Market Review

The FBMKLCI ("Index") rose 0.74% Month-on-Month ("MoM") to close at 1,453 pts on 30 November 2023. The Index underperformed the MSCI Asia Ex Japan Index, which rose 4.57% MoM in Malaysian Ringgit ("MYR") terms over the same period. Foreign investors turned net buyers of Malaysian equities amounting to MYR1.6 billion in November 2023 while local institutions turned net sellers with net sell flow of MYR1.5 billion. Bursa Malaysia's average daily transaction value ("ADTV") rose 9.7% MoM to MYR2.2 billion in November 2023. During the month, Genting Bhd (+16.1%), Genting Malaysia (+10.3%) and Sime Darby (+7.9%) were the key gainers while key detractors were PPB Group (-7.1%), Hong Leong Financial Group (-6.6%) and IHH Healthcare (-2.8%). Sector wise, Utilities (+10.2%), Healthcare (+6.6%) and Technology (+2.1%) were the key performers while Energy (-4.5%), Telecom (-1.1%) and Transports (-0.8%) were the key detractors. Major news during the month included Malaysia's intention to roll out targeted subsidy program for RON95 petrol in 2H24. Malaysia's Gross Domestic Product ("GDP") grew 3.3% Year-on-Year ("YoY") in 3Q23, driven by private sector spending.

Market Outlook

We are cautiously optimistic of the equity market in the near term. We believe that US interest rates may have peaked but developed markets equity valuation has yet to fully reflect the soft landing or mild recession (if any) in the US and Euro land. Investors are now watching the macro data closely to gauge the timing of a possible rate cut going forward. Over in Asia, China's policy easing is gaining momentum given the earlier-than-expected policy rate cut, less restrictions on house ownership policy, and efforts to revitalize the capital market and stabilize foreign trade and investment. Domestically in Malaysia, we expect a brighter outlook given the lower political risk premium amidst a more stable unity government coupled with stronger corporate earnings upside arising from the implementation of the government's pump priming initiatives as well as launching of mega energy renewal and infrastructure projects. Downside risks to the market could stem from a hard landing US recession, worsening geopolitical tension, and weak China economy.
