MESSAGE FROM CEO AND CIO

Dear Valued Policyholders,

Thank you for your continued trust in AIA. We are deeply honoured to be given the privilege to support you and your family's aspirations to achieve Healthier, Longer and Better Lives.

Market Review

2022 has been an exceptional year for financial markets where both equities and fixed income posted negative returns, occurring only for the second time in half a century. A combination of detractors such as the Ukrainian war which resulted in significantly higher commodity prices, restrictive monetary policies by central banks to rein in inflation as well as the resurgence of COVID-19 saw both equity and bond markets struggling. The United States ("U.S.") Federal Reserve ("Fed") hiked the fed fund rate by a cumulative 425 basis points ("bps") in 2022, which drove significantly higher volatility in the global bond market. Domestically, Bank Negara Malaysia ("BNM") also embarked on a series of rate hikes with a cumulative tightening of 100bps following the pickup in economic activities and strong inflation prints.

Against this background, FTSE Bursa Malaysia Top 100 Index and FTSE Bursa Malaysia KLCI Index registered a decline of 5.40% and 4.60% respectively against the MSCI World Index (in MYR terms) and MSCI Asia Ex Japan Index (in MYR terms) which fell 14.68% and 16.89% respectively. Softer domestic investor sentiment and offshore fund outflows brought higher bond yields, with the 10-year ("10Y") Malaysian Government Securities ("MGS") yield increasing 50 bps to close at 4.07% as at end-December 2022. The U.S. Treasury ("UST") 10Y note yield rose by 236 bps in 2022, closing the year at 3.87%.

Risk sentiments improved in the later part of 2022, as data indicated that inflation may have likely peaked. While inflation may have softened from its highs, it is likely to remain above what we have experienced in the past decades.

Market Outlook

We expect 2023 to be a better year for the fixed income market as inflation and growth are expected to trend lower in 2023 while central banks across the world are expected to conclude their policy normalisation, marking the end of the tightening cycle. However, we expect heightened volatility in the bond market on the horizon, due to monetary policy uncertainty as the timing of the policy pivot is still uncertain and remains highly data dependent.

MESSAGE FROM CEO AND CIO (cont'd)

We expect the MGS curve to potentially bull-strengthen in 2023 due to attractive valuations amidst lower supply and stable demand from investors. We employ a neutral duration stance with a tactical overweight bias as we continue to trade on momentum for Malaysian government bonds, with trading opportunity at the short end to belly of the curve. Our asset allocation will continue to favour corporate bonds over government bonds for yield enhancements.

As for equities, we are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signaled towards a gradual reopening of its economy which will mitigate the impact of U.S. recession risk. Domestically, corporate earnings will improve in 2023 with the expiry of the one-off prosperity tax. Malaysia earnings-per-share ("EPS") for 2023 is expected to grow by 11.9%, aided by the absence of prosperity tax and should outperform the projected 5.7% growth for MSCI Asia Ex Japan. Meanwhile, Malaysia equity valuations remain undemanding with price-to-earnings ("PE") valuation trading circa 1.5 standard deviation, below its 10-year mean.

Key risks to our call include the prolonged Russia-Ukraine geopolitical tension, contagion effect from the banking crisis in U.S. and Europe, worsening U.S.-China trade relations, slow recovery in China's gross domestic product ("GDP") growth, an uptrend in commodities prices which can renew inflation concerns, higher U.S. treasury yields which can lead to USD strength and be at a disadvantage to emerging markets, hard landing in the U.S. and back tracking on the gradual re-opening of China.

Once again, we wish to extend our utmost appreciation to you for your continued support to AIA and for giving us the opportunity to look after your health, wealth and protection needs. Our team of highly qualified investment professionals will continue to be guided by AIA's prudent investment philosophy, strong risk management framework and sound corporate governance. Wishing you and your family the best of health and happiness for the year ahead.

Ben Ng
Chief Executive Officer, AIA Bhd.

Richard Lin
Chief Investment Officer, AIA Bhd.

LOCAL FIXED INCOME MARKET COMMENTARY

Market Review

As global economies reopened in 2022, aggressive rehiring activities fuelled robust labour market conditions and pent-up demand. The war between Russia and Ukraine exacerbated the supply chain disruptions and commodities prices soared resultantly. These drove persistent inflationary pressures across many countries, which resorted to aggressive monetary policy tightening decisions by major central banks. The United States (U.S.) Federal Reserve ("Fed") hiked the fed fund rate by a cumulative 425 basis points ("bps") in 2022, which drove significant volatility in the global bond market. Market participants aggressively repriced bond yields higher to reflect the Fed's rate hike path.

Domestically, Bank Negara Malaysia ("BNM") also embarked on a series of rate hikes with a cumulative tightening of 100bps following the pickup in economic activities and strong inflation prints. However, interest rate differential between the U.S. and domestic bond yields tightened significantly with the faster path of policy tightening by the Fed, thereby reducing the appeal of domestic bonds to offshore investors. As a result, foreign investors were net sellers of Malaysian debt securities with a net outflow of MYR9.8 billion during the year, bringing foreign holdings in Malaysian government bonds, both Malaysian Government Securities ("MGS") and Government Investment Issue ("GII") to 22.4% in December 2022 (compared to 25.9% in December 2021). Softer domestic investor sentiment and offshore fund outflows brought bond yields higher, with the 10Y MGS yield increasing 50 bps to close at 4.07% as at end-December 2022. On the sovereign rating front, Fitch Ratings and Moody's reaffirmed Malaysia's rating at BBB+ with a stable outlook and A3 with a stable outlook, respectively. Meanwhile, S&P maintained our country's rating at A- and upgraded the outlook from Negative to Stable. The outlook upgrade provided a relief to the bond market and somewhat capped the bond yield increase during the calendar year. The Malaysian ringgit ("MYR") weakened against the U.S.dollar ("USD"), primarily due to a broader USD strength on the back of Fed's aggressive policy rate hikes.

Market Outlook

Domestically, we expect the fixed income market to perform better than in 2022. The MGS curve is expected to bull-strengthen due to attractive valuations after flattening significantly in 2H2022. The back end of the curve is likely to be well supported amidst lower supply of longer-dated bonds and stable demand from investors. The monetary policy outlook based on the revised Budget 2023 appears to be constructive for the domestic bond market. With a projected decline in the budget deficit to 5.0% in 2023 from 5.6% in 2022, concerns on Malaysia's sovereign rating will likely be muted. However, risks remain as the net supply for government securities is still forecasted to be higher in 2023. This should be well-balanced by ample onshore liquidity and investor demand, although the front-loaded supply could weigh on the market in 1H2023. There is also some uncertainty on the

LOCAL FIXED INCOME MARKET COMMENTARY (cont'd)

monetary policy front. Although BNM is expected to conclude its rate normalisation cycle in 1H2023, which should be positively received by the domestic fixed income market, the risk remains that BNM could continue tightening if inflation picks up and growth remains resilient. On the currency front, MYR should be well supported in 2023 given the broad USD weakness from market expectations of a Fed policy pivot, constructive domestic macro conditions and potential spill-over effects from the Renminbi ("RMB") strength as the China economy reopens. However, a reduction in external demand from a global growth slowdown and a potentially hawkish Fed could weigh on the MYR in 2023.

Opportunities

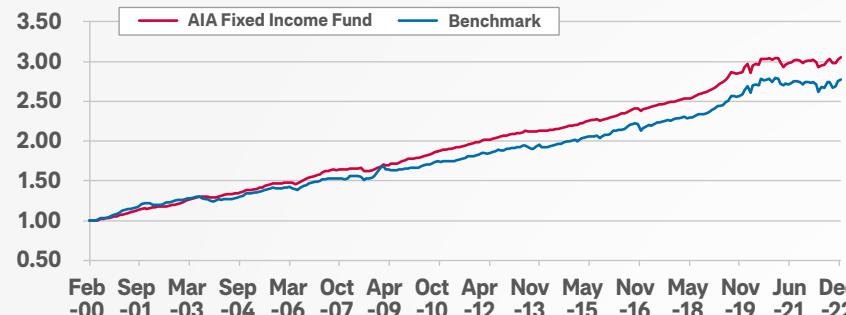

- China reopening is supportive of growth and tourist arrivals, and thus positive for MYR.
- Potential fund flows from foreign investors into the domestic bond market on the back of reduced political uncertainty, Fed policy pivot and expectations of peak USD strength.
- Healthier onshore demand for domestic government securities as pension fund flows have normalised.

Concerns

- Prolonged Russia-Ukraine geopolitical tension and worsening U.S.-China trade relations.
- Contagion effect from the banking sector in U.S. and Europe.
- Slower recovery in China's GDP growth.
- Uptrend in commodities prices could renew inflation concerns.
- U.S. Treasury ("UST") yields potentially trending higher, prompting further momentum to USD strength and risk of non-resident outflows.
- Ramp up of quantitative tightening if growth and inflation expectations change.
- Hard landing in the U.S with a severe economic recession.

AIA FIXED INCOME FUND

AIA Fixed Income Fund

Performance as of 31 December 2022

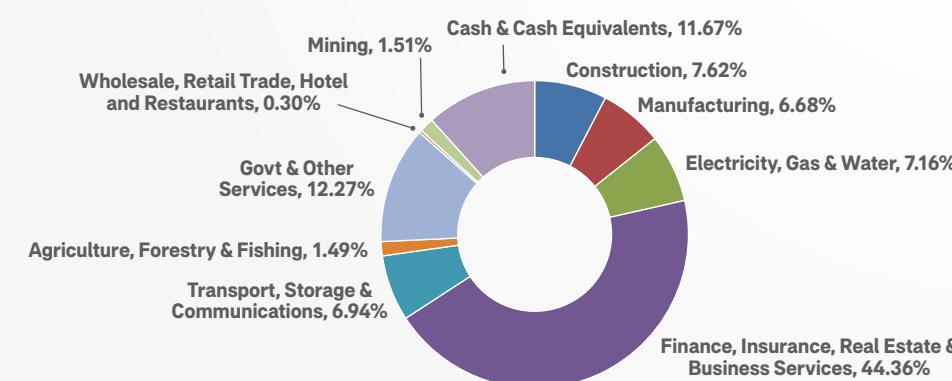

Cumulative Performance	1-Month	6-Month	1-Year	3-Year	5-Year	Since Inception

Notice: Past performance is not indicative of future performance and the performance of the fund is not guaranteed.

Sector Allocation as at 31 December 2022

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned 1.18% against the benchmark's return of 0.97%. The Fund's duration stance at slight underweight in 1H2022 and subsequent shift to neutral benefitted the Fund's performance during the period. For the 5-year period under review, the Fund returned 21.69% against the benchmark's return of 21.25%. The Fund's overweight in corporate bonds supported performance during the period. Since its inception in February 2000, the Fund posted a cumulative return of 204.93% versus the benchmark's cumulative return of 117.12%.

What is your strategy going forward?

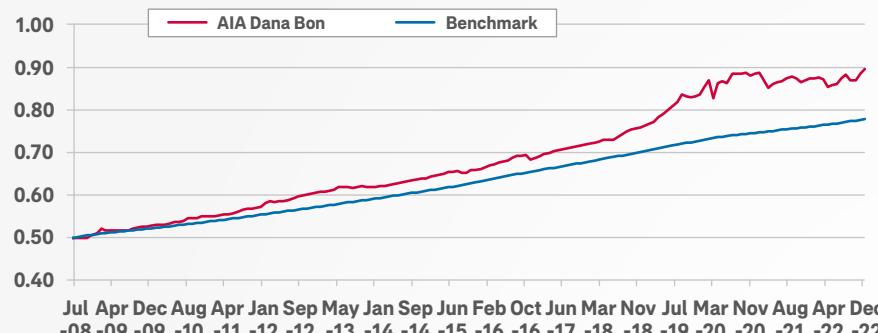

With inflation and growth expected to trend lower in 2023, central banks across the world are expected to conclude their policy normalisation, marking the end of the tightening cycle. That said, the timing of the policy pivot is still uncertain and remains highly data dependent. Given those expectations, the bond market is generally expected to perform better in 2023 but with a potential rise in volatility on the horizon due to monetary policy uncertainty, increased bond supply and fiscal concerns. We expect the MGS curve to potentially bull-strengthen in 2023 due to attractive valuations after flattening significantly in 2022 and for the back-end of the curve to be well supported amidst lower supply of longer-dated bonds and stable demand from investors. We employ a neutral duration stance with a tactical overweight bias as we continue to trade on momentum for government bonds, with trading opportunity at the short-end to belly of the curve. Our asset allocation will continue to favour corporate bonds over government bonds for yield enhancements.

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. We will continue to focus on high levels of income and returns by carefully selecting good quality bonds. We will also maintain a diversified portfolio of corporate and government bonds to better manage risks.

AIA DANA BON

* 12-month Maybank General Investment Account (Islamic) Tier 1 Rate

(Source: Maybank)

Notice: Past performance is not indicative of future performance and the performance of the fund is not guaranteed.

Sector Allocation as at 31 December 2022

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned 2.44% against the benchmark's return of 2.40%. Despite the relative outperformance against the benchmark, the Fund's holdings in government sukuk generally detracted from overall performance due to the increase in yields in 2022. However, the Fund's performance was supported by the corporate sukuk holdings that carried high profit income and contributed to the defensive positioning for the Fund during the period. For the 5-year period under review, the Fund returned 24.15% against the benchmark's return of 14.67%. The Fund's positive performance was contributed by both the return from a high profit income and credit spreads compression. Since its inception in July 2008, the Fund has posted a cumulative return of 78.99% versus the benchmark's cumulative return of 55.72%.

What is your strategy going forward?

With inflation and growth expected to trend lower in 2023, central banks across the world are expected to conclude their policy normalisation, marking the end of the tightening cycle. That said, the timing of the policy pivot is still uncertain and remains highly data dependent. Given those expectations, the sukuk market is generally expected to perform better in 2023 but with a potential rise in volatility on the horizon due to monetary policy uncertainty, increased sukuk supply and fiscal concerns. We expect the GII curve to potentially bull-strengthen in 2023 due to attractive valuations after flattening significantly in 2022 and for the back-end of the curve to be well supported amidst lower supply of longer-dated sukuk and stable demand from investors. We employ a neutral duration stance with a tactical overweight bias as we continue to trade on momentum for government sukuk, with trading opportunity at the short-end to belly of the curve. Our asset allocation will continue to favour corporate sukuk over government sukuk for yield enhancements.

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. AIA Dana Bon will continue to focus on maximising total returns from both income and capital growth by investing in investment grade sukuk and Islamic money market instruments in Malaysia while minimising reinvestment risks.

LOCAL STOCK MARKET COMMENTARY

Market Review

The broader Malaysian equity market ended the year lower with FTSE Bursa Malaysia Top 100 Index and FTSE Bursa Malaysia KLCI Index registering a decline of 5.40% and 4.60% respectively as recessionary concerns and a heightened geopolitical tension dominated the equity market during most part of the year. Persistent inflationary pressures across many countries caused by supply chain disruptions following the war between Russia and Ukraine, pent up demand post re-opening and tight labour market resulted in aggressive monetary policy tightening decisions by major central banks. The U.S. Federal Reserve ("Fed") hiked the fed fund rate by a cumulative of 425 basis points ("bps").

In general, corporate earnings were downgraded on the back of higher commodity price and labour shortage. Valuation compression was evident as investors repriced equities with the surging bond yield during the year. However, towards the end of the year, local sentiment improved significantly with the formation of the unity government, thus removing the political deadlock and resulted in lower political risk premium. This is also aided by expectations that U.S. inflation has peaked, and Fed will slow down rate hikes moving forward. During the year, sectors such as Healthcare and Technology underperformed the broader index while Financials, Energy, Plantation, Transport and Construction were the key outperformers.

Against the regional peers, FBM100 Index outperformed the MSCI World Index (MYR basis) and MSCI Asia Ex Japan Index (MYR basis) which fell 14.68% and 16.89% respectively. The outperformance was driven by the reopening of the domestic economy in early 2022. In addition, Malaysia being a net beneficiary of higher commodity price also contributed to the outperformance. In contrast, developed markets underperformed as they aggressively raised interest rates to control the stubbornly high inflationary pressure. As for Asia, MSCI Asia Ex Japan Index (MYR basis) declined 16.89%, mainly dragged down by China's strict adherence to the zero-COVID policy during the first 10 months of 2022.

Market Outlook

As for equities we are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signalled towards a gradual reopening of its economy which will mitigate the impact of the U.S. recession risk. Domestically, corporate earnings will improve in 2023 with the expiry of the one-off prosperity tax. Malaysia EPS for 2023 is expected to grow by 11.9%, aided by the absence of prosperity tax and should outperform the projected 5.7% growth for MSCI Asia Ex Japan. Meanwhile, Malaysia equity valuations remain undemanding with PE valuation trading circa 1.5 standard deviation, below its 10-year mean.

LOCAL STOCK MARKET COMMENTARY (cont'd)

Downside risks to the market could stem from a prolonged deep U.S. recession, worsening geopolitical tension and government policy risk.

Opportunities

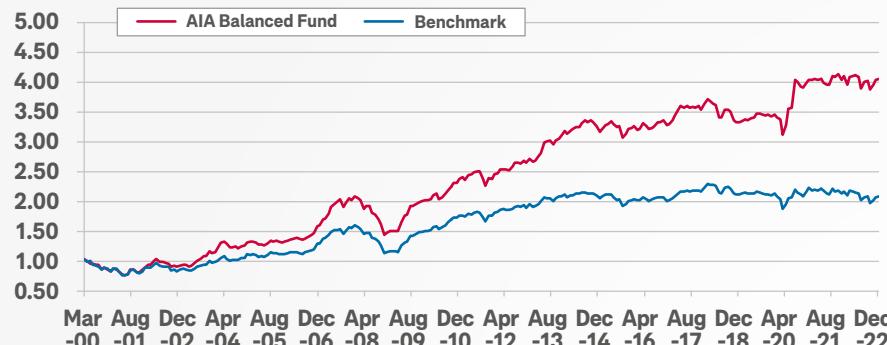

- Favourable macro backdrop arising from China re-opening and elevated commodity prices.
- Revival of domestic infrastructure projects to support economic growth.
- Political stability has returned with the formation of new unity government with Prime Minister Dato' Seri Anwar Ibrahim securing a 2/3 majority in parliament.
- The ongoing trade tension could result in trade and investment diversion into Malaysia resulting in higher Foreign Direct Investment ("FDI") and exports.

Concerns

- Persistently high and stubborn U.S. inflation.
- Contagion effect from the banking crisis in U.S. and Europe.
- Risk of a hard landing in the U.S. economy.
- Worsening geopolitical tension.
- Back tracking of China's reopening.
- Possible introduction of new taxes to close the fiscal deficit.

AIA BALANCED FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -1.23%, against the benchmark which declined 3.38% over the same period. The outperformance was mainly due to the Fund's underweight in Healthcare and Technology sectors and overweight in the Financial and Industrial sectors. The Fund's holdings in corporate bonds that carried a high coupon income also contributed to the performance. On a 5-year basis, the Fund returned 11.94% against the benchmark's return of -6.57%. The outperformance was due to the Fund's overweight in Financials, Materials, Consumer Staples, Healthcare and Technology and underweight in Consumer Discretionary and Telecommunications services sectors. The Fund's positive performance in bonds were contributed by both the return from high coupon income and credit spreads compression. Since its inception in March 2000, the Fund has posted a cumulative return of 306.39% versus the benchmark's cumulative return of 109.12%.

What is your strategy going forward?

With inflation and growth expected to trend lower in 2023, central banks across the world are expected to conclude their policy normalisation, marking the end of the tightening cycle. That said, the timing of the policy pivot is still uncertain and remains highly data dependent. Given those expectations, the bond market is generally expected to perform better in 2023 but with a potential rise in volatility on the horizon due to monetary policy uncertainty, increased bond supply and fiscal concerns. We expect the MGS curve to potentially bull-strengthen in 2023 due to attractive valuations after flattening significantly in 2022 and for the back-end of the curve to be well supported amidst lower supply of longer-dated bonds and stable demand from investors. We employ a neutral duration stance with a tactical overweight bias as we continue to trade on momentum for government bonds, with trading opportunity at the short-end to belly of the curve. Our asset allocation will continue to favour corporate bonds over government bonds for yield enhancements.

In terms of portfolio positioning for equities, we are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signalled towards a gradual reopening of its economy which will mitigate the impact of the U.S. recession risk. Sector Allocation as at 19 September 2022

Not applicable as the Fund only holds cash as of 19 September 2022, which is the final NAV date for the Fund's redemption. The Fund matured on 17 September 2022.

PB INCOME PLUS 2 FUND (cont'd)

How did the Fund perform during the period?

For the period of 1 January 2022 to 19 September 2022, on a net basis, the Fund returned -2.86%, against the benchmark which declined 5.90%. The outperformance was mainly due to the Fund's underweight in Technology and Healthcare, and overweight in Financials and Plantations sectors. The Fund's holdings in corporate bonds that carried high coupon income also contributed to the performance. On a 5-year basis, the Fund returned 12.81% against the benchmark's return of -7.24%. The outperformance was due to the Fund's overweight in Financials, Materials, Healthcare and Technology, as well as underweight in Utilities and Telecommunications services sectors. The Fund's positive performance in bonds were contributed by both the return from high coupon income and credit spreads compression. Since its inception in October 2014, the Fund has posted a cumulative return of 23.83% versus the benchmark's cumulative return of -2.01%.

What is your strategy going forward?

N/A. Both Funds have matured in 2022.

Will there be any changes in AIA-PB Income Plus and AIA-PB Income Plus 2's investment objectives or risk characteristics?

N/A. Both Funds have matured in 2022.

