DIRECTORS' REPORT

The Directors have pleasure in presenting their report together with the annual audited financial statements of the Group and of the Company for the financial period from 1 December 2017 to 31 December 2018.

PRINCIPAL ACTIVITIES

The Company is engaged principally in the underwriting of life insurance business, including investment-linked business.

The principal activities and the details of the subsidiaries are stated in Note 7 to the financial statements. There have been no significant changes in these activities during the financial period, except as disclosed in note 14 to the financial statements.

FINANCIAL RESULTS

	Group RM'000	Company RM'000
Profit after tax for the financial period	962,055	923,537

There were no material transfers to or from reserves or provisions during the financial period other than those disclosed in the financial statements.

In the opinion of the Directors, the results of the operations of the Group and of the Company during the financial period were not substantially affected by any item, transaction or event of a material and unusual nature other than as disclosed in the financial statements.

SIGNIFICANT EVENTS DURING THE FINANCIAL PERIOD

The Directors have on 23 February 2017 approved the separation of the general insurance and life insurance businesses of the Company pursuant to the requirements of the Financial Services Act, 2013 ("FSA"). The general insurance business has been approved to be transferred to AIA General Berhad ("AIAGB") a wholly-owned subsidiary of the Company. The effective date of transfer of the general insurance business was on 1 July 2018, with a total consideration of RM15,078,000 equivalent to the net asset value of the general insurance business.

On 29 June 2018, the Company has increased its investment in AIAGB by allotment of 90,000,000 new ordinary shares at a total purchase consideration of RM90,000,000 for the purpose of maintaining a capital adequacy level commensurate with AIAGB risk profiles after acquisition of the general insurance business of the Company. The Company's investment in AIAGB is increased from 100,000,000 ordinary shares to 190,000,000 ordinary shares.

On 12 October 2018, the Company's former immediate holding company, Premium Policy Berhad (In Members' Voluntary Liquidation) has transferred 525,732,174 ordinary shares to the Company's current immediate holding company, Orange Policy Sdn. Bhd. ("OPSB") following the entering of Distribution In Specie Agreement between the parties to have the surplus assets from Premium Policy Berhad to be distributed in specie to OPSB following completion of the members' voluntary liquidation process.

DIRECTORS' REPORT (CONTINUED)

CHANGE OF FINANCIAL YEAR END

The Directors have in their resolution dated 23 November 2017, approved the change of the financial year end from 30 November to 31 December. Therefore, the financial period covered in these financial statements is for a period of thirteen (13) months from 1 December 2017 to 31 December 2018. Thereafter, the financial year end of the Group and of the Company shall revert to twelve (12) months ending 31 December for each subsequent year.

SUBSEQUENT EVENTS

There were no material events subsequent to or from the reporting date that require disclosures or adjustments to the financial statements.

DIVIDENDS

The amount of dividends declared and paid by the Company since the end of the previous financial year was as follows:

	RM'000
In respect of the financial year ended 30 November 2017:	
Final single tier dividend of 97.7% (RM0.977 per ordinary share) on 767,438,174 ordinary shares, paid on 22 May 2018, 20 June 2018 and 20 July 2018	750,000
In respect of the financial period ended 31 December 2018:	
Interim single tier dividend of 27.4% (RM0.274 per ordinary share) on 767,438,174 ordinary shares, paid on 21 November 2018	210,000

The Directors have not recommended any final dividend to be paid for the current financial period under review.

SHARE CAPITAL

There was no issuance of new ordinary shares during the financial period.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

The brief profile of the Directors in office during the financial period and during the period from the end of the financial period to the date of the report are as follows: (continued)

3. Anusha a/p Thavarajah
Executive Director/Chief Executive Officer

Ms Anusha was appointed Chief Executive Officer ("CEO") of AIA Bhd. in June 2015. She joined AIA in 2002 as Vice President of Actuarial and later took on the role of Appointed Actuary & Head of Product Development in ING Insurance Berhad, where she went on to become Deputy CEO. Anusha returned to AIA in 2011 as Deputy General Manager of Operations, Finance & Actuarial. Prior to becoming CEO, Ms Anusha was appointed as the Regional Business Development Director of AIA Group Limited. She holds a First Class Honours in Mathematics & Statistics from the UK's University of Birmingham and is also a Fellow of the Institute of Actuaries, UK.

4. Dato' Wee Hoe Soon @ Gooi Hoe Soon (Resigned on 4 April 2018)
Independent Non-Executive Director

Dato' Gooi is a member of the Malaysian Institute of Certified Public Accountants and Malaysian Institute of Accountants. He has over 30 years of experience in accounting and corporate finance. Apart from being the Finance Director of several private and public listed companies, Dato' Gooi also assumed the Chairmanship in EON Bank Berhad (until May 2012) and Amity Bond Berhad, where he continues to helm the Board. He has also been instrumental in the successful implementation of several corporate exercises by public listed companies.

5. Dr. Chong Su-Lin
Independent Non-Executive Director

Dr. Chong is a graduate from the Royal Free Hospital School of Medicine, London. She began her career in the National Health Services, UK, following which she took an MBA at the London Business School. This was followed by two years with Cambridge Pharma Consultancy, specialising in the field of pharmaco-economics. She has also served as Chief Executive Officer of Sunway Medical Centre Berhad and Prince Court Medical Centre Sdn. Bhd.

(B) BOARD OF DIRECTORS (CONTINUED)

The brief profile of the Directors in office during the financial period and during the period from the end of the financial period to the date of the report are as follows: (continued)

6. Ching Neng Shyan (Appointed on 18 September 2018)
   Independent Non-Executive Director

   Mr. Ching is a Fellow of the Institute of Chartered Accountants in England and Wales as well as a Member of the Malaysian Institute of Accountants. He holds a Master of Business Administration from Universiti Sains Malaysia and was the Managing Director of Kennedy, Burkill & Company Berhad from 2008 until 2018. Mr. Ching had worked with Pannell Kerr Forster, Chartered Accountants in Liverpool, England and Ernst & Young in Malaysia.

7. Shulamite N K Khoo (Appointed on 24 April 2018)
   Non-Independent Non-Executive Director

   Ms Shu Khoo is a Chartered Fellow of the Chartered Institute of Personnel and Development since 2013 and previously a member of the International Advisory Panel of the Singapore Public Service Division from 2011 to 2017. She gained her Bachelor of Science degree from University of Toronto, Canada in 1983. She was previously the Group Chief Human Resource Officer of AIA Group Limited and a member of AIA Group's Executive Committee. Prior to joining AIA Group in 2011, Ms Shu Khoo was the Group Executive Vice President and Global Head of Human Resources of AXA Group SA. Between 1984 and 2004, she has served in different roles as Regional Head of Human Resource of Asia of Prudential Corporation Asia, as well as Head of Human Resource, Head of Insurance Operations and Head of Underwriting and Claims of Prudential Singapore.

In promoting independent oversight by the Board, the tenure limit for Independent Directors is nine (9) years from the date of the Director's initial appointment. The Board is also discouraged from having more than eight (8) Directors. However, a maximum of ten (10) Directors may be allowed provided the additional Directors are Independent Directors.

During the financial period, a total number of thirty-eight (38) Board and Board Committee Meetings were held, as set out below:

	Audit Committee	Risk Management Committee	Nominating Committee	Remuneration Committee	Board
Number of meetings	9	4	8	6	11

DIRECTORS' REPORT (CONTINUED)

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

The Directors' attendance to the Board and Board Committee Meetings during the financial period was as follows:

Name of Director	Audit Committee	Risk Management Committee	Nominating Committee	Remuneration Committee	Board Meetings
Ching Yew Chye @ Chng Yew Chye	9/9	4/4	8/8	6/6	11/11
Mohd Daruis bin Zainuddin	9/9	4/4	8/8	6/6	11/11

Dato' Wee Hoe Soon @ Gooi Hoe Soon (Resigned on 4 April 2018)	3/3	1/1	4/4	4/4	4/4

The Board is responsible for the overall governance of the Company and discharges this responsibility through compliance with the FSA and Corporate Governance Policy Document issued by BNM and other directives, in addition to adopting other best practices on corporate governance.

The Board has an overall responsibility to lead the Company, including setting the strategic future direction, review viability of the corporate objective and overseeing the conduct and performance of business.

As at the date of the report, the Board comprises four Independent Non-Executive Directors and one Executive Director to enable a balanced and objective consideration of issues, hence facilitating optimal decision-making.

The Board met eleven times during the financial period. All Directors in office at the end of the financial period complied with the 75% minimum attendance requirement at such meeting.

DIRECTORS' REPORT (CONTINUED)

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

The Members of the Board had attended briefings, conferences, seminars and trainings during the financial period, which include the following:

No.	Description
1.	Financial Institutions Directors' Education (FIDE) Core Programme: Module A
2.	FIDE Core Programme: Module B
3.	Propel and Accounting Standards Briefing
4.	5th BNM-FIDE FORUM Annual Dialogue
5.	FT Effective Non-Executive Director Programme
6.	BNM-FIDE FORUM Dialogue-Managing Cyber Risks in Financial Institutions
7.	FIDE: Blockchain in Financial Services Industry
8.	Differential Levy System Framework Briefing
9.	Board Performance Evaluation / Programme Assessment Session
10.	MIA International Accountants Conference 2018
11.	AIA Board of Directors' Programme in Bangkok
12.	Financial Services Professional Board Code of Ethics Briefing
13.	Asian Confederation of Institute of Internal Auditors (ACIIA)
14.	Disaster Recovering and Business Continuity Plan Briefing
15.	IBM Think Malaysia-FIDE
16.	AIA Cybersecurity Briefing/Visit
17.	Whistleblowing Refresher Briefing
18.	Financial Institutions Directors' Education (FIDE) Core Programme: Module A

The Members of the Board were also regularly updated on the issuance of new related FSA and regulations as well as the requirements to be observed both by the Company and Directors.

The Company provides an in-house orientation to newly appointed Directors and the Directors may request trainings on specific subjects in facilitating the Directors to discharge their duties effectively. On an annual basis, the Nominating Committee ("NC") will conduct annual review of trainings attended by the Directors during each financial period.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

To support sound corporate governance and processes, the Board formed various Board Committees namely the Nominating Committee, the Remuneration Committee, the Risk Management Committee and the Audit Committee ("the Committees") in accordance with the requirements of BNM's Corporate Governance Policy Document.

The roles and members of the Committees are as provided below.

Nominating Committee

As at the date of this report, the NC comprises six (6) members as follows:

Dr. Chong Su-Lin	Chairperson (Independent Non-Executive)
Ching Yew Chye @ Chng Yew Chye	Member (Independent Non-Executive)
Mohd Daruis bin Zainuddin	Member (Independent Non-Executive)
Anusha a/p Thavarajah	Member (Executive)
Shulamite N K Khoo	Member (Non-Independent Non-Executive)
Ching Neng Shyan	Member (Independent Non-Executive)

The objective of the NC is to establish a documented, formal and transparent procedure for the appointment of Directors, CEO and Key Senior Officers ("KSOs") and to assess the effectiveness of individual directors, the Board as a whole (including various committees of the Board), CEO and KSOs on an on-going basis.

The principal duties and responsibilities of the NC are:

(a) establishing the minimum requirements of the Directors and senior management at the time of appointment and on a continuing basis;

(b) establishing and regularly reviewing succession plans for senior management and the Board to promote the Board's renewal and address any vacancies;

(c) establishing a rigorous process for the appointment and removal of Directors, CEO and Senior Officers. The process must involve the assessment of candidates against the minimum requirements as set out in the Corporate Governance Policy Document to maintain the engagement between a candidate and the Committee and to ascertain the suitability of each candidate for the Board;

(d) assessing against the minimum requirements for each senior management and Director on an annual basis, and as and when the Board becomes aware of information that may materially compromise the individual/Director's fitness and propriety, or any circumstance that suggests that the Director is ineffective, errant or otherwise unsuited to carry out his responsibilities;

(e) recommending and assessing the appointment and reappointment of Directors and senior management as per the minimum requirements as set out in the Corporate Governance Policy Document before an application for approval is submitted to BNM;

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

Nominating Committee (continued)

The principal duties and responsibilities of the NC are: (continued)

(f) assessing the Board and the Board Committees in terms of the appropriate size that promotes effective deliberation and encourages the active participation of all Directors and allows the work of the various Board Committees to be discharged without giving rise to an over-extension of Directors that are required to serve on multiple Board Committees; and

(g) assessing the performance and effectiveness of the Board, the Board Committees and individual Directors. This is important to enable the Board to identify areas for professional development and process improvements, having regard to the changing needs of the Company.

Remuneration Committee

As at the date of this report, the Remuneration Committee ("RC") comprises five (5) members as follows:

Dr. Chong Su-Lin	Chairperson (Independent Non-Executive)
Ching Yew Chye @ Chng Yew Chye	Member (Independent Non-Executive)
Mohd Daruis bin Zainuddin	Member (Independent Non-Executive)
Shulamite N K Khoo	Member (Non-Independent Non-Executive)
Ching Neng Shyan	Member (Independent Non-Executive)

The objective of the RC is to provide a formal and transparent procedure for developing a remuneration policy for Directors, CEO and KSOs and ensuring that their compensation is competitive and consistent with the Company's culture, objectives and strategy.

The principal duties and responsibilities of the RC are to review and assess:

(a) the remuneration policy of the Company which must be approved by the Board and subject to periodic Board's review, including when material changes are made to the policy;

(b) the remuneration for each Director, members of senior management and other material risk taker must be approved by the Board annually. The Company must maintain and regularly review a list of officers who fall within the definition of "other material risk takers";

(c) the overall remuneration system for the Company which must:

    (i) be subject to the Board's active oversight to ensure that the system operates as intended;
    (ii) be in line with the business and risk strategies, corporate values and long-term interests of the Company;
    (iii) promote prudent risk-taking behaviour and encourage individuals to act in the interests of the Company as a whole, taking into account the interests of its customers; and
    (iv) be designed and implemented with input from the control functions and the Board's Risk Management Committee to ensure that risk exposures and risk outcomes are adequately considered.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

Remuneration Committee (continued)

The principal duties and responsibilities of the RC are to review and assess: (continued)

(d) the remuneration for individuals which must be aligned with prudent risk-taking. Hence, remuneration outcomes must be symmetric with risk outcomes. This includes ensuring that:

(i) remuneration is adjusted to account for all types of risk, and must be determined by both quantitative measures and qualitative judgment;
(ii) the size of the bonus pool is linked to the overall performance of the Company;
(iii) incentive payments are linked to the contribution of the individual and business unit to the overall performance of the Company;
(iv) bonuses are not guaranteed, except in the context of sign-on bonuses; and
(v) for members of senior management and other material risk takers:
- a portion of remuneration consists of variable remuneration to be paid on the basis of individual, business-unit and institution-wide measures that adequately assess performance; and
- the variable portion of remuneration increases along with the individual's level of accountability.

(e) the remuneration payout schedules which must reflect the time horizon of risks and take account of the potential for financial risks to crystallise over a longer period of time. As such, the Company must adopt a multi-year framework to measure the performance of members of senior management and other material risk takers. Such a framework must provide for:

(i) the deferment of payment of a portion of variable remuneration to the extent that risks are realised over long periods, with these deferred portions increasing along with the individual's level of accountability;
(ii) the calibration of an appropriate mix of cash, shares, share-linked instruments, and other forms of remuneration to reflect risk alignment; and
(iii) adjustments to the vested and unvested portions of variable remuneration (through malus, clawbacks and other reversals or downward revaluations of awards) in the event of bad performance of the business unit or institution attributable to the individual or if he commits serious legal, regulatory or internal policy breaches.

(f) the incentive structure to ensure that:

(i) variables used to measure risk and performance outcomes of an individual relate closely to the level of accountability of that individual;
(ii) the determination of performance measures and variable remuneration considers that certain indicators (such as share prices) may be influenced in the short term by factors like market sentiment or general economic conditions which are not specifically related to the Company's performance or an individual's actions, and the use of such indicators does not create incentives for individuals to take on excessive risk in the short term; and
(iii) members of senior management and other material risk takers commit not to undertake activities (such as personal hedging strategies and liability-related insurance) that will undermine the risk alignment effects embedded in their remuneration.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

Risk Management Committee

As at the date of this report, the Risk Management Committee ("RMC") comprises four (4) members as follows:

Mohd Daruis bin Zainuddin	Chairman (Independent Non-Executive)
Ching Yew Chye @ Chng Yew Chye	Member (Independent Non-Executive)
Dr. Chong Su-Lin	Member (Independent Non-Executive)
Ching Neng Shyan	Member (Independent Non-Executive)

The objective of the RMC is to oversee the senior management's activities in managing the key risk areas of the Company and to ensure that an appropriate risk management process is in place and functioning effectively.

The principal duties and responsibilities of the RMC are:

(a) ensuring that the Company's corporate objectives are supported by a sound risk strategy and an effective risk management framework that is appropriate to the nature, scale and complexity of its activities;

(b) providing effective oversight of senior management's actions to ensure consistency with the risk strategy and policies approved by the Board, including the risk appetite framework;

(c) ensuring senior management oversight in the day-to-day management of the financial institution's activities is consistent with the risk strategy, including the risk appetite and policies approved by the Board;

(d) ensuring that the risk management framework enables the identification, measurement and continuous monitoring of all relevant and material risks on a group and firm-wide basis, supported by robust management information systems that facilitate the timely and reliable reporting of risks and the integration of information across the institution. The sophistication of the Company's risk management framework must keep pace with any changes in the institution's risk profile (including its business growth and complexity) and the external risk environment;

(e) ensuring that the risk management is well-integrated throughout the organisation and embedded into the culture and business operations of the institution;

(f) establishing an independent senior risk executive role (chief risk officer or its equivalent) with distinct responsibility for the risk management function and the institution's risk management framework across the entire organisation. The executive must have sufficient stature, authority and seniority within the organisation to meaningfully participate in and be able to influence decisions that affect the Company's exposures to risk;

(g) establishing and maintaining an effective risk management function with sufficient authority, stature, independence, resources and access to the Board;

(h) effectively implementing the risk management framework that is reinforced with an effective compliance function and subjected to an independent internal audit review;

Risk Management Committee (continued)

The principal duties and responsibilities of the RMC are: (continued)

(i) ensuring that the Company has appropriate mechanisms in place for communicating risks across the organisation and for reporting risk developments to the Board and senior management;

(j) ensuring that the executive remuneration is aligned with prudent risk-taking and appropriately adjusted for risks. The Board must actively oversee the institution's remuneration structure and its implementation, and must monitor and review the remuneration structure to ensure that it operates as intended;

(k) ensuring that the Board and senior management are aware of and understand the Company's operational and organisational structure and the risks it poses and be satisfied that it is not overly complex or opaque such that it hampers effective risk management by the Company;

(l) ensuring that the Board and senior management understand the purpose, structure and unique risks of operations when the Company operates through special-purpose structures. Appropriate measures must be undertaken to mitigate the risks identified; and

(m) exercising oversight over its subsidiaries with appropriate established processes to monitor the subsidiaries' compliance to the Group's risk management policies.

