Market Review

The FBMS ("Index") gained 0.7% Month-on-Month ("MoM") to close at 12,098 pts in October 2025. The Index underperformed the MSCI Asia ex Japan Index, which gained 4.0% MoM in Malaysian ringgit ("MYR") terms over the same period. Foreign investors were net sellers of Malaysian equities with net sell flows of MYR2.73 billion while local institutions remained net buyers amounting to MYR3.60 billion during the month. Bursa Malaysia's average daily transaction value ("ADTV") rose 8.4% MoM to MYR2.9 billion in October 2025. During the month, Nestle Malaysia (+17.4%), IHH Healthcare (+9.3%), and PPB Group (+9.2%) were the key gainers while key detractors were Sime Darby (-10.1%), Gamuda (-8.9%) and Petronas Chemicals (-7.8%). Sector wise, Technology (+9.8%), Consumer (+3.6%) and Healthcare (+2.9%) were the key outperformers, while Construction (-6.0%), Property (-2.7%) and Utilities (-1.7%) were the key detractors. Major news during the month included the announcement of Budget 2026 by the Prime Minister which featured a one-off RM100 cash handout to all Malaysians aged 18 and above in February 2026, the agreement by the US and Malaysia on a reciprocal trade agreement which results in 19% tariffs on Malaysian goods to the US, and the dissolution of the Sabah State Assembly which paves the way for state elections in November 2026. Malaysia's Consumer Price Index ("CPI") rose 1.5% Year-on-Year ("YoY") in September 2025, slightly above forecasts of 1.4% and up from 1.3% in August 2025.

Market Outlook

We maintain a cautiously optimistic outlook for equities, as markets transition into a late-cycle phase underpinned by resilient corporate earnings, easing inflationary pressures, and growing expectations of policy normalization. The US Federal Reserve ("Fed") and other major central banks are widely anticipated to begin rate cuts in early 2026, providing a tailwind to risk assets and supporting valuation multiples. However, the pace of easing will likely be gradual, constrained by lingering inflation pressure and tight labor markets in developed markets. Emerging markets ("EM") are gaining renewed investor attention, supported by a softer US Dollar ("USD"), improving liquidity conditions and attractive relative valuations. Volatility is expected to remain elevated amid geopolitical risks, uneven policy signals, and potential profit-taking after recent rallies.