AIA DANA PROGRESIF (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -5.51%, against the benchmark which declined 7.36%. The outperformance was mainly due to the Fund's underweight in Technology and Healthcare sectors, and overweight Plantations and Materials sectors. The Fund's holdings in corporate sukuk that carried high profit income also contributed to the performance. On a 5-year basis, the Fund returned 8.50% against the benchmark's return of -6.85%. The outperformance was due to the Fund's overweight in Healthcare, Technology and Industrials sectors, and underweight in Telecommunications, Utilities, Energy and Properties sectors. The Fund's positive performance in sukuks were contributed by both the return from high profit income and credit spreads compression. Since its inception in March 2000, the Fund has posted a cumulative return of 175.74% versus the benchmark's cumulative return of 85.81%.

What is your strategy going forward?

With inflation and growth expected to trend lower in 2023, central banks across the world are expected to conclude their policy normalisation, marking the end of the tightening cycle. That said, the timing of the policy pivot is still uncertain and remains highly data dependent. Given those expectations, the sukuk market is generally expected to perform better in 2023 but with a potential rise in volatility on the horizon due to monetary policy uncertainty, increased sukuk supply and fiscal concerns. We expect the GII curve to potentially bull-strengthen in 2023 due to attractive valuations after flattening significantly in 2022 and for the back-end of the curve to be well supported amidst lower supply of longer-dated sukuk and stable demand from investors. We employ a neutral duration stance with a tactical overweight bias as we continue to trade on momentum for government sukuk, with trading opportunity at the short-end to belly of the curve. Our asset allocation will continue to favour corporate sukuk over government sukuk for yield enhancements.

In terms of portfolio positioning for equities, we are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signalled towards a gradual reopening of its economy which will mitigate the impact of the U.S. recession risk. Domestically, corporate earnings will improve in 2023 with the expiry of the one-off prosperity tax. Malaysia EPS for 2023 is expected to grow by 11.9%, aided by the absence of prosperity tax and should outperform the projected 5.7% growth for MSCI Asia Ex Japan. Meanwhile, Malaysia equity valuations remain undemanding with PE valuation trading circa 1.5 standard deviation, below its 10-year mean.

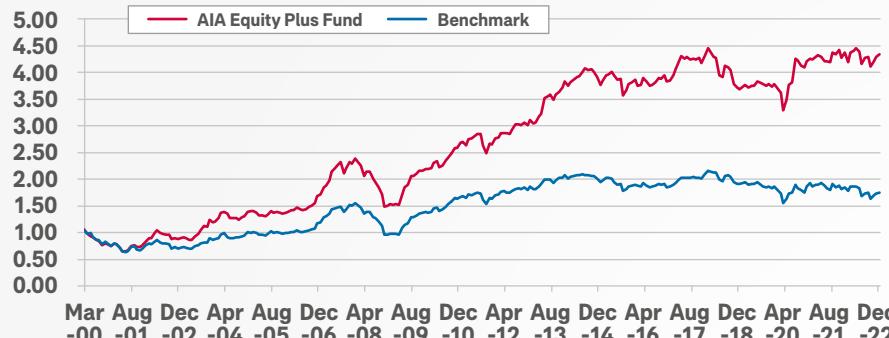

AIA DANA PROGRESIF (cont'd)

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. We will continue to focus on maximising total returns from both income and capital growth by investing in investment grade sukuk and Islamic money market instruments in Malaysia while minimising reinvestment risk. As for the Shariah equity portion, we will continue to seek long-term growth of capital and income through a diversified equity portfolio.

Sector Allocation as at 31 December 2022

AIA EQUITY PLUS FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -0.80% against the benchmark's return of -5.40%. The outperformance in 2022 was mainly driven by the Fund's overweight position in the Financial Services and Construction sectors, and underweight position in the Healthcare and Telecommunication sectors. On a 5-year basis, the Fund has posted a cumulative return of 0.62% versus the benchmark's cumulative return of -16.18%. The outperformance is mainly driven by the Fund's overweight in the Technology and Financial Services sector. The Fund's underweight in Healthcare and Telecommunication sectors also helped with the Fund's outperformance. Since its inception in March 2000, the Fund has posted a cumulative return of 333.37% vs the benchmark's cumulative return of 75.49%.

What is your strategy going forward?

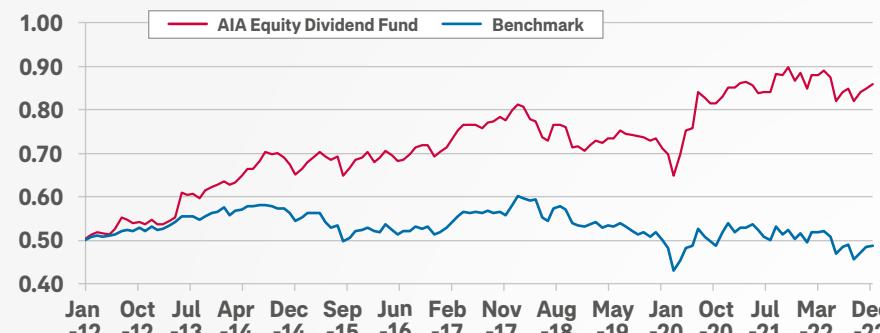

We are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signaled towards a gradual reopening of its economy which will mitigate the impact of the U.S. recession risk. We are cautiously optimistic on equities and positioning the Fund in the Consumer Products & Services sectors that benefitted from the economy reopening. We also favour Technology sector with structural growth catalyst and trading at a reasonable valuation. Downside risks to the market could stem from a prolonged deep U.S recession, worsening geopolitical tension and government policy risk.

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. We will continue to seek long-term growth of capital and income through a diversified equity portfolio.

AIA EQUITY DIVIDEND FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -2.93% against the benchmark's return of -5.40%. The outperformance was mainly due to the Fund's overweight in the Telecommunications & Media and Finance sectors as well as underweight in Healthcare sector. Over the 5-year period, the Fund has posted a cumulative return of 7.26% versus the benchmark's cumulative return of -16.18%. The outperformance was mainly due to the Fund's overweight in Technology sector as well as underweight in Healthcare and Finance sectors. Since its inception, the Fund has posted a cumulative return of 71.60% versus the benchmark's cumulative return of -2.38%.

What is your strategy going forward?

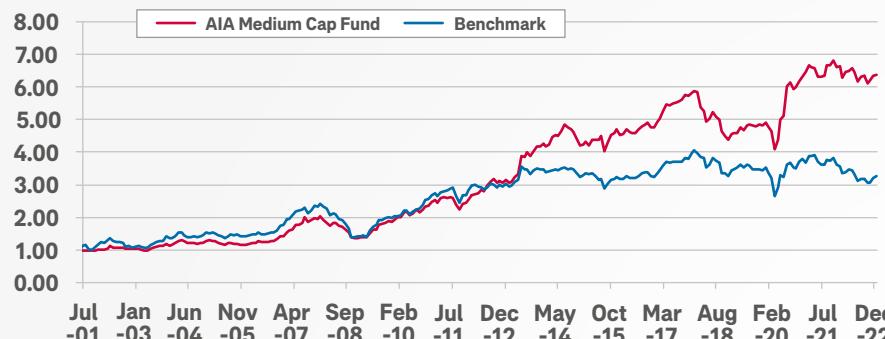

We prefer companies that can sustain their dividend payments despite challenging periods. As such, our focus will be on companies with visible and rising cash-flow.

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. We will continue to seek long-term growth of capital and income through a diversified equity portfolio.

* 100% FBM70 Index

(Source: Bursa Malaysia)

Notice: Past performance is not indicative of future performance and the performance of the fund is not guaranteed.

Sector Allocation as at 31 December 2022

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -3.98% against the benchmark's return of -8.41%. The outperformance in 2022 was mainly driven by the Fund's overweight positions in Financial Services, Energy, and Telecommunications & Media sectors. The Fund's underweight position in Technology, Plantation, and Property sectors also helped with the Fund's outperformance vs benchmark. On a 5-year basis, the Fund has posted a cumulative return of 9.41% versus the benchmark's cumulative return of -17.67%. The outperformance in the past 5 years was mainly driven by the Fund's overweight positions in Healthcare, Technology, and Financial Services sectors. The Fund's underweight position in Energy, Utilities, Property, Telecommunication & Media, Plantation and Real Estate Investment Trusts sectors also helped with the Fund's outperformance vs benchmark. Since its inception in July 2001, the Fund has posted a cumulative return of 536.93% versus the benchmark's cumulative return of 225.7%.

What is your strategy going forward?

In terms of portfolio positioning, our focus will continue to be on mid-cap companies with solid fundamentals and visible earnings growth at reasonable valuations to weather the current market volatility. We are also on the lookout for growth stocks with strong competitive edge benefiting from secular growth trends.

We are positive on Technology, Materials and Energy sectors as valuations have strongly derated in 2022, but the worst outcome has seemingly been avoided with increasing probabilities of a soft landing in the developed economies whilst inflationary and interest rate pressures at its tail-ends. Financial services sector outlook remains resilient, but we believe upside could be limited considering the potential downside risk to net interest margin with an interest rate environment largely peaked amid cost of funds pressure on intensifying competition for deposits.

Nevertheless, given the constantly evolving market conditions and macro-uncertainties, we will remain vigilant and will adjust our strategies accordingly as and when the need arises.

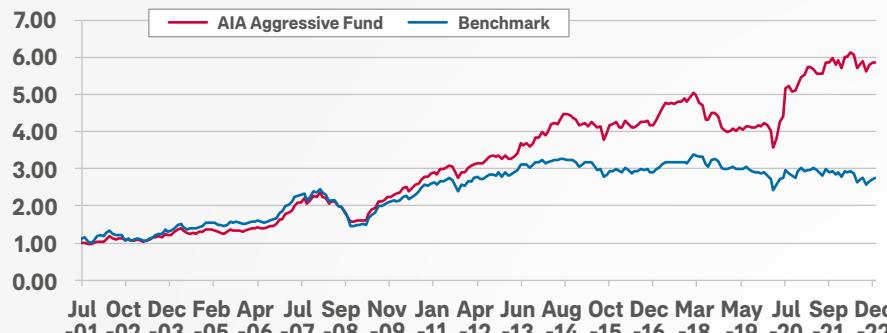

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. We will continue to seek long-term growth of capital and income through a diversified equity portfolio, with a focus on small and medium-sized enterprises and growth stocks.

AIA DANA DINAMIK (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund generated a -7.03% return against the benchmark which declined 10.80%. The outperformance was mainly due to the Fund's underweight in Technology, Industrials and Healthcare sectors, and overweight in Plantations and Telecommunications & Media sectors. On a 5-year basis, the Fund returned 1.08% against the benchmark's return of -16.94%. The outperformance was due to the Fund's overweight in the Healthcare, Consumer Products and Industrials sectors, and underweight in the Plantations, Energy, Utilities and Properties sectors. Since its inception in July 2001, the Fund has posted a cumulative return of 290.32% versus the benchmark's cumulative return of 155.66%.

What is your strategy going forward?

In terms of portfolio positioning for equities, we are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signalled towards a gradual reopening of its economy which will mitigate the impact of the U.S. recession risk. Domestically, corporate earnings will improve in 2023 with the expiry of the one-off prosperity tax. Malaysia EPS for 2023 is expected to grow by 11.9%, aided by the absence of prosperity tax and should outperform the projected 5.7% growth for MSCI Asia Ex Japan. Meanwhile, Malaysia equity valuations remain undemanding with PE valuation trading circa 1.5 standard deviation, below its 10-year mean.

Will there be any changes in the Fund's investment objectives or risk characteristic?

No. We will continue to invest in Shariah-approved securities listed on Bursa Malaysia to maximise the medium to long-term capital appreciation of the investment.

AIA GLOBAL BOND FUND SERIES' MARKET COMMENTARY

What economic, events or financial market conditions have impacted the fund?

The global economy experienced a surge in inflation in 2022, driven by a combination of commodity price increases, geopolitical events, supply chain disruptions and post-COVID economic imbalances. This has led to substantial implications for monetary policy, triggering a wave of monetary tightening among global central banks in a bid to rein in inflation. The United States ("U.S.") Federal Reserve ("Fed") hiked the fed funds rate 7 times in 2022, raising the rates by a total of 425 basis points ("bps"). Despite initially maintaining an accommodative stance in 1H2022, a similar move was observed in the Eurozone, as the European Central Bank ("ECB") raised the main refinancing rate by 250bps in 2022.

The sharp increase in central bank policy rates led to a sell-off in global fixed income, with U.S. Treasury ("UST") yields rising significantly, primarily in 2Q2022 and 3Q2022. The UST 10-year ("10Y") note yield rose by 236 bps in 2022, closing the year at 3.87%. The abrupt tightening in monetary policy also strengthened expectations of a recession risk in 2023 which led to an inversion in the UST yield curve with the 2Y note increasing by 366 bps to 4.42% for the year.

Tightening of monetary conditions eventually began to filter through the economy, as inflation eventually showed signs of dissipating in 2H2022. U.S. headline Consumer Price Index ("CPI") inflation decelerated in 2H2022, slowing to 6.5% Year-on-Year ("YoY"), which although still elevated, was well below its 40-year high of 9.1% reached in June 2022.

The moderation of inflation led to a deceleration in monetary tightening by the Fed in 4Q2022. The Fed increased the fed funds target rate by 50 bps at the Federal Open Market Committee ("FOMC") meeting in December, after four consecutive 75 bps hikes in previous meetings. This drove market expectations that the tightening cycle has somewhat peaked, which led to a mild recovery in the fixed income market in 4Q2022.

What investments influenced the fund's performance over the year?

For the financial year 2022, the Underlying Fund's performance fared better than that of its benchmark index. Interest rate strategies made a positive contribution, while sovereign credit exposures had a largely neutral effect. Among currencies, positions in the Ghanaian cedi ("GHC"), Argentine peso ("ARS"), Colombian peso ("CLP"), South Korean won ("KRW"), Indonesian rupiah ("IDR"), Chinese yuan ("CNY") and Indian rupee ("INR") detracted from absolute performance, offset in part by positions in the Japanese yen ("JPY") and Brazilian real ("BRL"), as well as net-negative positioning in the euro ("EUR") earlier in the year. The Underlying Fund maintained duration exposures primarily in select emerging markets. Duration exposures in Argentina and Brazil contributed to absolute results, while duration exposure in Ghana detracted.

AIA GLOBAL BOND FUND SERIES' MARKET COMMENTARY (cont'd)

On a 5-year basis, the Underlying Fund's relative underperformance was primarily due to its currency positions where exposures in Latin America and Asia detracted from relative results. Interest-rate strategies generally contributed to performance while overall credit exposures had a largely neutral effect. Duration exposure to UST for part of the period generally detracted from performance while duration exposures in the emerging market region such of Latin America, Asia ex-Japan and Africa were a majority positive contributor to performance for the period.

What is your strategy going forward?

The Underlying Manager continues to expect inflation to be on a declining trend but remain above historical averages for 2023, albeit for differing reasons in individual regions. Hence, the Underlying Manager will continue to closely monitor individual inflation drivers and outcomes in the different regions and countries.

The prolonged Russia-Ukraine war continues to generate uncertainty in global growth and financial markets, particularly if disruptions on supply of food, energy and other commodities throughout Europe worsens. On the rates front, while the world is still generally in a monetary tightening cycle, the Underlying Manager is seeing signs of divergence creeping in as early movers signal pauses and/or peaks in their cycles, while other central banks remain hawkish. Whilst developed markets may choose to hold interest rates at elevated levels if inflation remains stubbornly high, emerging market may start to pause or even ease sooner due to the need to stimulate and rebuild their economies.

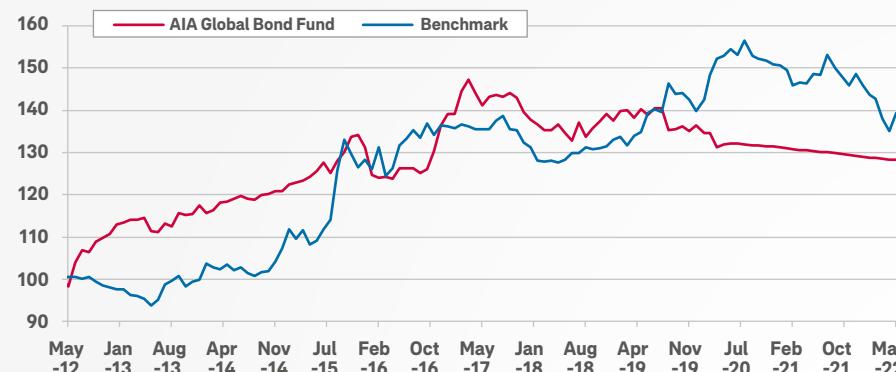

The Underlying Manager views that selective emerging market assets have already been priced for high inflation and rate hikes and Asia will continue to stand out given its stronger macro growth, whilst potential alpha generation can come from Latin America, where the high commodity prices should help bolster local-currency assets and currency valuations despite some political rhetoric in these countries.

What changes, if any, do you have in the fund's investment objectives or risk characteristics?

There were no changes to the investment objectives or risk characteristics of the Fund in 2022. AIA Global Bond Fund and AIA Global Bond Funds 1 to 5 matured in 2022. There are 3 remaining funds which will mature in 2023.

AIA GLOBAL FIXED INCOME FUND (cont'd)

Geographical Allocation as at 31 December 2022*

* Underlying fund data taken from Underlying Manager AIA Investment Management Private Limited Factsheet of underlying fund AIA Diversified Fixed Income Fund as of 31 December 2022

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -12.54% against the benchmark of -12.41%. The Fund initially recorded a positive relative return against the benchmark in 1Q2022, as the underweight allocation towards risk assets was a major driver of portfolio returns. The rapidly increasing inflation, hawkish sentiment from the Fed and geopolitical uncertainty from the Russia-Ukraine tensions combined to trigger a sell-off in global bonds and a widening of credit spreads. The Fund largely weathered the move as the Underlying Manager reduced exposure in Russia and kept duration short. Towards 2H2022, the Fund's relative performance deteriorated against the benchmark as the market sell-off intensified. There was a repricing in market expectations as the rapid pace of rate hikes by the Fed strengthened expectations of a recession. Recession fears drove credit spreads wider, which saw the Fund's exposure in lower quality credits and growth-sensitive sectors detracted from performance. The Fund gradually reduced its exposure in riskier assets in expectations of heightened volatility, becoming increasingly underweight to corporates and emerging market ("EM"). However, this strategy eventually resulted in an overall underperformance in the benchmark in 2022, as the sentiment switched in 4Q2022 towards a risk-on move in expectations that the rate hiking cycle is nearing its conclusion and that a U.S. recession will likely occur in 2023 which will lead to faster than expected rate cuts by the Fed. The dovish sentiment was also driven by moderating price pressures as U.S. headline CPI decelerated in 2H2022, slowing to 6.5% YoY in December 22, well below its 40-year high of 9.1% reached in June 22.

AIA GLOBAL FIXED INCOME FUND (cont'd)

In general, most of the poor relative returns in 2022 can be attributed to asset allocation, specifically from the Fund's underperformance in corporate bonds in the industrial and financial sector. However, this was mitigated by positive contributions from security selection in the emerging markets region. Another notable source of positive relative return was from the Underlying Fund's duration positioning, where its underweight duration strategy outperformed in the rising yield environment observed across global fixed income markets.

Over the 5-year period, the Fund returned -4.98% against the benchmark of 3.34% on a net basis. Since its inception in July 2006, the Fund has posted a cumulative return of 111.17% versus the benchmark of 139.28%.

What is your strategy going forward?

The Underlying Manager expects inflation to decline in 2023, moderating to 3% by year end from 6.5% at the end of 2022. It also expects economic growth to trend lower, with a U.S. recession occurring in 3Q2022 and GDP growth at -1.5% for the year. This is predicated on the Underlying Manager's expectation that the Fed will continue to hike the fed funds rate beyond 1Q2023, with another 50 - 75 bps worth of hikes to be implemented. The Underlying Manager also sees consumer spending weakening in 2023 as personal savings decline and personal net worth deteriorate amidst a sharp decline in valuations in the housing market. Profitability of corporates is also expected to soften as inflation-driven revenue effect dissipates. This will eventually translate to labour market weakness as jobless claims are expected to increase to over 300,000 by 3Q2023.

The Underlying Manager believes that the resulting decline in economic activity will likely tip the U.S. economy into recession in 3Q2023 and lead to a broad weakening of the U.S. dollar ("USD"). As such, the Underlying Manager is constructive on EM currencies, but will be selective in its country allocation amidst concerns on the fiscal position of selected Latin American and Asian countries amidst declining Purchasing Managers' Index ("PMI") and commodity prices.

Valuations for U.S. Investment Grade ("IG") corporates has become increasingly expensive in 2H2022. As such, the Underlying Manager will reduce exposure in this sector as it expects excess returns to be relatively modest for 2023. In addition, volatility in the IG space has increased which indicates heightened vulnerability and lower risk-adjusted returns. From a fundamental view, the Underlying Manager also views IG less favourably as it believes that corporate earnings are unsustainable given the economic outlook and that revenue and earnings growth have already peaked in 2022.

Given the Underlying Manager bearish view on the economy and the expectation of further increases in the fed funds rate, the Underlying Manager will be looking to keep an underweight exposure in Corporates and Industrials, while maintaining an overweight in Financial Institutions and Banking. However, due to the view that the

AIA GLOBAL FIXED INCOME FUND (cont'd)

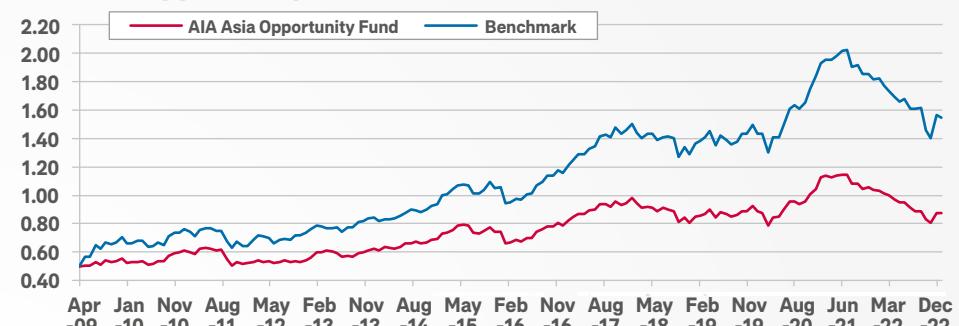

market is incorrectly pricing the Fed's hawkishness and that the outcome will greatly hinge on how the labour market develops over the first months of 2023, the Underlying Manager expects 1H2023 to be volatile and will be looking to be nimble with its allocation strategy.