Audit Committee

As at the date of this report, the Audit Committee ("AC") comprises four (4) members as follows:

Mohd Daruis bin Zainuddin	Chairman (Independent Non-Executive)
Ching Yew Chye @ Chng Yew Chye	Member (Indpendent Non-Executive)
Shulamite N K Khoo	Member (Non-Independent Non-Executive)
Ching Neng Shyan	Member (Independent Non-Executive)

The primary objective of the AC is to ensure the integrity and transparency of the financial reporting process.

The principal duties and responsibilities of the AC are:

(a) ensuring that the internal audit department is distinct and has the appropriate status within the overall organisational structure for the internal auditors to effectively accomplish their audit objectives;

(b) reviewing and concurring the annual audit plan, audit charter and annual budget of the internal audit department and the appointment of the external auditors;

(c) ensuring that internal audit staff have free and unrestricted access to the Company's records, assets, personnel or processes relevant to and within the scope of the audits;

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(A) BOARD OF DIRECTORS (CONTINUED)

<u>Audit Committee</u> (continued)

The principal duties and responsibilities of the AC are: (continued)

(d) reviewing and concurring with the appointment, removal and remuneration of the external auditors recommended by Group Audit Committee;

(e) reviewing various relationships between the external auditors and the Company or any other entity that may impair or appear to impair the external auditors' judgement or independence in respect of the Company;

(f) investigating reasons for any request made by management to dismiss the external auditor, or any resignation by the external auditor and disclosing the full Board and the Group Audit Committee the results of the investigation together with the Audit Committee's recommendations on proposed actions to be taken;

(g) maintaining regular, timely, open and honest communication with the external auditors, and require the external auditors to report to the AC on significant matters;

(h) reviewing with the external auditors that appropriate audit plans are in place and the scope of the audit plans reflect the terms of the engagement letter;

(i) reviewing with the external auditors on the financial statements (before the audited financial statements are presented to the Board) and discussing the findings and issues arising from their work done, including but not limited to, any opinions or qualifications, significant/material changes and fluctuations reported therein;

(j) audit reports, including obligation reports to BNM and discuss the findings and issues arising from the external audit;

(k) ensuring that management's remediation efforts with respect to all findings and recommendations are resolved effectively and in a timely manner;

(l) approving the provision of non-audit services by the external auditors and ensuring that the level of provision of non-audit services is compatible with maintaining auditor independence;

(m) reviewing the Chairman's statement, interim financial reports, preliminary announcements and corporate governance disclosures in the Directors' Report (where applicable);

(n) reviewing any related party transactions and conflicts of interest situations that may arise including any transaction, procedure or conduct that raises questions of management integrity;

(o) ensuring that the Company's accounts are prepared and published in a timely and accurate manner for regulatory, management and general reporting purposes;

(A) BOARD OF DIRECTORS (CONTINUED)

Audit Committee (continued)

The principal duties and responsibilities of the AC are: (continued)

(p) monitoring compliance with the Board's conflict of interest policy which would include monitoring the items set out below:

- (i) identifying circumstances which constitute or may give rise to conflicts of interests;
- (ii) clearly defining the process for Directors to keep the Board informed on any change of circumstances that may give rise to a conflict of interest;
- (iii) identifying those responsible for maintaining updated records on each Director's conflicts of interest; and
- (iv) articulating how any non-compliance with the policy will be addressed.

(q) reviewing third-party opinions on the design and effectiveness of the Company's internal control framework.

The AC has the authority to investigate any matter within its terms of reference and has unlimited access to all information and documents relevant to its activities, to the internal and external auditors, and to employees and agents of the Company.

During the financial period, the AC members have met twice with the external auditors without the presence of the management.

(B) MANAGEMENT ACCOUNTABILITY

The Company has an organisational structure that clearly establishes the job descriptions, authority limits and other operating boundaries of each management and executive employees and formal performance appraisal is done annually. Information is effectively communicated to the relevant employees within the Company. The Company has a formal and transparent procedure for developing policy on executive remuneration. None of the Directors and senior management of the Company has, in any circumstances, conflict of interest referred to in Sections 54 and 55 of the FSA.

The management meets all prescriptive requirements under this section, and has already adopted best practices in the areas of organisational structure and allocation of responsibilities, conflicts of interest, goal setting and the area of communication.

(C) CORPORATE INDEPENDENCE

All material related party transactions are conducted on agreed terms as specified under BNM's Guidelines on Related-Party Transactions and BNM's Corporate Governance Policy Document. Related parties' transactions and balances have been disclosed in the financial statements in compliance with Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS").

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(D) INTERNAL CONTROL FRAMEWORK

The Board has overall responsibility for ensuring that the Group maintains an adequate system of internal control and risk management and for reviewing its effectiveness. Enterprise Risk Management, Compliance and Internal Audit functions, among others, provide assessment, reporting and assurance on the effectiveness of the Group's policies and operations as well as its compliance with legal and regulatory obligations.

Such processes are designed to manage rather than eliminate the risk of failure to achieve business objectives, and can only provide reasonable and not absolute assurance against material misstatement or loss.

The criteria applied by the Directors in judging the effectiveness of these controls are that they allow the maximisation of shareholders' value by exploiting business opportunities whilst ensuring that risks are properly identified and managed. The controls are regularly reviewed to ensure that they enable the proper management of business risks without so restricting efficiency and entrepreneurial nature that they inhibit proper running of the business.

The Group has a management structure with clear lines of responsibility and accountability, staffed by appropriate personnel. The Board is responsible for setting the overall strategy and reviewing the performance of the Group.

The day to day running of the Group's operations is managed by the Group's Executive Committee, chaired by the CEO. This team is also responsible for the recommendation to the Board of the Group's strategy and its subsequent implementation, for ensuring that appropriate internal controls are in place to manage and assess risk and that they are fully complied with.

The fundamental elements of the Group's internal control and risk management framework are described below:

1. Structure and reporting

   A clear organisational structure exists, detailing lines of authority and control responsibilities. The professionalism and competence of staff is maintained both through rigorous recruitment policies and a performance appraisal system which establishes targets, reinforces accountability and awareness of controls, and identifies appropriate training requirements. Action plans are prepared and implemented to ensure that staff develop and maintain the required skills to fulfil their responsibilities, and that the Group can meet its future management requirements.

2. Approval procedures

   The Group has delegated authority structures to ensure that decisions are taken at an appropriate level, with an appropriate level of input by internal and external expert advisers. The delegated authority structure prescribes financial limits of approval at each level and requires decisions with significant financial, legal or reputational impact for the Group to be approved by the Board.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(D) INTERNAL CONTROL FRAMEWORK (CONTINUED)

The fundamental elements of the Group's internal control and risk management framework are described below: (continued)

3. Operating philosophy

The Group has identified and adopted the following Operating Philosophy as being about "Doing the Right Thing, in the Right Way, with the Right People…..and the results will come". Underlying this Operating Philosophy are 12 Operating Principles that help guide and shape our employees' actions and behaviours, informing how we interact with one another and how we behave externally with our customers, shareholders and other stakeholders, including the community at large.

4. Corporate policies, values and compliance

There are various policies and procedures in place as internal control to govern the operations of the Group. The following policies have been adopted by the Group:

(a) AIA Code of Conduct: AIA Code of Conduct lays the foundation for good business decisions and guides staff and agents in conducting business honourably, ethically and with utmost professionalism. The Code specifies the standards of behaviour to which every AIA employee and stakeholder is expected to adhere. The Code guides us on compliance, ethics and risk issues and allows us to contribute positively to the societies where we operate.

(b) Whistleblower Protection Policy: Whistleblower Protection Policy aims to establish corporate values and culture that support ethical behavior and to assure confidentiality and non-retaliation to whistleblowers. Every employee has the obligation to report unethical behaviour or suspected violations of law or Group policy connected with AIA Group's business activities.

(c) Anti-Fraud Policy: The Group is committed to conducting all of its business with the highest level of ethics and integrity. To uphold this commitment and in particular, a zero-tolerance approach to fraud, the Group requires adherence to this Anti-Fraud Policy. The policy is intended to reinforce management procedures designed to aid in the prevention, detection and investigation of fraud, thereby safeguarding the Group's assets and providing protection from the legal and reputational consequences of fraudulent activities.

(d) Anti-Corruption Policy: The Group is committed to conducting all of its business in an honest and ethical manner. Bribery or any improper payment to gain an advantage in any situation is never acceptable and may have serious legal, reputation and regulatory implications for the Group. The Anti-Corruption Policy also makes good business sense.

DIRECTORS' REPORT (CONTINUED)

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(D) INTERNAL CONTROL FRAMEWORK (CONTINUED)

The fundamental elements of the Group's internal control and risk management framework are described below: (continued)

4. Corporate policies, values and compliance (continued)

   These controls that are embedded in the Group as a result of the adoption of the policies are designed to manage rather than eliminate the risk of failure to achieve business objectives due to circumstances which may reasonably be foreseen and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Company recognises the importance of sound risk management in every aspect of our business and for all our stakeholders. For the Company's policyholders, it provides the security of knowing that the Company will always be there for them; for the Company's investors, it is key to protecting and enhancing the long-term value of their investment. Also for the regulators, the Company is supportive of industry growth and the public's trust in the industry.

While effective risk management is vital to any organisation, it goes to the core of a life insurance business where it is a main driver of value. The Company's Risk Management Framework ("RMF") does not seek to eliminate all risks but rather to identify, understand and manage them within acceptable limits in order to support the creation of long-term value.

The Company's RMF is built around developing an appropriate and mindful risk culture at every level of the organisation in support of the Company's strategic objectives. The RMF provides the Company with appropriate tools, processes and capabilities for the identification, assessment and where requires, upward referral of identified material risks for further evaluation.

The RMF consists of the following components:

i. Risk Culture

   The RMF recognises the importance of risk culture in the effective management of risks. Risk culture defines the Company's attitude to risks and ensures its remuneration structure promotes the right behaviour. The Board and senior management is committed to fostering a corporate culture which promotes proactive risk management.

   Accountability

   A key component of the risk culture is accountability. The respective business functions in the Company are owners of the risks arising from within their areas and is responsible for managing risks. The Chief Risk Officer ("CRO") has overall accountability for the Enterprise Risk Management function with primary reporting line to AIA Group's CRO and a secondary reporting line to the CEO. This structure ensures independence of the Enterprise Risk Management and Compliance functions and allows the CRO full access to business discussions so as to provide risk management perspectives and insights. The CRO is also a non-voting member of the Executive Committee.

(D) INTERNAL CONTROL FRAMEWORK (CONTINUED)

The RMF consists of the following components: (continued)

i. Risk Culture (continued)

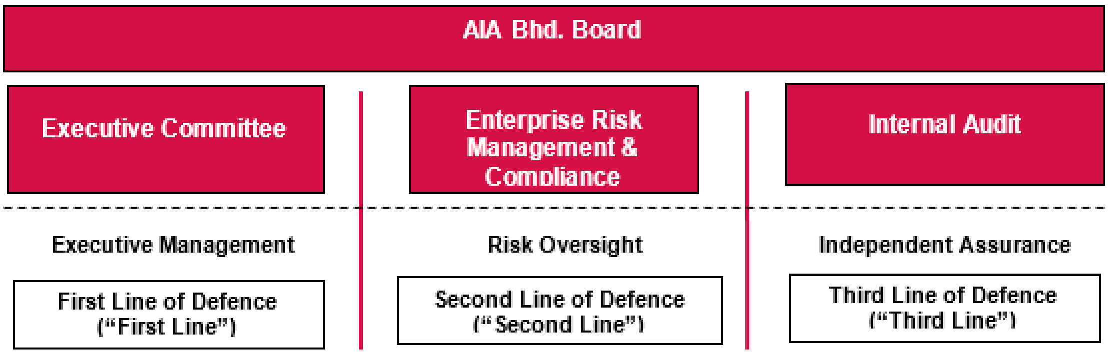
Remuneration

The Company's executive remuneration structure ensures appropriate consideration of the RMF within a strong performance-oriented culture. This is supported by a performance management system where all staff are measured on 'how' as well as 'what' they deliver. This structure places significant emphasis on conduct as well as achievement, and is consistent with the Company's fundamental Operating Philosophy of "Doing the Right Thing, in the Right Way, with the Right People…. And the results will come'.

ii. Risk Management Process

In order to encourage good management and to embed a culture of iterative process of continuous improvement, all business functions must incorporate the four key risk management process in their activities to identify, quantify, manage and monitor the risk exposures. This ensures that risk reviews undertaken by the Company are appropriate and contributing to optimise business decisions.

iii. Risk Governance



The Company's Risk Governance framework is built on the "Three Lines of Defence" model. With regard to risk management, the objective is to ensure that an appropriate framework is in place, including an independent system of checks and balances, to provide assurance that risks are identified, assessed, managed and governed properly. The framework clearly defines roles and responsibilities for the management of risk between the Executive Management ("First Line"), Enterprise Risk Management & Compliance ("Second Line") and Internal Audit ("Third Line") functions. While each line of defence is independent from the others, they work closely to ensure effective oversight.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(D) INTERNAL CONTROL FRAMEWORK (CONTINUED)

The RMF consists of the following components: (continued)

iii. Risk Governance (continued)

The First Line is made up of the business decision-takers who are responsible for ensuring that effective and appropriate processes, limits and controls are in place at all times to effectively identify, assess and manage risk in a manner consistent with the RMF. In particular, the amount of risk taken at each level of the organisation must be consistent with the risk appetite and in accordance with approved risk policies and procedures.

The Second Line consists of the Enterprise Risk Management & Compliance function. This function is independent of the First Line and is responsible for overseeing First Line activities and ensuring that the Company adheres to its own high standards. The Second Line works consultatively with the First Line to support the business in achieving its objectives whilst operating within the risk appetite limits.

The Third Line is the Group Internal Audit ("GIA") function, which reports to the Audit Committee of the Board. GIA is responsible for providing independent assurance over the effectiveness of key internal controls and makes recommendations based on the audit findings.

The Three Lines of Defence converge at the Board, which retains overall responsibility for the Company's RMF.

iv. Risk Appetite Framework

The Company's Risk Appetite Framework is the foundation of its risk management practices. It establishes the risk boundaries within which the business will operate and sets stakeholder expectations in regard to the risk being run in the Company.

v. Risk Landscape

The Company maintains a detailed risk taxonomy to ensure all risks are identified and systematically managed. Under the Company's RMF, the Company adopts a common language in the description of risks to proactively manage a wide spectrum of financial and non-financial risks.

(E) REMUNERATION POLICY

i. Objectives

The Group's executive remuneration policy is based on the principle of providing an equitable, motivating and competitive remuneration package to foster a strong performance-oriented culture within an appropriate risk management framework.

The policy aims to ensure that rewards and incentives relate directly to the performance of individuals, the operations and functions in which they work or for which they are responsible, and the overall performance of the Group. The compensation and benefits arrangements designed under the policy provides incentives that are consistent with the interests of the Group's stakeholders and do not encourage executives to take excessive risks that may threaten the value of the Group and impair the reputation of the brand.

ii. Main Components of Remuneration

The table below summarises the Group's remuneration polices regarding the elements of the remuneration structure as it applies to the CEO and Senior Management Team during the financial period.

Element	Purpose	Basis of determination	Notes on practices
Basic	Fixed cash element of remuneration to recruit and retain talent.	Basic salary is determined with reference to the specific roles and responsibilities of the position, internal relativities, market practice, individual experience, performance and other factors to attract and retain employees with required capabilities to achieve the Group's business objectives.	The Remuneration Committee reviews salaries annually for the CEO and Senior Management Team against relevant industry survey sources. Salary increases, where applicable, typically take effect from 1 March.
Short-term incentive	Short-term incentives are delivered in the form of a performance-based cash award to recognize and reward achievement of the Group's objectives and individual contribution.	Short-term incentive target and maximum opportunities are determined with reference to the market appropriateness of total compensation and the roles and responsibilities of the individual.	Annual short-term incentive is based on the achievement of financial performance measures and relevant strategic objectives, as well as individual contribution.

DIRECTORS' REPORT (CONTINUED)

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(E) REMUNERATION POLICY (CONTINUED)

ii. Main Components of Remuneration (continued)

The table below summarises the Group's remuneration polices regarding the elements of the remuneration structure as it applies to the CEO and Senior Management Team during the financial period. (continued)

Element	Purpose	Basis of determination	Notes on practices
Long-term incentive	Long-term incentive plan focuses key contributors on the long-term success of the Group and is used to align the interest of executives with those of shareholders using a combination of share-based awards and share mix options to deliver a balanced mix of ownership and incentives.	Long-term incentive target and maximum opportunities are determined with reference to the total competitiveness of the total compensation package and the roles and responsibilities of the individual.	Awards are discretionary and determined on an annual basis Awards are made in restricted share units and/or share options, and generally vest after a three-year period, with the restricted share units subject to pre-defined performance objectives.
Benefits	Benefits form part of the long-term employment relationship and contribute to the value of total remuneration provided at market competitive levels.	The benefits program is determined such that it is market competitive. It remains fully compliant with local regulations.	The CEO and Senior Management Team receive certain benefits, for example, medical and life insurance, use of company car and/or driver.
Employee share purchase plan ("ESPP")	Share purchase plan with matching offer to facilitate and encourage AIA share ownership by employees, and provide a long-term retention mechanism.	The ESPP is open to all employees who have completed probation and subject to a maximum contribution indicated as a percentage of basic salary or the plan maximum limit.	Participants receive matching shares for shares purchased at a rate approved by the Remuneration Committee. Matching shares vest after three (3) years.

DIRECTORS' REPORT (CONTINUED)

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(E) REMUNERATION POLICY (CONTINUED)

ii. Main Components of Remuneration (continued)

Short-Term Incentive Plan

The short-term incentive targets were determined and communicated to the CEO and Senior Management Team at the beginning of the financial period. The performance measures for short-term incentives were:

- Value of new business ("VONB")
- Operating profit after tax ("OPAT"); and
- Excess embedded value growth ("EEVG").

VONB is an estimate of the economic value of one (1) year's sales as published by the Group; OPAT is the IFRS operating profit after tax based on the IFRS results published by the Group; and EEVG is the sum of the operating experience variances (current year performance against the operating assumptions for calculating embedded value ("EV") in the EV operating profit.).

The weighting of the three (3) performance measures described above is fifty per cent (50%), ten per cent (10%) and twenty-five per cent (25%) for VONB, EEVG and OPAT respectively. The remaining weighting is fifteen per cent (15%) for Active New Agent (7.5%) and Expense Ratio (7.5%). Based on the level of achievement of the performance measures, short-term incentive awards in respect of the financial period ended 31 December 2018 will be paid to the CEO and Senior Management Team in March 2019.

