Note: Past performance of the fund is not an indication of its future performance.

The above returns are computed based on the Net Asset Value (i.e. unit price) of the respective AIA Investment Funds and not on the gross premium paid under the policy. (This is strictly the performance of the investment fund, and not the returns earned on the actual premiums/contributions paid of the Investment-Linked Insurance plan.)

The basis of calculation of past performance is as follows:

$$R_{20xx} = \frac{(UP_{31 \text{ December } 20xx} - UP_{31 \text{ December } 20xx-1})}{UP_{31 \text{ December } 20xx-1}} \times 100\%$$

Where:

- UP 31 December 20xx is the Unit Price as at 31st December 20xx.
- UP 31 December 20xx-1 is the Unit Price as at 31st December 20xx-1.
- R20xx is the rate of return after deducting fund management charges and tax of the relevant fund.

Dividend Distribution

AIA Dividend-Focus MYR Fund, AIA Infinite Dividend-Focus USD Fund and AIA Infinite Dividend-Focus SGD Fund ("the Fund") intends to distribute dividends on a quarterly basis. Dividend distributions could change according to prevailing market conditions. Both capital and dividend distributions are not guaranteed. Dividend rates does not represent the overall return of the Fund, and a high distribution yield does not imply a positive or high return on the total investments. AIA Bhd. will review dividend distribution periodically and has the discretion to determine the dividend rate and frequency of the distribution.

AIA Bhd. intends to distribute dividends from the income and/or net realised gains of the Fund, and AIA Bhd. maintains the discretion to distribute dividends out of capital. Customers should be aware that when dividend distributions are made from the capital, it may lead to a reduction in customer's original investment and may also result in reduced future returns to the customer. When dividend distributions are declared and paid out with respect to the Fund, the net assets of the Fund will reduce by an amount equivalent to the distributions declared. This will be reflected as a reduction in the unit price.

Customers who are invested in the Fund and have units credited and held in their policy as at ex-date, as evidenced in our records, will be entitled to dividend distributions. Ex-date is set on the 10th Business Day of March, June, September, December.

The Fund will make its first dividend distribution only after it has achieved a stable level of liquidity and investment management, ensuring that such distributions are sustainable and aligned with the Fund's long-term objectives.

There will be two business days of non-dealing during which the subscription and/or redemption of units cannot be carried out (including transactions such as fulfilling single premium payments, top-up premium requests, fund switch requests, partial withdrawal/ full surrender/ claim requests which necessarily lead to the subscription or redemption of units). The non-dealing days will occur immediately before the ex-date. All the subscription and/or redemption of units shall be transacted based on the prevailing NAV as at the valuation day after the non-dealing days.

Customers are allowed to choose between the following dividend distribution options:

- Reinvest option. The dividend will be reinvested and distributed as additional units in the Fund, equivalent to the total value of the dividends divided by the price of each unit prevailing on the reinvestment date.
- Payout option. The equivalent total value of the dividends will be paid to the bank account provided by the customer. Payout option is subject to a minimum amount of RM50, USD 50 or SGD 50. If valid bank account details are not available in AIA Bhd.'s record, and/or if the dividend amount is RM50, USD 50 or SGD 50, the dividend amount will be automatically reinvested into the Fund.

Risks (continued)

a) Market Risk

Market risk refers to the risk of a portfolio falling in value due to changes in underlying market risk factors. Examples of market risk factor are interest rates, foreign exchange rates, natural disaster, political turmoil and terrorist attacks. The value of investments may fall over a given time period due to changes in the economic climate or other events directly affecting the market. Careful allocation and diversification of assets can protect against market risk because different segments of the market tend to be not perfectly correlated.

In an investment-linked fund, this risk is managed via active asset allocation between cash and risky assets that are exposed to market risk.

b) Liquidity Risk

Liquidity risk is the risk that a given security or asset cannot be traded quickly enough in the market to prevent a loss. It arises in situations where an asset cannot be traded due to lack of buyers/sellers in the market.