Will there be any changes in the Fund's investment objectives or risk characteristics?

There will be no changes to the investment objectives or risk characteristics of the Fund in the near future.

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -14.91% against the benchmark of -15.06%. Key contributor to the Fund performance came from stock selection within the Financial and Consumer Discretionary sector. The Fund's overweight in the Financial sector was a major contributor to fund performance as banks are key beneficiary amid economy reopening and interest rate hikes. 2022 was a volatile year for Asia ex Japan market as the region was dragged by China's strict adherence to the 'zero-COVID' policy in the first 10 months. On a 5-year basis, the Fund has posted a cumulative return of -7.03% versus the benchmark's cumulative return of 6.05%. The relative performance in the past 5 years was dragged by the Fund's security selection within Consumer Discretionary, Healthcare and Materials sectors. However, allocation and security selection in the Communication Services sector contributed positively to relative return. Since its inception in April 2009, the Fund has posted a cumulative return of 75.30% versus the benchmark's cumulative return of 209.12%.

AIA ASIA OPPORTUNITY FUND (cont'd)

What is your strategy going forward?

We are of the view that we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China has signaled towards a gradual reopening of its economy which will mitigate the impact of U.S. recession risk. We are cautiously optimistic on equities and positioning the Fund in Consumer Discretionary sector that benefitted from economy reopening. We also favour Information Technology and Communication Services sectors with structural growth catalyst and decent valuation. Downside risks to the market could stem from a prolonged deep U.S. recession, worsening geopolitical tension and government policy risk.

Will there be any changes in the Fund's investment objectives or risk characteristics?

No. The Fund will maintain the same investment objectives and general risk characteristics.

Fund Allocation as at 31 December 2022

AIA NEW HORIZON FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -9.31% against the benchmark of -9.42%. The Fund performance marginally outperformed due to the decision to overweight local equities vs foreign equities. Its cash holdings also helped to preserve capital in a falling market environment. Its main holdings in AIA Strategic Equity Fund managed to outperform the benchmark mainly driven by AIA Strategic Equity Fund's overweight position in Financial Services sector and underweight position in Healthcare sector. The Fund's foreign holdings, namely AIA Global Multi Factor Equity Fund underperform its benchmark marginally while AIA New Multinational Fund outperformed its benchmark.

On a 5-year basis, the Fund has posted a cumulative return of -0.62% versus the benchmark's cumulative return of 8.76%. The relative performance in the past 5 years was mainly dragged by the allocation to the underlying Emerging Europe equity fund and the underperformance of the Greater China fund. Since its inception in August 2004, the Fund has posted a cumulative return of 153.30% versus the benchmark's cumulative return of 180.21%.

What is your strategy going forward?

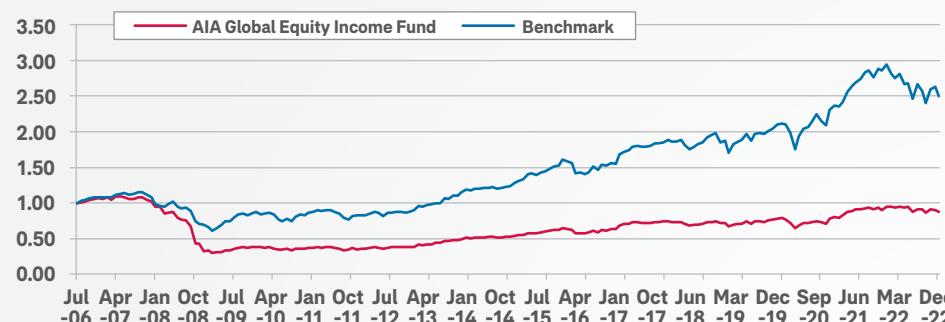

We believe we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China's gradual reopening of its economy will help to mitigate the impact of U.S. recession risk. We are cautiously optimistic on the global equity market in the near term and are positioned in the Consumer Products & Services sectors, which benefitted from the economy reopening. We also favour Technology sector with structural growth catalyst and reasonable valuation. Domestically, we expect corporate earnings to improve in 2023 with the opening of international borders and the expiry of the one-off prosperity tax, and look to invest in companies that deliver quality earnings and of strong balance sheet in times of uncertainty. Downside risks to the market could stem from a prolonged deep U.S. recession, overtightening of monetary policy, worsening geopolitical tension and government policy risk.

Will there be any changes in the Fund's investment objectives or risk characteristic?

There will be no changes to the investment objectives or risk characteristics of the Fund in the near future.

Sector Allocation as at 31 December 2022*

* Underlying fund data taken from Underlying Manager AIA Investment Management Private Limited Factsheet of AIA Equity Income Fund as of 31 December 2022

AIA GLOBAL EQUITY INCOME FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -7.87% against the benchmark of -15.20%. This is against a backdrop of a risk off environment globally, which was brought forth by the Ukraine-Russia conflict, sharp rise in inflation and central bank raising rates aggressively to combat inflation. High dividend stocks with stable cashflow, high earning visibility and low beta tend to perform relatively better than the overall market in a bearish market environment.

On a 5-year basis, the Fund has posted a cumulative return of 19.33% versus the benchmark's cumulative return of 34.12%. The period has been mostly characterised by dovish central banks in earlier years, with unprecedented amounts of quantitative easing. As a result, interest rates fell sharply globally. The COVID-19 pandemic has accelerated this trend with governments and central banks responding quickly and aggressively. This environment has been very rewarding for Growth stocks. The MSCI Growth index has rerated strongly over the period and outperformed the MSCI Value index by a staggering rate. The valuation difference between the two indices rose to record highs as investors were willing to pay higher multiples for Growth stocks. This has worked against the Fund's core strategy of investing in high quality, value oriented, dividend-paying companies worldwide selling at a discount to fair value. Since its inception in July 2006, the Fund has posted a cumulative return of -12.47% versus the benchmark's cumulative return of 150.17%.

What is your strategy going forward?

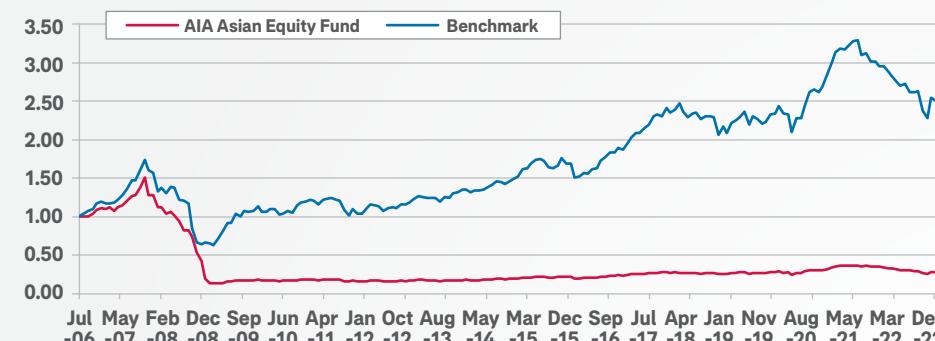

From a positioning perspective, the Fund decreased its underweight positions to the Communication Services and Consumer Discretionary sectors and decreased its overweight position to the Healthcare sector. The Fund decreased its overweight position to the Consumer Staples sector, which continues to be its largest overweight while the Information Technology sector continues to be the largest underweight. The Fund has also moved from an overweight to an underweight position in Industrials. With regards to regional positioning, the Fund decreased its overweight exposure to Developed Asia Pacific ex Japan and Japan, while increasing its overweight exposure to Developed Europe & Middle East ex UK. The Fund increased its underweight position to North America, which continues to be the largest underweight exposure and Emerging Markets is the largest overweight exposure.

Will there be any changes in the Fund's investment objectives or risk characteristics?

There will be no changes to the investment objectives or risk characteristics of the Fund in the near future.

AIA ASIAN EQUITY FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -19.06% against the benchmark of -15.06%. Both stock and asset allocation detracted from the Fund's relative performance. From a stock selection perspective, Financials and Real Estate sectors contributed positively to the Fund's performance while Information Technology sector was the largest detractor from the Fund's performance. Having a position in Cash added positively to the performance.

On a 5-year basis, the Fund has posted a cumulative return of 1.35% versus the benchmark's cumulative return of 5.39%. The underperformance in the past 5 years was mainly driven by security selection in the Consumer Discretionary and Real Estate sectors. Since its inception in July 2006, the Fund has posted a cumulative return of -72.11% versus the benchmark's cumulative return of 151.42%.

What is your strategy going forward?

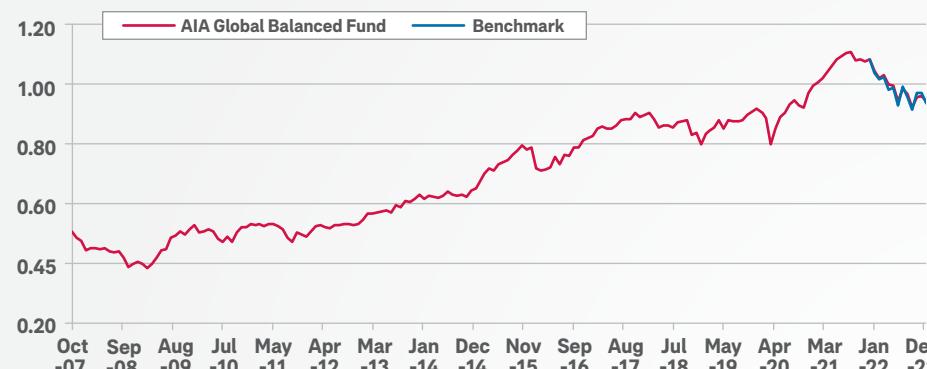

As we head into 2023, the Fed's policy normalisation would remain imperative for investors as global markets continued to see pressure from slowing growth and restrictive monetary policy. That said, softening Inflation and the continuation of USD weakness may be conducive for regional equities, just as Asia ex-Japan is looking to see a positive turn in Earnings Per Share ("EPS") revisions led by China. The performance of Asia ex-Japan equities hinges heavily on its largest market China. Even though the MSCI China has rallied 35% in the last two months of 2022, the Underlying Manager remains positive with the clear pivot back to growth, favouring Internet, Renewables and Consumption/Reopening beneficiaries. Oversold mega-cap index names could also benefit when flows return. South Korea and Taiwan remain the most vulnerable given their technology-centric nature, although both are expected to receive some support in the form of increasing demand from China reopening. These two markets have been among the worst performers in 2022, and the Underlying Manager expects opportunities to emerge in 2023 after the re-basement of valuations and expectations. ASEAN and India have benefitted from reopening and easing oil prices respectively and have stayed relatively more resilient in 2022. Ongoing diversification in global supply chains is also underpinning their longer-term structural growth story. However, the Underlying Manager remains cognisant of potential funds outflow from these regions into North Asia, in particular China, given the wide performance gap observed last year.

Will there be any changes in the Fund's investment objectives or risk characteristics?

There will be no changes to the investment objectives or risk characteristics of the Fund in the near future.

Fund Allocation as at 31 December 2022

AIA GLOBAL BALANCED FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -12.97%.

2022 has been an exceptional year for financial markets where both equities and fixed income posted negative returns, occurring only the 2nd time in half a century. A combination of detractors such as the Ukrainian war, restrictive monetary policies by central banks to rein in inflation, as well as the COVID-19 resurgence saw both equity and bond markets struggling. Global stocks (MSCI World Index) lost 18.1% for the year while global bonds (Bloomberg Barclays Global Aggregate Bond Index - BBG) faced similar pressure and was down 16.7% for the year on the back of relentless rate hikes by major central banks to tackle runaway inflation.

Risk sentiments improved in the later months of 2022, as data indicates that inflation may have likely peaked. While inflation may have softened from its highs, it is likely to remain above what we have experienced in the past decades.

The conventional wisdom of stocks and bonds having an inverse relationship where stocks get sold while bonds rally in a risk off environment did not work as investment managers find little room to seek shelter from the market volatility. The Fund, although well diversified across asset classes, was not spared from this volatility and as a result saw negative performance for the year.

On a 5-year basis, the Fund has posted a cumulative return of 4.85%. The performance in the past 5 years was mainly driven by the Asia and U.S. equities funds. Meanwhile, the European equities funds were key relative underperformers. Since its inception in October 2007, the Fund has posted a cumulative return of 88.32%.

What is your strategy going forward?

In view of the bearish view on the equity market, the Fund currently maintains an overweight to lower beta styles such as Minimum Volatility, High Dividend, Quality and Value with the view that these factors should outperform the core index under a macro context of weaker growth (or recession) and Fed tightening. These factors should also be able to provide some downside protection during equity sell-off events as well as provide diversification benefits within a portfolio construction context.

For the fixed income market, as we approach the end of the rate hike cycle, the Underlying Manager continues to adopt a more cautious approach towards credits while positioning for long-term opportunities.

Will there be any changes in the Fund's investment objectives or risk characteristics?

There will be no changes to the investment objectives or risk characteristics of the Fund in the near future.

Fund Allocation as at 31 December 2022

AIA ASIA PLATINUM FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -12.53% against the benchmark of -9.91% as all the underlying funds underperformed their respective benchmarks and produced negative total returns owing to macroeconomic challenges in 2022.

On a 5-year basis, the Fund has posted a cumulative return of 15.14% versus the benchmark's cumulative return of 20.28%. The relative performance in the past 5 years was mainly dragged by the positions in Japan and India equities funds. Since its inception in May 2006, the Fund has posted a cumulative return of 155.42% versus the benchmark's cumulative return of 196.97%.

What is your strategy going forward?

Domestically, China's relaxation of COVID measures is expected to provide substantial support to the recovery in consumer spending and domestic earnings in many sectors of the economy. However, the exit from COVID remains a risk and economic momentum could be volatile as a result. Despite the recent rebound, the Underlying Manager continues to see solid valuation support for equities in China and Hong Kong. If China's re-opening and other policies are successful, then there is scope for a sharp improvement in sentiment and a market re-rating. In Taiwan, while geopolitical and technology outlook uncertainties linger, there is a chance for the technology inventory cycle to pivot in the first half of 2023. This could drive a sharp re-rating in the Taiwan market. Domestic activity may also gradually recover as Taiwan exits from Omicron.

In Japan, the main event for investors in December was the decision by the Bank of Japan to widen the band within which it has been maintaining the 10-year bond yields. Although such a change had always been recognised by investors as a logical first step towards policy normalisation, the timing of the decision was a complete surprise. Although the change in yield-control policy was not a de-facto interest rate rise, it was still sufficient to drive a sharp strengthening of the Japanese yen in December as investors moved to discount a more fundamental shift in policy from the Bank of Japan in 2023. Japan enters 2023 as a clear outlier among developed markets, in terms of the outlook for economic growth, monetary policy and inflation. With the domestic economy finally reopening, the Underlying Manager sees many companies well-positioned to continue to grow profits in the coming year.

In India, given the potential risk of sharp economic slowdown in Western economies, portfolio positioning remains in favour of domestic sectors of the economy. The portfolio has an underweight position in commodities and IT services sectors while financials is the key overweight sector. In recent months, exposure to consumer, defence and healthcare sectors have also been increased.

AIA ASIA PLATINUM FUND (cont'd)

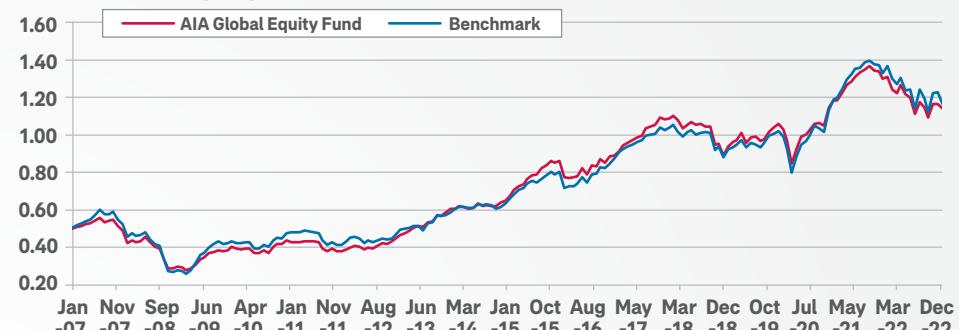

Another important factor for Emerging Markets ("EM") is the USD, which is expensive if compared with its history. Confidence that measures from the Fed have successfully begun to control inflation should also lead to a softer USD, allowing EM currencies to recover. Following the recent rally, and some downward revision to EM earnings expectations, aggregate valuations have moved closer to their historical median. In general, EM yields and currencies are at attractive levels. The Underlying Manager remains cautious in the near term but will continue to deploy cash into opportunities that are priced to offer a good margin of safety.

Will there be any changes in the Fund's investment objectives or risk characteristics?

No. The Fund will maintain the same investment objectives and general risk characteristics.

Fund Allocation as at 31 December 2022

AIA GLOBAL EQUITY FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -12.77% against the benchmark of -14.84%. The Fund outperformed the benchmark given its overweight position in AIA Asia Ex Japan fund which benefited significantly from China's decision to re-open the economy in 4Q2022. Our holdings in AIA Global Multi-Factor Equity Fund underperformed the benchmark marginally.

On a 5-year basis, the Fund has posted a cumulative return of 4.79% versus the benchmark's cumulative return of 11.86%. The relative performance in the past 5 years was mainly due to the negative alpha generation from the Europe small cap equity fund. Since its inception in January 2007, the Fund has posted a cumulative return of 128.13% versus the benchmark's cumulative return of 132.78%.

What is your strategy going forward?

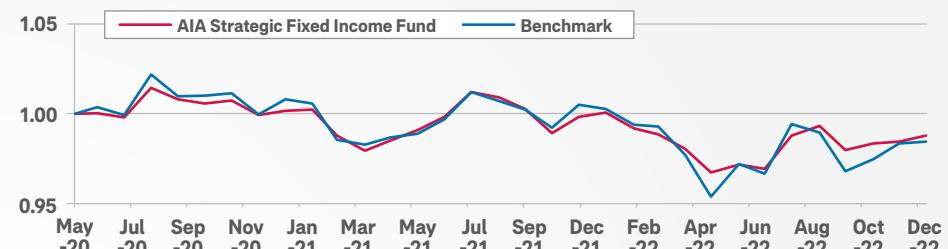

In view of the bearish view, the Fund currently maintains an overweight to lower beta styles such as Minimum Volatility, High Dividend, Quality and Value with the view that these factors should outperform the core index under a macro context of weaker growth (or recession) and Fed tightening. These factors should also be able to provide some downside protection during equity sell-off events, as well as provide diversification benefits within a portfolio construction context.

Will there be any changes in the Fund's investment objectives or risk characteristics?

There will be no changes to the investment objectives or risk characteristics of the Fund in the near future.

Sector Allocation as at 31 December 2022

AIA STRATEGIC FIXED INCOME FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -1.27% against the benchmark of -1.79%. Positive relative performance was attributed to its asset allocation strategy in overweighting domestic corporate bonds relative to government bonds as the former outperformed. Good security selection from both domestic and foreign corporate bonds also attributed positively to the performance. Since its inception in May 2020, on a net basis, the Fund returned -1.22% against the benchmark of -1.55%.

What is your strategy going forward?

With inflation and growth expected to trend lower in 2023, central banks across the world are expected to conclude their policy normalisation, marking the end of the tightening cycle. That said, the timing of the policy pivot is still uncertain and remains highly data dependent. Given those expectations, the bond market is generally expected to perform better in 2023 but with a potential rise in volatility on the horizon, due to monetary policy uncertainty, increased bond supply and fiscal concerns. We expect the MGS curve to potentially bull-steeple in 2023 due to attractive valuations after flattening significantly in 2022; and for the back end of the curve to be well supported amidst lower supply and stable demand from investors. We employ a neutral duration stance with a tactical overweight bias as we continue to trade on momentum for government bonds, with trading opportunity at the short end to belly of the curve. Our asset allocation will continue to favour corporate bonds over government bonds for yield enhancements.

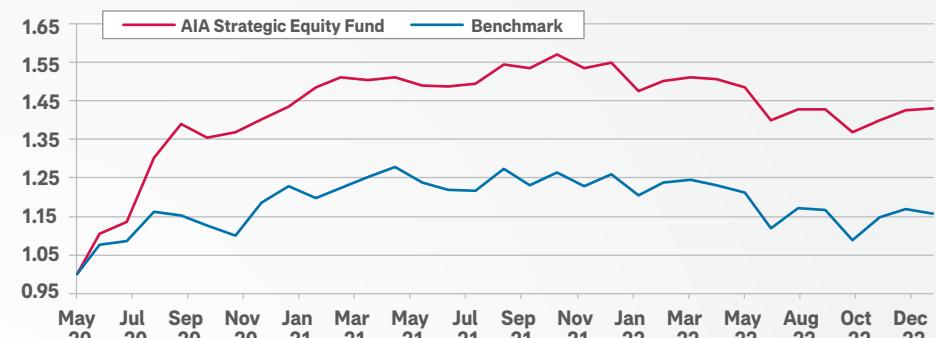

In terms of foreign investments, we exercise a slight underweight positioning in foreign bond investments in the Fund as we expect the Fed to remain committed in keeping rates higher for longer in their bid to tame inflation. The outlook on USD/MYR remains neutral but interest rate and curve risk will remain volatile in fixed income markets this year.