The total value of the short-term incentive awards accrued for the CEO and Senior Management Team for the financial period ended 31 December 2018 is RM6,347,520.

Long-Term Incentive Plan

The Restricted Share Unit Scheme and the Share Option Scheme were adopted on 28 September 2010 and are effective for a period of ten (10) years from the date of adoption.

These schemes are designed to motivate and reward participants who have not only made an important contribution to the Group's success but are expected to play a significant role in the future.

Awards made under these schemes are discretionary and are determined on an annual basis with reference to the magnitude of overall variable remuneration, the competitiveness of the total remuneration package, the roles, responsibilities, performance and potential of the individual.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(E) REMUNERATION POLICY (CONTINUED)

ii. Main Components of Remuneration (continued)

Long-Term Incentive Plan (continued)

The schemes operate through the award of restricted share units and share options to deliver a balanced mix of incentives and ownership. The rewards are subject to eligibility criteria and generally vest after a three-year period.

As applicable to other remuneration payments, long-term incentive vesting is subject to the AIA Group's Remuneration Committee's approval and is in compliance with all relevant AIA Group's policies.

The schemes are reviewed regularly to ensure that the design, process, structure and governance work together to balance risk and incentives.

a. Restricted Share Unit Scheme

Under the Restricted Share Unit Scheme, the Group may award restricted share units to selected employees, CEO, Directors (excluding Independent Non-executive Directors) or officers of the Group or any of its subsidiaries. The objectives of the Restricted Share Unit Scheme is to retain participants, align their interests with those of the Group's investors and reward the creation of sustainable value for shareholders through the award of restricted share units to participants.

Performance Measures and Vesting

Vesting of performance-based restricted share unit awards will be contingent on the extent of achievement of three-year performance targets as outlined below for the following AIA Group metrics:

(i) Value of new business;
(ii) Equity attributable to shareholders on the embedded value basis; and
(iii) Total shareholder return.

VONB is an estimate of the economic value of one (1) year's sales as published by the AIA Group.

Equity attributable to shareholders of AIA Group on the embedded value basis ("EV Equity") is the total of embedded value, goodwill and other intangible assets. Embedded value is an estimate of the economic value of in-force life insurance business, including the net worth on the AIA Group's balance sheet but excluding any economic value attributable to future new business.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(E) REMUNERATION POLICY (CONTINUED)

ii. Main Components of Remuneration (continued)

Long-Term Incentive Plan (continued)

a. Restricted Share Unit Scheme (continued)

Performance Measures and Vesting (continued)

The VONB and EV Equity performance considered in determining incentive awards are based on AIA Group's VONB and AIA Group's EV Equity results published by AIA Group.

Total shareholder return ("TSR") is the compound annual return from the ownership of a share over a period of time, measured by calculating the change in the share price and the gross value of dividends received (and reinvested) during that period. AIA Group's TSR will be calculated in the same way and compared with the TSR of the peer companies in the Dow Jones Insurance Titans 30 Index ("DJTINN") over the performance period.

The three (3) performance measures are equally weighted. Achievement of each performance measure will independently determine the vesting of one-third of the award. Threshold performance levels are required for restricted share units to vest; at target performance levels (for TSR, median relative performance measured against the TSR of the peer companies in the DJTINN) fifty per cent (50%) of the restricted share units will vest; and at maximum performance levels (for TSR, seventy fifth (75^{th}) percentile or above relative performance measured against the TSR of the peer companies in the DJTINN) the full allocation of restricted share units will vest.

b. Share Option Scheme

The objective of the Share Option Scheme is to align the interests of the Scheme participants with those of the AIA Group's shareholders. Under the Share Option Scheme, AIA Group may award share options to Directors (excluding Independent Non-Executive Directors) or selected officers of the Group or any of its subsidiaries. No amount is payable by the eligible participants on the acceptance of a share option.

(E) REMUNERATION POLICY(CONTINUED)

ii. Main Components of Remuneration (continued)

Long-Term Incentive Plan (continued)

b. Share Option Scheme (continued)

During the financial year end, share options were awarded by AIA Group under the Share Option Scheme to Directors or selected officers of the Company. The exercise price of such share options was determined by applying the highest of:

(i) The closing price of the shares on the date of grant;
(ii) The average closing price of the shares for the five (5) business days immediately preceding the date of grant; or
(iii) The nominal value of a share.

The total number of share options that can be awarded under the AIA Group scheme is 301,100,000 representing approximately two-point-five per cent (2.5%) of the number of shares in issue as at the date of this report. Unless shareholders' approval is obtained in accordance with the relevant procedural requirements under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("Listing Rules"), the maximum number of shares that may be awarded to any employee in any twelve (12) month period up to and including a proposed date of grant is point-two-five per cent (0.25%) of the number of shares in issue as of the proposed date of grant. No share options have been awarded to substantial shareholders, or in excess of the individual limit.

Performance Measures and Vesting

Share options awarded under the Share Option Scheme have a life of ten (10) years before expiry. Generally, share options become exercisable three (3) years after the date of grant and remain exercisable for another seven (7) years, subject to participants continued employment in good standing or retirement. There are no performance conditions attached to the vesting of share options. Each share option entitles the eligible participant to subscribe for one (1) ordinary share. Benefits are realized only to the extent that share price exceeds the exercise price.

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(E) REMUNERATION POLICY (CONTINUED)

ii. Main Components of Remuneration (continued)

Long-Term Incentive Plan (continued)

c. Employee Share Purchase Plan

AIA Group adopted the Employee Share Purchase Plan ("ESPP") on 25 July 2011 (ESPP adoption date). Under the ESPP, eligible employees of the Group may elect to purchase the AIA Group's shares and receive one (1) matching share for each two (2) shares purchased after having been in the plan for a period of three (3) years through the award of matching restricted stock purchase units ("RSPUs"). Each eligible employee's participation level is currently capped at a maximum purchase in any plan year of five (5) per cent of his or her base salary or Malaysian Ringgit Four Thousand Five Hundred Ninety-Nine (MYR4,599) equivalent of Hong Kong Dollars Nine Thousand Seven Hundred Fifty (HK$9,750), whichever is lower. Upon vesting of the matching RSPUs, those employees who are still in employment with the Group will receive one (1) matching share for each RSPU which he or she holds. The matching shares can either be purchased on market by the trustee of the ESPP or through the issuance of new shares by AIA Group. The aggregate number of shares which can be issued by AIA Group under the ESPP for the ten-year period shall not exceed two-point-five per cent (2.5%) of the number of shares in issue on the ESPP adoption date.

iii. Remuneration Procedure

The levels of remuneration should be sufficient to attract, retain and motivate all levels of the management and staff of the quality required to run the Group effectively. In this respect, the Group has an independent, objective and robust review process for assessing the remuneration package for the financial period known as the Total Compensation Review ("TCR") process. The TCR process ensures linking remuneration to corporate and individual performance coupled with appropriate consideration of AIA's Group policy during the annual appraisal.

The Board and its respective Committees provide the necessary oversight in the formulation and implementation of the remuneration practices.

- Nominating Committee reviews the performance of the CEO and Senior Management Team, KSO and Key Responsible Persons ("KRP") to ensure alignment with strategies, goals and culture.
- Remuneration Committee reviews policy and practices before recommending remuneration package for the Board's approval.

DIRECTORS' REPORT (CONTINUED)

STATEMENT ON CORPORATE GOVERNANCE (CONTINUED)

(E) REMUNERATION POLICY (CONTINUED)

iii. Remuneration Procedure (continued)

The Board and its respective Committees provide the necessary oversight in the formulation and implementation of the remuneration practices. (continued)

- Audit Committee and Risk Committee reviews the relevant KRPs' performance before approval by the Board.
- At the management level, the Management Risk Committee reviews the Risk dashboard reports escalated by the Operational Risk Management Committee for all departments.

With effect from 1 June 2018, Officers in control functions with discretionary Short Term Incentive awards will be based on a combination of AIA Group's business performance and the Group's business performance; thereby ensuring the impartiality of the actions of the Officers in control functions.

iv. Quantification of Remuneration

The Directors' remuneration for the financial period is required to be tabled to the Remuneration Committee, Board and Members of the Company for approval. Set out below is the breakdown of the total amount of remuneration for the following Directors during the financial period:

Name of Director	Fixed Remuneration (RM)	Variable Remuneration (RM)	Total Remuneration (RM)
Ching Yew Chye @ Chng Yew Chye	287,083	76,500	363,583
Mohd Daruis bin Zainuddin	232,917	75,000	307,917
Dr. Chong Su-Lin	165,457	61,500	226,957
Shulamite N K Khoo (Appointed on 24 April 2018)	99,486	33,000	132,486
Ching Neng Shyan (Appointed on 18 September 2018)	49,583	13,500	63,083
TOTAL	834,526	259,500	1,094,026

The Directors and Officers' liability insurance policy with a total premium of RM65,000 is taken and borne by the Company covering all Directors and Officers of the Company and its subsidiaries and related companies incorporated in Malaysia, collectively.

(E) REMUNERATION POLICY (CONTINUED)

iv. Quantification of Remuneration (continued)

The following breakdown provides the remuneration awarded to the CEO and Senior Management Team during the financial period:

Total value of remuneration awards	Unrestricted (RM)	Deferred (RM)
Fixed remuneration		
• Cash-based	15,196,627	-
• Other	3,300,332	-
Variable remuneration		
• Cash-based	6,347,520	-
• Shares and share-linked instruments	-	8,588,536

(F) PUBLIC ACCOUNTABILITY

As a custodian of public funds, the Group's dealings with the public are always conducted fairly, honestly and professionally. The Group meets all prescriptive and best practice requirements under this section relating to unfair practices.

OTHER STATUTORY INFORMATION

(a) Before the financial statements of the Group and of the Company were prepared, the Directors took reasonable steps to ascertain that:

(i) proper action had been taken in relation to the writing off of bad debts and the making of allowance for doubtful debts and satisfied themselves that all known bad debts had been written off and that adequate impairment losses had been made for doubtful debts; and

(ii) any current assets which were unlikely to be realised in the ordinary course of business including the values of current assets as shown in the accounting records of the Group and of the Company have been written down to an amount which the current assets might be expected to realise.

DIRECTORS' REPORT (CONTINUED)

OTHER STATUTORY INFORMATION (CONTINUED)

(b) At the date of this report, the Directors of the Group and of the Company are not aware of any circumstances:

(i) which would render the amounts written off for bad debts or the amount of impairment losses in the Group and in the Company inadequate to any substantial extent; or

(ii) which would render the values attributed to current assets in the financial statements of the Group and of the Company misleading; or

(iii) which have arisen which would render adherence to the existing method of valuation of assets or liabilities of the Group and of the Company misleading or inappropriate; or

(iv) not otherwise dealt with in this report or the financial statements of the Group and of the Company that would render any amount stated in the financial statements misleading.

(c) As at the date of this report, there does not exist:

(i) any charge on the assets of the Group and of the Company which has arisen since the end of the financial period which secures the liabilities of any other person; or

(ii) any contingent liability of the Group and of the Company which has arisen since the end of the financial period.

(d) In the opinion of the Directors:

(i) no contingent or other liability has become enforceable or is likely to become enforceable within the period of twelve months after the end of the financial period which, in the opinion of the Directors, will or may substantially affect the ability of the Group and of the Company to meet their obligations as and when they fall due; and

(ii) no item, transaction or event of a material and unusual nature has arisen in the interval between the end of the financial period and the date of this report which is likely to affect substantially the results of the operations of the Group and of the Company for the financial period in which this report is made; and

(iii) the results of the operations of the Group and of the Company during the financial period were not substantially affected by any item, transaction or event of a material and unusual nature.

For the purpose of paragraphs (c) and (d), contingent and other liabilities do not include liabilities arising from insurance contracts underwritten in the ordinary course of business of the Company.

(e) Before the income statements and statements of financial position of the Group and of the Company were made out, the Directors took reasonable steps to ascertain that there were adequate provisions for its insurance contract liabilities in accordance with the valuation methods specified in Part D of the Risk-Based Capital ("RBC") Framework for Insurers.

Our opinion

In our opinion, the financial statements of AIA Bhd. ("the Company") and its subsidiaries ("the Group") give a true and fair view of the financial position of the Group and of the Company as at 31 December 2018, and of their financial performance and their cash flows for the financial period from 1 December 2017 to 31 December 2018 in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

What we have audited

We have audited the financial statements of the Group and of the Company, which comprise the statements of financial position as at 31 December 2018 of the Group and of the Company, and the income statements, statements of comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial period then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 38 to 236.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and other ethical responsibilities

We are independent of the Group and of the Company in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

INDEPENDENT AUDITORS' REPORT
TO THE MEMBERS OF AIA BHD. (CONTINUED)
(Incorporated in Malaysia)
(Company No. 790895-D)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Information other than the financial statements and auditors' report thereon

The Directors of the Company are responsible for the other information. The other information comprises Directors' Report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors of the Company are responsible for the preparation of the financial statements of the Group and of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

INDEPENDENT AUDITORS' REPORT
TO THE MEMBERS OF AIA BHD. (CONTINUED)
(Incorporated in Malaysia)
(Company No. 790895-D)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

(a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

(b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and Company's internal control.

(c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

(d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or Company to cease to continue as a going concern.

(e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.

TO THE MEMBERS OF AIA BHD. (CONTINUED)
(Incorporated in Malaysia)
(Company No. 790895-D)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Auditors' responsibilities for the audit of the financial statements (continued)

(f) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

OTHER MATTERS

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

	872,332	777,594	839,783	738,300

The Group and Company classifies cash flows from the acquisition and disposal of financial assets as operating cash flows as the purchases are funded from cash flows predominantly associated with the origination of insurance contracts, net of cash flows for payments of benefits and claims incurred for insurance contracts, which are respectively treated under the operating activities.

The accompanying notes form an integral part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE 13 MONTHS PERIOD ENDED 31 DECEMBER 2018

1 CORPORATE INFORMATION

The Company is engaged principally in the underwriting of life insurance business, including investment-linked business. The principal activities of the subsidiaries are stated in Note 7 to the financial statements.

There have been no significant changes in the nature of these activities during the financial period other than as disclosed in Note 14 to the financial statements.

The Company is a public limited liability company, incorporated on 4 October 2007 under the Companies Act 2016 and the Financial Services Act, 2013 ("FSA") and domiciled in Malaysia. The registered office and principal place of business of the Company are located at Level 29, Menara AIA, 99 Jalan Ampang, 50450 Kuala Lumpur and Menara AIA, 99 Jalan Ampang, 50450 Kuala Lumpur respectively.

On 12 October 2018, the Company's former immediate holding company, Premium Policy Berhad (In Members' Voluntary Liquidation) has transferred 525,732,174 ordinary shares to the Company's current immediate holding company, Orange Policy Sdn. Bhd. ("OPSB") following the entering of Distribution In Specie Agreement between the parties to have the surplus assets from Premium Policy Berhad to be distributed in specie to OPSB following completion of the members' voluntary liquidation process. The ultimate holding company is AIA Group Limited, a company incorporated in Hong Kong and listed on the Stock Exchange of Hong Kong Limited.

The financial statements are authorised for issue by the Board on 22 March 2019.

2 SIGNIFICANT ACCOUNTING POLICIES

Unless otherwise stated, the following accounting policies have been applied consistently in dealing with items that are considered material in relation to the financial statements of all the years presented.

2.1 Basis of preparation

The financial statements of the Group and the Company are prepared under the historical cost convention, except as disclosed in the summary of significant accounting policies and comply with Malaysian Financial Reporting Standards ("MFRS"), International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

The preparation of financial statements in conformity with Malaysian Financial Reporting Standards and International Financial Reporting Standards requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. It also requires Directors to exercise judgement in the process of applying the Company's accounting policies. Although these estimates and judgement are based on the Directors' best knowledge of current events and actions, actual result may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in Note 2.4 to the financial statements.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.1 Basis of preparation (continued)

Change of financial year end

On 23 November 2017, the Directors approved the change in the Group and the Company's financial year end from 30 November to 31 December. Therefore, the financial period covered in these financial statements is for a period of thirteen (13) months from 1 December 2017 to 31 December 2018 and the comparative amounts are not comparable for the income statements, statements of comprehensive income, statements of changes in equity, statements of cash flows and the related notes to the financial statements.

2.2 Summary of significant accounting policies

(a) Basis of consolidation

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The Group uses the purchase method of accounting to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

Non-controlling interests are presented within equity and represent the portion of profit or loss and net assets of a subsidiary attributable to equity interests that are not owned, directly or indirectly through subsidiaries, by the parent. Non-controlling interests are measured at the non-controlling interests' share of the fair value of the subsidiaries' identifiable assets and liabilities at the acquisition date and their share of change in the subsidiaries' equity since that date. Acquisition and disposal of non-controlling interests are treated as transactions between equity holders.

Intra-group transactions, balances and unrealised gains on intra-group transactions are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(a) Basis of consolidation (continued)

(ii) Associates

Associates are entities in which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not in control or joint control over those policies.

Investments in associates are accounted for in the Group's financial statements using the equity method of accounting and are initially recognised at cost. Under the equity method, the investment in associates is carried in the Group's statements of financial position at cost adjusted for post-acquisition changes in the Group's share of net assets of the associate. The Group's share of its associates' post-acquisition profit is recognised in the Group's income statements and its share of post-acquisition movement in other comprehensive income is recognised in the Group's statements of comprehensive income.

In applying the equity method, unrealised gains and losses on transactions between the Group and the associates are eliminated to the extent of the Group's interest in the associates. After application of the equity method, the Group determines whether it is necessary to recognise any additional impairment losses with respect to the Group's net investment in the associates. The associates are equity accounted for from the date the Group obtains significant influence until the date the Group ceases to have significant influence over the associates.

Goodwill relating to an associate is included in the carrying amount of the investment and is not amortised. Any excess of the Group's share of the net fair value of the associate's identifiable assets and liabilities over the cost of the investment is included as income in the determination of the Group's share of the associate's profit or loss in the period in which the investment is acquired.

When the Group's share of loss in an associate equals or exceeds its interest in the associate, including any long-term interests that, in substance, form part of the Group's net investment in the associate, the Group does not recognise further loss, unless it has incurred obligations or made payments on behalf of the associate.

The most recent available audited financial statements of the associates are used by the Group in applying the equity method. Where the dates of the audited financial statements used are not consistent with those of the Group, the share of results is arrived at from the last audited financial statements available and/or management accounts up to the end of the accounting period. Uniform accounting policies are adopted for transactions and events in similar circumstances.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(b) Business combination under common control

Business combinations under common control are accounted for using the predecessor method of accounting. Under the predecessor method of accounting, the income statements include the results of the acquired business from the date of combinations. The assets and liabilities of the acquired business are accounted for at the date of combination, based on the carrying amounts of the acquiree adjusted for alignment of accounting policies, if any. The excess of the cost of acquisition over the aggregate carrying amounts of assets and liabilities as of the date of the combination is taken to equity.