This risk could be managed by taking greater care in buying less illiquid stocks and diversification.

c) Interest Rate Risk

Interest rate risk is the risk of fluctuating values of interest-bearing assets, such as a loan or a bond, due to changes in interest rates. In general, when interest rates rise, the price of bonds will fall.

This risk can be managed by adopting active durations management of fixed-income investments held at a given time.

d) Particular Stock Risk

Any major price fluctuations of a particular stock invested by the fund may affect the NAV and thus impact on the prices of units.

The risk is managed by investing in a wide range of companies in different sectors.

e) Credit/Default Risk

Credit/default risk is the risk of losses from non-repayment of a loan or other line of credit (either the principal or interest (coupon) or both). Default events include delay in repayments, restructuring of borrower repayments, and bankruptcy.

The risk is reduced by investing in high quality securities as these generally have a lower degree of credit risk.

f) Country Risk

Country risk refers to the risk of investing in a country, that is subject to changes in the business/political environment that may adversely affect operating profits or the value of assets in that country. Some factors affecting Country Risk include financial factors such as currency controls, devaluation or regulatory changes, and events affecting political stability i.e. political changes, mass riots and civil war.

The risk is reduced by investing into diversified markets.

g) Currency Risk

Currency risk refers to the risk of changes in the exchange rate altering value of investments denominated in a foreign currency. Whenever investors hold assets across national borders, they face currency risk if their positions are not hedged.

This risk is reduced by investing in assets denominated in a wide range of foreign currency denominated assets.

Risks (continued)

h) Reclassification of Shariah Status Risk

This risk refers to a situation where Shariah-compliant securities are reclassified as Non-Shariah compliant in the periodic review by the Shariah Advisory Council of the Securities Commission Malaysia, the Shariah Advisor or the Shariah Boards of the relevant Islamic indices. The reclassification of securities as Non-Shariah compliant may result in the newly non-Shariah compliant securities to underperform its benchmark.

This risk can be managed by disposing Shariah-Compliant equities that are likely to turn Shariah Non-Compliant before the periodic review.

i) Derivative Risk

The use of financial derivative instruments also involves certain special risks, including

- i. dependence on the fund managers' ability to predict movements in the prices of securities being hedged and movements in stock prices, currency exchange rates or other economic factors,
- ii. imperfect correlation between the price movements of the derivatives and price movements of related investments,
- iii. the fact that skills needed to use these instruments are different from those needed to select the fund's securities,
- iv. the possible absence of a liquid market for any particular instrument at any particular time,
- v. possible impediments to effective portfolio management or the ability to meet redemptions,
- vi. possible legal risks arising in relation to derivative contract documentation, particularly issues arising relating to enforceability of contracts and limitations thereto,
- vii. settlement risk as when dealing with futures, forwards, swaps, contracts for differences where the fund's liability may be potentially unlimited until the position is closed, and
- viii. counterparty risk as the use of OTC derivatives, such as futures, forward contracts, swap agreements and contracts for differences will expose the fund to credit risk with respect to the counterparty involved.

Risk Management on the Usage of Derivative Instruments

One of the prime objectives of the legislators and regulatory authorities throughout Europe is to maintain a high level of retail-investor protection. This translates into a requirement for UCITS managers to implement a sound risk-management process (RMP) to monitor, manage and measure the financial and operational risks associated with derivatives. Below are regulatory requirement and the manager's internal risk management policy governing the use of derivative instruments:

- a) The global exposure relating to derivative instruments must not exceed 100% of the fund's NAV.
- b) The underlying investment of the derivative must be of eligible asset class as specified by CSSF (Luxembourg Financial Sector Supervisory Authority) and shall be in line with investment objective of the fund.
- c) The over-the-counter (OTC) derivatives must subject to reliable and verifiable valuation on a daily basis and can be sold at any time.
- d) The counterparties to OTC derivative are institutions that are subject to prudential supervision as approved by the CSSF.
- e) Under no circumstances will the use of derivative cause the fund to diverge from its investment objectives.
- f) A risk management process must be employed which enables the fund to monitor and measure at any time the risk of its position. It must employ a process for accurate and independent valuation of OTC derivative instrument.
- g) The investment objectives of these funds constraint them to achieve their investment objective by primarily using equity and equity related securities, not derivatives.
- h) The mark-to-market losses on derivative positions (if any) shall be covered by liquid assets or cash.