Will there be any changes in the Fund's investment objectives or risk characteristics?

No. The Fund will maintain the same investment objectives and general risk characteristics.

Sector Allocation as at 31 December 2022

AIA STRATEGIC EQUITY FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund returned -7.60% against the benchmark's return of -8.12%. The outperformance in 2022 was mainly driven by the Fund's overweight position in Financial Services sector and underweight position in Healthcare sector. Since inception in May 2020, on a net basis, the Fund returned 42.99% against the benchmark's return of 15.64%. The outperformance was mainly driven by the Fund's overweight in Technology sector. The Fund's underweight position in Healthcare and Plantation sectors also helped with the Fund's outperformance vs benchmark.

What is your strategy going forward?

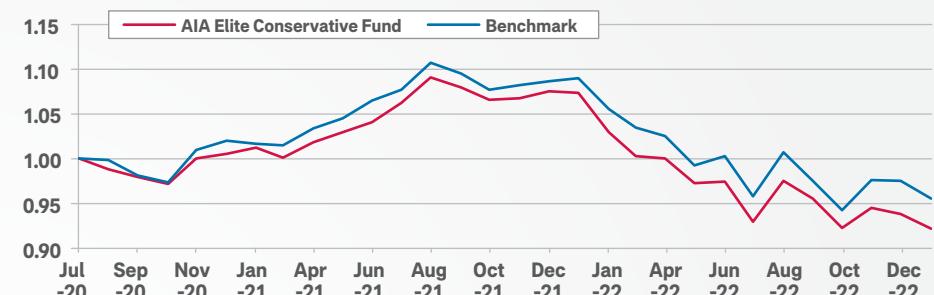

We believe we have already seen the peak of Fed's hawkishness and equities valuation has been partially adjusted downwards accordingly. Investors are now watching the macro data closely to gauge the extend of the recession risk in the U.S. from the aggressive rate hikes. On the other hand, China's gradual reopening of its economy will help to mitigate the impact of U.S. recession risk. We are cautiously optimistic on the global equity market in the near term and are positioned in the Consumer Products & Services sectors, which benefitted from the economy reopening. We also favour Technology sector with structural growth catalyst and reasonable valuation. Domestically, we expect corporate earnings to improve in 2023 with the opening of international borders and the expiry of the one-off prosperity tax, and look to invest in companies that deliver quality earnings and of strong balance sheet in times of uncertainty. Downside risks to the market could stem from a prolonged deep U.S. recession, overtightening of monetary policy, worsening geopolitical tension and government policy risk.

Will there be any changes in the Fund's investment objectives or risk characteristics?

No. We will continue to seek long-term growth of capital and income through a diversified equity portfolio.

AIA ELITE CONSERVATIVE FUND (cont'd)

How did the Fund perform during the period?

For the financial year 2022, on a net basis, the Fund posted a return of -14.14% against the benchmark of -12.33%. The key detractor for 2022 came from the exposure to AIA Global Quality Growth Fund (sub-managed by Baillie Gifford) which has an investment style biased towards growth, selecting companies that can double its value within 5 years amongst other considerations. With global growth slowing and looking more challenging ahead, Baillie Gifford has enhanced their investment process by establishing a central team, headed by their two lead managers, to take the lead on investment research. This will enable a more holistic approach to portfolio construction and idea flow, as well as a clear and consistent sustainability bar. Their investment style now focuses towards "enduring growth" where the managers identify companies that can deliver a decade or more of double-digit earnings and sustainable growth.

On the other hand, the key contributor for 2022 came from the exposure to AIA New Multinationals Fund (sub-managed by Wellington Management) which focuses mainly on high quality companies with strong earnings capabilities and strong stewardship. The focus towards quality had enabled the Fund to weather market volatility better and delivered outperformance against the benchmark. Going forward, the Underlying Manager will continue to seek opportunities from market inefficiencies while maintaining its focus on quality companies.

2022 has been an exceptional year for financial markets where both equities and fixed income posted negative returns, occurring only the 2nd time in half a century. A combination of detractors such as the Ukrainian war, restrictive monetary policies by central banks to rein in inflation, as well as COVID resurgence, saw both equity and bond markets struggling. Global stocks (MSCI World Index) lost 18.1% for the year while global bonds (Bloomberg Barclays Global Aggregate Bond Index - BBG) faced similar pressure and was down 16.7% for the year on the back of relentless rate hikes by major central banks to tackle runaway inflation.

Risk sentiments improved in the later months of 2022, as data indicates that inflation may have likely peaked. While inflation may have softened from its highs, it is likely to remain above what we have experienced in the past decades.

The conventional wisdom of stocks and bonds having an inverse relationship where stocks get sold while bonds rally in a risk-off environment did not work as investment managers find little room to seek shelter from the market volatility. The AIA Elite portfolios, although well diversified across asset classes, were not spared from this volatility and as a result saw negative performance for the year.

Since its inception in August 2020, the Fund has posted a cumulative return of -7.86% versus the benchmark's cumulative return of -4.44%.

AIA ELITE CONSERVATIVE FUND (cont'd)

What is your strategy going forward?

We think 2023 will be "a year of inflections" - inflections through a macro recovery, a Fed "pivot" and a turnaround in asset class performance compared to 2022. But every inflection point must first come with a weakening phase. On the macro front, we think U.S. growth will stall, corporate profits will decline, and associated cost cutting should lead to higher unemployment rates, translating to a higher probability of a recession sometime near the middle of the year. Equity valuations, on the other hand, may test lower before recovering some ground in the latter half of 2023.

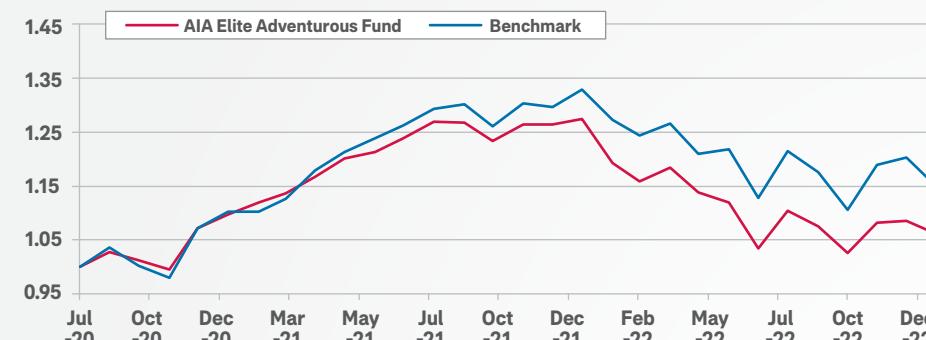

We think there will be plenty of opportunities for asset classes to make a strong turnaround, first starting with sovereign bonds (in particular, U.S. Treasury) and possibly much later with risk assets (global and Asian equities and high yield credit). The timing of asset class recoveries wouldn't necessarily be synchronised, and hence a return of a more normal cross-asset correlation structure in the market, unlike what we've experienced in 2022.

Will there be any changes in the Fund's investment objectives or risk characteristics?

No. The Fund will maintain the same investment objectives and general risk characteristics.

Ulasan Pasaran

Tahun 2022 merupakan tahun yang luar biasa bagi pasaran kewangan di mana kedua-dua ekuiti dan pendapatan tetap mencatatkan pulangan negatif, merupakan hanya kali kedua dalam masa setengah abad keadaan seperti ini berlaku. Gabungan peristiwa yang menjelaskan seperti perang Ukraine yang mengakibatkan harga komoditi meningkat tinggi dengan ketara, dasar monetari terhad oleh bank pusat untuk mengekang inflasi serta kebangkitan semula COVID-19 menyaksikan pasaran ekuiti dan bon mengalami kesukaran. Rizab Persekutuan ("Fed") Amerika Syarikat ("A.S.") menaikkan kadar dana Fed sebanyak 425 mata asas ("bps") secara kumulatif pada tahun 2022, yang mendorong turun naik yang ketara lebih tinggi dalam pasaran bon global. Di dalam negara, Bank Negara Malaysia ("BNM") juga memulakan beberapa siri kenaikan kadar dengan pengetatan kumulatif sebanyak 100bps berikutan peningkatan dalam aktiviti ekonomi dan terbitan inflasi yang kukuh.

Berlatarbelakangkan keadaan tersebut, Indeks 100 Teratas FTSE Bursa Malaysia dan Indeks KLCI FTSE Bursa Malaysia yang masing-masing mencatatkan penurunan sebanyak 5.40% dan 4.60% berbanding Indeks Dunia MSCI (dalam terma MYR) dan Indeks MSCI Asia Ex Jepun (dalam terma MYR) yang masing-masing jatuh 14.68 % dan 16.89%. Sentimen pelabur domestik yang lebih lembut dan aliran keluar dana luar pesisir membawa kadar hasil bon yang lebih tinggi, dengan kadar hasil Sekuriti Kerajaan Malaysia ("MGS") 10 tahun ("10Y") meningkat 50 bps untuk ditutup pada 4.07% pada akhir bulan Disember 2022. Kadar hasil nota Perbendaharaan A.S. 10Y ("UST") meningkat sebanyak 236 bps pada tahun 2022, menutup tahun pada 3.87%.

Sentimen risiko bertambah baik pada bahagian akhir tahun 2022, kerana data menunjukkan bahawa inflasi berkemungkinan telah memuncak. Walaupun inflasi mungkin menurun daripada paras tertingginya, berkemungkinan ia kekal mengatasi kadar yang pernah kita alami dalam beberapa dekad yang lalu.

MESEJ DARIPADA CEO DAN CIO (samb)

Pandangan Pasaran

Kami menjangka tahun 2023 akan menjadi tahun yang lebih baik untuk pasaran pendapatan tetap kerana inflasi dan pertumbuhan dijangka menurun pada tahun 2023 manakala bank pusat di seluruh dunia dijangka menamatkan penormalan dasar mereka, menandakan berakhirnya kitaran pengetatan. Walau bagaimanapun, kami menjangkakan peningkatan kemudahan hubungan dalam pasaran bon sudah kelihatan, disebabkan ketidaktentuan dasar monetari kerana pemasaan perubahan dasar masih tidak menentu dan kekal bergantung kepada data.

Kami menjangkakan keluk MGS berpotensi meningkat pada tahun 2023 disebabkan penilaian yang menarik dalam keadaan bekalan yang lebih rendah dan permintaan yang stabil daripada pelabur. Kami mengambil pendirian jangka masa neutral dengan kecenderungan taktikal untuk berwajaran tinggi sambil terus berdagang pada momentum untuk bon kerajaan Malaysia, dengan peluang dagangan pada hujung pendek hingga ke atas keluk. Peruntukan aset kami akan terus mengutamakan bon korporat berbanding bon kerajaan untuk peningkatan kadar hasil.

Bagi ekuiti, kami berpendapat bahawa kami telah melihat kemuncak *hawkish* Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat ke arah pembukaan semula ekonominya secara beransur-ansur yang akan mengurangkan kesan risiko kemelesetan A.S. Di dalam negeri, pendapatan korporat akan bertambah baik pada tahun 2023 apabila tamat tempoh cukai kemakmuran sekali sahaja. Pendapatan sesaham Malaysia ("EPS") untuk tahun 2023 dijangka berkembang sebanyak 11.9%, dibantu oleh ketiadaan cukai kemakmuran dan sepatutnya mengatasi unjuran pertumbuhan 5.7% untuk MSCI Asia Ex Jepun. Sementara itu, penilaian ekuiti Malaysia kekal tidak sukar dengan dagangan penilaian harga kepada pendapatan ("PE") sekitar 1.5 sisihan piawai, di bawah purata 10 tahun.

Risiko utama pada pendapatan kami termasuk ketegangan geopolitik Rusia-Ukraine yang berpanjangan, kesan penularan daripada krisis perbankan di A.S. dan Eropah, hubungan perdagangan A.S.-China yang semakin teruk, pemulihan perlahan dalam pertumbuhan keluaran dalam negara kasar ("KDNK") China, aliran menaik dalam harga komoditi yang boleh memperbarui keimbangan inflasi, kadar hasil perbendaharaan A.S. yang lebih tinggi yang boleh mengukuhkan USD dan merugikan pasaran memuncul, pendaratan sukar di A.S. dan perubahan dasar mengenai pembukaan semula China secara beransur-ansur.

MESEJ DARIPADA CEO DAN CIO (samb)

Sekali lagi, kami ingin merakamkan setinggi-tinggi penghargaan kepada anda atas sokongan berterusan anda kepada AIA dan kerana memberi kami peluang untuk menjaga keperluan kesihatan, kekayaan dan perlindungan anda. Ahli pelaburan profesional kami yang berkelayakan akan terus berpandukan falsafah pelaburan berhemat AIA, kerangka pengurusan risiko yang kukuh dan tadbir urus korporat yang baik. Diharapkan anda sekeluarga berada dalam keadaan sihat sejahtera dan berbahagia sentiasa.

GAMBARAN PASARAN PENDAPATAN TETAP TEMPATAN

Ulasan Pasaran

Pembukaan semula ekonomi global pada tahun 2022 menyebabkan aktiviti pengambilan semula yang agresif, mendorong keadaan pasaran buruh yang teguh dan permintaan yang terbendung. Peperangan antara Rusia dan Ukraine memburukkan lagi gangguan rantaian bekalan dan mengakibatkan harga komoditi melambung naik. Ini mendorong tekanan inflasi yang berterusan di banyak negara, menyebabkan bank pusat utama mengambil keputusan agresif untuk mengetatkan dasar monetari. Rizab Persekutuan Amerika Syarikat (A.S.) ("Fed") menaikkan kadar dana Fed sebanyak 425 mata asas ("bps") secara kumulatif pada tahun 2022, mendorong turun naik yang ketara dalam pasaran bon global. Peserta pasaran secara agresif menilai semula harga kadar hasil bon lebih tinggi untuk mencerminkan laluan kenaikan kadar Fed.

Di dalam negara, Bank Negara Malaysia ("BNM") juga memulakan beberapa siri kenaikan kadar dengan pengetatan kumulatif sebanyak 100bps berikutan peningkatan dalam aktiviti ekonomi dan terbitan inflasi yang kukuh. Walau bagaimanapun, perbezaan kadar faedah antara kadar hasil bon A.S. dan domestik mengetat dengan ketara seiring dengan laluan pengetatan dasar yang lebih pantas oleh Fed, sekali gus mengurangkan tarikan bon domestik kepada pelabur asing. Akibatnya, pelabur asing adalah penjual bersih sekuriti hutang Malaysia dengan aliran keluar bersih sebanyak MYR9.8 bilion pada tahun tersebut, menjadikan pegangan asing dalam bon kerajaan Malaysia, Sekuriti Kerajaan Malaysia ("MGS") dan Terbitan Pelaburan Kerajaan ("GII") sebanyak 22.4% pada bulan Disember 2022 (berbanding 25.9% pada bulan Disember 2021). Sentimen pelabur domestik yang lebih lembut dan aliran keluar dana asing menyebabkan kadar hasil bon lebih tinggi, dengan kadar hasil MGS 10Y meningkat 50 bps untuk ditutup pada 4.07% pada akhir bulan Disember 2022. Dari segi penarafan berdaulat, Fitch Ratings dan Moody's masing-masing mengesahkan semula penarafan Malaysia pada BBB+ dengan tinjauan stabil dan A3 dengan tinjauan yang stabil. Sementara itu, S&P mengekalkan penarafan negara kita pada A- dan meningkatkan tinjauan daripada Negatif kepada Stabil. Peningkatan prospek memberikan kelegaan kepada pasaran bon dan sedikit sebanyak menghadkan penambahan kadar hasil bon pada tahun kalender tersebut. Ringgit Malaysia ("MYR") lemah berbanding dolar A.S. ("USD"), terutamanya disebabkan oleh kekuatan USD yang lebih luas berikutan kenaikan kadar dasar Fed yang agresif.

Tinjauan Pasaran

Di dalam negara, kami menjangkakan pasaran pendapatan tetap akan berprestasi lebih baik berbanding tahun 2022. Keluk MGS dijangka meningkat dengan ketara berikutan penilaian yang menarik setelah mendatar dengan ketara pada separuh kedua 2022. Bahagian belakang keluk berkemungkinan disokong dengan baik dalam keadaan penawaran yang lebih rendah bagi bon bertarikh lebih lama dan permintaan yang stabil daripada pelabur. Tinjauan dasar monetari berdasarkan Belanjawan 2023 yang telah dikaji semula nampaknya membina untuk pasaran bon domestik.

GAMBARAN PASARAN PENDAPATAN TETAP TEMPATAN (samb)

Unjuran penurunan deficit bajet kepada 5.0% pada tahun 2023 daripada 5.6% pada tahun 2022, berkemungkinan menjadikan keimbangan terhadap penarafan kedaulatan Malaysia tidak lantang. Walau bagaimanapun, risiko kekal kerana penawaran bersih sekuriti kerajaan masih diramalkan lebih tinggi pada tahun 2023. Ini harus diimbangi dengan kecairan dalam pesisir yang mencukupi dan permintaan pelabur, walaupun penawaran yang bercaj muka boleh menjelaskan pasaran pada separuh pertama 2023. Terdapat juga beberapa ketidaktentuan mengenai dasar monetari. Walaupun BNM dijangka akan menamatkan kitaran normalisasi kadarnya pada separuh pertama 2023, yang sepatutnya diterima secara positif oleh pasaran pendapatan tetap domestik, risiko kekal bahawa BNM boleh terus mengetatkan jika inflasi meningkat dan pertumbuhan kekal berdaya tahan. Dari segi mata wang, MYR sepatutnya disokong dengan baik pada tahun 2023 memandangkan kelemahan USD yang luas kerana jangkaan pasaran tentang perubahan (pivot) dasar Fed, keadaan makro domestik yang membina dan potensi kesan limpahan daripada kekuatan Renminbi ("RMB") apabila ekonomi China dibuka semula. Walau bagaimanapun, pengurangan dalam permintaan luar akibat kelembapan pertumbuhan global dan Fed yang berpotensi *hawkish* boleh menjelaskan MYR pada tahun 2023.

Peluang

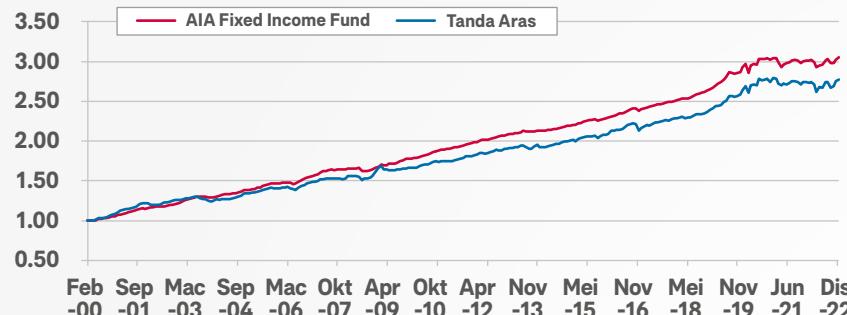

- Pembukaan semula China menyokong pertumbuhan dan ketibaan pelancong, dan dengan itu positif untuk MYR.
- Aliran dana berpotensi daripada pelabur asing ke dalam pasaran bon domestik berikutan ketidaktentuan politik yang berkurangan, perubahan dasar Fed dan jangkaan kekuatan USD memuncak.
- Permintaan dalam negeri yang lebih baik untuk sekuriti kerajaan domestik memandangkan aliran dana pencerun telah menjadi normal.

Kebimbangan

- Ketegangan geopolitik Rusia-Ukraine yang berpanjangan dan hubungan perdagangan A.S.-China yang semakin buruk.
- Kesan penularan daripada sektor perbankan di A.S. dan Eropah.
- Pemulihan pertumbuhan KDNK China yang lebih perlahan.
- Aliran meningkat dalam harga komoditi boleh memperbaharui keimbangan inflasi.
- Kadar hasil Perbendaharaan A.S. ("UST") berpotensi menjadi arah aliran lebih tinggi, mendorong momentum selanjutnya kepada kekuatan USD dan risiko aliran keluar bukan pemastautin.
- Peningkatan pengetatan kuantitatif jika jangkaan pertumbuhan dan inflasi berubah.
- Pendaratan keras di A.S. dengan kemelesetan ekonomi yang teruk.

Notis: Prestasi masa lalu bukan indikatif prestasi masa depan dan prestasi dana ini tidak dijamin.

Pengagihan Sektor pada 31 Disember 2022

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan 1.18% berbanding pulangan tanda aras sebanyak 0.97%. Pendirian jangka masa Dana pada tahap berwajaran rendah pada separuh pertama 2022 dan peralihan seterusnya kepada neutral memberi manfaat kepada prestasi Dana dalam tempoh tersebut. Bagi tempoh 5 tahun dalam tinjauan, Dana memberi pulangan 21.69% berbanding pulangan tanda aras sebanyak 21.25%. Dana berwajaran tinggi dalam bon korporat menyokong prestasi dalam tempoh tersebut. Sejak dilancarkan pada bulan Februari 2000, Dana memberi pulangan kumulatif 204.93% berbanding pulangan kumulatif tanda aras sebanyak 117.12%.

Apakah strategi anda bagi masa hadapan?