(c) Investment in subsidiaries and associates under the Company's separate financial statements

In the Company's separate financial statements, investments in subsidiaries and associates are stated at cost less impairment losses. Income from investment in associates is recognised in the income statements to the extent of dividends received subsequent to the date of acquisition.

(d) Property, plant and equipment and depreciation

All items of property, plant and equipment are initially recorded at cost. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the income statements during the financial period in which they are incurred. The cost of major renovations is included in the carrying amount of the asset when it is probable that future economic benefits in excess of the original assessed standard of performance of the existing asset will flow to the Group.

Subsequent to initial recognition, property, plant and equipment except for land and owner occupied buildings are stated at cost less accumulated depreciation and any accumulated impairment losses.

Land and owner occupied buildings are stated at revalued amount, which is the fair value at the date of the revaluation less any accumulated impairment losses.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(d) Property, plant and equipment and depreciation (continued)

Fair value is determined from market-based evidence by appraisal that is undertaken by professionally qualified valuers. Revaluations are performed with sufficient regularity to ensure that the fair value of a revalued asset does not differ materially from that which would be determined using fair values at the reporting date.

Any revaluation surplus is recognised in other comprehensive income and accumulated in equity under asset revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in the statement of comprehensive income, in which case the increase is recognised in the statement of comprehensive income to the extent of the decrease previously recognised. Upon disposal or retirement of an asset, any asset revaluation reserve relating to the particular asset is transferred directly to the retained earnings.

The residual values, useful life and depreciation method are reviewed and adjusted, if applicable, at each date of the statements of financial position. An asset’s carrying amount is written down to its recoverable amount if the asset’s carrying amount is greater than its estimated recoverable amount.

The gains and losses on disposal of an asset is the difference between the net sale proceeds and the carrying amount of the relevant asset, and is recognised in the income statements and presented within net realised gains/(losses).

Freehold land has an unlimited useful life and therefore is not depreciated. Leasehold land, which considered as finance lease, is depreciated over its remaining lease term. Major building improvements are depreciated over the shorter of the remaining useful lives of the related assets or 10 years. Depreciation of other property and equipment is calculated using the straight-line method to allocate cost less any residual value over the estimated useful life, as summarised as follows:

Leasehold land	799 – 999 years
Buildings	30 years
Furniture, fixtures and fittings	5 – 10 years
Office equipments	2 – 5 years
Motor vehicles	5 years

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(e) Investment properties

Investment properties are properties which are held either to earn rental income or for capital appreciation or for both. Such properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value.

Fair value is arrived at by reference to market evidence of transactions priced for similar properties and is performed by registered independent valuers having an appropriate recognised professional qualification and recent experience in the location and category of the properties being valued and/or periodic intervening valuation by internal qualified professionals as appropriate.

Gains and losses arising from changes in the fair values of the investment properties are recognised in the income statements in the financial period in which they arise and presented within the fair value gains/(losses).

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the income statements and presented within net realised gains/(losses) in the financial period in which they arise.

(f) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Intangible assets with finite lives are amortised on a straight-line basis over the estimated economic useful lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each date of the statements of financial position. The amortisation expense on intangible assets with finite lives is recognised in the income statements.

Gains or losses arising from derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in the income statements and presented within net realised gains/(losses) when the asset is derecognised.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(f) Intangible assets (continued)

Software

The cost of acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful life, generally not exceeding a period of 5 years.

The cost of significant development of knowledge-based software and computer application to meet the unique requirements of the insurance business is capitalised and recognised as an intangible asset in accordance with MFRS 138. The Group establishes that these development costs will generate economic benefits beyond one year and are associated with identifiable software applications controlled by the commissioning, on a straight-line basis over its useful economic life. The carrying amount is assessed for impairment when there is an indication of impairment.

Membership fees

The membership fees are in relation to club membership subscription. The membership fees with finite lives are amortised over its useful life using the straight-line method and those with infinite lives are subject to impairment test.

(g) Impairment of non-financial assets

Property, plant and equipment, investment properties, intangible assets and other non-financial assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised to the extent that the carrying amount of the asset exceeds its recoverable amount, which is the higher of the asset's or cash generating unit's fair value less costs of disposal and its value in use. Recoverable amounts are estimated for individual assets, or, if it is not possible, for the cash-generating unit.

An impairment loss is charged to the income statements. Subsequent increase in the recoverable amount of an asset is treated as reversal of the previous impairment loss and is recognised to the extent of the carrying amount of the asset that would have been determined (net of amortisation and depreciation) had no impairment loss been recognised. The reversal is recognised in the income statements immediately.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(h) Financial assets and financial liabilities

The Group classifies its financial assets into financial assets at fair value through profit or loss (“FVTPL”), loans and receivables (“LAR”), held to maturity (“HTM”) and available-for-sale (“AFS”). The classification depends on the purpose for which the financial assets were acquired or originated. Management determines the classification of its investments at initial recognition.

The significant accounting policies by the categories above are as follows:

FVTPL

Financial assets at FVTPL comprise two sub-categories:

- financial assets designated at fair value through profit or loss; and
- financial assets held for trading, including derivatives not designated as hedges

The Group designates financial assets at FVTPL if this eliminates a measurement inconsistency or if the related assets and liabilities are actively managed on a fair value basis, including:

- financial assets held to back investment-linked contracts and participating funds; and

- other financial assets managed on a fair value basis; consisting of the Group’s equity portfolio and investments held by the Group’s fully consolidated investment-linked fund.

Financial assets at FVTPL are initially recorded at fair value. Subsequent to initial recognition, financial assets at FVTPL are remeasured at fair value. Fair value adjustments and realised gains and losses on derecognition are recognised in the income statements and presented within fair value gains/(losses). Transaction costs in respect of financial assets at FVTPL are expensed as they are incurred.

Fair value changes of financial assets at FVTPL are analysed between change resulting from foreign currency fluctuation and other fair value changes. Foreign currency fluctuation and other fair value changes are included under other operating income/(expense) and fair value gains/(losses) in the income statements respectively.

Dividend income from equity instruments designated at fair value through profit or loss is recognised as investment income in the income statements, generally when the security becomes ex-dividend or the right to receive payment is established. Interest income is recognised as investment income in the income statements using the effective interest method.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(h) Financial assets and financial liabilities (continued)

LAR

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market other than those the Group intends to sell in the short term or that it has designated as FVTPL. They are initially recognised at fair value plus transaction costs. Subsequently, they are carried at amortised cost using the effective interest rate method less any impairment losses.

Interest income from loans and receivables is recognised as investment income in the income statements using the effective interest rate method. Gains and losses are recognised in the income statements when the investments are derecognised or impaired, as well as through the amortisation process.

AFS

Financial assets, other than those at FVTPL, LAR and HTM, are classified as AFS. AFS category is used where the relevant investments backing insurance and investment contract liabilities and shareholders' equity are not managed on a fair value basis. These principally consist of the Group's debt securities (other than those backing participating funds and investment-linked contracts). AFS financial assets are initially recognised at fair value plus attributable transaction costs. For AFS debt securities, the difference between their cost and par value is amortised. AFS financial assets are subsequently measured at fair value.

Interest income from debt securities classified as AFS is recognised as investment income in the income statements using the effective interest method.

Unrealised gains and losses on securities classified as AFS are analysed between differences resulting from foreign currency translation, and other fair value changes. Foreign currency translation differences on monetary AFS investments, such as debt securities, and impairment of AFS financial assets are recognised under "other operating income/(expense)" in the income statements.

Changes in the fair value of securities classified as AFS, except for impairment losses and relevant foreign exchange gains and losses on monetary AFS investments, are recorded in a separate fair value reserve within equity.

On derecognition, the cumulative fair value gains and losses previously reported in equity are transferred to the income statements and presented within net realised gains/(losses).

Financial liabilities

All financial liabilities are initially recorded at fair value. Subsequent to initial recognition, financial liabilities are carried at amortised cost using effective interest rate method.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(i) Fair value of financial instruments

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, having regard to the specific characteristics of the asset or liability concerned, assuming that the transfer takes place in the most advantageous market to which the Group has access. The fair values of financial instruments traded in active markets (such as financial instruments at FVTPL and AFS) are based on quoted market prices at the date of the statements of financial position. The quoted market price used for financial assets held by the Group is the current bid price. The fair values of financial instruments that are not traded in active markets are determined using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions at the date of each statements of financial position. The objective of using a valuation technique is to estimate the price at which an orderly transaction would take place between market participants at the date of the statement of financial position.

The degree of judgement used in measuring the fair value of financial instruments generally correlates with the level of pricing observability. Pricing observability is affected by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and general market conditions.

The fair value of floating rate and over-night deposits with financial institutions is their carrying value i.e. the cost of the deposits/placements and accrued interest.

If the fair value cannot be measured reliably, these financial instruments are measured at cost, being the fair value of the consideration paid for the acquisition of the instrument or the amount received on issuing the financial liability. All transaction costs directly attributable to the acquisition are also included in the cost of the investment.

(j) Impairment of financial assets

<u>**General**</u>

Financial assets are assessed for impairment on a regular basis. A financial asset is impaired if its carrying value exceeds the estimated recoverable amount and there is objective evidence of impairment to the financial asset. The Group assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset, or group of financial assets, is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a ‘loss event’) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(j) Impairment of financial assets (continued)

<u>General</u> (continued)

Objective evidence that a financial asset, or group of assets, is impaired includes observable data that comes to the attention of the Group about the following events:

- significant financial difficulty of the issuer or debtor; or
- a breach of contract, such as a default or delinquency in payments; or
- it becomes probable that the issuer or debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for that financial asset because of financial difficulties; or
- observable data, including market prices, indicating that there is a potential decrease in the estimated future cash flows since the initial recognition of those assets, including:
  - adverse changes in the payment status of issuers
  - national or local economic conditions that correlate with increased default risk.

The Group first assesses whether objective evidence of impairment exists for financial assets that are individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

<u>Financial assets carried at amortised cost</u>

For financial assets carried at amortised cost, impairment is considered to have taken place if it is probable that the Group will not be able to collect principal and/or interest due according to the contractual terms of the instrument. When impairment is determined to have occurred, the carrying amount is decreased through a charge to the income statements. The carrying amount of mortgage loans or receivables is reduced through the use of an allowance account, and the amount of any allowance is recognised as an impairment loss in the income statements.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in the income statements, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(j) Impairment of financial assets (continued)

AFS financial assets

When a decline in the fair value of an AFS financial asset has been recognised in shareholders' equity and there is objective evidence that the financial asset is impaired, the cumulative loss already recognised directly in shareholders' equity is recognised in the current financial period's income statements. The Group generally considers an AFS debt security for evidence of impairment when it is identified as credit impaired. In the absence of any other evidence of credit impairment, a debt security would be assessed for impairment when there is a significant decline in fair value.

If the fair value of a debt security classified as AFS increases in a subsequent period, and the increase can be objectively related to an event occurring after the impairment loss was recognised in the income statements, the impairment loss is reversed through the income statements.

Where, following the recognition of an impairment loss in respect of an AFS debt security, the financial asset suffers further decline in value, such further decline are recognised as an impairment only in the case when objective evidence exists of a further impairment event to which the losses can be attributed.

(k) Derecognition of financial assets

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership.

(l) Equity instruments

Ordinary share capital

Issued capital represents the nominal value of shares issued plus any share premium received from the issue of share capital, if any. Incremental external costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds of the issue.

Dividends on ordinary share capital

Dividends on ordinary shares are recognised as liabilities when proposed or declared before the date of the statement of financial position. A dividend proposed or declared after the date of the statement of financial position, but before the financial statements are authorised for issue, is not recognised as a liability at the date of statement of financial position. Upon the dividend becoming payable, it will be accounted for as a liability.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(m) Repurchase agreement

Obligations on securities sold under repurchase agreements are securities which have been sold from the Group's portfolio, with a commitment to repurchase at future dates. Such financing transactions and the obligation to repurchase the securities are reflected as a liability on the statements of financial position.

The securities sold under repurchase agreements are treated as pledged assets and are not derecognised from the statements of financial position.

(n) Product classification

Insurance contracts are those contracts that transfer significant insurance risk. These contracts may also transfer financial risk. Significant insurance risk is defined as the possibility of paying significantly more in a scenario when the insured event occurs than in a scenario in which it does not. Scenarios considered are those with commercial substance.

Investment contracts are those contracts without significant insurance risk. Once a contract has been classified as an insurance or investment contract, no reclassification is subsequently performed unless the terms of the agreement are later amended.

Certain contracts with discretionary participation features ("DPF") supplement the amount of guaranteed benefits due to the policyholders. These contracts are distinct from other insurance and investment contracts as the Group has discretion in the amount and/or timing of the benefits declared, and how such benefits are allocated between groups of policyholders. Customers may be entitled to receive, as a supplement to guaranteed benefits, additional benefits or bonuses:

- that are likely to be a significant portion of the total contractual benefits;
- whose amount or timing is contractually at the discretion of the Group; and
- that are contractually based on:
  - the performance of a specified pool of contracts or a specified type of contract; or
  - realised and/or unrealised investment returns on a specified pool of assets held by the issuer; or
  - the income statements of the Company, fund or other entity that issues the contract.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(n) Product classification (continued)

Approximately 90% of surpluses in the DPF funds must be distributed to the policyholders as a group in accordance with the relevant terms under the FSA. The Group has the discretion over the amount and timing of the distribution of these surpluses to policyholders. All DPF liabilities, including unallocated surpluses, both guaranteed and discretionary, at the end of the reporting period are held within the insurance contract liabilities.

Certain derivatives embedded in insurance contracts are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statements.

The Group does not separately measure embedded derivatives that meet the definition of an insurance contract or embedded options to surrender insurance contracts for a fixed amount (or an amount based on a fixed amount and an interest rate). All other embedded derivatives are separated and carried at fair value if they are not closely related to the host insurance contract and meet the definition of a derivative.

A unit-linked insurance contract is an insurance contract with an embedded derivative linking payments on the contract to units of an internal investment fund set up by the Group with the consideration received from the contract holders. This embedded derivative meets the definition of an insurance contract and is not therefore accounted for separately from the host insurance contract. The liability for such contracts is adjusted for all changes in the fair value of the underlying assets.

The recognition and measurement of life insurance contracts and general insurance contracts are set out in Note 2.2(o) and 2.2(p) to the financial statements respectively.

(o) Life insurance contracts

<u>**Gross premium**</u>

Premium income includes premium recognised in the ordinary life and investment-linked business. Gross premium is recognised as soon as the amount of the premium can be reliably measured. First premium is recognised from inception date and subsequent premium is recognised when it is due.

At the end of the period, all due premiums are accounted for to the extent that they can be reliably measured.

Premium income of investment-linked business is in respect of the net creation of units which represents premiums paid by policyholders as payment for a new contract or subsequent payments to increase the amount of that contract. Net creation of units is recognised on a receipt basis.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(o) Life insurance contracts (continued)

<u>Commission and agency expenses of life insurance business</u>

Gross commission and agency expenses, which are costs directly incurred in securing premium on insurance policies are charged to the income statements in the financial period in which they are incurred.

<u>Benefits, claims and expenses</u>

Benefits and claims that are incurred during the financial period are recognised when a claimable event occurs and/or the insurer is notified.

Benefits and claims arising on life insurance policies, including settlement costs, are accounted for using the case basis method and for this purpose, the benefits payable under a life insurance policy is recognised as follows:

(i) maturity or other policy benefits payments due on specified dates are treated as claims payable on the due dates;

(ii) death, surrender and other benefits without due dates are treated as claims payable, on the date of receipt of intimation of death of the assured or occurrence of contingency covered;

(iii) benefits payable under investment-linked business include net cancellation of units and are recognised as surrender; and

(iv) bonus on DPF policy upon declaration.

<u>Life insurance contract liabilities</u>

Life insurance contract liabilities comprise (i) claims liabilities, (ii) actuarial liabilities, (iii) unallocated surplus, and (iv) net asset value attributable to unitholders.

(i) Claims liabilities

Claims liabilities represent the amounts payable under a life insurance policy in respect of claims including settlement costs, and are accounted for using the case-by-case method as set out above under benefits, claims and expenses.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(o) Life insurance contracts (continued)

<u>**Life insurance contract liabilities**</u> **(continued)**

(ii) Actuarial liabilities

Actuarial liabilities are recognised when contracts are entered into and premiums are charged.

Actuarial liabilities are valued, where appropriate by using a prospective actuarial valuation based on the sum of the present value of future guaranteed and, in the case of a participating life policy, appropriate level of non-guaranteed benefits, and the expected future management and distribution expenses, less the present value of future gross considerations arising from the policy discounted at the appropriate risk discount rate.

The expected future cash flows are determined using best estimate assumptions. An appropriate allowance for provision of risk margin for adverse deviation from expected experience is provided for in the valuation of non-participating policies and non-unit liabilities of investment-linked policies, and in the valuation of participating policies on guaranteed benefits only.

Actuarial liabilities in respect of a participating insurance contract is taken as the higher of the guaranteed benefits insurance liabilities or the total benefits insurance liabilities at the fund level derived as stated above.

In the case of a life policy where the future premiums are not determinable, the reserve is determined as the higher of the gross premium valuation ("GPV") reserve or the accumulated amount, plus the unearned cost of insurance. The GPV calculation includes assumptions regarding the pattern of premium payments as the product has a flexible premium nature. In this regard, assumptions are made on the proportion of policyholders taking premium holidays in the future.

Where policies or extensions of a policy are collectively treated as an asset at the fund level under the valuation method adopted, this asset value is eliminated at fund level.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(o) Life insurance contracts (continued)

Life insurance contract liabilities (continued)

(ii) Actuarial liabilities (continued)

The valuation of the non-unit liability is conducted for each investment-linked policy by a cash flow projection. The liability in respect of the non-unit component of an investment-linked policy is valued by projecting future cash flows to ensure that all future outflows can be met without recourse to additional finance or capital support at any future time during the duration of the investment-linked policy.

In the case of a life policy where a part of, or the whole of the premiums are accumulated in a fund, the reserves shall be the higher of the current accumulated amount, or the sum of the current accumulated amount and a reserve calculated on the net cash flows. These cash flows shall, where appropriate, be determined by considering the projected future values of the accumulated amount, at the relevant confidence level.

The actuarial liabilities are derecognised when the insurance contract expires, is discharged or is cancelled.

Adjustments to the actuarial liabilities at each reporting date are recorded in the income statements.

The liability adequacy test has been in-built in the valuation of actuarial liabilities and hence no separate assessment is carried out.

(iii) Unallocated surplus

Surpluses of contracts with DPF are attributable to policyholders and shareholders and the amount and timing of the distribution to both the policyholders and shareholders are determined by an actuarial valuation of the long term liabilities to policyholders at the date of the statements of financial position is made in accordance with the provision of the Financial Services Act, 2013 and related regulations by the Company’s Appointed Actuary.

