Market Review

Malaysian Government Securities ("MGS") yield curve shifted lower in April 2026 as global markets calmed down and turned less reactionary to headlines from the US-Iran conflict. Nonetheless, disruptions around the Strait of Hormuz kept Brent oil prices above USD90/barrel. Global inflation and policy rate expectations shifted as a response, thus pushing bond yields in several developed markets higher relative to levels seen prior to the start of the conflict. Despite higher U.S. Treasury ("UST") yields on a Month-on-Month ("MoM") basis, local government bond yields were very well anchored by Malaysia's unchanged Overnight Policy Rate ("OPR") at 2.75%, still-moderate domestic inflation backdrop and deep pool of onshore investors. On the currency front, the Malaysian ringgit ("MYR") strengthened against the US dollar ("USD") by 1.9% in April 2026 to end the month at 3.9717. MGS levels as at end-April 2026 were: 3-year at 3.20% (-7 bps), 5-year at 3.34% (-10 bps), 7-year at 3.46% (-9 bps), 10-year at 3.56% (-8 bps), 15-year at 3.83% (-8 bps), 20-year at 3.96% (-4 bps) and 30-year at 4.07% (-4 bps).

Fixed income foreign inflows reversed, with foreign investors significantly increasing holdings by MYR6.1 billion in March 2026 (February 2026: -MYR2.5 billion). Foreign holdings in MGS and Government Investment Issue ("GII") increased to 21.6% in March 2026 (February 2026: 21.2%).

There were 3 government security auctions during the month: The 30-year MGS 7/55 reopening with an auction size of MYR3.0 billion and a MYR2.0 billion private placement drew a bid-to-cover ("BTC") ratio of 2.029x at an average yield of 4.197%, the 3-year GII 10/29 reopening with an auction size of MYR5.0 billion drew a BTC of 2.921x at an average yield of 3.227% and the 20-year MGS 4/46 new issue with an auction size of MYR3.0 billion and a MYR2.0 billion private placement drew a BTC of 2.881x at an average yield of 3.987%.

On the economic data front, Malaysia's foreign reserves increased to USD128.8 billion as of 15 April 2026 (31 March 2026: USD126.6 billion). The reserves position is sufficient to finance 4.7 months of imports of goods and services and cover 0.9x of total short-term external debt. Malaysia's headline inflation increased to 1.7% Year-on-Year ("YoY") in March 2026 (February 2026: 1.4% YoY). Inflation was mainly driven by an increase in transport category. Core inflation, which excludes volatile fresh food prices and price-administered goods, also increased to 2.1% YoY (February 2026: 2.0% YoY). Malaysia's exports remained robust, growing 8.3% YoY in March 2026 (February 2026: 10.8% YoY), mainly driven by demand for electrical & electronic ("E&E") products. Imports grew 10.4% YoY (February 2026: 8.2% YoY), resulting in a trade surplus of MYR24.6 billion (January 2026: MYR16.7 billion). Industrial Production for February 2026 slowed to 3.1% YoY (January 2026: 5.9% YoY). The expansion was supported by the manufacturing and electricity sectors.

On the primary corporate bond space, notable issuances included MYR0.58 billion Kimanis Power (Dua) Sdn Bhd IMTN, MYR1.20 billion Public Bank Berhad MTN, MYR1.0 billion Gamuda Berhad IMTN, MYR1.35 billion Malaysian Resources Corporation Berhad Perpetual IMTN and MYR0.50 billion Pelabuhan Tanjung Pelepas Sdn Bhd IMTN. In terms of credit ratings, RAM has upgraded its outlook on RHB Group's AA1 rating to positive from stable.

Market Outlook

While external risks, particularly geopolitical risk, continue to linger, Malaysia's proactive policy measures and resilient domestic fundamentals will continue to provide a constructive backdrop for the local bond market in 2026. The latest Summary of Economic Projections from the Federal Open Market Committee ("FOMC") continues to indicate one rate cut for 2026, which is expected to support the ringgit and attract foreign inflows. Domestically, Bank Negara Malaysia ("BNM") kept the OPR unchanged at 2.75% in its recent Monetary Policy Committee ("MPC") meeting in March 2026. Despite Malaysia's solid Gross Domestic Product ("GDP") growth, the monetary policy statement was rather neutral where BNM highlighted contained inflation and downside risks to growth as reasons to stay cautious. For now, BNM will likely keep the policy rate on hold while evaluating incoming data to guide its next steps.