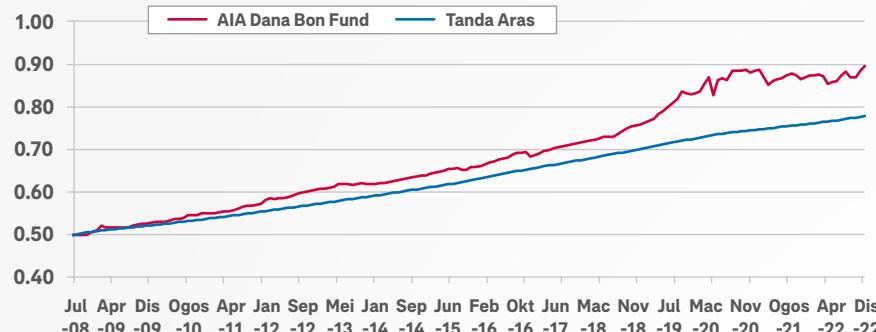

Memandangkan inflasi dan pertumbuhan dijangka menurun pada tahun 2023, bank pusat di seluruh dunia dijangka akan menamatkan penormalan dasar mereka, menandakan berakhirnya kitaran pengetatan. Walau bagaimanapun, masa perubahan dasar masih tidak pasti dan masih sangat bergantung kepada data. Berdasarkan jangkaan tersebut, pasaran bon secara amnya dijangka menunjukkan prestasi yang lebih baik pada tahun 2023 tetapi dengan potensi peningkatan dalam turun naik sudah kelihatan disebabkan ketidaktentuan dasar monetari, peningkatan penawaran bon dan keimbangan fiskal. Kami menjangkakan keluk MGS berpotensi meningkat pada tahun 2023 disebabkan penilaian yang menarik setelah mendatar dengan ketara pada tahun 2022 dan bahagian belakang keluk disokong dengan baik dalam keadaan penawaran bon yang lebih rendah bertarikh lebih lama dan permintaan stabil daripada pelabur. Kami berpendirian jangka masa neutral dengan kecenderungan taktikal untuk berwajaran tinggi sambil kami terus berdagang mengikut momentum untuk bon kerajaan, dengan peluang dagangan pada masa yang singkat sehingga di atas keluk. Peruntukan aset kami akan terus mengutamakan bon korporat berbanding bon kerajaan untuk penambahan kadar hasil.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus memberi tumpuan kepada tahap pendapatan dan pulangan yang tinggi dengan memilih bon berkualiti baik dengan berhati-hati. Kami juga akan mengekalkan kepelbagaiannya portfolio bon korporat dan kerajaan untuk menguruskan risiko dengan lebih baik.

Pengagihan Sektor pada 31 Disember 2022

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan 2.44% berbanding pulangan tanda aras sebanyak 2.40%. Walaupun prestasi relatif lebih baik berbanding penanda aras, pegangan Dana dalam sukuk kerajaan secara amnya merosot daripada prestasi keseluruhan disebabkan oleh peningkatan dalam hasil pada 2022. Walau bagaimanapun, prestasi Dana disokong oleh pegangan sukuk korporat yang membawa pendapatan keuntungan tinggi dan menyumbang kepada kedudukan defensif Dana dalam tempoh tersebut. Bagi tempoh 5 tahun dalam tinjauan, Dana memberi pulangan 24.15% berbanding pulangan tanda aras sebanyak 14.67%. Prestasi positif Dana disumbangkan oleh pulangan daripada pendapatan keuntungan yang tinggi dan pemampatan *spread* kredit. Sejak dilancarkan pada bulan Julai 2008, Dana telah mencatatkan pulangan kumulatif sebanyak 78.99% berbanding pulangan kumulatif tanda aras sebanyak 55.72%.

Apakah strategi anda bagi masa hadapan?

Memandangkan inflasi dan pertumbuhan dijangka menurun pada tahun 2023, bank pusat di seluruh dunia dijangka menamatkan penormalan dasar mereka, menandakan berakhirnya kitaran pengetatan. Walau bagaimanapun, masa perubahan dasar masih tidak pasti dan masih sangat bergantung kepada data. Berdasarkan jangkaan tersebut, pasaran sukuk secara amnya dijangka menunjukkan prestasi yang lebih baik pada tahun 2023 tetapi dengan potensi peningkatan dalam turun naik sudah kelihatan disebabkan ketidaktentuan dasar monetari, peningkatan penawaran sukuk dan keimbangan fiskal. Kami menjangkakan keluk GII berpotensi meningkat pada tahun 2023 disebabkan penilaian yang menarik setelah mendatar dengan ketara pada tahun 2022 dan bahagian belakang keluk disokong dengan baik dalam keadaan penawaran sukuk yang lebih rendah bertarikh lebih lama dan permintaan stabil daripada pelabur. Kami menggunakan pendirian jangka masa neutral dengan kecenderungan taktikal berwajaran tinggi sambil kami terus berdagang mengikut momentum untuk sukuk kerajaan, dengan peluang dagangan pada masa yang singkat hingga ke atas keluk. Peruntukan aset kami akan terus memihak kepada sukuk korporat berbanding sukuk kerajaan untuk penambahan kadar hasil.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. AIA Dana Bon akan terus memberi tumpuan terhadap memaksimumkan jumlah pulangan daripada pendapatan dan pertumbuhan modal melalui pelaburan dalam sukuk gred pelaburan dan instrumen pasaran wang Islam di Malaysia sambil meminimumkan risiko pelaburan semula.

ULASAN PASARAN SAHAM TEMPATAN

Tinjauan Pasaran

Pasaran ekuiti Malaysia yang lebih luas mengakhiri tahun lebih rendah dengan Indeks 100 Teratas FTSE Bursa Malaysia dan Indeks KLCI FTSE Bursa Malaysia masing-masing mencatatkan penurunan sebanyak 5.40% dan 4.60% berikutan kebimbangan kemelesetan dan ketegangan geopolitik yang memuncak menguasai pasaran ekuiti sepanjang sebahagian besar tahun ini. Tekanan inflasi yang berterusan merentasi banyak negara disebabkan oleh gangguan rantaian bekalan berikutan perang antara Rusia dan Ukraine, permintaan yang terbendung selepas pembukaan semula dan pasaran buruh yang ketat mengakibatkan keputusan mengetarkan dasar monetari yang agresif oleh bank pusat utama. Rizab Persekutuan A.S. ("Fed") menaikkan kadar dana Fed dengan kumulatif 425 mata asas ("bps").

Secara amnya, pendapatan korporat diturunkan taraf berikutan harga komoditi yang lebih tinggi dan kekurangan buruh. Pemampatan penilaian terbukti apabila pelabur menilai semula ekuiti dengan kadar hasil bon yang melonjak pada tahun tersebut. Bagaimanapun, menjelang akhir tahun, sentimen tempatan bertambah baik dengan ketara dengan pembentukan kerajaan perpaduan, sekali gus menghilangkan kebuntuan politik dan mengakibatkan premium risiko politik yang lebih rendah. Ini juga dibantu oleh jangkaan bahawa inflasi A.S. telah memuncak, dan Fed akan memperlakukan kenaikan kadar pada masa hadapan. Pada tahun tersebut, sektor seperti Penjagaan Kesihatan dan Teknologi mencatatkan prestasi rendah dalam indeks yang lebih luas manakala Kewangan, Tenaga, Perladangan, Pengangkutan dan Pembinaan adalah yang mengatasi prestasi utama.

Berbanding rakan serantau, Indeks FBM100 mengatasi Indeks Dunia MSCI (dasas MYR) dan Indeks MSCI Asia Ex Jepun (dasas MYR) yang masing-masing jatuh 14.68% dan 16.89%. Prestasi mengatasi itu didorong oleh pembukaan semula ekonomi domestik pada awal tahun 2022. Selain itu, Malaysia sebagai penerima bersih harga komoditi yang lebih tinggi turut menyumbang kepada prestasi lebih tinggi. Sebaliknya, pasaran maju kurang berprestasi apabila mereka menaikkan kadar faedah secara agresif untuk mengawal tekanan inflasi yang tinggi. Bagi Asia, Indeks MSCI Asia Ex Jepun (dasas MYR) merosot 16.89%, terutamanya diheret oleh pematuhan ketat China terhadap dasar sifar-COVID dalam tempoh 10 bulan pertama tahun 2022.

Gambaran Pasaran

Bagi ekuiti, kami berpendapat bahawa kami telah melihat kemuncak *hawkish* Fed dan penilaian ekuiti telah diselaraskan sebagaimanya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat ke arah pembukaan semula ekomininya secara beransur-ansur yang akan mengurangkan kesan risiko kemelesetan A.S. Di dalam negeri,

ULASAN PASARAN SAHAM TEMPATAN (samb)

pendapatan korporat akan bertambah baik pada tahun 2023 apabila tamat tempoh cukai kemakmuran sekali sahaja. EPS Malaysia untuk tahun 2023 dijangka bertumbuh sebanyak 11.9% dibantu oleh ketidaaan cukai kemakmuran dan sepatutnya mengatasi unjuran pertumbuhan 5.7% untuk MSCI Asia ex Jepun. Sementara itu, penilaian ekuiti Malaysia kekal tidak sukar dengan dagangan penilaian Harga kepada Pendapatan ("PE") sekitar 1.5 sisihan piawai di bawah purata 10 tahun.

Risiko kemerosotan kepada pasaran boleh berpunca daripada kemelesetan A.S. yang berpanjangan, ketegangan geopolitik yang semakin teruk dan risiko dasar kerajaan.

Peluang

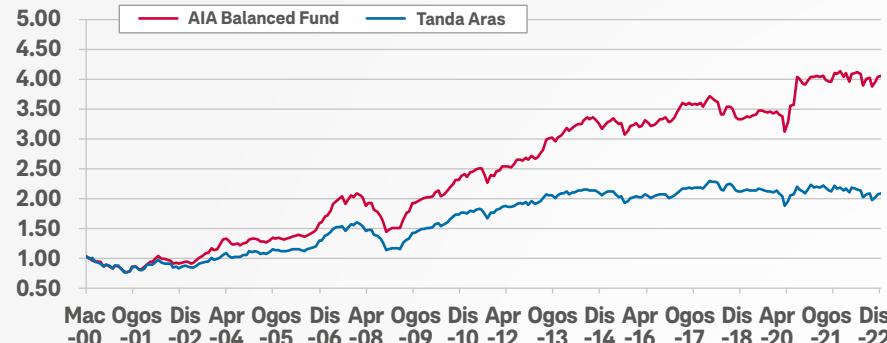

- Latar belakang makro yang menggalakkan berikutnya pembukaan semula China dan kenaikan harga komoditi.
- Menghidupkan semula projek infrastruktur domestik untuk menyokong pertumbuhan ekonomi.
- Kestabilan politik telah kembali dengan pembentukan kerajaan perpaduan baharu dengan Perdana Menteri Dato' Seri Anwar Ibrahim memperoleh majoriti 2/3 di parlimen.
- Ketegangan perdagangan yang berterusan boleh mengakibatkan lencongan perdagangan dan pelaburan ke Malaysia yang menghasilkan Pelaburan Langsung Asing ("FDI") dan eksport yang lebih tinggi.

Kebimbangan

- Inflasi A.S. yang tinggi dan tegar secara berterusan.
- Risiko pendaratan keras dalam ekonomi A.S.
- Ketegangan geopolitik yang semakin teruk.
- Mengubah keputusan mengenai pembukaan semula China.
- Kemungkinan pengenalan cukai baharu untuk menutup defisit fiskal.

Tidak berkenaan kerana Dana hanya memegang tunai pada 19 September 2022, yang merupakan tarikh akhir NAB untuk penebusan Dana. Dana matang pada 17 September 2022.

PB INCOME PLUS 2 FUND (samb)

Bagaimakah prestasi Dana semasa tempoh tersebut?

Bagi tempoh 1 Januari 2022 hingga 19 September 2022, pada asas bersih, Dana memberi pulangan -2.86%, berbanding tanda aras yang merosot 5.90%. Prestasi mengatasi ini terutamanya disebabkan oleh Dana berwajaran rendah dalam sektor Teknologi dan Penjagaan Kesihatan, dan berwajaran tinggi dalam sektor Kewangan dan Perladangan. Pegangan Dana dalam bon korporat yang membawa pendapatan kupon tinggi juga menyumbang kepada prestasi. Pada asas 5 tahun, Dana memberi pulangan 12.81% berbanding pulangan tanda aras sebanyak -7.24%. Prestasi mengatasi itu disebabkan oleh Dana berwajaran tinggi dalam sektor Bahan, Penjagaan Kesihatan dan Teknologi, serta berwajaran rendah dalam sektor perkhidmatan Utiliti dan Telekomunikasi. Prestasi positif Dana dalam bon disumbangkan oleh pulangan daripada pendapatan kupon tinggi dan pemampatan *spread* kredit. Sejak dilancarkan pada bulan Oktober 2014, Dana telah mencatatkan pulangan kumulatif sebanyak 23.83% berbanding pulangan kumulatif tanda aras sebanyak -2.01%.

Apakah strategi anda bagi masa hadapan?

Tidak berkenaan. Kedua-dua Dana telah matang pada tahun 2022.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko AIA-PB Income Plus dan AIA-PB Income Plus 2?

Tidak berkenaan. Kedua-dua Dana telah matang pada tahun 2022.

AIA DANA PROGRESIF (samb)

Bagaimakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan -5.51%, berbanding tanda aras yang merosot 7.36%. Prestasi mengatasi ini terutamanya disebabkan oleh Dana berwajaran rendah dalam sektor Teknologi dan Penjagaan Kesihatan, dan berwajaran tinggi dalam sektor Perladangan dan Bahan. Pegangan Dana dalam sukuk korporat yang membawa pendapatan keuntungan tinggi turut menyumbang kepada prestasi tersebut. Pada asas 5 tahun, Dana memberi pulangan 8.50% berbanding pulangan tanda aras sebanyak -6.85%. Prestasi mengatasi itu disebabkan oleh Dana berwajaran tinggi dalam sektor Penjagaan Kesihatan, Teknologi dan Perindustrian, dan berwajaran rendah dalam sektor Telekomunikasi, Utiliti, Tenaga dan Hartanah. Prestasi positif Dana dalam sukuk disumbangkan oleh pulangan daripada pendapatan untung tinggi dan pemampatan *spread* kredit. Sejak dilancarkan pada bulan Mac 2000, Dana telah mencatatkan pulangan kumulatif sebanyak 175.74% berbanding pulangan kumulatif tanda aras sebanyak 85.81%.

Apakah strategi anda bagi masa hadapan?

Memandangkan inflasi dan pertumbuhan dijangka menurun pada tahun 2023, bank pusat di seluruh dunia dijangka menamatkan penormalan dasar mereka, menandakan berakhirnya kitaran pengetatan. Walau bagaimanapun, masa perubahan dasar masih tidak pasti dan masih sangat bergantung kepada data. Berdasarkan jangkaan tersebut, pasaran sukuk secara amnya dijangka menunjukkan prestasi yang lebih baik pada tahun 2023 tetapi dengan potensi peningkatan dalam turun naik sudah kelihatan disebabkan ketidaktentuan dasar monetari, peningkatan penawaran sukuk dan kebimbangan fiskal. Kami menjangkakan keluk GII berpotensi meningkat pada tahun 2023 disebabkan penilaian yang menarik setelah mendatar dengan ketara pada tahun 2022 dan bahagian belakang keluk disokong dengan baik dalam keadaan penawaran sukuk yang lebih rendah bertarikh lebih lama dan permintaan stabil daripada pelabur. Kami menggunakan pendirian jangka masa neutral dengan kecenderungan taktikal berwajaran tinggi sambil kami terus berdagang mengikut momentum untuk sukuk kerajaan, dengan peluang dagangan pada masa yang singkat sehingga di atas keluk. Peruntukan aset kami akan terus memihak kepada sukuk korporat berbanding sukuk kerajaan untuk penambahan kadar hasil.

Dari segi kedudukan portfolio untuk ekuiti, kami berpendapat bahawa kami telah melihat kemuncak *hawkish* Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat ke arah pembukaan semula ekonominya secara beransur-ansur yang akan mengurangkan kesan risiko kemelesetan A.S. Di dalam negeri, pendapatan korporat akan bertambah baik pada tahun 2023 apabila tamat tempoh cukai kemakmuran sekali sahaja. EPS Malaysia

AIA DANA PROGRESIF (samb)

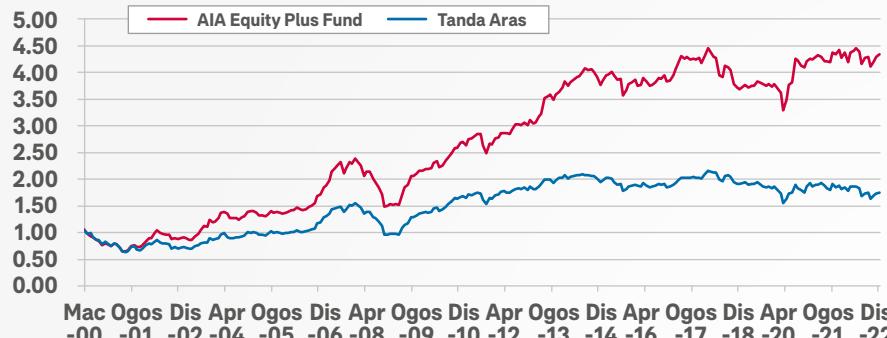

untuk tahun 2023 dijangka bertumbuh sebanyak 11.9% dibantu oleh ketiadaan cukai kemakmuran dan sepatutnya mengatasi unjuruan pertumbuhan 5.7% untuk MSCI Asia ex Jepun. Sementara itu, penilaian ekuiti Malaysia kekal tidak sukar dengan dagangan penilaian PE sekitar 1.5 sisihan piawai di bawah purata 10 tahun.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus memberi tumpuan untuk memaksimumkan jumlah pulangan daripada pendapatan dan pertumbuhan modal menerusi pelaburan dalam sukuk gred pelaburan dan instrumen pasaran wang Islam di Malaysia, disamping meminimumkan risiko pelaburan semula. Berhubung bahagian ekuiti Syariah pula, kami akan terus berusaha untuk mendapatkan pertumbuhan jangka panjang modal dan pendapatan melalui kepelbagai portfolio ekuiti.

Notis: Prestasi masa lalu bukan indikatif prestasi masa depan dan prestasi dana ini tidak dijamin.

Pengagihan Sektor pada 31 Disember 2022

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan -0.80% berbanding pulangan tanda aras sebanyak -5.40%. Prestasi mengatasi pada tahun 2022 didorong terutamanya oleh kedudukan Dana berwajaran tinggi dalam sektor Perkhidmatan Kewangan dan Pembinaan, dan kedudukan berwajaran rendah dalam sektor Penjagaan Kesihatan dan Telekomunikasi. Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 0.62% berbanding pulangan kumulatif tanda aras sebanyak -16.18%. Prestasi mengatasi ini didorong terutamanya oleh Dana berwajaran tinggi dalam sektor Teknologi dan Perkhidmatan Kewangan. Dana berwajaran rendah dalam sektor Penjagaan Kesihatan dan Telekomunikasi juga membantu Dana mengatasi prestasi. Sejak dilancarkan pada bulan Mac 2000, Dana telah mencatatkan pulangan kumulatif sebanyak 333.37% berbanding pulangan kumulatif tanda aras sebanyak 75.49%.

Apakah strategi anda bagi masa hadapan?

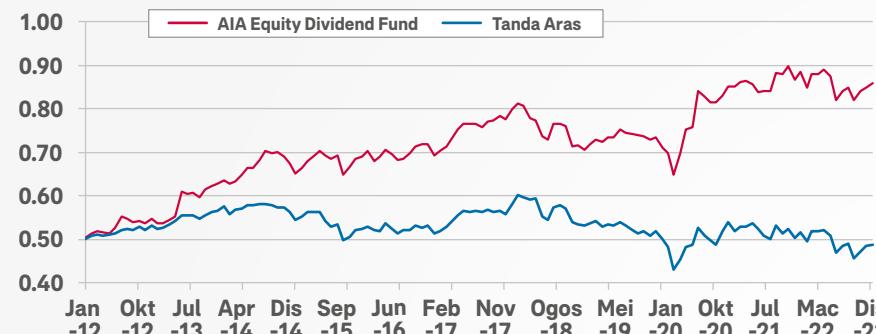

Kami berpendapat bahawa kami telah melihat kemuncak *hawkish* Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat ke arah pembukaan semula ekonominya secara beransur-ansur yang akan mengurangkan kesan risiko kemelesetan A.S. Kami optimistik secara berhati-hati terhadap ekuiti dan meletakkan Dana dalam sektor Produk & Perkhidmatan Pengguna yang mendapat manfaat daripada pembukaan semula ekonomi. Kami juga mengutamakan sektor Teknologi yang mempunyai pemangkin pertumbuhan struktur dan perdagangan pada penilaian yang munasabah. Risiko penurunan pasaran boleh berpuncak daripada kemelesetan A.S. yang berpanjangan, ketegangan geopolitik yang semakin teruk dan risiko dasar kerajaan.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus berusaha untuk mendapatkan pertumbuhan modal dan pendapatan jangka panjang dengan kepelbagai portfolio ekuiti.

Pengagihan Sektor pada 31 Disember 2022

AIA EQUITY DIVIDEND FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan -2.93% berbanding pulangan tanda aras sebanyak -5.40%. Prestasi mengatasi ini disebabkan terutamanya oleh Dana berwajaran tinggi dalam sektor Telekomunikasi & Media dan Kewangan serta berwajaran rendah dalam sektor Penjagaan Kesihatan. Sepanjang tempoh 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 7.26% berbanding pulangan kumulatif tanda aras sebanyak -16.18%. Prestasi mengatasi ini disebabkan terutamanya oleh Dana berwajaran tinggi dalam sektor Teknologi serta berwajaran rendah dalam sektor Penjagaan Kesihatan dan Kewangan. Sejak dilancarkan, Dana telah mencatatkan pulangan kumulatif sebanyak 71.60% berbanding pulangan kumulatif tanda aras sebanyak -2.38%.

Apakah strategi anda bagi masa hadapan?

Kami lebih mengutamakan syarikat yang dapat mengekalkan pembayaran dividen mereka walaupun dalam tempoh yang mencabar. Oleh itu kami akan memberi tumpuan kepada syarikat yang mempunyai aliran tunai yang jelas dan meningkat.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus berusaha untuk mendapatkan pertumbuhan modal dan pendapatan jangka panjang dengan kepelbagaiannya portfolio ekuiti.

