Notice: Past performance of the Fund is not an indication of its future performance.

Market Review

The FBMKLCI ("Index") rose 4.01% Month-on-Month ("MoM") to close at 1,512.98 pts in January 2024. The Index outperformed the MSCI Asia Ex Japan Index, which corrected 2.61% MoM in Malaysian Ringgit ("MYR") terms over the same period. Foreign investors stayed net buyers of Malaysian equities amounting to MYR679 million while local institutions reversed their trend, becoming net buyers of MYR112 million during the month. Bursa Malaysia's average daily transaction value ("ADTV") rose 19% MoM to MYR3.4 billion in January 2024. During the month, YTL Power (+61.8%), YTL Corp (+23.8%) and Axiata Group (+14.7%) were the key gainers while key detractors were Petronas Chemicals (-5.4%), MrDIY (-4.8%) and Petronas Dagangan (-2.3%). Sector wise, Utilities (+17.3%), Energy (+9.5%) and Construction (+9.4%) were the key performers while Technology (-2.2%), Industrial Production (0.1%) and Consumer (0.7%) were the key detractors. Major news during the month included the launch of the Central Database Hub (PADU initiative), the MOU signing with Singapore for the Johor-Singapore Special Economic Zone (SEZ), and the Ministry of Finance ("MOF")'s decision to exempt capital gains tax and foreign-sourced income tax on unit trusts. It also saw the National Water Services Commission (SPAN) announcing a 22sen per cubic metre increase in water tariff rates for domestic users in Peninsular Malaysia and Labuan starting 1 February 2024. Malaysia's Gross Domestic Product ("GDP") growth stalled at 3.4% Year-on-Year ("YoY") in 4Q23. Bank Negara Malaysia ("BNM") opted to maintain the Overnight Policy Rate ("OPR") rate at 3%, and the Johor ruler Sultan Ibrahim was installed as Malaysia's 17th king on 31 January 2024.

Market Outlook

Moving into 2024, all eyes will be on the US Federal Reserve ("Fed")'s potential pivot to interest rate cuts amid sign of a slower economic growth and easing inflation. Locally, the execution of the already announced economic initiatives such as the National Energy Transformation Roadmap (NETR), SEZ, Malaysia My Second Home (MM2H) and the much-anticipated petrol and diesel subsidies rationalization will be watched. Coupled with a stable political environment, we expect more investment activities be generated by both foreign and local parties. With interest rates in the US expected to fall and higher inflow of foreign investment, the MYR is expected to strengthen further improving investor sentiment. At the time of writing, China has expressed concerns over the falling property and stock prices. It appears that serious proposals are in the work to resolve these lingering issues. Should these issues be resolved, investor's confidence will be boosted further. Downside risks to the market could stem from a U.S. recession, China slowdown, worsening geopolitical tension and government policy risk.
