### Market Review

The FBMKLCI ("Index") posted a remarkable 6.0% Month-on-Month ("MoM") gain and closed at 1,459.43 pts on 31 July 2023. This market rally is driven by foreign buying, improved market sentiments following the launch of the Madani Economic Framework and National Energy Transition Roadmap, and the strengthening of the Malaysian ringgit ("MYR"). The Index outperformed the MSCI Asia Ex Japan Index, which rose 5.7% MoM in Malaysian ringgit ("MYR") terms over the same period. In July 2023, foreign investors returned as net buyers of MYR1.4 billion, while local institutions emerged as the largest net sellers with a net sell value of MYR748 million. Bursa Malaysia's average daily transaction value ("ADTV") rose by 9% MoM to MYR2.1 billion in July 2023. During the month, Petronas Chemical (+15.8%), IOI Corporation (+11.8%) and Dialog Group (+11.7%) were the key gainers while key detractors were Mr DIY (-7.5%), Westports (-3.8%) and Maxis (-1.5%). Sector wise, Property (+12%), Industrial Production (+7.5%) and Energy (+7.2%) were the key performers while REIT (+0%), Transport (+1.3%) and Telecommunication (+1.6%) were the key detractors. Major news during the month included the government launched the Madani Economic Framework that outlines the government's policy direction for the next decade, promoting inclusive growth, a competitive economy and an equitable society. The government also sets high-level objectives for key government blueprints and reviews, including the Energy Transition Masterplan (released on 27 July 2023), the New Industrial Master Plan, the 12th Malaysia Plan Mid-Term Review and the Budget 2024.

### Market Outlook

We are cautiously optimistic on the equity market in the near term. We are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession in the US and the timing of a rate cut going forward. Over in Asia, China's economic reopening was disappointing with weaker than expected recovery as consumer and corporate confidence remain soft with limited government stimulus. Domestically in Malaysia, we expect a better outlook given the lower political risk premium with a relatively more stable unity government coupled with corporate earnings recovery post expiry of one-off prosperity tax. Downside risks to the market could stem from a prolonged deep US recession, worsening geopolitical tension, weak China economic recovery and domestic politics.