Notis: Prestasi masa lalu bukan indikatif prestasi masa depan dan prestasi dana ini tidak dijamin.

Pengagihan Sektor pada 31 Disember 2022

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan -3.98% berbanding pulangan tanda aras sebanyak -8.41%. Prestasi mengatasi pada tahun 2022 didorong oleh kedudukan Dana yang berwajaran tinggi dalam sektor Perkhidmatan Kewangan, Tenaga, dan Telekomunikasi & Media. Kedudukan Dana yang berwajaran rendah dalam sektor Teknologi, Perladangan, dan Hartanah juga membantu Dana mengatasi prestasi tanda aras. Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 9.41% berbanding pulangan kumulatif tanda aras sebanyak -17.67%. Prestasi mengatasi dalam tempoh 5 tahun yang lalu didorong terutamanya oleh kedudukan Dana yang berwajaran tinggi dalam sektor Penjagaan Kesihatan, Teknologi, dan Perkhidmatan Kewangan. Kedudukan Dana yang berwajaran rendah dalam Tenaga, Utiliti, Hartanah, Telekomunikasi & Media, Perladangan dan Amanah Pelaburan Hartanah juga membantu prestasi Dana melebihi tanda aras. Sejak dilancarkan pada bulan Julai 2001, Dana telah mencatatkan pulangan kumulatif sebanyak 536.93% berbanding pulangan kumulatif tanda aras sebanyak 225.7%.

Apakah strategi anda bagi masa hadapan?

Dari segi kedudukan portfolio, tumpuan kami akan terus diberikan kepada syarikat yang bermodal sederhana serta mempunyai asas kukuh dan pertumbuhan pendapatan yang nyata pada penilaian yang berpatut untuk melalui ketidaktentuan pasaran semasa. Kami juga mencari stok pertumbuhan dengan daya saing yang kukuh yang mendapat manfaat daripada aliran pertumbuhan sekular.

Kami positif terhadap sektor Teknologi, Bahan dan Tenaga kerana penilaian telah sangat merosot pada tahun 2022, tetapi hasil yang paling teruk kelihatan seperti telah dielakkan dengan meningkatnya kebarangkalian pendaratan lembut bagi ekonomi maju sementara tekanan kadar inflasi dan faedah sudah hampir ke penghujungnya. Tinjauan sektor perkhidmatan kewangan kekal berdaya tahan, tetapi kami percaya peningkatan mungkin terhad memandangkan potensi risiko penurunan kepada margin faedah bersih dengan kadar faedah yang sebahagian besarnya memuncak di tengah-tengah tekanan kos dana untuk meningkatkan persaingan untuk deposit.

Walau bagaimanapun, memandangkan keadaan pasaran yang sentiasa berkembang dan ketidaktentuan makro, kami akan tetap berhati-hati dan akan menyesuaikan strategi kami dengan sewajarnya apabila perlu.

AIA MEDIUM CAP FUND (samb)

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus berusaha untuk mendapatkan pertumbuhan jangka panjang modal dan pendapatan melalui kepelbagaian portfolio ekuiti dengan tumpuan kepada perusahaan kecil dan sederhana dan saham pertumbuhan.

AIA DANA DINAMIK (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana menjana pulangan sebanyak -7.03% berbanding tanda aras yang menurun 10.80%. Prestasi mengatasi itu disebabkan terutamanya oleh Dana berwajaran rendah dalam sektor Teknologi, Perindustrian dan Penjagaan Kesihatan, dan berwajaran tinggi dalam sektor Perladangan dan Telekomunikasi & Media. Pada asas 5 tahun, Dana memberi pulangan 1.08% berbanding pulangan tanda aras -16.94%. Prestasi mengatasi itu disebabkan oleh Dana berwajaran tinggi dalam sektor Penjagaan Kesihatan, Keluaran Pengguna dan Perindustrian, dan berwajaran rendah dalam sektor Perladangan, Tenaga, Utiliti dan Hartanah. Sejak dilancarkan pada bulan Julai 2001, Dana telah mencatatkan pulangan kumulatif sebanyak 290.32% berbanding pulangan kumulatif tanda aras sebanyak 155.66%.

Apakah strategi anda bagi masa hadapan?

Dari segi kedudukan portfolio untuk ekuiti, kami berpendapat bahawa kami telah melihat puncak hawkish Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah dengan sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat kepada pembukaan semula ekonominya secara beransur-ansur yang akan mengurangkan kesan risiko kemelesetan A.S. Di dalam negeri, pendapatan korporat akan bertambah baik pada tahun 2023 apabila tamatnya cukai kemakmuran sekali sahaja. EPS Malaysia untuk tahun 2023 dijangka bertumbuh sebanyak 11.9% dibantu oleh ketidaaan cukai kemakmuran dan sepatutnya mengatasi unjuran pertumbuhan 5.7% untuk MSCI Asia ex Jepun. Sementara itu, penilaian ekuiti Malaysia kekal tidak sukar dengan dagangan penilaian PE sekitar 1.5 sisihan piawai di bawah purata 10 tahun.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus melabur dalam sekuriti yang diluluskan Syariah yang disenaraikan di Bursa Malaysia untuk memaksimumkan peningkatan pelaburan modal tempoh sederhana dan jangka panjang.

ULASAN PASARAN SIRI DANA AIA GLOBAL BOND

Apakah keadaan ekonomi, peristiwa atau pasaran kewangan yang memberi kesan kepada Dana?

Ekonomi global mengalami lonjakan inflasi pada tahun 2022, didorong oleh gabungan kenaikan harga komoditi, peristiwa geopolitik, gangguan rantaian bekalan dan ketidakseimbangan ekonomi pasca COVID. Ini telah membawa implikasi yang besar terhadap dasar monetari, mencetuskan gelombang pengetatan monetari di kalangan bank pusat global dalam usaha untuk mengekang inflasi. Rizab Persekutuan Amerika Syarikat ("A.S.") ("Fed") menaikkan kadar dana Fed sebanyak 7 kali pada tahun 2022, menaikkan kadar sebanyak 425 mata asas ("bps"). Walaupun pada mulanya mengekalkan pendirian akomodatif pada separuh pertama 2022, langkah yang sama diperhatikan di Zon Euro, apabila Bank Pusat Eropah ("ECB") menaikkan kadar pembentukan semula utama sebanyak 250bps pada tahun 2022.

Peningkatan mendadak kadar dasar bank pusat menyebabkan penjualan dalam pendapatan tetap global, dengan kadar hasil Perbendaharaan A.S. ("UST") meningkat dengan ketara, terutamanya pada suku kedua 2022 dan suku ketiga 2022. Hasil nota 10 tahun UST ("10Y") meningkat sebanyak 236 bps pada tahun 2022, menutup tahun pada 3.87%. Pengetatan mendadak dalam dasar monetari juga mengukuhkan jangkaan risiko kemelesetan pada tahun 2023 yang menyebabkan penyongsangan dalam keluk kadar hasil UST dengan nota 2Y meningkat sebanyak 366 bps kepada 4.42% untuk tahun tersebut.

Keadaan monetari yang semakin ketat akhirnya mula dilalui ekonomi, kerana inflasi akhirnya menunjukkan tanda-tanda akan reda pada separuh kedua 2022. Inflasi Indeks Harga Pengguna ("IHP") utama A.S. menurun perlahan pada separuh kedua 2022, kepada 6.5% Tahun ke Tahun ("YoY"), yang walaupun masih tinggi, adalah jauh di bawah paras tertinggi dalam tempoh 40 tahunnya iaitu 9.1% yang dicapai pada bulan Jun 2022.

Inflasi yang sederhana mengurangkan pengetatan monetari oleh Fed pada suku keempat 2022. Fed meningkatkan kadar sasaran dana fed sebanyak 50 bps dalam mesyuarat Jawatankuasa Pasaran Terbuka Persekutuan ("FOMC") pada bulan Disember, selepas kenaikan sebanyak 75 bps empat kali berturut-turut dalam mesyuarat-mesyuarat sebelumnya. Ini mendorong jangkaan pasaran bahawa kitaran pengetatan telah memuncak, yang membawa kepada pemulihan sederhana dalam pasaran pendapatan tetap pada suku keempat 2022.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Bagi tahun kewangan 2022, prestasi Dana Dasar menunjukkan prestasi yang lebih baik berbanding indeks tanda arasnya. Strategi kadar faedah memberi sumbangan positif, manakala pendedahan kredit berdaulat mempunyai kesan neutral. Antara mata wang, kedudukan dalam cedi Ghana ("GHC"), peso Argentina ("ARS"), peso Colombia ("CLP"), won Korea Selatan ("KRW"), rupiah Indonesia ("IDR"), yuan China ("CNY") dan rupee India ("INR") menjelaskan prestasi mutlak, diimbangi

ULASAN PASARAN SIRI DANA AIA GLOBAL BOND (samb)

sebahagiannya oleh kedudukan dalam yen Jepun ("JPY") dan real Brazil ("BRL"), serta kedudukan negatif bersih dalam euro ("EUR") pada awal tahun ini. Dana Dasar mengekalkan pendedahan tempoh terutamanya dalam pasaran memuncul terpilih. Pendedahan tempoh di Argentina dan Brazil menyumbang kepada keputusan mutlak, manakala pendedahan tempoh di Ghana mengurangkan.

Pada asas 5 tahun, prestasi rendah relatif Dana Dasar disebabkan terutamanya oleh kedudukan mata wangnya di mana pendedahan di Amerika Latin dan Asia menjelaskan keputusan relatif. Strategi kadar faedah secara amnya menyumbang kepada prestasi manakala pendedahan kredit keseluruhan mempunyai kesan neutral. Pendedahan tempoh kepada UST untuk sebahagian daripada tempoh tersebut secara amnya menjelaskan prestasi manakala pendedahan tempoh di rantau pasaran memuncul seperti Amerika Latin, Asia ex-Jepun dan Afrika merupakan penyumbang majoriti positif kepada prestasi bagi tempoh tersebut.

Apakah strategi anda pada masa hadapan?

Pengurus Dasar masih menjangkakan inflasi berada pada arah aliran menurun tetapi kekal di atas purata sejarah untuk tahun 2023, walaupun atas sebab yang berlainan di setiap wilayah. Oleh itu, Pengurus Dasar akan terus memantau dengan teliti pendorong inflasi dan hasil di setiap rantau dan negara yang berlainan.

Perang Rusia-Ukraine yang berpanjangan terus menjana ketidaktentuan dalam pertumbuhan global dan pasaran kewangan, terutamanya jika gangguan bekalan makanan, tenaga dan komoditi lain di seluruh Eropah bertambah buruk. Dari segi kadar, sementara dunia secara amnya masih dalam kitaran pengetatan monetari, Pengurus Dasar melihat tanda-tanda perbezaan mula hadir apabila penggerak awal memberi isyarat berhenti seketika dan/atau memuncak dalam kitaran mereka, manakala bank pusat lain kekal *hawkish*. Walaupun pasaran maju mungkin memilih untuk mengekalkan kadar faedah pada paras yang tinggi jika inflasi kekal tinggi, pasaran memuncul mungkin mula berhenti seketika atau mereda dengan lebih cepat kerana keperluan untuk merangsang dan membina semula ekonomi mereka.

Pengurus Dasar berpendapat bahawa aset pasaran memuncul terpilih telah pun diberi harga untuk inflasi yang tinggi dan kenaikan kadar dan Asia akan terus menyerlah memandangkan pertumbuhan makronya yang lebih kukuh, manakala potensi penjanaan alfa boleh didapati dari Amerika Latin, di mana harga komoditi yang tinggi akan membantu meningkatkan aset mata wang tempatan dan penilaian mata wang walaupun terdapat sedikit retorik politik di negara ini.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tiada perubahan pada objektif pelaburan atau ciri risiko Dana pada tahun 2022. Dana AIA Global Bond 1 hingga 5 matang pada tahun 2022. Masih terdapat 3 dana yang akan matang pada tahun 2023.

* Data dana dasar diambil daripada Lembaran Fakta Pengurus Dasar AIA Investment Management Private Limited bagi dana dasar AIA Diversified Fixed Income Fund pada 31 Disember 2022

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan sebanyak -12.54% berbanding tanda aras sebanyak -12.41%. Dana pada mulanya mencatatkan pulangan relatif yang positif berbanding tanda aras pada suku pertama 2022, kerana peruntukan berwajaran rendah terhadap aset berisiko merupakan pendorong utama pulangan portfolio. Inflasi yang meningkat pesat, sentimen *hawkish* daripada Fed dan ketidaktentuan geopolitik daripada ketegangan Rusia-Ukraine digabungkan untuk mencetuskan penjualan dalam bon global dan meluaskan *spread* kredit. Dana sebahagian besarnya mengharungi langkah itu kerana Pengurus Dasar mengurangkan pendedahan di Rusia dan mengekalkan tempoh yang singkat. Menjelang separuh kedua 2022, prestasi relatif Dana merosot berbanding tanda aras apabila penjualan pasaran semakin meningkat. Terdapat penetapan harga semula dalam jangkaan pasaran apabila langkah kenaikan kadar yang pantas oleh Fed mengukuhkan jangkaan kemelesetan. Kebimbangan kemelesetan mendorong *spread* kredit lebih luas, yang menyaksikan pendedahan Dana dalam kredit berkualiti rendah dan sektor sensitif pertumbuhan menjaskan prestasi. Dana secara beransur-ansur mengurangkan pendedahannya dalam aset yang lebih berisiko dengan jangkaan peningkatan kemudahubahan yang meningkat, menjadi semakin berwajaran rendah kepada korporat dan pasaran memuncul ("EM"). Walau bagaimanapun, strategi ini akhirnya mengakibatkan prestasi rendah keseluruhan dalam tanda aras pada tahun 2022, apabila sentimen beralih pada suku keempat 2022 ke arah langkah mengambil risiko dengan jangkaan bahawa kitaran kenaikan kadar semakin hampir berakhir dan kemelesetan A.S. berkemungkinan akan berlaku pada

AIA GLOBAL FIXED INCOME FUND (samb)

tahun 2023 yang akan membawa kepada pemotongan kadar yang lebih cepat daripada jangkaan oleh Fed. Sentimen *dovish* juga didorong oleh tekanan harga yang menyederhana apabila CPI utama A.S. menurun perlahan pada separuh kedua 2022, kepada 6.5% YoY pada bulan Disember 2022, jauh di bawah paras tertinggi dalam tempoh 40 tahunnya sebanyak 9.1% yang telah dicapai pada bulan Jun 2022.

Secara umumnya, kebanyakan pulangan relatif yang lemah pada tahun 2022 boleh dikaitkan dengan peruntukan aset, khususnya daripada prestasi rendah Dana dalam bon korporat dalam sektor perindustrian dan kewangan. Walau bagaimanapun, ini telah dikurangkan oleh sumbangan positif daripada pemilihan sekuriti di rantau pasaran memuncul. Satu lagi sumber pulangan relatif positif yang ketara adalah daripada kedudukan jangka masa Dana Dasar, di mana strategi tempoh berwajaran rendah mengatasi prestasi dalam persekitaran hasil yang meningkat yang diperhatikan di merata pasaran pendapatan tetap global.

Sepanjang tempoh 5 tahun, Dana memberi pulangan sebanyak -4.98% berbanding tanda aras sebanyak 3.34% pada asas bersih. Sejak dilancarkan pada bulan Julai 2006, Dana telah mencatatkan pulangan kumulatif sebanyak 111.17% berbanding tanda aras sebanyak 139.28%.

Apakah strategi anda bagi masa depan?

Pengurus Dasar menjangkakan inflasi akan menurun pada tahun 2023, menyederhana kepada 3% menjelang akhir tahun daripada 6.5% pada akhir tahun 2022. Ia juga menjangkakan pertumbuhan ekonomi menjadi lebih rendah, dengan kemelesetan A.S. berlaku pada suku ketiga 2022 dan pertumbuhan KDNK pada -1.5% untuk tahun tersebut. Ini adalah berdasarkan jangkaan Pengurus Dasar bahawa Fed akan terus menaikkan kadar dana Fed melepas suku pertama 2023, dengan kenaikan 50 - 75 bps lagi akan dilaksanakan. Pengurus Dasar juga berpendapat bahawa perbelanjaan pengguna semakin lemah pada tahun 2023 apabila simpanan peribadi berkurangan dan nilai bersih peribadi semakin merosot dalam keadaan penurunan mendadak penilaian dalam pasaran perumahan. Keuntungan korporat juga dijangka berkurangan apabila kesan perolehan yang didorong oleh inflasi mereda. Ini akhirnya akan diterjemahkan kepada kelemahan pasaran buruh kerana tuntutan pengangguran dijangka meningkat kepada lebih 300,000 menjelang suku ketiga 2022.

Pengurus Dasar percaya bahawa kemerosotan dalam aktiviti ekonomi yang terhasil berkemungkinan akan menyebabkan ekonomi A.S. mengalami kemelesetan pada suku ketiga 2023 dan membawa kepada kelemahan meluas dolar A.S. ("USD"). Oleh itu, Pengurus Dasar adalah konstruktif pada mata wang EM, tetapi akan memilih dalam peruntukan negaranya di tengah-tengah kebimbangan mengenai kedudukan fiskal negara Amerika Latin dan Asia terpilih dalam keadaan penurunan Indeks Pengurusan Pembelian ("PMI") dan harga komoditi.

AIA GLOBAL FIXED INCOME FUND (samb)

Penilaian untuk korporat Gred Pelaburan A.S. ("IG") telah menjadi semakin mahal pada separuh kedua 2022. Oleh itu, Pengurus Dasar akan mengurangkan pendedahan dalam sektor ini kerana menjangkakan pulangan berlebihan secara relatifnya sederhana untuk tahun 2023. Selain itu, turun naik dalam ruang IG telah meningkat yang menunjukkan kerentanan yang meningkat dan pulangan terlaras risiko yang lebih rendah. Dari segi pandangan asas, Pengurus Dasar juga kurang tertarik kepada IG kerana percaya bahawa pendapatan korporat tidak mampu memandangkan prospek ekonomi dan pertumbuhan perolehan serta pendapatan telah pun memuncak pada tahun 2022.

Memandangkan Pengurus Dasar mempunyai pandangan kurang merangsang terhadap ekonomi dan jangkaan peningkatan selanjutnya dalam kadar dana Fed, Pengurus Dasar akan berusaha untuk mengekalkan pendedahan berwajaran rendah dalam Korporat dan Perindustrian, sambil kekal berwajaran tinggi dalam Institusi Kewangan dan Perbankan. Walau bagaimanapun, disebabkan oleh pandangan bahawa pasaran telah silap dalam menetapkan harga *hawkish* Fed dan bahawa hasilnya akan sangat bergantung pada perkembangan pasaran buruh sepanjang awal-awal bulan tahun 2023, Pengurus Dasar menjangkakan separuh pertama 2023 tidak menentu dan akan berusaha supaya lincah dengan strategi peruntukannya.

AIA ASIA OPPORTUNITY FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -14.91% berbanding tanda aras sebanyak -15.06%. Penyumbang utama kepada prestasi Dana adalah pemilihan saham dalam sektor Kewangan dan Budi Bicara Pengguna. Dana berwajaran tinggi dalam sektor Kewangan merupakan penyumbang utama kepada prestasi dana kerana bank merupakan penerima manfaat utama semasa pembukaan semula ekonomi dan kenaikan kadar faedah. Tahun 2022 merupakan tahun yang tidak menentu bagi pasaran Asia ex Jepun kerana rantaui itu diseret oleh pematuhan ketat China terhadap dasar 'sifar-COVID' dalam 10 bulan pertama. Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak -7.03% berbanding pulangan kumulatif tanda aras sebanyak 6.05%. Prestasi relatif dalam 5 tahun yang lalu telah diheret oleh pemilihan sekuriti Dana dalam sektor Budi Bicara Pengguna, Penjagaan Kesihatan dan Bahan. Walau bagaimanapun, pemilihan peruntukan dan sekuriti dalam sektor Perkhidmatan Komunikasi menyumbang secara positif kepada pulangan relatif. Sejak dilancarkan pada bulan April 2009, Dana telah mencatatkan pulangan kumulatif sebanyak 75.30% berbanding pulangan kumulatif tanda aras sebanyak 209.12%.

AIA ASIA OPPORTUNITY FUND (samb)

Apakah strategi anda bagi masa hadapan?

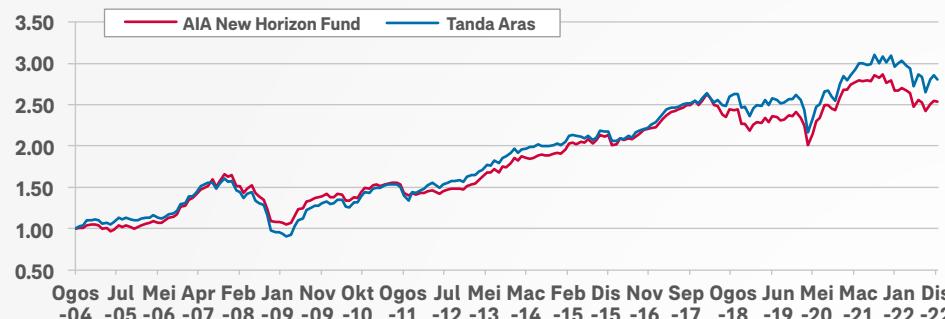

Kami berpendapat bahawa kami telah melihat kemuncak hawkish Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat ke arah pembukaan semula secara beransur-ansur ekonominya yang akan mengurangkan kesan risiko kemelesetan A.S. Kami berhati-hati optimistik terhadap ekuiti dan meletakkan Dana dalam sektor Budi Bicara Pengguna yang mendapat manfaat daripada pembukaan semula ekonomi. Kami juga mengutamakan sektor Teknologi Maklumat dan Perkhidmatan Komunikasi yang mempunyai pemangkin pertumbuhan struktur dan penilaian yang baik. Risiko kemerosotan kepada pasaran boleh berpunca daripada kemelesetan A.S. yang berpanjangan, ketegangan geopolitik yang semakin teruk dan risiko dasar kerajaan.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Dana akan mengekalkan objektif pelaburan dan ciri risiko am yang sama.

