Market Review

The FBMKLCI ("Index") fell 1.4% Month-on-Month ("MoM") to close at 1,716 pts in February 2026. The Index underperformed the MSCI Asia ex Japan Index, which gained 4.4% MoM in Malaysian ringgit ("MYR") terms over the same period. Foreign investors remained net buyers of Malaysian equities recording net inflows of MYR171 million while local institutions turned net sellers of MYR1.1 billion during the month. Bursa Malaysia's average daily transaction value ("ADTV") declined by 5.7% MoM to MYR3.0 billion in February 2026. During the month, Sime Darby (+13.0%), Petronas Dagangan (+3.7%) and Tenaga Nasional (+3.2%) were the key gainers while 99 Speed Mart (-14.0%), YTL Power (-12.4%) and YTL Corp (-11.5%) were the key detractors. Sector wise, Transport (+2.2%), Property (+2.0%) and Healthcare (+0.5%) were the key outperformers, while Telecom (-3.3%), Industrial Production (-2.7%) and Utilities (-2.4%) were the key detractors. Major developments during the month included the distribution of a one-off MYR100 Sumbangan Asas Rahmah ("SARA") aid to eligible Malaysians from 9 February 2026, an official visit by Indian Prime Minister Narendra Modi on 7-8 February 2026, and the release of 4Q 2025 Gross Domestic Product ("GDP") on 13 February 2026 where 4Q 2025 GDP grew 6.3% Year-on-Year ("YoY"), lifting full year 2025 GDP growth to 5.2% which is above forecast. Globally, the US Supreme Court struck down US President Donald Trump's tariffs under the International Emergency Economic Powers Act ("IEEPA"), which was replaced by 10% global tariffs under Section 122 of the Trade Act of 1974.

Market Outlook

The US-Iran war has heightened geopolitical tensions, leading to increased oil price volatility and introducing uncertainty to the two key factors that supported equity markets in the first two months of the year — namely expectations of US Federal Reserve ("Fed") rate cuts and a weaker US dollar ("USD"), both of which have been supportive of Asian equities. At this stage, the outcome and duration of the conflict remain uncertain. The longer the war persists, the higher the risk premium is likely to be embedded in oil prices. Sustained elevated oil prices could subsequently impact global growth, inflation dynamics and policy responses. Markets are therefore assessing whether the current situation represents a temporary geopolitical disruption or a more persistent supply shock to the global energy market. Asia and Europe are likely to be more affected than the United States, given their relatively higher dependence on oil imports from the Middle East. Our base case, for now, is that the supply shock remains transitory, although we will continue to monitor the development closely.

For Malaysia, we remain constructive on domestic equities. Malaysia is among the least affected markets in a higher oil price environment, given that the country is a net exporter of oil and gas, in contrast to most Asian economies which are net energy importers. Domestic growth also continues to be supported by several structural initiatives, including the Johor-Singapore Special Economic Zone, the National Energy Transition Roadmap, and ongoing major infrastructure projects.

Key risks to monitor include a prolonged oil supply shock, a weaker Chinese economy, delays in domestic growth initiatives, and hyperscalers scaling back Artificial intelligence ("AI") capex. In this environment, we will maintain a proactive and disciplined approach to portfolio construction as conditions evolve.

Lipper Leader Fund for:

1. Preservation

Lipper uses a ranking system of 1 to 5. A ranking of 5 means the fund is in the top 20% of funds in that category while a ranking of 1 means the fund is in the bottom 20%. Source : www.lipperleaders.com