Risks (continued)

j) Regulatory Risk

The fund's ability to invest and/or fully implement the investments and/or pursue its investment objective and strategy, would be subject to all applicable laws, rules and regulations in Malaysia, which may be subject to any change from time to time. In the event the Government of Malaysia imposes any restrictions such as capital control which restrict foreign investments and currency repatriation, the fund's ability to invest in foreign market will be adversely affected. In such event, the fund's ability to achieve its investment objective could be negatively affected.

Frequency of Unit Valuation

The value of each fund specially created by AIA shall be determined by us on daily basis under normal circumstances. To recoup the cost of acquiring and disposing of assets, we will impose a dilution fee or transaction cost which is due at the same time payment is made for the sale and repurchase of units. The dilution fee or transaction cost charged should be allocated back to the unit fund.

We may value the fund less frequently if trading in any Stock Exchange or any other exchanges in which the fund is invested is suspended so as to make it impossible to value the fund on a daily basis. In that event, the fund shall be valued at least once a week. AIA shall seek services of independent person(s) or firm(s) to obtain the value whenever appropriate, whether selling or buying, of the fund's assets and shall observe applicable laws and accepted practices in dealing with the fund's assets.

Exceptional Circumstances

We reserve the right to defer the payment of fund redemption for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the Fund is invested, which the Company in its discretion, may consider exceptional.

U.S. Foreign Account Tax Compliance Act

Under the Foreign Account Tax Compliance Act ("FATCA"), Funds that are invested directly or indirectly in US assets may be subject to 30% US withholding tax on certain US-sourced payments unless the Fund complies with FATCA. The Fund intends to be FATCA compliant. However this cannot be guaranteed given the complexity and evolving nature of the requirements. If the Fund is unable to satisfy the obligations imposed on them to avoid the imposition of the withholding tax, certain US-sourced payments made to the Fund may be subject to 30% withholding tax, which could reduce the cash available for investors. The application of the withholding rules and the information that may be required to be reported and disclosed are uncertain and subject to change.

Nota: Prestasi masa lalu dana tidak membayangkan prestasi masa depannya.

Pulangan di atas dikira berdasarkan Nilai Aset Bersih (iaitu harga unit) Dana-dana Pelaburan AIA masing-masing dan bukan berdasarkan premium kasar yang telah dibayar di bawah polisi. (Ini hanya prestasi dana pelaburan, dan bukan pulangan yang diperolehi daripada premium/sumbangan sebenar yang dibayar untuk pelan Insurans Berkaitan Pelaburan).

Asas pengiraan prestasi masa lalu adalah seperti berikut:

$$R_{20xx} = \frac{(UP_{31 \text{ Disember } 20xx} - UP_{31 \text{ Disember } 20xx-1})}{UP_{31 \text{ Disember } 20xx-1}} \times 100\%$$

Di mana:

- UP 31 Disember 20xx ialah Harga Unit pada 31 Disember 20xx
- UP 31 Disember 20xx-1 ialah Harga Unit pada 31 Disember 20xx-1
- R_{20xx} ialah kadar pulangan selepas menolak caj pengurusan dana dan cukai dana yang berkenaan

³ Prestasi dana setakat 31 Disember 2025.

⁴ Maklumat lanjut mengenai CIS sandaran boleh diperolehi dari AIAIM @ www.aia.com/en/funds-information dan Bloomberg.

⁵ Prestasi masa lalu yang ditunjukkan merujuk kepada CIS sandaran dan tidak mewakili prestasi Dana Berkaitan Pelaburan ("Dana").

⁶ Prestasi sejarah yang ditunjukkan bagi CIS sandaran merangkumi tempoh sebelum AIA melabur dalam CIS tersebut bagi Dana dan tidak menggambarkan prestasi masa hadapan.