Unallocated surplus of contracts with DPF, where the amount are yet to be allocated or distributed to either policyholders or shareholders by the end of the financial period, are held within the insurance contract liabilities.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(o) Life insurance contracts (continued)

Life insurance contract liabilities (continued)

(iv) Net asset value attributable to unitholders

The unit liability of investment-linked policy is equal to the net asset value of the investment-linked funds, which represents net premium received and investment returns credited to the policy less deduction for mortality and morbidity costs and expense charges.

(p) General insurance contracts

Gross premium

Gross premium income is recognised in the period in respect of risks assumed during that particular period.

Acquisition costs and deferred acquisition costs (“DAC”)

The costs of acquiring and renewing insurance policies net of income derived from ceding reinsurance premiums, are recognised as incurred and properly allocated to the period in which it is probable they give rise to income.

Commission costs are deferred to the extent that these costs are recoverable out of future premium. All other acquisition costs are charged to the income statements in the period in which they are incurred.

Subsequent to initial recognition, these costs are amortised on a straight-line basis based on the terms of expected future premiums. Amortisation is recognised in the income statements.

An impairment review is performed at each date of the statements of financial position or more frequently when an indication of impairment arises. When the recoverable amount is less than the carrying value, an impairment loss is recognised in the income statements.

DAC is also considered in the liability adequacy test for each accounting period. DAC is derecognised when the related contracts are either settled or disposed of.

DAC is insignificant, predominantly short-term in nature and hence is netted against premium liabilities in the financial statements.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(p) General insurance contracts (continued)

Claims and expenses

Claims and losses adjustment expenses are charged to the income statements as incurred based on the estimated liabilities for compensation owed to policyholders or third parties damaged by the policyholders. They include direct and indirect claims settlements costs and arise from events that have occurred up to the end of the reporting period even if they have not yet been reported to the Group.

General insurance contracts liabilities are recognised when contracts are entered into and premiums are charged. These liabilities comprise of (i) unearned premium reserves and (ii) claims liabilities.

(i) Unearned premium reserves

Unearned Premium Reserves ("UPR") represents the portion of the net premiums of insurance policies written that relate to the unexpired periods of policies at the end of the financial period. In determining UPR at the date of the statements of financial position, the method that most accurately reflects the actual unearned premiums is used as follows:

(i) 1/24th method for all other classes of Malaysian policies; and

(ii) time apportionment method for non-annual policies.

At each reporting date, the Group reviews its unexpired risks and a liability adequacy test is performed to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premium. This calculation uses current estimates of future contractual cash flows (taking into consideration current loss ratios) after taking account of the investment return expected to arise on assets relating to the relevant general insurance technical provisions and a Provision of Risk Margin for Adverse Deviation ("PRAD") calculated at the overall fund level. The current estimate of future contractual cash flow is a prospective estimate of the expected future payments arising from future events insured under policies in force as at the valuation date and also includes allowance for the insurer's expenses, including overheads and cost of reinsurance, expected to be incurred during the unexpired period in administering these policies and settling the relevant claims, and shall allow for expected future premium refunds.

If these estimates show that the carrying amount of the unearned premium less related deferred acquisition costs is inadequate, the deficiency is recognised in the income statements by setting up a provision for liability adequacy.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(p) General insurance contracts (continued)

<u>Claims and expenses</u> (continued)

(ii) Claims liabilities

Claims liabilities are determined based on the estimated ultimate cost of all claims incurred but not settled at the date of the statements of financial position, whether reported or not, together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore, the ultimate cost of these claims cannot be known with certainty at the date of the statements of financial position.

The liabilities are calculated at the reporting date using a range of standard actuarial claim projection techniques based on empirical data and current assumptions at best estimate and a PRAD calculated at the overall fund level. The liabilities are not discounted for the time value of money. No provision for equalisation or catastrophe reserves is recognised.

The liabilities are derecognised when the contract expires, is discharged or is cancelled.

The liability adequacy test has been in-built in the estimation of claims liabilities and hence no separate assessment is carried out.

(q) Reinsurance

The Group cedes reinsurance in the normal course of business, with retentions varying by line of business. The cost of reinsurance is accounted for over the life of the underlying reinsured policies contracts, using assumptions consistent with those used to account for such policies/contracts.

Premiums ceded and claims reimbursed are recognised in the same accounting period as the original policy/contract in which the reinsurance relates, and are presented on a gross basis in the income statements and statements of financial position.

Fee income derived from reinsurers in the course of reinsurance are credited to the income statements in the financial period in which they are earned.

Reinsurance assets consist of amounts receivable in respect of ceded insurance liabilities. Amounts recoverable from reinsurers are estimated in a manner consistent with the reinsured's insurance contract or investment contract liabilities or benefits paid and in accordance with the relevant reinsurance contract.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(q) Reinsurance (continued)

To the extent that reinsurance contracts principally transfer financial risk (as opposed to insurance risk), they are accounted for directly through the statements of financial position and are not included in reinsurance assets or liabilities. A deposit asset or liability is recognised, based on the consideration paid or received less any explicitly identified premiums or fees to be retained by the reinsured.

If a reinsurance asset is impaired, the Group reduces the carrying amount accordingly and recognises that impairment losses in the income statements. A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after initial recognition of the reinsurance asset, that the Group may not receive all amounts due to it under the terms of the contract, and the impact on the amounts that the Group will receive from the reinsurer can be reliably measured.

The Group also assumes reinsurance risk in the normal course of business for general insurance contracts when applicable.

Premiums and claims on assumed facultative reinsurance are recognised as revenue or expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Premiums, claims and other transactions costs on assumed treaty reinsurance are accounted for upon notification by the ceding companies or upon receipt of the statements of accounts.

(r) Insurance receivables

Insurance receivables are recognised when due and measured on initial recognition at the fair value of the consideration received or receivable. Subsequent to initial recognition, insurance receivables are measured at amortised cost, using the effective interest method.

If there is objective evidence that the insurance receivable is impaired, the Group reduces the carrying amount of the insurance receivable accordingly and recognises that impairment losses in the income statements. The Group gathers the objective evidence that an insurance receivables is impaired using the same process adopted for financial assets carried at amortised cost. These processes are described in Note 2.2(j) to the financial statements.

(s) Other financial liabilities and insurance payables

Other liabilities and payables are recognised when due and measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(t) Provisions

Provisions are recognised when the Group has a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are reviewed at each date of the statements of financial position and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as finance cost.

(u) Cash and cash equivalents

Cash and cash equivalents consist of cash in hands, deposits held at call with financial institutions with original maturities of three months or less. It excludes deposits which are held for investment purposes. The Group classifies the cash flows for purchase and disposal of investments in financial assets in its operating cash flows as the purchases are funded from the cash flows predominantly associated with the origination of insurance contracts, net of the cash flows for payments of insurance benefits and claims benefits.

(v) Leases

A lease is recognised as a finance lease if it transfers substantially to the Group all the risks and rewards incidental to ownership. Leases of lands are classified as operating or finance leases in the same way as leases of other assets and the land and buildings elements of a lease of land and buildings are considered separately for the purpose of lease classification.

Operating lease payments are recognised as an expense on a straight-line basis over the term of the relevant lease. The aggregate benefit of incentives provided by the lessor is recognised as a reduction of rental expense over the lease term on a straight-line basis.

In the case of a lease of land and buildings, the minimum lease payments made are allocated, whenever necessary, between the land and the buildings elements in proportion to the relative fair values for leasehold interests in the land element and buildings element of the lease at the inception of the lease.

Assets leased out under operating leases are recorded on the statements of financial position according to the nature of the assets. Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(w) Employee benefits

(i) Short term benefits

Wages, salaries, bonuses and social security contributions are recognised as an expense in the period in which the associated services are rendered by employees of the Group. Short term accumulating compensated absences such as paid annual leave are recognised when services are rendered by employees that increases their entitlement to future compensated absences, and short term non-accumulating compensated absences such as sick leave are recognised when the absences occur.

(ii) Post retirement benefit obligations

Defined contribution plans

As required by law, the Group makes contributions to the state pension scheme, the Employees Provident Fund (“EPF”). Such contributions are recognised as an expense in the income statements as incurred. Once the contributions have been paid, the Group has no further payment obligations.

The Group operates one unfunded post retirement employee benefit schemes, whose members receive benefits on a defined benefit basis (related to length of service). The defined benefit plans provide life and medical benefits for employees after retirement.

(iii) Share-based compensation plans

AIA Group Limited (“AIAGL”) launched a number of share-based compensation plans, under which the Company receives services from the employees, Directors and Officers as consideration for the shares and/or options of AIAGL. These share-based compensation plans comprise the Share Option Scheme (“SO Scheme”), the Restricted Share Unit Scheme (“RSU Scheme”) and the Employee Share Purchase Plan (“ESPP”).

The AIA Group’s share compensation plans offered to the Group’s employees are equity-settled plans. Under the equity-settled share-based compensation plan, the fair value of the employee services received in exchange for the grant of AIAGL’s shares and/or options is recognised as an expense in the income statements over the vesting period with a corresponding amount recorded in equity. Any amounts recharged from AIAGL related to equity-settled share-based payment arrangements are offsetted against the amounts recorded in equity.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(w) Employee benefits (continued)

(iii) Share-based compensation plans (continued)

The total amount to be expensed over the vesting period is determined by reference to the fair value of the share and/or options granted. Non-market vesting conditions are included in assumptions for the number of shares and/or options that are expected to be vested. At each period end, the Group revises its estimates of the number of shares and/or options that are expected to be vested. Any impact of the revision to original estimates is recognised in income statements with a corresponding adjustment to equity. Where awards of share-based payment arrangements have graded vesting terms, each tranche is recognised as a separate award, and therefore the fair value of each tranche is recognised over the applicable vesting period.

The Group estimates the fair value of options using a binomial lattice model. This model requires inputs such as share price, implied volatility, risk free interest rate, expected dividend rate and the expected life of the option.

Where modification or cancellation of an equity-settled share-based compensation plan occurs, the grant date fair value continues to be recognised, together with any incremental value arising on the date of modification if non-market conditions are met.

(x) Provision for agents' retirement benefits

Provision for agents' retirement benefits is calculated in accordance with the terms and conditions in the respective agents' agreements. The scheme is not separately funded. The Company pays fixed contributions into the Agency Provident Fund.

Provision for agents' retirement benefits is charged to profit or loss in the period in which it relates.

(y) Non-current assets (or disposal group) held-for-sale

Non-current assets (or disposal groups) are classified as assets held-for-sale when their carrying amounts are recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are stated at the lower of carrying amount or fair value less costs to sell.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(z) Foreign currency

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The functional currency of the consolidated financial statements are presented in thousands of Ringgit Malaysia ("RM"), which is the Group's and the Company's presentation currency.

(ii) Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statements.

Translation differences on non-monetary items carried at fair value are translated at the rates prevailing on the date when the fair value is determined. Non-monetary items that are measured in terms of historical cost in foreign currency are not re-translated.

(iii) Operations denominated in functional currency other than Ringgit Malaysia

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

(i) equity items are translated at their respective historical rates;

(ii) assets and liabilities for each statements of financial position presented are translated at the closing rate at the date of the statements of financial position;

(iii) income and expenses for each income statements are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and

(iv) all resulting exchange differences are recognised as a separate component of equity under the foreign currency translation reserve.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Summary of significant accounting policies (continued)

(aa) Taxation

Income tax on the income statements for the financial period comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the financial period and is measured using the tax rates that have been enacted at the date of statements of financial position.

Deferred tax is provided for, using the liability method, on temporary differences at the date of the statements of financial position between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the date of the statements of financial position. Deferred tax is recognised in the income statements, except when it arises from a transaction which is recognised in other comprehensive income or directly in equity in which case the deferred tax is also charged or credited in other comprehensive income.

(ab) Other revenue recognition

(i) Rental income

Rental income is recognised on accrual basis and presented within the investment income in the income statements.

(ii) Gains and losses on disposal of investments

Gains and losses on disposal of investments are determined by comparing the sales proceeds and the carrying amounts of the investments and the resulting difference is credited or charged to the income statements. Cost is determined by specific identification.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS

(a) Standards, amendments to published standards and interpretations to existing standards that are effective and relevant to the Group's financial period beginning on or after 1 December 2017

The following accounting standards, amendments and interpretations have been adopted for the first time for the financial period beginning on 1 December 2017.

- Amendments to MFRS 107 "Statement of Cash Flows – Disclosure Initiative"
- Amendments to MFRS 112 "Income Taxes – Recognition of Deferred Tax Assets for Unrealised Losses"
- Annual Improvements to MFRSs 2014 – 2016 Cycle: MFRS 12 "Disclosures of Interests in Other Entities"

The adoption of the above accounting standards, amendments and interpretations does not have any significant financial impact to the financial statements.

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted

The Group will apply the new standards, amendments to standards and interpretations in the following period:

Financial year beginning on/after 1 January 2019

- MFRS 9 "Financial Instruments" (effective from 1 January 2018) replaces MFRS 139 "Financial Instruments: Recognition and Measurement"

  MFRS 9 retains but simplifies the mixed measurement model in MFRS 139 and establishes three primary measurement categories for financial assets: amortised cost, fair value through profit or loss and fair value through other comprehensive income ("OCI"). The basis of classification depends on the entity's business model and the cash flow characteristics of the financial asset. Investments in equity instruments are always measured at fair value through profit or loss with an irrevocable option at inception to present changes in fair value in OCI (provided the instrument is not held for trading). A debt instrument is measured at amortised cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest.

  For liabilities, the standard retains most of the MFRS 139 requirements. These include amortised cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The main changes are:
  - For financial liabilities classified as FVTPL, the fair value changes due to own credit risk should be recognised directly to OCI. There is no subsequent recycling to income statement.
  - When a financial liability measured at amortised cost is modified without this resulting in derecognition, a gain or loss, being the difference between the original contractual cash flows and the modified cash flows discounted at the original effective interest rate, should be recognised immediately in income statement.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- MFRS 9 “Financial Instruments - Classification and Measurement of Financial Assets and Financial Liabilities” (effective from 1 January 2018) (continued)

  MFRS 9 introduces an expected credit losses model on impairment for certain financial assets that replaces the incurred loss impairment model used in MFRS 139. The expected credit losses model is forward-looking and eliminates the need for a trigger event to have occurred before credit losses are recognised.

- Amendments to MFRS 4 - Applying MFRS 9 “Financial Instruments” with MFRS 4 (“Insurance Contracts”). The amendments allow entities to avoid temporary volatility in profit or loss that might result from adopting MFRS 9 “Financial Instruments” before the forthcoming new insurance contracts standard. This is because certain financial assets have to be measured at fair value through profit or loss under MFRS 9; whereas, under MFRS ‘Insurance Contracts’, the related liabilities from insurance contracts are often measured on amortised cost basis.

  The amendments provide 2 different approaches for entities: (i) a temporary exemption from MFRS 9 for entities that meet specific requirements; and (ii) the overlay approach. Both approaches are optional.

  The temporary exemption enables eligible entities to defer the implementation date of MFRS 9 for annual periods beginning before 1 January 2021 at the latest. An entity may apply the temporary exemption from MFRS 9 if its activities are predominantly connected with insurance whilst the overlay approach allows an entity to adjust profit or loss for eligible financial assets by removing any accounting volatility to other comprehensive income that may arise from applying MFRS 9.

  An entity can apply the temporary exemption from MFRS 9 from annual periods beginning on or after 1 January 2018. An entity may start applying the overlay approach when it applies MFRS 9 for the first time.

  The Company’s business activity is predominantly insurance as the liabilities connected with the Company’s insurance businesses made up of more than 90% of the Company’s total liabilities. Hence, the Company qualifies for the temporary exemption from applying MFRS 9 and intends to defer and adopt MFRS 9 together with MFRS 17, Insurance Contracts for the financial year beginning on or after 1 January 2021.

The Group has yet to fully assess the impact of the standard and amendment on its financial position and results of operations.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- Amendments to MFRS 140 "Classification on 'Change in Use' – Assets transferred to/from, Investment Properties" (effective from 1 January 2018) clarify that to transfer to/from investment properties, there must be a change in use. A change in use would involve an assessment of whether a property meets, or has ceased to meet, the definition of investment property. The change must be supported by evidence that the change in use has occurred and a change in management's intention in isolation is not sufficient to support a transfer of property.

  The amendments also clarify the same principle applies to assets under construction.

- IC Interpretation 22 "Foreign Currency Transactions and Advance Consideration" (effective from 1 January 2018) applies when an entity recognises a non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. MFRS 121 requires an entity to use the exchange rate at the 'date of the transaction' to record foreign currency transactions.

  IC Interpretation 22 provides guidance on how to determine 'the date of transaction' when a single payment/receipt is made, as well as for situations where multiple payments/receipts are made.

  The date of transaction is the date when the payment or receipt of advance consideration gives rise to the non-monetary asset or non-monetary liability when the entity is no longer exposed to foreign exchange risk.

  If there are multiple payments or receipts in advance, the entity should determine the date of the transaction for each payment or receipt.

  An entity has the option to apply IC Interpretation 22 retrospectively or prospectively.

The Group has assessed the impact of the new interpretation on its financial position and results and it is not expected to have a material impact on the financial position or results of the Group.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- MFRS 15 'Revenue from contracts with customers' (effective from 1 January 2018) replaces MFRS 118 'Revenue' and MFRS 111 'Construction contracts' and related interpretations. The core principle in MFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to the customer in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

  Revenue is recognised when a customer obtains control of goods or services, i.e. when the customer has the ability to direct the use of and obtain the benefits from the goods or services.

  A new five-step process is applied before revenue can be recognised:

  - Identify contracts with customers;
  - Identify the separate performance obligations;
  - Determine the transaction price of the contract;
  - Allocate the transaction price to each of the separate performance obligations; and
  - Recognise the revenue as each performance obligation is satisfied.

  Key provisions of the new standard are as follows:

  - Any bundled goods or services that are distinct must be separately recognised, and any discounts or rebates on the contract price must generally be allocated to the separate elements.
  - If the consideration varies (such as for incentives, rebates, performance fees, royalties, success of an outcome etc), minimum amounts of revenue must be recognised if they are not at significant risk of reversal.
  - The point at which revenue is able to be recognised may shift: some revenue which is currently recognised at a point in time at the end of a contract may have to be recognised over the contract term and vice versa.
  - There are new specific rules on licenses, warranties, non-refundable upfront fees, and consignment arrangements.
  - As with any new standard, there are also increased disclosures.

  The Group has assessed the impact of adoption of MFRS 15 on its financial position and results and it is assessed that it will not have a significant financial impact to the financial position or results of the Group.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- Amendments to MFRS 2 'Share-based Payment – Classification and Measurement of Share-based Payment Transactions' (effective from 1 January 2018) clarifies that the fair value of a cash-settled award is determined on a basis consistent with that used for equity-settled awards, where the impact of vesting and non-vesting conditions is considered.