Pengagihan Dana pada 31 Disember 2022

AIA NEW HORIZON FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -9.31% berbanding tanda aras sebanyak -9.42%. Prestasi Dana ke atas sedikit disebabkan keputusan untuk berwajaran tinggi dalam ekuiti tempatan berbanding ekuiti asing. Pegangan tunainya juga membantu mengekalkan modal dalam persekitaran pasaran yang merosot. Pegangan utamanya dalam AIA Strategic Equity Fund berjaya mengatasi tanda aras terutamanya didorong oleh kedudukan Dana berwajaran tinggi dalam AIA Strategic Equity Fund dalam sektor Perkhidmatan Kewangan dan kedudukan berwajaran rendah dalam sektor Penjagaan Kesihatan. Pegangan asing Dana, iaitu AIA Global Multi Factor Equity Fund mencatatkan prestasi yang sedikit di bawah tanda arasnya manakala AIA New Multinational Fund mengatasi tanda arasnya.

Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak -0.62% berbanding pulangan kumulatif tanda aras sebanyak 8.76%. Prestasi relatif dalam 5 tahun yang lalu diheret terutamanya oleh peruntukan kepada dana ekuiti dasar Eropah Memuncul dan prestasi rendah dana Tanah Besar China. Sejak dilancarkan pada bulan Ogos 2004, Dana telah mencatatkan pulangan kumulatif sebanyak 153.30% berbanding pulangan kumulatif tanda aras sebanyak 180.21%.

Apakah strategi anda bagi masa hadapan?

Kami percaya kami telah melihat kemuncak *hawkish* Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, pembukaan semula ekonomi China secara beransur-ansur akan membantu mengurangkan kesan risiko kemelesetan A.S. Kami optimistik secara berhati-hati terhadap pasaran ekuiti global dalam jangka masa terdekat dan mempunyai kedudukan dalam sektor Produk & Perkhidmatan Pengguna, yang mendapat manfaat daripada pembukaan semula ekonomi. Kami juga mengutamakan sektor Teknologi yang mempunyai pemangkin pertumbuhan struktur dan penilaian yang munasabah. Di dalam negara, kami menjangkakan pendapatan korporat akan bertambah baik pada tahun 2023 dengan pembukaan sempadan antarabangsa dan tamat tempoh cukai kemakmuran sekali sahaja, dan mencari peluang untuk melabur dalam syarikat yang memberikan pendapatan berkualiti dan kunci kira-kira yang kukuh pada masa ketidaktentuan. Risiko kemerosotan kepada pasaran boleh berpunca daripada kemelesetan A.S. yang berpanjangan, dasar monetari yang terlalu ketat, ketegangan geopolitik yang semakin teruk dan risiko dasar kerajaan.

* Data dana dasar diambil daripada Lembaran Fakta Pengurus Dasar AIA Investment Management Private Limited bagi Dana AIA Equity Income pada 31 Disember 2022

AIA GLOBAL EQUITY INCOME FUND (samb)

Bagaimakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -7.87% berbanding tanda aras sebanyak -15.20%. Ini adalah berlatarbelakangkan persekitaran risiko di peringkat global, yang dicetuskan oleh konflik Ukraine-Rusia, kenaikan inflasi yang mendadak dan kenaikan kadar secara agresif oleh bank pusat untuk memerangi inflasi. Saham dividen yang tinggi dengan aliran tunai yang stabil, keterlihatan pendapatan tinggi dan beta rendah cenderung menunjukkan prestasi yang lebih baik daripada keseluruhan pasaran dalam persekitaran pasaran menurun.

Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 19.33% berbanding pulangan kumulatif tanda aras sebanyak 34.12%. Tempoh ini kebanyakannya dicirikan oleh bank pusat yang *dovish* pada tahun-tahun sebelumnya, dengan jumlah pelonggaran kuantitatif yang tidak pernah berlaku sebelum ini. Akibatnya, kadar faedah jatuh secara mendadak di seluruh dunia. Pandemik COVID-19 telah mempercepatkan trend ini dengan kerajaan dan bank pusat bertindak balas dengan cepat dan agresif. Persekitaran ini sangat bermanfaat untuk saham Pertumbuhan. Indeks Pertumbuhan MSCI telah dinilai semula dengan kukuh sepanjang tempoh tersebut dan mengatasi prestasi indeks Nilai MSCI dengan kadar yang mengejutkan. Perbezaan penilaian antara kedua-dua indeks meningkat ke paras tertinggi kerana para pelabur sanggup membayar gandaan yang lebih tinggi untuk saham Pertumbuhan. Ini tidak memihak kepada strategi teras Dana untuk melabur dalam syarikat yang berkualiti tinggi, berorientasikan nilai, membayar dividen di seluruh dunia yang dijual pada harga diskaun kepada nilai saksama. Sejak dilancarkan pada bulan Julai 2006, Dana telah mencatatkan pulangan kumulatif sebanyak -12.47% berbanding pulangan kumulatif tanda aras sebanyak 150.17%.

Apakah strategi anda bagi masa hadapan?

Dari perspektif kedudukan, Dana mengurangkan kedudukan berwajaran rendah dalam sektor Perkhidmatan Komunikasi dan Budi Bicara Pengguna dan mengurangkan kedudukan berwajaran tinggi dalam sektor Penjagaan Kesihatan. Dana mengurangkan kedudukan berwajaran tinggi dalam sektor Asas Pengguna yang terus menjadi berwajaran tinggi terbesarnya manakala sektor Teknologi Maklumat terus menjadi berwajaran rendah terbesar. Dana juga telah beralih daripada berwajaran tinggi kepada kedudukan berwajaran rendah dalam sektor Perindustrian. Berkenaan dengan kedudukan serantau, Dana mengurangkan pendedahan berwajaran tinggi di Asia Pasifik Maju ex Jepun dan Jepun, sambil meningkatkan pendedahan berwajaran tinggi di Eropah Maju & Timur Tengah ex UK. Dana meningkatkan kedudukan berwajaran rendah di Amerika Utara, yang terus menjadi pendedahan berwajaran rendah terbesar dan Pasaran Memuncul ialah pendedahan berwajaran tinggi terbesar.

* Data dana dasar diambil daripada Lembaran Fakta Pengurus Dasar AIA Investment Management Private Limited bagi Dana Ekuiti AIA Asia (Ex Jepun) pada 31 Disember 2022

AIA ASIAN EQUITY FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -19.06% berbanding tanda aras sebanyak -15.06%. Peruntukan stok dan aset menjelaskan prestasi relatif Dana. Dari perspektif pemilihan saham, sektor Kewangan dan Hartanah menyumbang secara positif kepada prestasi Dana manakala sektor Teknologi Maklumat merupakan pengurang terbesar terhadap prestasi Dana. Kedudukan dalam Tunai menambah secara positif kepada prestasi.

Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 1.35% berbanding pulangan kumulatif tanda aras sebanyak 5.39%. Prestasi yang kurang baik dalam tempoh 5 tahun lalu didorong terutamanya oleh pemilihan sekuriti dalam sektor Budi Bicara Pengguna dan Hartanah. Sejak dilancarkan pada bulan Julai 2006, Dana telah mencatatkan pulangan kumulatif sebanyak -72.11% berbanding pulangan kumulatif tanda aras sebanyak 151.42%.

Apakah strategi anda bagi hadapan?

Melangkah masuk ke tahun 2023, normalisasi dasar Fed akan kekal penting bagi pelabur kerana pasaran global terus mengalami tekanan akibat pertumbuhan yang perlahan dan dasar monetari yang mengehadkan. Inflasi yang lemah dan penerusan kelemahan USD mungkin kondusif untuk ekuiti serantau, sama seperti Asia ex-Jepun yang sedang mencari perubahan positif dalam semakan Pendapatan Sesaham ("EPS") yang diterajui oleh China. Prestasi ekuiti Asia ex Jepun sangat bergantung pada pasaran terbesarnya di China. Walaupun MSCI China telah meningkat sebanyak 35% dalam dua bulan terakhir tahun 2022, Pengurus Dasar kekal positif dengan perubahan (pivot) yang jelas kembali kepada pertumbuhan, memihak kepada penerima manfaat daripada Internet, Boleh Diperbaharui dan Penggunaan/Pembukaan Semula. Nama-nama dalam indeks modal mega yang terlebih jual juga boleh mendapat manfaat apabila aliran kembali. Korea Selatan dan Taiwan kekal paling terdedah memandangkan sifat mereka yang mementingkan teknologi, walaupun kedua-duanya dijangka menerima sedikit sokongan dalam bentuk peningkatan permintaan daripada pembukaan semula China. Kedua-dua pasaran ini adalah antara pasaran berprestasi paling teruk pada tahun 2022, dan Pengurus Dasar menjangkakan peluang akan muncul pada tahun 2023 selepas penilaian dan jangkaan didasari semula. ASEAN dan India telah mendapat manfaat daripada pembukaan semula dan penurunan harga minyak masing-masing dan kekal lebih berdaya tahan pada tahun 2022. Kepelbagaiannya berterusan dalam rantaian bekalan global juga menyokong kisah pertumbuhan struktur jangka panjang mereka. Walau bagaimanapun, Pengurus Dasar tetap menyedari potensi aliran keluar dana dari rantau ini ke Asia Utara, khususnya China, memandangkan jurang prestasi yang luas diperhatikan pada tahun lepas.

Peruntukan Dana pada 31 Disember 2022

AIA GLOBAL BALANCED FUND (samb)

Bagaimakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -12.97%.

Tahun 2022 merupakan tahun yang luar biasa untuk pasaran kewangan di mana ekuiti dan pendapatan tetap mencatatkan pulangan negatif, merupakan hanya kali kedua dalam masa setengah abad keadaan seperti ini berlaku. Gabungan peristiwa yang menjelaskan seperti perang Ukraine, dasar monetari terhad oleh bank pusat untuk mengekang inflasi, serta kebangkitan semula COVID-19 menyaksikan pasaran ekuiti dan bon mengalami kesukaran. Saham global (Indeks Dunia MSCI) kehilangan 18.1% untuk tahun ini manakala bon global (Indeks Bon Agregat Global Bloomberg Barclays - BBG) menghadapi tekanan yang sama dan turun 16.7% untuk tahun ini berikutan kenaikan kadar berterusan oleh bank pusat utama untuk menangani inflasi yang melambung naik.

Sentimen risiko bertambah baik pada akhir tahun 2022, kerana data menunjukkan bahawa inflasi mungkin telah memuncak. Walaupun inflasi mungkin menurun daripada paras tertingginya, berkemungkinan ia kekal mengatasi kadar yang pernah kita alami dalam beberapa dekad yang lalu.

Kebijaksanaan konvensional mengenai saham dan bon mempunyai kaitan songsang di mana saham dijual manakala bon pulih dalam persekitaran menolak risiko tidak berkesan kerana pengurus pelaburan mendapati hanya sedikit ruang untuk mencari perlindungan daripada turun naik pasaran. Dana, walaupun dipelbagaikan dengan baik dalam semua kelas aset, tidak terlepas daripada turun naik ini dan akibatnya menyaksikan prestasi negatif bagi tahun tersebut.

Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 4.85%. Prestasi dalam 5 tahun yang lalu didorong terutamanya oleh dana ekuiti Asia dan A.S. Sementara itu, dana ekuiti Eropah adalah yang utama berprestasi rendah relatif. Sejak pelancarannya pada bulan Oktober 2007, Dana telah mencatatkan pulangan kumulatif sebanyak 88.32%.

Apakah strategi anda bagi masa hadapan?

Disebabkan pandangan mengenai pasaran ekuiti kurang merangsangkan, Dana pada masa ini mengekalkan berwajaran tinggi dalam gaya beta yang lebih rendah seperti Volatiliti Minimum, Dividen Tinggi, Kualiti dan Nilai dengan pandangan bahawa faktor-faktor ini sepatutnya mengatasi prestasi indeks teras dalam konteks makro pertumbuhan yang lebih lemah (atau kemelesetan) dan pengetatan Fed. Faktor-faktor ini juga seharusnya dapat memberikan sedikit perlindungan kelemahan semasa peristiwa penjualan ekuiti serta menyediakan faedah kepelbagaian dalam konteks pembinaan portfolio.

AIA GLOBAL BALANCED FUND (samb)

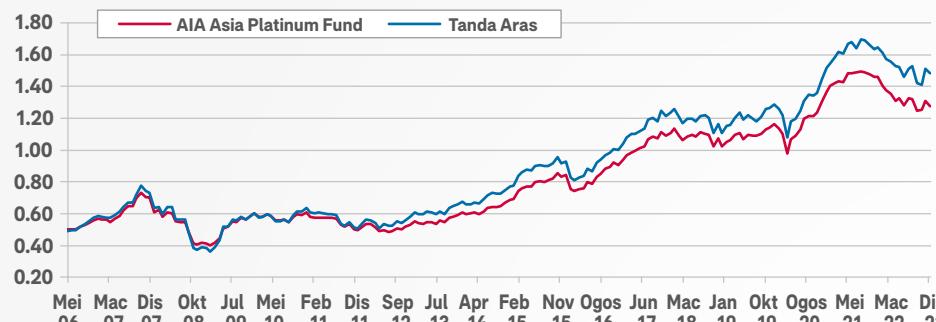

Bagi pasaran pendapatan tetap, apabila kami menghampiri penghujung kitaran kenaikan kadar, Pengurus Dasar masih menggunakan pendekatan yang lebih berhati-hati terhadap kredit sambil mengambil kedudukan untuk peluang jangka panjang.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tiada perubahan kepada objektif pelaburan atau ciri risiko Dana dalam masa terdekat.

Pengagihan Dana pada 31 Disember 2022

AIA ASIA PLATINUM FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -12.53% berbanding tanda aras sebanyak -9.91% kerana semua dana dasar berprestasi rendah berbanding tanda aras masing-masing dan menghasilkan jumlah pulangan negatif berikutan cabaran makroekonomi pada tahun 2022.

Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 15.14% berbanding pulangan kumulatif tanda aras sebanyak 20.28%. Prestasi relatif dalam 5 tahun yang lalu terutamanya diseret oleh kedudukan dalam dana ekuiti Jepun dan India. Sejak dilancarkan pada bulan Mei 2006, Dana telah mencatatkan pulangan kumulatif sebanyak 155.42% berbanding pulangan kumulatif tanda aras sebanyak 196.97%.

Apakah strategi anda bagi masa hadapan?

Di dalam negeri, kelonggaran langkah pencegahan COVID di China dijangka memberikan sokongan yang besar kepada pemulihan dalam perbelanjaan pengguna dan pendapatan domestik dalam banyak sektor ekonomi. Walau bagaimanapun untuk keluar dari COVID kekal sebagai risiko dan momentum ekonomi mungkin tidak menentu akibatnya. Walaupun pulih baru-baru ini, Pengurus Dasar masih melihat sokongan penilaian yang kukuh untuk ekuiti di China dan Hong Kong. Jika pembukaan semula China dan dasar lain berjaya, maka terdapat ruang untuk peningkatan mendadak dalam sentimen dan penarafan semula pasaran. Di Taiwan, sementara ketidaktentuan prospek geopolitik dan teknologi berlarutan, terdapat peluang untuk kitaran inventori teknologi berubah pada separuh pertama tahun 2023. Ini boleh mendorong penarafan semula yang mendadak dalam pasaran Taiwan. Aktiviti domestik juga mungkin beransur pulih apabila Taiwan keluar dari Omicron.

Di Jepun, acara utama untuk pelabur pada bulan Disember ialah keputusan Bank Pusat Jepun untuk meluaskan jalur di mana ia telah mengekalkan kadar hasil bon 10 tahun. Walaupun perubahan sedemikian sentiasa diiktiraf oleh pelabur sebagai langkah pertama yang logik ke arah normalisasi dasar, pemasaran keputusan itu benar-benar mengejutkan. Walaupun perubahan dalam dasar kawalan kadar hasil bukanlah kenaikan kadar faedah *de-facto*, ia masih mencukupi untuk memacu pengukuhan mendadak yen Jepun pada bulan Disember apabila pelabur bertindak untuk menolak peralihan yang lebih asas dalam dasar daripada Bank Pusat Jepun pada tahun 2023. Jepun memasuki tahun 2023 sebagai pesisih (outlier) yang jelas dalam kalangan pasaran maju, dari segi prospek pertumbuhan ekonomi, dasar monetari dan inflasi. Disebabkan ekonomi domestik akhirnya dibuka semula, Pengurus Dasar melihat banyak syarikat berada pada kedudukan yang baik untuk terus meningkatkan keuntungan pada tahun akan datang.

AIA ASIA PLATINUM FUND (samb)

Di India, memandangkan potensi risiko kelembapan ekonomi yang mendadak dalam ekonomi Barat, kedudukan portfolio kekal memihak kepada sektor ekonomi domestik. Portfolio ini mempunyai kedudukan berwajaran rendah dalam sektor komoditi dan perkhidmatan IT manakala kewangan adalah sektor utama berwajaran tinggi. Dalam beberapa bulan kebelakangan ini, pendedahan kepada sektor pengguna, pertahanan dan penjagaan kesihatan juga telah meningkat.

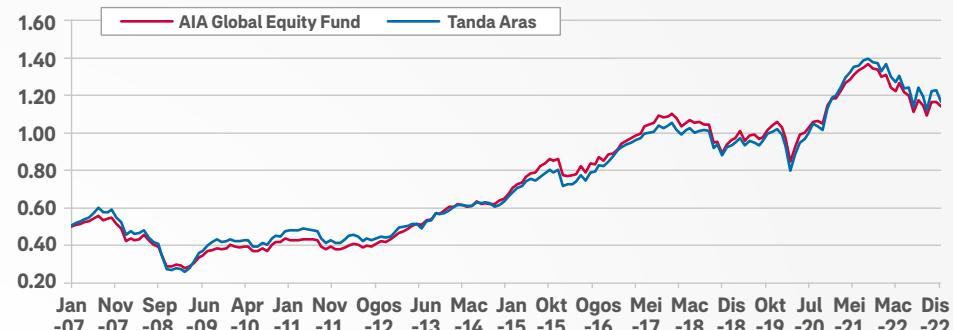

Satu lagi faktor penting untuk Pasaran Memuncul ("EM") ialah USD, yang mahal jika dibandingkan dengan sejarahnya. Keyakinan bahawa langkah daripada Fed telah berjaya mula mengawal inflasi juga harus membawa kepada USD yang lebih lemah, membolehkan mata wang EM pulih. Berikutnya pemulihan baru-baru ini, dan beberapa semakan menurun kepada jangkaan pendapatan EM, penilaian agregat telah menghampiri median sejarah mereka. Secara umumnya, kadar hasil dan mata wang EM berada pada tahap yang menarik. Pengurus Dasar kekal berhati-hati dalam tempoh terdekat tetapi akan terus menggunakan wang tunai bagi peluang yang diletakkan harga untuk menawarkan margin keselamatan yang baik.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Dana akan mengekalkan objektif pelaburan dan ciri risiko am yang sama.

Peruntukan Dana pada 31 Disember 2022

AIA GLOBAL EQUITY FUND (samb)

Bagaimakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -12.77% berbanding tanda aras sebanyak -14.84%. Dana mengatasi tanda aras memandangkan kedudukannya yang berwajaran tinggi dalam dana AIA Asia Ex Jepun yang mendapat manfaat besar daripada keputusan China untuk membuka semula ekonomi pada suku keempat 2022. Pegangan kami dalam AIA Global Multi-Factor Equity Fund berprestasi rendah sedikit berbanding tanda aras.

Pada asas 5 tahun, Dana telah mencatatkan pulangan kumulatif sebanyak 4.79% berbanding pulangan kumulatif tanda aras sebanyak 11.86%. Prestasi relatif dalam 5 tahun yang lalu adalah disebabkan terutamanya oleh penjanaan alfa negatif daripada dana ekuiti modal kecil Eropah. Sejak pelancarannya pada bulan Januari 2007, Dana telah mencatatkan pulangan kumulatif sebanyak 128.13% berbanding pulangan kumulatif tanda aras sebanyak 132.78%.

Apakah strategi anda bagi masa hadapan?

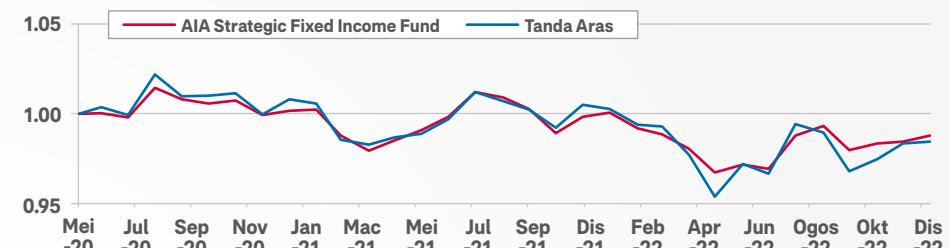

Disebabkan pandangan kurang merangsang, Dana pada masa ini mengekalkan berwajaran tinggi kepada gaya beta yang lebih rendah seperti Volatiliti Minimum, Dividen Tinggi, Kualiti dan Nilai dengan pandangan bahawa faktor-faktor ini harus mengatasi prestasi indeks teras dalam konteks makro pertumbuhan yang lebih lemah (atau kemelesetan) dan pengetatan Fed. Faktor-faktor ini juga seharusnya dapat memberikan sedikit perlindungan kelemahan semasa peristiwa penjualan ekuiti, serta menyediakan faedah kepelbagaiannya dalam konteks pembinaan portfolio.