Untuk dana yang melabur dalam Skim Pelaburan Kolektif yang diuruskan oleh pengurus dana luar, fungsi pengurusan pelaburan Skim Pelaburan Kolektif adalah dilaksanakan oleh pengurus dana luar dan diuruskan mengikut peraturan dan peraturan semasa negara yang mengawal Skim Pelaburan Kolektif tersebut. Oleh itu, piawai pendedahan kepada Skim Pelaburan Kolektif ini mungkin tidak sama dengan piawai pendedahan di Malaysia.

Pengagihan Dividen

Dana MYR Fokus-Dividen AIA, Dana USD Fokus-Dividen AIA Infinite dan Dana SGD Fokus-Dividen AIA Infinite ("Dana ini") bertujuan untuk mengagihkan dividen secara suku tahunan. Pengagihan dividen boleh berubah mengikut keadaan pasaran semasa. Kedua-dua modal dan pengagihan dividen tidak dijamin. Kadar dividen tidak mewakili pulangan keseluruhan Dana ini, dan hasil agihan yang tinggi tidak semestinya menunjukkan pulangan positif atau tinggi terhadap jumlah pelaburan keseluruhan. AIA Bhd. akan menyemak semula pengagihan dividen dari semasa ke semasa dan mempunyai budi bicara untuk menentukan kadar dan kekerapan pengagihan dividen.

AIA Bhd. bertujuan untuk mengagihkan dividen daripada pendapatan dan/atau keuntungan direalisasi bersih Dana, dan AIA Bhd. mempunyai budi bicara untuk mengagihkan dividen daripada modal. Pelanggan perlu sedar bahawa apabila dividen diagihkan daripada modal, ia mungkin mengurangkan jumlah pelaburan asal pelanggan dan seterusnya boleh mengurangkan pulangan masa depan pelanggan. Apabila dividen diagihkan dan dibayar daripada Dana, aset bersih Dana akan berkurang dengan jumlah yang setara dengan dividen yang diisytiharkan. Ini akan menyebabkan pengurangan harga seunit.

Pelanggan yang melabur dalam Dana dan mempunyai unit yang dikreditkan serta dipegang dalam polisi mereka pada tarikh ex-dividen, seperti yang dibuktikan dalam rekod kami, adalah layak untuk menerima dividen. Tarikh ex-dividen ditetapkan pada Hari Perniagaan ke-10 bagi bulan Mac, Jun, September dan Disember.

Dana hanya akan membuat pengagihan dividen pertamanya selepas mencapai tahap kestabilan dalam kecairan dan pengurusan pelaburan, bagi memastikan pengagihan tersebut adalah mampan dan selaras dengan objektif jangka panjang Dana.

Akan terdapat dua hari perniagaan tanpa urus niaga di mana subskripsi dan/atau penebusan unit tidak boleh dilakukan (termasuk urus niaga seperti bayaran premium tunggal, permintaan tambah nilai premium, pertukaran dana, pengeluaran sebahagian/ penuh/ tuntutan yang memerlukan subskripsi atau penebusan unit). Hari tanpa urus niaga ini akan berlaku serta-merta sebelum tarikh ex-dividen. Semua transaksi subskripsi dan/atau penebusan unit akan dilaksanakan berdasarkan NAB pada hari penilaian selepas hari tanpa urus niaga tersebut.

Pelanggan dibenarkan untuk memilih antara pilihan pengagihan dividen berikut:

- Pilihan pelaburan semula. Dividen akan dilabur semula dan diagihkan sebagai unit tambahan dalam Dana, bersamaan dengan jumlah nilai dividen dibahagi dengan harga seunit pada tarikh pelaburan semula.
- Pilihan pembayaran. Jumlah bersamaan dengan nilai dividen akan dibayar kepada akaun bank yang dibagi oleh pelanggan. Pilihan pembayaran tertakluk kepada jumlah minimum sebanyak RM50, USD 50 atau SGD 50. Jika maklumat akaun bank yang sah tidak terdapat dalam rekod AIA Bhd., dan/atau jika amaun dividen di bawah RM50, USD 50 atau SGD 50, amaun dividen akan dilaburkan semula secara automatik ke dalam Dana.