  Specifically, market performance conditions and non-vesting conditions are reflected in the estimation of fair value of the cash-settled award, whilst non-market performance conditions and service conditions are reflected in the estimate of the number of awards expected to vest. This method differs from the concept of "fair value" in MFRS 13 'Fair Value Measurement' ('MFRS 13').

  The amendments introduce an exception to the principles of MFRS 2 when an employer is obliged under the tax law to withhold some of the shares to which an employee is entitled under a share-based payment award and to remit the employee's tax obligation to the tax authority on behalf of the employee.

  The amendments require an entity to account for awards with such a feature as equity-settled share-based payment instead of dividing the award into 2 components; the tax portion as cash-settled and the net amount of shares issued to the employee as equity-settled.

  The amendments clarify that when an award is modified from cash-settled to equity-settled, the liability for the original award is derecognised, and the modified equity-settled award is recognised in equity to the extent of goods or services received at the modification date.

  The modified award is measured by reference to the fair value of the equity instruments on the modification date. The resultant difference is recognised in profit or loss.

  Earlier application is permitted and should be disclosed.

  Based on the assessment performed to date, the Group does not expect amendments to MFRS 2 to have a significant effect on its financial position and results.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- MFRS 16 “Leases” (effective from 1 January 2019) supercedes MFRS 117 “Leases” and the related interpretations.

  Under MFRS 16, a lease is a contract (or part of a contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

  MFRS 16 eliminates the classification of leases by the lessee as either finance leases (on balance sheet) or operating leases (off balance sheet). MFRS 16 requires a lessee to recognise a “right-of-use” of the underlying asset and a lease liability reflecting future lease payments for most leases.

  The right-of-use asset is depreciated in accordance with the principle in MFRS 116 “Property, Plant and Equipment” and the lease liability is accreted over time with interest expense recognised in the income statement.

  For lessors, MFRS 16 retains most of the requirements in MFRS 117. Lessors continue to classify all leases as either operating leases or finance leases and account for them differently.

  The Group has assessed the impact of initial application of MFRS 16 to its financial position and results of operations.

  As at the reporting date, the Group has non-cancellable operating lease commitments of RM596,429. Of these commitments, approximately RM596,429 relate to short-term leases which will be recognised on a straight-line basis as expense in the income statements.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- MFRS 16 "Leases" (effective from 1 January 2019) supercedes MFRS 117 "Leases" and the related interpretations (continued)

  For the remaining lease commitments, the Group expects to recognise right-of-use assets of approximately RM97,979,046 on 1 January 2019, lease liabilities of RM97,979,046 (after adjustments for prepayments and accrued lease payments recognised as at 31 December 2018).

  Operating cash flows will decrease and financing cash flows will increase by approximately RM24,419,098 as repayment of the principal portion of the lease liabilities will be classified as cash flows from financing activities.

  Based on the assessment performed, the Group's activities as a lessor are not material and therefore the Group does not expect the adoption of MFRS 16 to have a significant impact on the financial statements.

- IC Interpretation 23 "Uncertainty over Income Tax Treatments" (effective 1 January 2019) provides guidance on how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment.

  If an entity concludes that it is not probable that the tax treatment will be accepted by the tax authority, the effect of the tax uncertainty should be included in the period when such determination is made. An entity shall measure the effect of uncertainty using the method which best predicts the resolution of the uncertainty.

  IC Interpretation 23 will be applied retrospectively.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

<u>Financial year beginning on/after 1 January 2019</u> (continued)

- Amendments to MFRS 128 'Long-term Interests in Associates and Joint Ventures' (effective from 1 January 2019) clarify that an entity should apply MFRS 9 'Financial Instruments' (including the impairment requirements) to long-term interests in an associate or joint venture, which are in substance form part of the entity's net investment, for which settlement is neither planned nor likely to occur in the foreseeable future.

  In addition, such long-term interest are subject to loss allocation and impairment requirements in MFRS 128.

  The amendments shall be applied retrospectively.

- Amendments to MFRS 9 'Prepayment features with negative compensation' (effective 1 January 2019) allow companies to measure some prepayable financial assets with negative compensation at amortised cost. Negative compensation arises where the contractual terms permit the borrower to prepay the instrument before its contractual maturity, but the prepayment amount could be less than the unpaid amounts of principal and interest. To qualify for amortised cost measurement, the negative compensation must be reasonable compensation for early termination of the contract, and the asset must be held within a "held to collect" business model.

  The amendments will be applied retrospectively.

- Annual Improvements to MFRSs 2015 – 2017 Cycle:

  Amendments to MFRS 3 'Business Combinations' (effective from 1 January 2019) clarify that when a party obtains control of a business that is a joint operation, the acquirer should account the transaction as a business combination achieved in stages. Accordingly it should remeasure its previously held interest in the joint operation (rights to the assets and obligations for the liabilities) at fair value on the acquisition date.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

Financial year beginning on/after 1 January 2019 (continued)

- Annual Improvements to MFRSs 2015 – 2017 Cycle: (continued)

  Amendments to MFRS 112 'Income Taxes' (effective from 1 January 2019) clarify that where income tax consequences of dividends on financial instruments classified as equity is recognised (either in profit or loss, other comprehensive income or equity) depends on where the past transactions that generated distributable profits were recognised. Accordingly, the tax consequences are recognised in profit or loss when an entity determines payments on such instruments are distribution of profits (that is, dividends). Tax on dividend should not be recognised in equity merely on the basis that it is related to a distribution to owners.

  Amendments to MFRS 123 'Borrowing Costs' (effective from 1 January 2019) clarify that if a specific borrowing remains outstanding after the related qualifying asset is ready for its intended use or sale, it becomes part of general borrowings.

- Amendments to MFRS 119 'Plan amendment, curtailment or settlement' (effective 1 January 2019) requires an entity to use the updated actuarial assumptions from remeasurement of its net defined benefit liability or asset arising from plan amendment, curtailment or settlement, to determine current service cost and net interest for the remaining period after the change to the plan. The amendments will be applied prospectively.

The Group has assessed the impact of these new standards on its financial position and results and they are not expected to have a material impact on the financial position or results of the Group.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group will apply the new standards, amendments to standards and interpretations in the following period: (continued)

<u>Financial year beginning on/after 1 January 2021</u>

- MFRS 17 “Insurance Contracts” replaces MFRS 4 “Insurance Contracts” applies to insurance contracts issued, to all reinsurance contracts and to investment contracts with discretionary participating features if an entity also issues insurance contracts. For fixed-fee service contracts whose primary purpose is the provision of services, an entity has an accounting policy choice to account for them in accordance with either MFRS 17 or MFRS 15 “Revenue”. An entity is allowed to account financial guarantee contracts in accordance with MFRS 17 if the entity has asserted explicitly that it regarded them as insurance contracts. Insurance contracts, (other than reinsurance) where the entity is the policyholder are not within the scope of MFRS 17. Embedded derivatives and distinct investment and service components should be ‘unbundled’ and accounted for separately in accordance with the related MFRSs. Voluntary unbundling of other components is prohibited.

  MFRS 17 requires a current measurement model where estimates are remeasured at each reporting period. The measurement is based on the building blocks of discounted, probability-weighted cash flows, a risk adjustment and a contractual service margin (“CSM”) representing the unearned profit of the contract. An entity has a policy choice to recognise the impact of changes in discount rates and other assumptions that are related to financial risks either in profit or loss or in other comprehensive income.

  Alternative measurement models are provided for the different insurance coverages:
  a) Simplified premium allocation approach if the insurance coverage period is a year or less; and
  b) Variable fee approach should be applied for insurance contracts that specify a link between payments to the policyholders and the returns on the underlying items.

  The requirements of MFRS 17 align the presentation of revenue with other industries. Revenue is allocated to the periods in proportion to the value of the expected coverage and other services that the insurer provides in the period, and claims are presented when incurred. Investment components are excluded from revenue and claims.

  Insurers are required to disclose information about amounts, judgements and risks arising from insurance contracts.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Changes in accounting policies and effects arising from adoption of revised MFRS (continued)

(b) Standards, amendments to published standards and interpretations to existing standards that are relevant to the Group but are not effective for the financial period ended 31 December 2018 and have not been early adopted (continued)

The Group is in the midst of conducting a detailed assessment of the new standard. The standard is currently mandatorily effective for financial period beginning on or after 1 January 2021. In November 2018, International Accounting Standards Board ("IASB") has proposed to defer the adoption of IFRS 17 and a temporary exemption of the adoption of IFRS 9 for insurers until the financial period beginning on or after 1 January 2022.

2.4 Critical accounting estimates and judgements in applying accounting policies

In the preparation of the financial statements, management has made judgements and estimates in applying accounting policies in respect of the reported amounts of assets, liabilities, income and expenses. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The following are the judgements made by management that have the most significant effect on the amounts recognised in the financial statements:

Key sources of estimation uncertainty

(a) Actuarial liabilities for life insurance contracts and premium liabilities for accident & health contracts

There are several sources of uncertainty in the estimation of these liabilities, including future mortality and morbidity, withdrawals, expenses and discount rates. In developing the operating assumptions, management has utilised the Company's actual historical experience wherever available. For certain products where experience is limited, experience for similar products or pricing assumptions has been used.

Prescribed risk-free discount rates are used for discounting of cash flows to value Ringgit Malaysia denominated liabilities of non-DPF life policies, the guaranteed liabilities under participating policies and the non-unit liabilities of investment-linked policies. The risk-free discount rate was based on a weighted average of zero-coupon spot yields of Malaysian Government Securities ("MGS"). Where total guaranteed and non-guaranteed benefits of the DPF funds are considered, the discount rate assumed is the current portfolio yield graded to the long-term interest rate assumption for the DPF fund.

The key assumptions used and the sensitivity analysis on the key assumptions as at 31 December 2018, based on the change in one specific assumption while holding all other assumptions constant are disclosed in Note 36 to the financial statements.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.4 Critical accounting estimates and judgements in applying accounting policies (continued)

The following are the judgements made by management that have the most significant effect on the amounts recognised in the financial statements: (continued)

Key sources of estimation uncertainty (continued)

(b) Valuation of general insurance contract liabilities

For general insurance contracts, Bornheutter-Ferguson ("BF") methods are used to estimate the ultimate cost of outstanding claims.

BF method basically assumes that the claim experience for an accident year will produce a particular loss ratio and adjusted with subsequent actual claim experience.

The estimates of general insurance contract liabilities are therefore sensitive to various factors and uncertainties. These uncertainties may arise from changes in expected loss ratio used for each accident years and changes in average claim settlement period. Thus, the general settlement of eventual insurance contract liabilities may vary from the estimates.

The key assumptions used and the sensitivity analysis on the key assumptions as at 31 December 2018, based on the change in one specific assumption while holding all other assumptions constant are disclosed in Note 36 to the financial statements.

(c) Valuation of investment properties and properties held for own use

The Group uses independent professional valuers to determine the fair value of properties on the basis of highest and best use of the properties that is physically possible, legally permissible and financially feasible. In most cases, current use of the properties are considered to be its highest and best use. Different valuation approaches may be adopted to reach the fair value of a property. Under the market data approach, records of recent sales and offerings of similar properties are analysed and comparisons are made for factors such as size, location, quality and prospective use.

For investment properties, the discounted cash flow approach is used by reference to net rental income allowing for reversionary income potential to estimate the fair value of the properties. In some occasions, the cost approach is used as well to calculate the fair value which reflects the cost that would be required to replace the service capacity of the property.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE 13 MONTHS PERIOD ENDED 31 DECEMBER 2018 (CONTINUED)

3 PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

Properties held for own use are carried at fair value at the reporting date less accumulated depreciation. The Group and the Company use independent professional valuers to determine the fair value of properties on the basis of the highest and best use of the properties that is physically possible, legally permissible and financially feasible.

In most cases, current use of the properties is considered to be the highest and best use for determining the fair values and are determined based on appropriate valuation techniques which may consider among other income projection, value of comparable property and adjustments for factors such as size, location, quality and prospective use. These valuation inputs are deemed unobservable inputs under the level 3 fair value hierarchy.

Increases in revaluation surplus on properties held for own use of RM8 million (2017: RM8 million) for the Group and Company were recognised in other comprehensive income during the financial period.

The net book value of revalued buildings had these assets been carried at cost less accumulated depreciation are as follows:

	Group and Company	
	31.12.2018	30.11.2017
	RM'000	RM'000
Freehold land	6,440	11,046
Leasehold land	5,503	6,187
Buildings owner occupied properties	159,538	179,744

The table below set out the summary of changes in level 3 fair value for financial assets during the financial period.

	Group and Company		
	Freehold land	Leasehold land	Building owner occupied properties
	RM'000	RM'000	RM'000
At 30 November 2016	141,989	11,515	230,803

7 INVESTMENT IN SUBSIDIARIES

	Company 31.12.2018 RM'000	Company 30.11.2017 RM'000
Unquoted shares, at cost	253,000	163,000

The Company has increased its investment in AIA General Berhad ("AIAGB") by RM90,000,000 on 29 June 2018 for the purpose of maintaining a capital adequacy level that commensurates with AIAGB's risk profiles after its acquisition of the General Insurance business of the Company.

7 INVESTMENT IN SUBSIDIARIES (CONTINUED)

Details of the subsidiaries are as follows:

Name	Country of incorporation	Effective interest 2018 %	Effective interest 2017 %	Principal activities
AIA General Berhad	Malaysia	100	100	Changed from investment holding to underwriting of general insurance business on 1 July 2018.
AIA Pension and Asset Management Sdn. Bhd. ("APAM")	Malaysia	100	100	Managing private retirement scheme and asset management business.

Interests in structured entities

The Group has determined that the investment funds and structured securities, such as mortgage-backed securities, mutual funds and real estate investment trust funds that the Group has interest are structured entities.

The following tables summarise the Group's interest in unconsolidated structured entities as at 31 December 2018:

	Group and Company	
	Investment funds RM'000	Structured securities[1] RM'000
At 31 December 2018		
Available for sale debt securities	-	90,222
Debt securities at fair value through profit or loss	-	592,015
Equity securities at fair value through profit or loss	2,132,207[2]	-
	2,132,207	682,237

7 INVESTMENT IN SUBSIDIARIES (CONTINUED)

Interests in structured entities

The following tables summarise the Group's interest in unconsolidated structured entities as at 30 November 2017:

	Group	
	Investment funds RM'000	Structured securities[1] RM'000
At 30 November 2017		
Available for sale debt securities	-	98,538
Debt securities at fair value through profit or loss	-	677,893
Equity securities at fair value through profit or loss	1,926,062[2]	-
	1,926,062	776,431

	Company	
	Investment funds RM'000	Structured securities[1] RM'000
At 30 November 2017		
Available for sale debt securities	-	95,517
Debt securities at fair value through profit or loss	-	677,893
Equity securities at fair value through profit or loss	1,926,062[2]	-
Assets of a disposal group classified as held-for-sale	-	3,021
	1,926,062	776,431

Notes:

(1) Structured securities include mortgage-backed securities.

(2) Balance represents the Group's interests in mutual funds and real estate investment trusts.

The Group's maximum exposure to loss arising from its interests in these unconsolidated structured entities is limited to the carrying amount of the assets. Dividend income and interest income are received during the reporting period from these interests in unconsolidated structured entities.

In addition, the Group receives management fees in respect of providing management and administrative services to certain investment funds. As the investment funds are not held by the Group and the associated investment risks are not borne by the Group, the Group does not have exposure to losses in these funds.

8 INVESTMENT IN ASSOCIATES

	Group		Company

Insurance payables	(6,402,367)	5,453	(6,396,914)
	(6,072,649)	-	(6,072,649)
2017			
Continuing operations			
Insurance receivables	314,690	(670)	314,020
Insurance payables	(6,114,882)	670	(6,114,212)
	(5,800,192)	-	(5,800,192)

Certain amount due from reinsurers and amount due to reinsurers were set off for presentation purpose because they have enforceable right to set off and they intend either to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

14 DISPOSAL GROUP CLASSIFIED AS HELD-FOR-SALE

Discontinued operations

In accordance with the requirements of the FSA, an insurer that carries on both classes of life insurance and general insurance businesses must take steps to split the businesses under separate legal entities before 1 July 2018.

The Directors have on 23 February 2017 approved the separation of the general insurance and life insurance businesses of the Company pursuant to the requirements of the FSA. Approval from BNM has been obtained to transfer the general insurance business to AIAGB with effective date of transfer on 1 July 2018 for a total consideration of RM15,078,000 equivalent to the net asset value of the general insurance business transferred.

For the financial year ended 30 November 2017, the assets and liabilities of the general insurance business of the Company have been presented as a disposal group classified as held-for-sale in the statements of financial position while the operating results and cash flows of the general insurance business have been classified as discontinued operations in the income statements, statements of comprehensive income and statements of cash flows. There is no impact to the Group level as AIAGB is a wholly-owned subsidiary of the Company.

(A) The carrying amounts of assets and liabilities transferred to AIAGB as at the date of transfer on 1 July 2018 were as follows:

	RM'000
Property and equipment (Note 3)	364
Intangible assets (Note 6)	3,928
Available-for-sale financial assets (Note 9)	184,012
Fair value through profit or loss financial assets (Note 10)	5,190
Loans and receivables	93,595
Reinsurance assets (Note 18)	16,814
Insurance receivables	33,861
Cash and cash equivalents	3,465
Total assets	341,229
Insurance contract liabilities (Note 18)	308,231
Insurance payables	7,186
Deferred tax liabilities (Note 19)	747
Other payables	9,987
Total liabilities	326,151
Carrying amounts of net assets transferred	15,078

14 DISPOSAL GROUP CLASSIFIED AS HELD-FOR-SALE (CONTINUED)

Discontinued operations (continued)

(B) The components of assets and liabilities held-for-sale attributable to the discontinued operations are as follows:

(i) Assets of a disposal group classified as held-for-sale

	31.12.2018 RM'000	30.11.2017 RM'000
Property, plant and equipment (Note 3)	-	401

Discontinued operations (continued)

(B) The components of assets and liabilities held-for-sale attributable to the discontinued operations are as follows: (continued)

(iii) Liabilities of a disposal group classified as held-for-sale (continued)

	31.12.2018 RM'000	30.11.2017 RM'000
(e) Insurance payables:		
Due to reinsurers	-	4,359
Due to agents and insured	-	8,410
	-	12,769
(f) Other payables:		
Post employment benefit obligation		
- Defined benefit plan	-	4,213
Other payables	-	9,511
	-	13,724

The carrying amounts of insurance payables and other payables approximate their fair values as at the date of the statements of financial position due to the relatively short-term maturity of these balances.