Risiko-risiko (bersambung)

a) Risiko Pasaran

Risiko pasaran merujuk kepada risiko nilai portfolio menurun yang disebabkan oleh perubahan dalam faktor-faktor risiko dasar pasaran. Contoh-contoh faktor risiko pasaran adalah paras harga saham, kadar faedah, kadar pertukaran asing, dan paras harga komoditi. Nilai pelaburan mungkin akan jatuh dalam suatu tempoh masa kerana perubahan dalam iklim ekonomi atau perkara-perkara lain yang secara langsungnya menjejaskan pasaran. Peruntukan dan kepelbagaian aset yang teliti boleh melindungi terhadap risiko pasaran kerana segmen pasaran yang berlainan cenderung untuk kolerasi yang tidak sempurna.

Dalam dana berkaitan pelaburan, risiko ini boleh diuruskan melalui peruntukan aset aktif antara tunai dan aset berisiko yang terdedah kepada risiko pasaran.

b) Risiko Kecairan

Risiko kecairan adalah risiko di mana suatu sekuriti atau aset tidak boleh diniagakan dengan cepat di pasaran untuk mengelakkan kerugian. Ia timbul dalam situasi di mana aset tidak boleh diniagakan kerana kekurangan pembeli/penjual di pasaran.

Risiko ini boleh diuruskan dengan mengambil langkah yang lebih cermat dalam pembelian aset yang kurang cair dan mempelbagaian saham.

c) Risiko Kadar Faedah

Risiko kadar faedah adalah risiko turun naik nilai bagi aset berfaedah, seperti pinjaman atau bon, disebabkan oleh perubahan dalam kadar faedah. Secara umum, apabila kadar faedah meningkat, harga bon akan jatuh.

Risiko ini boleh diuruskan melalui pengurusan tempoh aktif pelaburan pendapatan tetap pada suatu tempoh masa.

d) Risiko Saham Tertentu

Sebarang turun naik harga yang besar bagi saham tertentu yang dilabur oleh dana mungkin menjejaskan Nilai Aset Bersih (NAV) dan justeru itu menjejaskan harga unit.

Risiko ini boleh diuruskan dengan melabur dalam pelbagai syarikat dalam sektor yang berbeza.

e) Risiko Kredit/Mungkir

Risiko kredit/mungkir adalah risiko kerugian daripada pinjaman atau jenis kredit yang lain (sama ada prinsipal atau faedah (kupon) atau kedua-duanya) yang tidak dibayar balik. Perkara-perkara mungkir termasuk kelewatan dalam pembayaran balik, penstrukturan semula pembayaran balik peminjam, dan kebangkrutan.

Risiko ini dikurangkan dengan melabur dalam sekuriti yang berkualiti tinggi kerana ia secara umumnya mempunyai tahap risiko kredit yang lebih rendah.

f) Risiko Negara

Risiko negara merujuk kepada risiko melabur di dalam sesebuah negara, yang tertakluk kepada perubahan dalam persekitaran perniagaan/politik yang boleh menjejaskan keuntungan operasi atau nilai aset di negara itu. Beberapa faktor yang mempengaruhi Risiko Negara termasuk faktor-faktor kewangan seperti kawalan mata wang, penurunan nilai atau perubahan peraturan dan peristiwa-peristiwa yang menjejaskan kestabilan politik iaitu perubahan politik, rusuhan besar-besaran dan perang saudara.

Risiko ini dikurangkan dengan melabur ke dalam pelbagai pasaran.

Risiko-risiko (bersambung)

g) Risiko Mata Wang

Risiko mata wang merujuk kepada risiko perubahan dalam kadar pertukaran yang mengubah nilai pelaburan dalam denominasi mata wang asing. Bila-bila masa pelabur memiliki aset yang merentasi sempadan negara, mereka menghadapi risiko mata wang jika kedudukan mereka tidak dilindungi nilai.

Risiko ini dikurangkan dengan melabur dalam aset yang didenominasikan dalam pelbagai aset mata wang asing.

h) Risiko Pengelasan Semula Status Syariah

Risiko ini merujuk kepada keadaan di mana sekuriti mematuhi Syariah diklasifikasikan sebagai tidak mematuhi Syariah dalam kajian semula berkala oleh Majlis Penasihat Syariah Suruhanjaya Sekuriti Malaysia, Penasihat Syariah atau Lembaga Syariah bagi indeks Islam yang berkaitan. Pengelasan semula sekuriti sebagai tidak mematuhi Syariah boleh mengakibatkan sekuriti baru yang tidak mematuhi Syariah kurang berprestasi berbanding penanda arasnya.

Risiko ini boleh diuruskan dengan melupuskan ekuiti-ekuiti mematuhi Syariah yang berkemungkinan besar akan menjadi tidak mematuhi Syariah sebelum kajian semula berkala.

i) Risiko Derivatif

Penggunaan instrumen kewangan derivatif juga melibatkan risiko khas tertentu, termasuk

- i. Pergantungan kepada keupayaan pengurus dana untuk meramalkan pergerakan dalam harga sekuriti yang dilindungi nilai dan pergerakan dalam harga saham, kadar pertukaran mata wang atau lain-lain faktor-faktor ekonomi,
- ii. kewujudan hubungan yang tidak sempurna antara pergerakan harga derivatif dan pergerakan harga pelaburan yang berkaitan,
- iii. hakikat bahawa kemahiran yang diperlukan untuk menggunakan instrumen ini adalah berbeza daripada yang diperlukan untuk memilih sekuriti dana,
- iv. kemungkinan ketiadaan pasaran cair bagi apa-apa suratcara tertentu pada bila-bila masa tertentu
- v. kemungkinan terdapat halangan untuk pengurusan portfolio yang berkesan atau keupayaan untuk memenuhi penebusan,
- vi. risiko undang-undang yang mungkin timbul berkaitan dengan dokumen kontrak derivatif, terutamanya isu-isu yang timbul berkaitan penguatkuasaan kontrak dan batasan kepadanya,
- vii. risiko penyelesaian apabila berhadapan dengan niaga hadapan, ke hadapan, swap, kontrak untuk perbezaan di mana liabiliti dana mungkin berpotensi tanpa had sehingga kedudukan ditutup, dan
- viii. risiko rakan niaga sebagai penggunaan derivatif OTC, seperti niaga hadapan, kontrak hadapan, perjanjian swap dan kontrak untuk perbezaan akan mendedahkan dana kepada risiko kredit berkenaan kepada rakan niaga yang terlibat.

Pengurusan Risiko Pada Penggunaan Instrumen Derivatif

Salah satu objektif utama penggabul undang-undang dan pihak berkuasa di seluruh Eropah adalah untuk mengekalkan tahap perlindungan-pelabur runcit yang tinggi. Ini diterjemahkan kepada keperluan untuk pengurus UCITS untuk melaksanakan proses pengurusan risiko yang mantap (PDRM) untuk memantau, mengukur dan mengukur risiko kewangan dan operasi yang berkaitan dengan derivatif. Berikut adalah keperluan peraturan dan dasar pengurusan risiko dalaman pengurus yang mengawal penggunaan instrumen derivatif:

- a) Pendedahan global yang berkaitan dengan instrumen derivatif tidak boleh melebihi 100% daripada NAB dana.

Risiko-risiko (bersambung)