(C) The components of the statement of cash flows held-for-sale attributable to the discontinued operations are as follows:

	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000
Operating cash flows	(37,745)	32,579
Investing cash flows	(554)	(601)
Financing cash flows	11,613	(19,196)
Net (decrease)/increase in cash and cash equivalents	(26,686)	12,782
Cash and cash equivalents at 1 December	26,686	13,904
Cash and cash equivalents at 31 December/30 November	-	26,686

15 FAIR VALUE MEASUREMENTS

Fair value measurements on a recurring basis

The Group measures at fair value for financial instruments classified at fair value through profit or loss, available for sale and investments in non-consolidated investment funds on a recurring basis. The fair value of a financial instrument is the amount that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The degree of judgement used in measuring the fair value of financial instruments generally correlates with the level of pricing observability. Financial instruments with quoted prices in active markets generally have more pricing observability and less judgement is used in measuring fair value. Conversely, financial instruments traded in other than active markets or that do not have quoted prices have less observability and are measured at fair value using valuation models or other pricing techniques that require more judgement. An active market is one in which transactions for the asset or liability being valued occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

An other than active market is one in which there are few transactions, the prices are not current, price quotations vary substantially either over time or among market makers, or in which little information is released publicly for the asset or liability being valued. Pricing observability is affected by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and general market conditions.

The Group does not have assets or liabilities measured at fair value on a non-recurring basis during the financial period ended 31 December 2018.

The following methods and assumptions were used by the Group to estimate the fair value of financial instruments:

Level 1 - Financial instruments measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, secondary market via dealer and broker, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm’s length basis.

Level 2 - Financial instruments measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions for which pricing is obtained via pricing services but where prices have not been determined in an active market, instruments with fair values based on broker quotes, investment in unit and property trusts with fair values obtained via fund managers and instruments that are valued using the Group’s own models whereby the majority of assumptions are market observable.

15 FAIR VALUE MEASUREMENTS (CONTINUED)

Fair value measurements on a recurring basis (continued)

Level 3 - Financial instruments measured in whole or in part using a valuation technique based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The main asset class in this category is unquoted equity securities. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the instrument at the measurement date. However, the fair value measurement objective remains the same, that is, an exit price at the measurement date from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the instrument (including assumptions about risk). These inputs are developed based on the best information available, which might include the Group's own data.

The Group's policy is to recognise transfers of assets and liabilities between Level 1 and Level 2 at their fair values as at the end of each reporting period, consistent with the date of the determination of fair value. Assets are transferred out of Level 1 when they are no longer transacted with sufficient frequency and volume in an active market. During the financial period ended 31 December 2018, there is no transfer of assets measured at fair value from Level 1 to Level 2. Conversely, assets are transferred from Level 2 to Level 1 when transaction volume and frequency are indicative of an active market. There is no transfer of assets from Level 2 to Level 1 during the financial period ended 31 December 2018.

The Group's Level 2 financial instruments include debt securities, deposits with licensed bank and Malaysian government guarantee loans. The fair values of Level 2 financial instruments are estimated using values obtained from private pricing services and brokers corroborated with internal review as necessary. When the quotes from third-party pricing services and brokers are not available, internal valuation techniques and observable inputs will be used to derive the fair value for the financial instruments.

Significant unobservable inputs for Level 3 fair value measurements

The following table shows the valuation techniques used in determination of fair values within Level 3, as well as the significant unobservable inputs used in the valuation models:

Description	**Valuation techniques**	**Valuation unobservable inputs**
Private equity funds	Net asset value	Net asset value
Common and preferred shares of private companies	Cost	Cost
Investment properties and properties held for own use	Discounted cash flows	Expected market rental growth, discount rate and yield

15 FAIR VALUE MEASUREMENTS (CONTINUED)

Valuation processes

The Group has the valuation policies, procedures and analyses in place to govern the valuation of financial assets required for financial reporting purposes, including Level 3 fair values. In determining the fair values of financial assets, the Group in general uses third-party pricing providers and, only in rare cases when no third-party prices exist, will use prices derived from internal models. Chief Investment Officers of the Group are required to review the reasonableness of the prices used and report price exceptions, if any. The Group's investment team analyses reported price exceptions and reviews price challenge responses from third party pricing providers and provides the final recommendation on the appropriate price to be used. Any changes in valuation policies are reviewed and approved by the Group Pricing Committee ("GPC") which is part of the Group's wider financial risk governance processes. Changes in Level 2 and 3 fair values are analysed at each reporting date.

A significant increase/(decrease) in any of the unobservable input may result in a significantly lower/(higher) fair value measurement. The Group has subscriptions to private pricing services for gathering such information. If the information from private pricing services is not available, the Group uses the proxy pricing method based on internally-developed valuation inputs.

Fair value for assets and liabilities for which fair value is disclosed at reporting date

A summary of the fair value hierarchy of assets and liabilities not carried at fair value but for which fair value is disclosed as at 31 December 2018 is set out below.

Basic earnings per share (sen)	125.4	105.4	120.3	105.9

17 RETAINED EARNINGS

Under the single tier system, there are no restrictions on the Company to frank the payment of dividends out of its entire retained earnings as at the date of the statements of financial position.

The Company may distribute single tier exempt dividend to its shareholders out of its retained earnings. Pursuant to Section 51(1) of the FSA, the Company is required to obtain BNM's written approval prior to declaring or paying any dividend with effect from financial year beginning 1 December 2016. Pursuant to the RBC Framework for Insurers, the Company shall not pay dividends if its Capital Adequacy Ratio ("CAR") position is less than its internal target capital level or if the payment of dividend would impair its CAR position to below its internal target.

19 DEFERRED TAX LIABILITIES

Deferred tax assets and liabilities are offsetted when there is a legally enforceable right to set-off current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The net deferred tax assets/liabilities shown in the statements of financial position are determined after appropriate offsetting.

33 OPERATING LEASE ARRANGEMENTS

(a) The Company as lessee

The Company has entered into operating lease agreements for the use of buildings, computers and printers.

The future aggregate minimum lease payments payable under the operating leases contracted for as at the reporting date but not recognised as liabilities, are as follows:

	Group and Company	
	31.12.2018	**30.11.2017**
	RM'000	**RM'000**
Future minimum rental payments:		
Not later than 1 year	27,985	20,561
Later than 1 year and not later than 5 years	32,634	47,114
More than 5 years	-	3,599
	60,619	71,274

The lease payments recognised in the income statements during the financial period are disclosed in Note 29 to the financial statements.

(b) The Company as lessor

The future aggregate minimum lease payments receivable under the operating leases contracted for as at the reporting date but not recognised as receivables, are as follows:

	Group	
	31.12.2018	**30.11.2017**
	RM'000	**RM'000**
Not later than 1 year	18,146	17,730
Later than 1 year and not later than 6 years	11,774	7,453
More than 6 years	2,359	-
	32,279	25,183

	Company	
	31.12.2018	**30.11.2017**
	RM'000	**RM'000**
Not later than 1 year	19,570	17,685
Later than 1 year and not later than 6 years	12,166	7,502
More than 6 years	2,359	-
	34,095	25,187

Rental income recognised in the income statements during the financial period are disclosed in Note 24 to the financial statements.

34 RELATED PARTY DISCLOSURES

In the normal course of business, the Group and the Company undertake various transactions with the immediate holding company and other related corporations deemed related parties by virtue of them being members of AIA Group Limited and its subsidiaries ("AIA Group"). These transactions were carried out on terms and conditions negotiated between the related parties.

(a) Significant related party transactions

The following are the significant transactions held by the Group and the Company with the related parties during the financial period:

	Group		Company	
	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000

Allowances	1,094	944	1,094	944
	34,958	24,061	34,526	24,061

Included in the compensation of key management personnel are:

	Group and Company	
	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000
Executive Director: (Note 29)		
- Remuneration	3,066	2,613
- Share-based payments	1,306	932
- Other remuneration or emoliments	532	420
	4,904	3,965

35 RISK MANAGEMENT

Risk Management Framework

The Company's Risk Management Framework consist of the following key components – Risk Culture, Risk Management Process, Risk Governance, Risk Appetite and Risk Landscape as set out in part of the Directors' Report on Statement on Corporate Governance on Internal Control Framework.

Capital Management Framework

The Company actively manages its capital adequacy by taking into account the potential impact of business strategies on the Company's risk profile and overall resilience. This is in line with BNM Guidelines on Internal Capital Adequacy Assessment Process ("ICAAP") for Insurers and the Risk-Based Capital Framework for Insurers ("RBC Framework").

Under the RBC Framework, the Company has to maintain a capital adequacy level that is commensurate with its risk profiles at all times. The Capital Adequacy Ratio of the Company remained well above the minimum capital requirement of 130% under the RBC Framework, regulated by BNM.

The ICAAP is the overall process (including oversight and operational frameworks and processes) by which the Company ensures adequate capital to meet its capital requirements on an ongoing basis. The key elements of ICAAP includes Board and senior management oversight; comprehensive risk assessment; individual target capital level and stress testing; sound capital management and ongoing monitoring, reporting and review of the ICAAP.

A capital management plan has been established which list the thresholds that act as triggers for actions to ensure maintenance of appropriate capital levels at all times as well as the corresponding corrective actions that are required for different scenarios and at each specified thresholds. Results of stress tests shall be considered when evaluating the appropriateness of capital thresholds and corrective actions with consideration of the particular stage of the business cycle in which the Company is operating, given the potential changes in the external environment that could affect the risk profile.

The Company sets an Individual Target Capital Level ("ITCL") that reflects the overall risk tolerance and risk appetite set by the Board, its own risk profile and risk management practices. The Company shall operate at capital levels above ITCL at all times. The ITCL provides a robust threshold in the management of capital adequacy, where a breach of this level would trigger timely responses by management to restore capital to the ITCL and heighten the Board's scrutiny based on the Capital Management Plan.

The planning and assessment of capital and ITCL will be formally conducted by senior management at least annually or as and when the need arises. The result will be reported to the Board and/or the Board's RMC.

35 RISK MANAGEMENT (CONTINUED)

Governance and Regulatory Framework

The Group's risk governance framework is built on the "three lines of defence" model. With regards to risk management, the objective is to ensure that an appropriate framework is in place, including an independent system of checks and balances to provide assurance that risks are identified, assessed, managed and governed properly. The framework clearly defines roles and responsibilities for the management of risks between the Executive Management, Compliance and Enterprise Risk Management and Internal Audit functions. While each line of defence is independent from the others, they work closely to ensure effective oversight.

The Group is required to comply with the requirements of the relevant regulations, laws and guidelines including those from BNM, Securities Commission, Life Insurance Association of Malaysia ("LIAM") and Persatuan Insurans Am Malaysia ("PIAM").

The Group has complied with the capital requirements prescribed by BNM during the reported financial period.

36 INSURANCE RISK

Insurance risk is the risk arising from changes in claims experience as well as more general exposure relating to the acquisition and persistency of insurance business. This also includes changes to actuarial and investment assumptions regarding future experience for these risks.

The Group considers insurance risk to be a combination of the following component risks:

(a) Product design risk;
(b) Pricing and underwriting risk;
(c) Lapse risk; and
(d) Claims volatility risk

The Group manages its exposure to insurance risk across a spectrum of components. The Group has significant underwriting and actuarial resources, and has implemented well-defined underwriting and actuarial guidelines and practices. The Group has accumulated substantial experience which assists in the evaluation, pricing and underwriting of its products. The Group's Product Development Committee ("PDC") and Financial Risk Committee ("FRC") play an important oversight role in relation to these insurance related risks, as discussed below. Insurance risk exposure is also considered when FRC reviews the strategic asset allocation plan and asset-liability management strategies.

(a) Product design risk

Product design risk refers to potential defects in the development of a particular insurance product. Product development process is overseen by PDC, which oversees the pricing guidelines set by the Group. The Group seeks to manage this risk by completing pre-launch reviews of each new product including product management, actuarial, legal and underwriting. The Group has substantial experience and has developed significant expertise in identifying potential flaws in product development that could expose the Group to excessive risks. The Group monitors closely the performance of new products and focus on actively managing each part of the actuarial control cycle to minimise risk in both in-force policies and new products.

36 INSURANCE RISK (CONTINUED)

(b) Pricing and underwriting risk

Pricing and underwriting risk refers to the possibility of product related income being inadequate to support future obligations arising from an insurance product. The Group seeks to manage pricing and underwriting risk by adhering to its underwriting guidelines.

The Group maintains a team of professional underwriters who review and select risks consistent with acceptable risk profile and underwriting strategy. In certain circumstances, such as when the Group enters into new lines of business, products or markets and do not have sufficient experience data, it makes use of reinsurers to obtain product pricing expertise. The use of reinsurance subjects the Group to the risk that the reinsurers become insolvent or fail to make any payment when due to the Group. The credit risk of the reinsurer is addressed via the established Credit Risk management process. The Group allows for an appropriate level of expenses in its product pricing that reflects a realistic medium to long term view of its cost structure. In the daily operations, the Group adheres to a disciplined expense budgeting and management process that controls expenses within the product pricing allowances over the medium to long term.

(c) Lapse risk

Lapse risk refers to the possibility of actual lapse experience that diverges from the anticipated experience assumed when products were priced. It includes the potential financial loss incurred due to early termination of policies or contracts in circumstances where the acquisition costs incurred are no longer recoverable from future revenue. The Group carries out regular reviews of persistency experience and the results are assimilated into new and in-force product management. In addition, many of the Group's products include surrender charges that entitle the Group to additional fees upon early termination by policyholders, thereby reducing its exposure to lapse risk.

(d) Claims volatility risk

Claims volatility risk refers to the possibility that the frequency or severity of claims arising from insurance products exceed the levels assumed when the products were priced. Firstly, the Group seeks to mitigate claims risk by conducting regular experience studies, including reviews of mortality and morbidity experience, reviewing internal and external data, and considering the impact of such information on reinsurance needs, product design and pricing. Secondly, the Group mitigates this risk by adhering to the underwriting and claims management policies and procedures that have been developed based on its extensive historical experience. Thirdly, broad product offering and large in-force product portfolio also reduce the Group’s exposure to concentration risk. The Group also uses reinsurance solutions to help reduce concentration risk.

36 INSURANCE RISK (CONTINUED)

(i) Life insurance contracts

The insurance risk of life insurance contracts consists of mortality/longevity and calamity risks. Mortality/longevity risk represents the risk of loss attributable to positive or negative changes in the assumed medical prognosis for life expectancy, occupational disability, illness and the need for long-term care as well as under-estimation of these probabilities. Calamity risk represents the risk of loss because of strong short-term fluctuation in the mortality rate, for example as a result of war or epidemics.

The table below shows the concentration of actuarial liabilities by types of contract reflecting product features of insurance risk associated.

36 INSURANCE RISK (CONTINUED)

(i) Life insurance contracts (continued)

Key assumptions

Mortality, total permanent disability and critical illness

Mortality, total permanent disability and critical illness assumptions were derived based on past experience, and expectation of current and future experience. For assumptions related to new morbidity risk, in the absence of credible experience, reference has been made to pricing assumptions.

Expense

Expense assumption was derived based on actual expense analysis which was translated into unit cost factors with appropriate expense carriers (e.g. per premium, per sum assured and per policy) and expense inflation rate was based on expectation of long-term consumer price index. In the absence of credible experience, reference has been made to pricing assumptions.

Lapse and surrender rates

Lapse rate assumption was derived based on past experience and best estimate of current and future experience. Lapse rate assumption vary by policy year, product type and/or premium payment method with different rates for regular and single premium products. Where experience for a particular product was not credible enough to allow any meaningful analysis to be performed, experience for similar products was used as a basis for future persistency experience assumptions. In the case of surrenders, the valuation assumes that current surrender value basis will continue to apply in the future.

Discount rate

The risk-free discount rate was derived from a yield curve, as follows:

1. For policies’ duration of less than 15 years: zero-coupon spot yields of MGS with matching duration; and
2. For policies’ duration of 15 years or more: zero-coupon spot yields of MGS with 15 years term to maturity.

Where total guaranteed and non-guaranteed benefits were considered, the discount rate used was the current portfolio yield (as at the valuation date) of the participating life funds graded linearly to the long-term interest rate over 9 years for AIA Participating Fund and 7 years for Business Acquired Participating Fund respectively. Long-term interest rate refers to the long-term interest assumption for the participating funds, which was determined based on the expected long term asset mix for the participating funds, historical yields on these asset classes over the last 5 years, as well as current market yields and future outlook. The graded period was determined based on the duration of the existing fixed income portfolio with reference to the relationship between asset and liability durations of the participating fund. The methodology for determining the participating portfolio interest rate, the grading period and the long-term interest rate assumption is consistent with the methodology adopted in the insurer’s annual bonus investigations.

36 INSURANCE RISK (CONTINUED)

(i) Life insurances contracts (continued)

Key assumptions (continued)

Sensitivities

The analysis below is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net actuarial liabilities included in insurance contract liabilities and profit after tax. The correlation of assumptions will have a significant effect in determining the insurance contract liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear. Sensitivity information will also vary according to the current economic assumptions.

		Group and Company	
	Change in assumption	Impact on gross/net actuarial liabilities	Impact on profit after tax
	%	RM'000	RM'000
2018			
Mortality	+10	275,880	(250,968)
Expense	+10	83,897	(41,317)
Lapse rate	+10	(101,268)	(56,143)
Discount rate	-0.5	74,613	(248,484)
2017			
Mortality	+10	588,619	(243,133)
Expense	+10	139,853	(38,937)
Lapse rate	+10	(39,759)	(59,370)
Discount rate	-0.5	378,485	(248,338)

The impact from changes in the above assumptions to insurance contracts with DPF has taken into consideration of the flexibility to adjust the policyholders' bonuses or dividends .

(ii) General insurance contracts

The insurance risk of general insurance contracts consists of premium and reserve risks. Premium risk represents the risk of loss because of an unexpected high loss volume resulting in an insufficient coverage of premiums. Reserve risks represents the risk of loss resulting from deviations between payments for incurred losses that have not yet been definitely settled and the reserves set up to cover these payments, or the use of an insufficient basis for the calculation of reserves.

36 INSURANCE RISK (CONTINUED)

(ii) General insurance contracts (continued)

Key assumptions

Expenses

Three elements of management expenses were considered, namely marketing, claims-related and premium-related expense. The premium-related expense is further segregated into two parts, i.e. a one-off expense incurred at the policy issuance and an on-going expense incurred during the policy period. Expense provision only takes into account the provision for claims-related expenses and the on-going premium-related expenses in outstanding claims liabilities and unexpired premium liabilities, respectively.

Premium liabilities

Premium liabilities for all classes of general insurance is the higher of Unexpired Risk Reserves (“URR”) at 75% probability of adequacy or Unearned Premium Reserves (“UPR”).

URR is assumed as the adjusted unearned premium reserve (net of reinsurance after adjustment for non-qualifying offshore reinsurance but gross of commission) multiplied by the resultant Ultimate Loss Ratio (“ULR”) for the most recent loss year.