- b) Dasar pelaburan derivatif mesti menjadi kelas aset yang layak sebagaimana yang dinyatakan oleh CSSF (Luxembourg Sektor Kewangan Pihak Berkuasa Penyeliaan) dan hendaklah selaras dengan objektif pelaburan dana.
 - c) Derivatif Over-the-Counter (OTC) mesti tertakluk kepada penilaian yang dipercayai dan boleh disahkan pada setiap hari dan boleh dijual pada bila-bila masa.
 - d) Pihak kepada derivatif OTC adalah institusi yang tertakluk kepada penyeliaan berhemat seperti yang diluluskan oleh CSSF.
 - e) Dalam apa keadaan pun penggunaan derivatif akan menyebabkan dana menyimpang daripada objektif pelaburan.
 - f) Satu proses pengurusan risiko yang membolehkan dana memantau dan mengukur risiko kedudukannya pada bila-bila masa mesti digunakan. Ia mesti menggunakan proses penilaian yang tepat dan bebas daripada instrumen derivatif OTC.
 - g) Objektif pelaburan dana ini menghadkan mereka untuk mencapai objektif pelaburan mereka dengan mengutamakan penggunaan ekuiti dan sekuriti berkaitan ekuiti, bukannya derivatif.
 - h) Kerugian mark-to-market pada kedudukan terbitan (jika ada) hendaklah dilindungi oleh aset cair atau wang tunai.
- j) Risiko Peraturan
Kemampuan dana untuk melabur dan/atau melaksanakan sepenuhnya pelaburan dan/atau mencapai objektif dan strategi pelaburannya, akan tertakluk kepada semua undang-undang, aturan dan peraturan yang digunakan di Malaysia, yang mungkin mengalami perubahan dari semasa ke semasa. Sekiranya Kerajaan Malaysia mengenakan sebarang sekatan seperti kawalan modal yang menyekat pelaburan asing dan penghantaran balik mata wang, kemampuan dana untuk melabur di pasaran asing akan terjejas. Di keadaan demikian, kemampuan dana untuk mencapai objektif pelaburannya akan terjejas secara negatif.

Kekerapan Penilaian Unit

Nilai setiap dana yang diterbitkan khas oleh AIA hendaklah ditentukan oleh kami pada setiap hari di bawah keadaan biasa. Untuk mendapatkan balik kos memperolehi dan melupuskan aset, kami akan mengenakan yuran pencairan atau kos transaksi yang mana akan dicajkan pada masa yang sama pembayaran dibuat untuk jualan dan belian balik unit. Yuran pencairan atau kos transaksi yang dikenakan akan diperuntukkan semula kepada dana unit.

Kita mungkin menilai dana kurang kerap jika diperdagangkan dalam mana-mana Bursa Saham atau mana-mana bursa lain di mana dana dilaburkan tergantung menyebabkan penilaian dana pada setiap hari tidak dapat dilakukan. Dalam kejadian itu, dana hendaklah dinilai sekurang-kurangnya sekali seminggu. AIA akan mendapatkan perkhidmatan daripada orang atau firma bebas untuk mendapatkan nilai bila-bila masa yang sesuai, sama ada menjual atau membeli aset dana dan akan mematuhi undang-undang yang berkenaan dan amalan yang diterima semasa menguruskan aset dana.

Keadaan Luar Biasa

Kami berhak menangguhkan pembayaran penebusan dana untuk tempoh tidak melebihi enam (6) bulan dari tarikh bayaran biasanya dilakukan jika tidak kerana gangguan seperti penutupan sementara mana-mana Bursa Saham di mana Dana dilaburkan, di mana Syarikat mengikut budi bicaranya, boleh mempertimbangkan sebagai luar biasa.

Foreign Account Tax Compliance Act Amerika Syarikat

Di bawah Foreign Account Tax Compliance Act ("FATCA"), dana yang dilaburkan secara langsung atau tidak langsung ke dalam harta Amerika Syarikat adalah tertakluk kepada 30% cukai pegangan ke atas bayaran tertentu yang berpunca daripada Amerika Syarikat melainkan dana tersebut mematuhi FATCA. Dana tersebut bertujuan untuk mematuhi FATCA, walau bagaimanapun ini tidak dapat dijamin memandangkan keperluan yang rumit dan sering berubah. Jika Dana tidak dapat memenuhi kewajipan yang dikenakan keatasnya untuk mengelakkan cukai pegangan, bayaran tertentu yang berpunca daripada Amerika Syarikat yang dibuat kepada dana mungkin tertakluk kepada 30% cukai pegangan yang mungkin akan mengurangkan tunai yang ada kepada pelabur. Penggunaan kaedah-kaedah pegangan dan maklumat yang dikehendaki untuk dilaporkan dan didedahkan adalah tidak muktamad and tertakluk kepada perubahan.