Provision for claims related expenses and overhead expenses are added to the ultimate unexpired risk reserves plus Provision of Risk Margin for Adverse Deviation (“PRAD”) as follows:

- Provision for claims related expense at 10.0% of the unexpired risk to allow for internal claims expenses including staff costs and administrative expenses expected to be incurred in settling claims on the unexpired portion of risk. This rate was based on the most recent financial year’s data of claims-related expenses against outstanding claims reserves held at the beginning of the financial year.

- Provision for overhead expense at 10.0% of the UPR (gross of reinsurance and commission) to allow for on-going premium related expenses including staff costs and administrative expenses not related to settling claims. This rate is based on a historic comparison of management expenses against gross written premiums over the most recent financial year, apportioned to exclude claims expenses and upfront expenses like marketing and underwriting costs.

36 INSURANCE RISK (CONTINUED)

(ii) General insurance contracts (continued)

Key assumptions (continued)

Claim liabilities

Claim liabilities include provision for outstanding claims of Incurred But Not Reported ("IBNR") and Incurred But Not Enough Reported ("IBNER") claims on best estimate basis using the Link Ratio method with a Bornhueter-Ferguson adjustment on a paid claims basis for all classes of business. Provision for claims-related expense is included.

Explicit allowance is not made for future inflation. However an implicit allowance is made based on projection of past development rates of claim inflation contained within the historical claims development data.

Sensitivities

The general insurance claim liabilities are sensitive to the key assumptions shown below. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process.

The analysis below is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net claim liabilities included in insurance contract liabilities and profit after tax. The correlation of assumptions will have a significant effect in determining the ultimate claim liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear.

				Group
	Change in assumption %	Impact on gross insurance contract liabilities RM'000	Impact on net insurance contract liabilities RM'000	Impact on profit after tax RM'000
31.12.2018				
Expected loss ratio	+10	12,938	12,351	(9,387)
Provision for expenses	+10	896	896	(681)
PRAD	+10	1,169	1,074	(816)
30.11.2017				
Expected loss ratio	+10	12,590	11,957	(9,087)

Claims development table

The following tables show the estimate of cumulative incurred claims, including both claims notified and IBNR for each successive accident year at each date of the statement of financial position, together with cumulative payments to-date.

In setting provisions for claims, the Group gives consideration to the probability and magnitude of future experience being more adverse than assumed and exercises a degree of caution in setting reserves when there is considerable uncertainty. In general, the uncertainty associated with the ultimate claims experience in an accident year is greatest when the accident year is at an early stage of development and the margin necessary to provide the necessary confidence in adequacy of provision is relatively at its highest. As claims develop and the ultimate cost of claims becomes more certain, the relative level of margin maintained should decrease.

37 FINANCIAL RISKS

The Group is exposed to a range of financial risks, including credit risk, liquidity risk and market risk. The Group applies a consistent risk management philosophy that is embedded in management's processes and controls such that both existing and emerging risks are considered and addressed.

Financial risks of investment-linked investments are not further provided and analysed as the financial risks in respect of investment-linked investments are generally wholly borne by the policyholders, and do not directly affect the profit before tax. Furthermore, investment-linked policyholders are responsible for allocation of their policy values amongst investment options offered by the Group. Although profit before tax is not affected by investment-linked investments, the investment return from such financial investments is included in the Group's income statements, as the Group has selected the fair value option for all investment-linked investments with corresponding change in insurance contract liabilities for investment-linked contracts.

(a) Credit risk

Credit risk arises from the possibility of financial loss arising from default by borrowers and transactional counterparties and decrease in the value of financial instruments due to deterioration in credit quality. The key areas where the Group is exposed to credit risk include repayment risk are in respect of:

- cash and cash equivalents;
- investments in debt securities;
- loans and receivables (including insurance receivables); and
- reinsurance receivables.

The Group only takes risks that it understands and can manage effectively. In credit risk management this means combining a detailed, bottom-up approach to market and credit analysis that considers individual counterparties with a portfolio approach focusing on sectors, countries and concentrations.

The Group manages credit risk consistent with the Group's investment philosophy and risk appetite, as endorsed by the Board and the Board of Directors of the Group.

With respect to investing activities, investment objectives including asset allocation limits and permitted variances from such limits ("Investment Guidelines") undergo through the governance process which includes the Investment Committee ("IC"), Asset Liability Committee ("ALCO"), FRC and the Board.

The Group Investment (being the investment team in the Company and in Group Office) manages the investment assets of the Group within the Investment Guidelines, utilising a discipline consistent with an outsourced service provider.

Within the investment guidelines, credit risk-based risk tolerances are set by the FRC. Such tolerances are based on the Group's internal credit ratings framework as approved by the Group's FRC (the "AIA Credit Ratings Framework").

37 FINANCIAL RISKS (CONTINUED)

(a) Credit risk (continued)

The financial assets are classified according to the credit rating assessed by rating agencies approved by BNM.

The financial assets comprise Malaysian Government Securities and certain corporate debt securities which are not rated as these investments are issued by the government or guaranteed by government which were exempted from the need of getting rating from rating agencies. Other financial assets which are not rated comprise fixed and call deposits with licensed bank, and loans and receivables as the issuer did not obtain any credit rating from the respective rating agencies. Such financial assets although not rated are issued by companies which have sound financial and high creditworthiness. The creditworthiness of the issuer is monitored on any downgrade news related to any investment in the debt portfolio.

The Group's loans and receivables include policy loans, mortgage loans, other secured loans, staff loans and unsecured loans. Policy loans, mortgage loans, other secured loans and secured staff loans are generally secured by collateral. The amount of loan is based on the valuation of collateral as well as an assessment of the credit risk of the counterparty. Guidelines are implemented on the acceptability of the types of collateral and the valuation parameters.

The type of collaterals, held by the Group as lender, for which it is entitled to in the event of default is as follows:

	Type of collateral	Group 31.12.2018 RM'000	Group 30.11.2017 RM'000
Policy loans	Cash surrender value	1,501,355	1,543,840

Impaired financial assets

For assets to be classified as "past-due and impaired", contractual payments must be in arrears for more than three (3) months. The Group records impairment allowance for loan receivables, other receivables and insurance receivables in separate allowance for impairment accounts. A reconciliation of the allowance for impairment losses is as follows:

Group

	Loan receivables		Other receivables		Insurance receivables	
	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000	13 months period ended 31.12.2018 RM'000	12 months period ended 30.11.2017 RM'000

37 FINANCIAL RISKS (CONTINUED)

(b) Liquidity risk

Liquidity risk primarily refers to the possibility of having insufficient cash available to meet the payment obligations to counterparties when they become due. This can arise when internal funds are insufficient to meet cash outflow obligations and where the Group is unable to obtain funding at market rates or liquidate assets at fair value resulting in the forced liquidation of assets at depressed prices. The Group is exposed to liquidity risk in respect of insurance and investment policies that permit surrender, withdrawal or other forms of early termination for cash surrender value specified in the contractual terms and conditions.

The Group's liquidity position is monitored in compliance with regulatory and internal requirements in combination with maturity gap analysis. To manage liquidity risk, the Group has implemented a variety of measures, including emphasising flexible insurance product design so that it can retain the greatest flexibility to adjust contract pricing or crediting rates.

The Group continuously seeks to match, to the extent possible and appropriate, the duration of its investment assets with the duration of insurance policies issued. The Group constantly monitors its liquidity position and has in place several contingency sources of liquidity in order to minimise the impact of any liquidity risk.

Investment-linked liabilities are repayable or transferable upon notice by policyholders and are disclosed separately under the "Investment-linked" column. Liquidity risk of investment-linked liabilities is managed as part of the Group-wide established framework, process and procedures as detailed above. The Group constantly monitors the liquidity position of the respective funds and has in place several contingency sources of liquidity in order to minimise the impact of any liquidity risk, which includes but not limited to funding from the operating fund and repurchase agreement ("Repo") as well as catastrophe excess-of-loss reinsurance cover.

37 FINANCIAL RISKS (CONTINUED)

(b) Liquidity risk (continued)

Maturity profiles

The table below summarises the maturity profile of the financial assets and financial liabilities of the Group and Company based on remaining contractual obligations, including interest payable and receivable. For insurance contract liabilities, maturity profiles are determined based on the estimated timing of discounted net cash outflows from the recognised insurance liabilities.

Group	Carrying value RM'000	Up to a year RM'000	1 – 3 years RM'000	3 – 5 years RM'000	> 5 years RM'000	No maturity date RM'000	Investment-linked RM'000	Total RM'000

37 FINANCIAL RISKS (CONTINUED)

(c) Market risk

Market risk arises from the possibility of financial losses caused by changes in the financial instruments' fair values or future cash flows due to fluctuations in key variables, including interest rates, equity market prices, foreign exchange rates and real estate property market prices. The Group manages the risk of market-based fluctuations in the value of the Group's investments, as well as liabilities with exposure to market risk.

The Group uses various quantitative measures to assess market risk, including sensitivity analysis. The level of movements in market factors on which the sensitivity analysis is based were determined based on economic forecasts and historical experience of variations in these factors. The Group routinely conducts sensitivity analysis of its fixed income portfolios to estimate its exposure to movements in interest. The Group's fixed income sensitivity analysis is primarily a duration-based approach.

Policies on asset allocation, portfolio limit structure and diversification benchmark have been set in line with the Group's risk management policy after taking cognisance of the regulatory requirements in respect of maintenance of assets and solvency.

(i) Interest rate risk

Interest risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest yield.

The Group's exposure to interest risk predominantly arises from the Group's duration gap between the liabilities and assets for interest rate sensitive products, especially those providing interest rate guarantees. For other products, including those with participation or investment-linked features, interest risk is significantly reduced due to the non-guaranteed nature of additional policyholder benefits.

The Group manages its interest rate risk by investing in financial instruments with tenors that match the duration of its liabilities as much as practicable and appropriate. The Group also considers the effect of interest rate risk in its overall product strategy. Certain products such as investment-linked, universal life and participating business, inherently have lower interest rate risk as their design provides flexibility as to crediting rates and policyholder dividend scales. For new products, the Group emphasises flexibility in product design and generally designs products to avoid excessive long-term interest rate guarantees. For in-force policies, bonus payout and credit interest rates applicable to policyholders' account balances are regularly adjusted by considering, amongst others, the earned yields and policyholders' communications and reasonable expectations.

37 FINANCIAL RISKS (CONTINUED)

(c) Market risk (continued)

(i) Interest rate risk (continued)

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit after tax (due to changes in fair value of floating rate/yield financial instruments), AFS fair value reserves and unallocated surplus of contract with DPF included in insurance contract liabilities (that reflects re-valuing fixed rate/yield financial assets of life fund) and equity (that reflects adjustments to profit after tax and re-valuing fixed rate/yield AFS financial assets). The correlation of variables will have a significant effect in determining the ultimate impact on interest rate yield risk but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear.

- 50 basis points shift in yield curves	817,724	-	255,945

(ii) Equity price risk

Equity price risk arises from changes in the market value of equity securities and equity funds. Investments in equity securities on a long-term basis are expected to provide diversification benefits and enhance returns. The extent of exposure to equities at any time is subject to the terms of the Group's strategic asset allocations.

The Group manages equity price risks by setting and monitoring objectives and constraints on investments, diversification plans, limits on investments in each sector, market and issuer, having regard also to such limits stipulated by BNM. The Group complies with BNM's stipulated limits during the financial period and has no significant concentration risk.

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit after tax (due to changes in fair value of foreign currency financial instruments) and unallocated surplus included in insurance contract liabilities (due to changes in fair value of financial assets and liabilities of life fund whose changes in fair values are retained in the life insurance contract liabilities). The correlation of variables will have a significant effect in determining the ultimate impact on price risk, but to demonstrate the impact due to changes in variables, the variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear.

37 FINANCIAL RISKS (CONTINUED)

(c) Market risk (continued)

(iii) Currency risks

Currency risk is the risk that the fair value of future cash flows of a financial instrument denominated in currencies other than RM, will fluctuate because of movements in foreign exchange rates vis-à-vis RM. The Group's primary transactions are carried out in RM and its exposure to currency risk arises principally with respect to Australian Dollar ("AUD"), United State Dollar ("USD"), EURO ("EUR"), Hong Kong Dollar ("HKD"), Singapore Dollar ("SGD") and Taiwan Dollar ("TWD"). The Group manages currency risks by setting and monitoring objectives and constraints on investments, diversification plans and limits on investments.

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit after tax (due to changes in fair value of foreign currency financial instruments) and unallocated surplus included in insurance contract liabilities (due to changes in fair value of foreign currency financial instruments of the Life Fund are retained in life insurance contract liabilities). The correlation of variables will have a significant effect in determining the ultimate impact on currency risk but to demonstrate the impact due to changes in variables, the variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear.

38 NON FINANCIAL RISKS

The Company's non-financial risks comprise operational risk and strategic risk.

(a) Operational risk

Operational risk is the risk arising from business processes including inadequate procedures or policies, people conduct, system failures, fraud, criminal activity or from external events which may result in direct or indirect business impact.

The Group protects itself against financial losses by purchasing insurance cover against a range of operational loss events including business disruption, property damage and internal fraud. The coverage is determined after taking into consideration the Group's operational risk profile.

(b) Strategic risk

Strategic risk is identified as part of the business plan processes and is defined as the potential impact of the business strategy on the Group's earnings, capital and reputation. This also takes into consideration the wider social, economic, political, regulatory, competitive or technological trends that could impact the Group's business strategy within a set time period.

39 SHARE-BASED PAYMENT

During the financial period, the AIA Group made further grants of share options, restricted share units and restricted share purchase units to certain employees, Directors and Officers of the Group under the Share Option ("SO") Scheme, the Restricted Share Unit ("RSU") Scheme and Employee Share Purchase Plan ("ESPP").

(a) RSU Scheme

Under the RSU Scheme, the vesting of the granted RSUs is conditional upon the eligible participants remaining in employment with the AIA Group during the respective vesting periods. RSU grants are vested either entirely after a specific period of time or in tranches over the vesting period. If the RSU grants are vested in tranches, each vesting tranche is accounted for as a separate grant for the purposes of recognising the expense over the vesting period. For certain RSUs, performance conditions are also attached which include both market and non-market conditions. RSUs subject to performance conditions are released to the employees at the end of vesting period depending on the actual achievement of the performance conditions. During the vesting period, the eligible participants are not entitled to dividends of the underlying shares. The maximum number of shares that can be granted under the RSU scheme is 301,100,000 (2017: 301,100,000), representing approximately 2.5% (2017: 2.5%) of the number of shares in issue of AIA Group Ltd. ("AIAGL") as at 31 December 2018.

	Group		Company

39 SHARE-BASED PAYMENT (CONTINUED)

(b) SO Scheme

The objectives of the SO Scheme are to align eligible participants' interests with those of the shareholders of the Company by allowing eligible participants to share in the value created at the point they exercise their options. SO grants are vested either entirely after a specific period of time or in tranches over the vesting period, during which, the eligible participants are required to remain in employment with the AIA Group. If the SO grants are vested in tranches, each vesting tranche is accounted for as a separate grant for the purposes of recognising the expense over the vesting period. The granted share options expire ten years from the date of grant. The total number of shares under options that can be granted under the scheme is 301,100,000 (2017: 301,100,000), representing approximately 2.5% (2017: 2.5%) of the number of shares in issue of AIAGL as at 31 December 2018.

Information about options outstanding and options exercisable by the Company's employees and Directors as at the end of the reporting period are as follows:

	31 December 2018		30 November 2017	
	Number of share options	Weighted average exercise price (HK$)	Number of share options	Weighted average exercise price (HK$)

Outstanding at end of financial period/year	112,312	8.10	80,014	9.27

(c) ESPP

Under the plan, eligible employees of the Company can purchase ordinary shares of AIAGL with qualified employees' contributions and the AIA Group will award one matching restricted stock purchase unit to them at the end of the vesting period for each two shares purchased through the qualified employees' contributions (contribution shares). Contribution shares are purchased from the open market. During the vesting period, the eligible employees must hold the contribution shares purchased during the plan cycle and remain employed by the AIA Group. The level of qualified employee contribution is limited to not more than 8% of the annual basic salary subject to a maximum of HK$117,000 per annum. For the financial period ended 31 December 2018, eligible employees paid RM5,762,149 (2017: RM4,727,977) to purchase 162,430 (2017: 162,447) ordinary shares of AIAGL.

Valuation methodology

The Company utilises a binomial lattice model to calculate the fair value of the share options grant, a Monte-Carlo simulation model and/or discounted cash flow technique to calculate the fair value of the RSU and ESPP, taking into account the terms and conditions upon which the awards were granted. The price volatility is estimated on the basis of implied volatility of AIAGL's shares which is based on an analysis of historical data since they are traded in the Stock Exchange of Hong Kong and takes into consideration the historical volatility of peer companies. The expected life of the options is derived from the output of the valuation model and is calculated based on an analysis of expected exercise behaviour of the Company's employees. The estimate of market condition for performance based RSUs is based on one-year historical data preceding the grant date.

41 SIGNIFICANT EVENTS DURING THE FINANCIAL PERIOD

Separation of General Insurance Business

The Directors have on 23 February 2017 approved the separation of the general insurance and life insurance businesses of the Company pursuant to the requirements of the FSA. The general insurance business has been approved to be transferred to AIAGB, a wholly-owned subsidiary of the Company, effective on 1 July 2018.

Change of Financial Year End

The Directors have in their resolution dated 23 November 2017, approved the change of the financial year end from 30 November to 31 December. Therefore, the financial period covered in these financial statements is for a period of thirteen (13) months from 1 December 2017 to 31 December 2018. Thereafter, the financial year end of the Group and of the Company shall revert to twelve (12) months ending 31 December for each subsequent year.

42 INSURANCE FUNDS

The Group's principal activities are organised by funds and segregated into Shareholders, General, Life and Investment-linked funds in accordance with the FSA.

The Group's statements of financial position and income statements analysed by Life fund, Shareholders' and General Funds have been presented together as one fund.

The life insurance business offers a wide range of participating and non-participating whole life, term assurance, endowment as well as investment-linked products.

The General insurance business offers general insurance products which include personal accident, motor, fire and other classes.

Individual fund's revenue, expense, assets and liabilities are those amounts resulting from the operating activities of the respective funds that are directly attributable to the respective funds and the relevant portion that can be allocated on a reasonable basis to the respective funds. Individual fund's revenue, expense, assets and liabilities are determined before inter-fund balances and inter-fund transactions are eliminated as part of the consolidation process.

As set out in Note 41 to the financial statements, the disposal of the Company's General Insurance business to AIA General Berhad has been completed on 30 June 2018. Accordingly, the statements of financial position, income statements and statements of comprehensive income and cash flows of the General Fund at the Company level have been classified as discontinued operations in the financial statements.