Pengagihan Sektor pada 31 Disember 2022

AIA STRATEGIC FIXED INCOME FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan sebanyak -1.27% berbanding tanda aras sebanyak -1.79%. Prestasi relatif yang positif disumbangkan oleh strategi peruntukan asetnya dalam berwajaran tinggi dalam bon korporat domestik berbanding bon kerajaan kerana bon korporat mengatasi prestasi. Pemilihan sekuriti yang baik dalam bon korporat domestik dan asing juga dikaitkan secara positif kepada prestasi tersebut. Sejak dilancarkan pada bulan Mei 2020, pada asas bersih, Dana memberi pulangan sebanyak -1.22% berbanding tanda aras sebanyak -1.55%.

Apakah strategi anda bagi masa hadapan?

Memandangkan inflasi dan pertumbuhan dijangka menurun pada tahun 2023, bank pusat di seluruh dunia dijangka menamatkan penormalan dasar mereka, menandakan berakhirnya kitaran pengetatan. Walau bagaimanapun, pemasaan perubahan (pivot) dasar masih tidak pasti dan masih bergantung kepada data. Berdasarkan jangkaan tersebut, pasaran bon secara amnya dijangka menunjukkan prestasi yang lebih baik pada tahun 2023 tetapi dengan potensi peningkatan dalam turun naik sudah kelihatan, disebabkan ketidaktentuan dasar monetari, peningkatan bekalan bon dan keimbangan fiskal. Kami menjangkakan keluk MGS berpotensi meningkat pada tahun 2023 disebabkan penilaian yang menarik setelah mendatar dengan ketara pada tahun 2022; dan untuk bahagian belakang keluk disokong dengan baik dalam keadaan penawaran yang lebih rendah dan permintaan yang stabil daripada pelabur. Kami berpendirian jangka masa neutral dengan kecenderungan taktikal untuk berwajaran tinggi sambil kami terus berdagang mengikut momentum untuk bon kerajaan, dengan peluang dagangan pada masa yang singkat sehingga di atas keluk. Peruntukan aset kami akan terus mengutamakan bon korporat berbanding bon kerajaan untuk peningkatan kadar hasil.

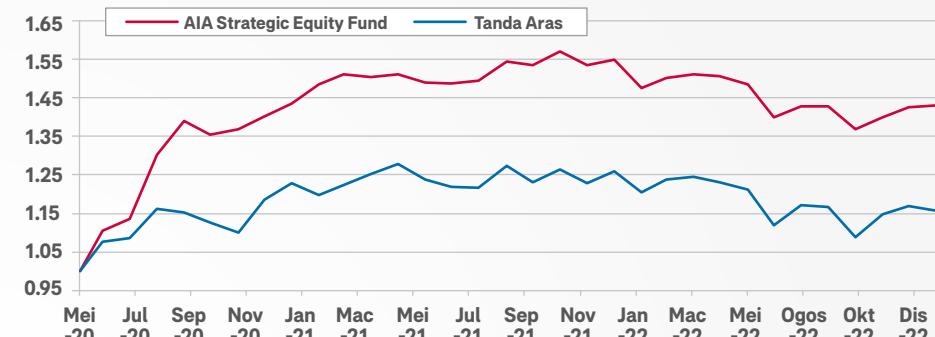

Dari segi pelaburan asing, kami menggunakan kedudukan berwajaran rendah dalam pelaburan bon asing dalam Dana kerana kami menjangkakan Fed akan terus komited dalam mengekalkan kadar lebih tinggi untuk lebih lama dalam usaha mereka untuk menenangkan inflasi. Tinjauan pada USD/MYR kekal neutral tetapi risiko kadar faedah dan keluk akan kekal tidak menentu dalam pasaran pendapatan tetap tahun ini.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Dana akan mengekalkan objektif pelaburan dan ciri risiko am yang sama.

Pengagihan Sektor pada 31 Disember 2022

AIA STRATEGIC EQUITY FUND (samb)

Bagaimakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana memberi pulangan sebanyak -7.60% berbanding pulangan tanda aras sebanyak -8.12%. Prestasi mengatasi pada tahun 2022 didorong terutamanya oleh kedudukan Dana berwajaran tinggi dalam sektor Perkhidmatan Kewangan dan kedudukan berwajaran rendah dalam sektor Penjagaan Kesihatan. Sejak dilancarkan pada bulan Mei 2020, pada asas bersih, Dana memberi pulangan sebanyak 42.99% berbanding pulangan tanda aras sebanyak 15.64%. Prestasi mengatasi ini didorong terutamanya oleh Dana berwajaran tinggi dalam sektor Teknologi. Kedudukan Dana berwajaran rendah dalam sektor Penjagaan Kesihatan dan Perladangan juga membantu prestasi mengatasi berbanding tanda aras Dana.

Apakah strategi anda bagi masa hadapan?

Kami berpendapat bahawa kami telah melihat kemuncak *hawkish* Fed dan penilaian ekuiti telah diselaraskan sebahagiannya ke bawah sewajarnya. Pelabur kini memerhati data makro dengan teliti untuk mengukur lanjutan risiko kemelesetan di A.S. akibat kenaikan kadar yang agresif. Sebaliknya, China telah memberi isyarat ke arah pembukaan semula ekonominya secara beransur-ansur yang akan mengurangkan kesan risiko kemelesetan A.S. Kami optimistik secara berhati-hati terhadap ekuiti dan akan meletakkan Dana dalam sektor Kewangan dan Produk & Perkhidmatan Pengguna yang mendapat manfaat daripada pembukaan semula ekonomi. Kami juga mengutamakan sektor Teknologi yang mempunyai pemangkin pertumbuhan struktur dan memperdagangkan penilaian yang munasabah.

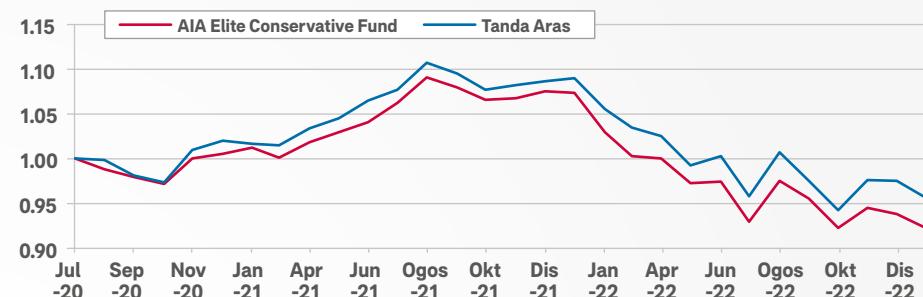

Di dalam negeri, kami menjangkakan pendapatan korporat akan bertambah baik pada tahun 2023 dengan pembukaan semula sempadan antarabangsa dan tamat tempoh cukai kemakmuran sekali sahaja. Kami berusaha untuk melabur dalam syarikat yang memberikan pendapatan berkualiti dan kunci kira-kira yang kukuh pada masa ketidaktentuan. Risiko menurun kepada pasaran boleh berpunca daripada kemelesetan A.S. yang berpanjangan, dasar monetari yang terlalu ketat dan ketegangan geopolitik yang semakin teruk dan risiko dasar kerajaan.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Kami akan terus mencari pertumbuhan jangka panjang modal dan pendapatan melalui portfolio ekuiti yang pelbagai.

Peruntukan Dana pada 31 Disember 2022

AIA ELITE CONSERVATIVE FUND (samb)

Bagaimanakah prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan 2022, pada asas bersih, Dana mencatatkan pulangan sebanyak -14.14% berbanding tanda aras sebanyak -12.33%. Pengurang utama untuk tahun 2022 disebabkan oleh pendedahan kepada AIA Global Quality Growth Fund (di sub-urus oleh Baillie Gifford) yang mempunyai gaya pelaburan yang antara lain cenderung terhadap pertumbuhan dan memilih syarikat yang boleh menggandakan nilainya dalam tempoh 5 tahun. Dalam keadaan pertumbuhan global yang perlahan dan kelihatan semakin mencabar, Baillie Gifford telah meningkatkan proses pelaburan mereka dengan menubuhkan pasukan pusat, diketuai oleh dua pengurus utama mereka, untuk menerajui penyelidikan pelaburan. Ini akan membolehkan pendekatan yang lebih holistik kepada pembinaan portfolio dan aliran idea, serta tahap pencapaian kemampunan yang jelas dan konsisten. Gaya pelaburan mereka kini tertumpu ke arah "pertumbuhan yang berkekalan" di mana pengurus mengenal pasti syarikat yang boleh menyampaikan pendapatan dua digit dan pertumbuhan yang mampan selama sedekad atau lebih.

Sebaliknya, penyumbang utama untuk tahun 2022 disebabkan oleh pendedahan kepada AIA New Multinationals Fund (di sub-urus oleh Wellington Management) yang memberi tumpuan terutamanya kepada syarikat berkualiti tinggi dengan keupayaan pendapatan yang kukuh dan pengawasan yang kukuh. Tumpuan terhadap kualiti telah membolehkan Dana mengharungi ketidaktentuan pasaran dengan lebih baik dan memberikan prestasi yang lebih baik berbanding tanda aras. Melangkah ke hadapan, Pengurus Dasar akan terus mencari peluang daripada ketidakcekapan pasaran sambil mengekalkan tumpuannya kepada syarikat berkualiti.

Tahun 2022 merupakan tahun yang luar biasa untuk pasaran kewangan di mana ekuiti dan pendapatan tetap mencatatkan pulangan negatif, merupakan hanya kali kedua dalam masa setengah abad keadaan seperti ini berlaku. Gabungan peristiwa yang menjelaskan seperti perang Ukraine, dasar monetari terhad oleh bank pusat untuk mengekang inflasi, serta kemunculan semula COVID, menyaksikan pasaran ekuiti dan bon mengalami kesukaran. Saham global (Indeks Dunia MSCI) kehilangan 18.1% untuk tahun ini manakala bon global (Indeks Bon Agregat Global Bloomberg Barclays - BBG) menghadapi tekanan yang sama dan turun 16.7% untuk tahun ini berikutan kenaikan kadar berterusan oleh bank pusat utama untuk menangani inflasi yang melambung naik.

Sentimen risiko bertambah baik pada penghujung tahun 2022, kerana data menunjukkan bahawa inflasi mungkin telah memuncak. Walaupun inflasi mungkin menurun daripada paras tertingginya, berkemungkinan ia kekal mengatasi kadar yang pernah kita alami sejak beberapa dekad yang lalu.

AIA ELITE CONSERVATIVE FUND (samb)

Kebijaksanaan konvensional mengenai saham dan bon mempunyai kaitan songsang di mana saham dijual manakala bon pulih dalam persekitaran menolak risiko tidak berkesan kerana pengurus pelaburan mendapat hanya sedikit ruang untuk mencari perlindungan daripada turun naik pasaran. Portfolio AIA Elite, walaupun dipelbagai dengan baik dalam semua kelas aset, tidak terlepas daripada turun naik ini dan akibatnya menyaksikan prestasi negatif bagi tahun tersebut.

Sejak dilancarkan pada bulan Ogos 2020, Dana telah mencatatkan pulangan kumulatif sebanyak -7.86% berbanding pulangan kumulatif tanda aras sebanyak -4.44%.

Apakah strategi anda bagi masa hadapan?

Kami berpendapat tahun 2023 akan menjadi "satu tahun perubahan" - perubahan melalui pemulihan makro, "perubahan (pivot)" Fed dan pemulihan dalam prestasi kelas aset berbanding tahun 2022. Namun setiap titik perubahan mesti dihadului dengan fasa yang melemahkan. Dari segi makro, kami berpendapat pertumbuhan A.S. akan terhenti, keuntungan korporat akan merosot, dan pemotongan kos yang berkaitan seharusnya membawa kepada kadar pengangguran yang lebih tinggi, diterjemahkan kepada kebarangkalian kemelesetan yang lebih tinggi pada pertengahan tahun ini. Penilaian ekuiti, sebaliknya, mungkin menguji lebih rendah sebelum pulih beberapa tahap pada separuh kedua tahun 2023.

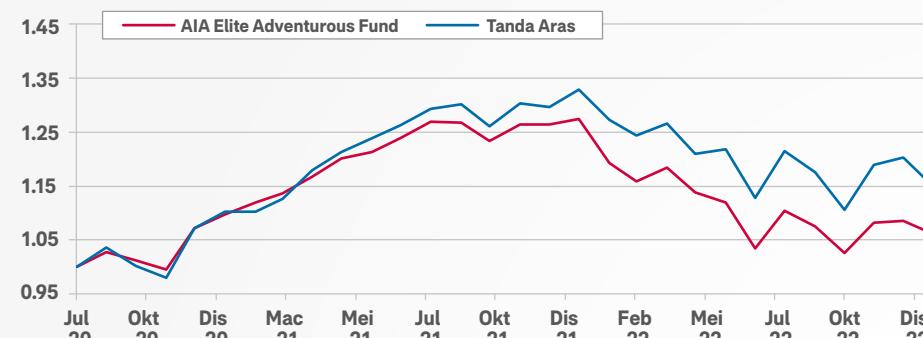

Kami berpendapat akan ada banyak peluang bagi kelas aset membuat pemulihan yang kukuh, bermula dengan bon berdaulat (khususnya, Perbendaharaan A.S.) dan mungkin lebih lama kemudian dengan aset berisiko (ekuiti global dan Asia serta kredit hasil tinggi). Masa pemulihan kelas aset tidak semestinya disegerakkan, dan oleh itu pengembalian struktur korelasi silang aset yang lebih normal dalam pasaran, tidak seperti yang dialami pada tahun 2022.

Adakah terdapat sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tidak. Dana akan mengekalkan objektif pelaburan dan ciri risiko am yang sama.

REPORT ON THE AUDIT OF THE FINANCIAL INFORMATION

Our opinion

In our opinion, the accompanying financial information of the Funds for the financial year ended 31 December 2022 are prepared, in all material respects, in accordance with the accounting policies set out in Note 3 to the financial information and the Guidelines on Investment-Linked Business issued by Bank Negara Malaysia.

What we have audited

We have audited the financial information of the Funds, which comprise the statements of assets and liabilities as at 31 December 2022, and the statements of income and expenditure and statements of changes in net asset value for the financial year then ended, and notes to the financial information, including a summary of significant accounting policies, as set out on pages 156 to 272.

INDEPENDENT AUDITORS' REPORT (cont'd)

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the financial information" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter – basis of preparation and restriction on distribution and use

We draw attention to Note 3 to the financial information, which describes the basis of preparation. The financial information is prepared to assist the Funds to meet the requirements of the Guidelines on Investment-linked Business issued by Bank Negara Malaysia. As a result, the financial information may not be suitable for another purpose. Our report is intended solely for the unitholders of the Funds as a body and should not be distributed to or used by parties other than the unitholders of the Funds. Our opinion is not modified in respect of this matter.

Independence and other ethical responsibilities

We are independent of the Funds in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Information other than the financial information and auditors' report thereon

The Directors of AIA Bhd. ("the Manager") are responsible for the other information. The other information comprises the information contained in the Investment-Linked Funds Annual Report, but does not include the financial information of the Funds and our auditors' report thereon.

Our opinion on the financial information of the Funds does not cover the other information and we do not express any form of assurance conclusion thereon.

INDEPENDENT AUDITORS' REPORT (cont'd)

Information other than the financial information and auditors' report thereon (cont'd)

In connection with our audit of the financial information of the Funds, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial information of the Funds or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors of the Manager for the financial information

The Directors of the Manager are responsible for the preparation of the financial information in accordance with the accounting policies set out in Note 3 to the financial information and the Guidelines on Investment-Linked Business issued by Bank Negara Malaysia, and for such internal control as the Directors determine is necessary to enable the preparation of financial information that are free from material misstatement, whether due to fraud or error.

In preparing the financial information, the Directors are responsible for assessing the Funds' ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

The Directors of the Manager are responsible for overseeing the Funds' financial reporting process.

Auditors' responsibilities for the audit of the financial information

Our objectives are to obtain reasonable assurance about whether the financial information of the Funds as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

INDEPENDENT AUDITORS' REPORT (cont'd)

Auditors' responsibilities for the audit of the financial information (cont'd)

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial information, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- (d) Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial information or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

INDEPENDENT AUDITORS' REPORT (cont'd)

STATEMENT OF ASSETS AND LIABILITIES

OTHER MATTERS

This report is made solely to the unitholders of the Funds, as a body, and for no other purpose. We do not assume responsibility to any other person for the content of this report.

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022

1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION

The principal activities of AIA Bhd.'s AIA Fixed Income Fund, AIA Equity Dividend Fund, AIA Global Bond Fund, AIA Global Bond Fund 1, AIA Global Bond Fund 2, AIA Global Bond Fund 3, AIA Global Bond Fund 4, AIA Global Bond Fund 5, AIA Global Bond Fund 6, AIA Global Bond Fund 7, AIA Global Bond Fund 8, AIA Balanced Fund, AIA Equity Plus Fund, AIA Global Fixed Income Fund, AIA Asian Equity Fund, AIA Global Equity Income Fund, AIA Dana Progresif, AIA Medium Cap Fund, AIA Aggressive Fund, AIA Dana Dinamik, AIA New Horizon Fund, AIA Asia Platinum Fund, AIA Global Equity Fund, AIA Global Balanced Fund, AIA Dana Bon, AIA Asia Opportunity Fund, PB Income Plus Fund, PB Income Plus 2 Fund, AIA Strategic Equity Fund, AIA Strategic Fixed Income Fund, AIA Elite Adventurous Fund and AIA Elite Conservative Fund which are distributed under the agents and bancassurance distribution channels, (hereinafter referred to collectively as "the Funds") are to invest in authorised investments.

The objective of the AIA Fixed Income Fund is primarily to provide stable income through investments in fixed income securities and money market instruments. The fund also aims to provide medium to long-term capital appreciation whilst preserving the capital invested.

The objective of the AIA Equity Dividend Fund is to provide steady capital growth and income by investing mainly in a portfolio of stocks listed on the Bursa Malaysia which offers or have the potential to offer attractive dividend yields.

The objective of the AIA Global Bond Fund series is to maximize total investment return consisting of a combination of interest income, capital appreciation and currency gains by investing principally in a portfolio of fixed or floating rate debt securities and debt obligations issued by government or government-related issuers worldwide. AIA Global Bond Fund series are closed ended with maturity dates to match customer financial needs: AIA Global Bond Fund matured in 17th May 2022, AIA Global Bond Fund 1 matured in 8th June 2022, AIA Global Bond Fund 2 matured in 21st July 2022, AIA Global Bond Fund 3 matured 31st August 2022, AIA Global Bond Fund 4 matured in 19th October 2022, AIA Global Bond Fund 5 matured in 30th November 2022, AIA Global Bond Fund 6 matured in 10th January 2023, AIA Global Bond Fund 7 matured in 11th March 2023, AIA Global Bond Fund 8 to be matured in 7th May 2023.

The objective of the AIA Balanced Fund is to maximize total returns with reasonable safety of principal by investing in diversified portfolio of equity, fixed income securities and cash equivalent securities.

The objective of the AIA Equity Plus Fund is to maximize medium to long-term growth of capital and income by investing in well managed large capitalisation companies that are believed to offer above average growth potential.

AIA Asian Equity Fund invests in a diversified portfolio of shares issued by companies incorporated in Asia excluding Japan and Australia. It is suitable for

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)**1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION (CONT'D)**

very aggressive investors who are willing to take high risk in order to achieve higher potential returns.

The objective of the AIA Dana Progresif is to maximize medium to long term capital appreciation by investing in equity and equity-related securities listed on Bursa Malaysia and Islamic debt securities which are strictly in compliance with Syariah principles.

The objective of the AIA Medium Cap Fund is to achieve medium to long-term capital growth. Greater emphasis is placed on investing in small to mid-size companies with reasonably good earnings growth prospect.

The objective of the AIA Aggressive Fund is to achieve long term capital growth through investment in diversified portfolio stocks. This is a high conviction fund that takes more concentrated position in sector and stock positioning. The fund is suitable for high risk tolerance equity investors.

The objective of the AIA Dana Dinamik is to achieve consistent capital growth over the medium term to long term horizon through investment in permissible stocks in accordance with the application of Syariah principles and regulatory policies.

The objective of the AIA New Horizon Fund is to achieve medium to long term capital appreciation by investing in equity and equity-related securities listed on Bursa Malaysia and global markets permissible by the prevailing Bank Negara Malaysia ("BNM")'s regulations.

The objective of the AIA Asia Platinum Fund is to achieve long term capital growth by investing in equity and equity related securities of companies in three regional markets, i.e. Greater China (which consists of People's Republic of China, Hong Kong and Taiwan), India and Japan. From time to time, it may invest in global emerging markets' securities in times of adverse investment climate in any of the above three regional markets. The investment in global emerging markets will be allocated across markets which include but are not limited to markets located in Central and Eastern Europe, South East Asia, Latin America and Africa.

The objective of the AIA Dana Bon is primarily to provide stable income by investing in Islamic fixed income securities and Islamic money market instruments in Malaysia. The fund also aims to provide medium to long-term capital appreciation whilst preserving the capital invested.

The objective of the AIA Asia Opportunity Fund is to provide capital appreciation over the medium to long-term by investing primarily in equities and equity-related instruments in companies with significant business operations in the Asian excluding Japan region.

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)**1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION (CONT'D)**

The objective of the PB Income Plus Fund series is to seek growth of capital and income through investment in a diversified portfolio of stocks, bonds and cash by investing in ringgit denominated government and corporate bonds and Malaysian equities. PB Income Plus Fund series are closed ended with maturity dates to match customer financial needs: PB Income Plus Fund matured in 20th June 2022, PB Income Plus 2 Funds matured in 19th September 2022.

The objective of the AIA Strategic Equity Fund is to maximize medium to long term growth of capital and income through investments in a diversified portfolio of equity securities listed on local and foreign bourses.

The objective of the AIA Strategic Fixed Income Fund is primarily to provide a steady stream of income returns through investments in both domestic and USD-denominated fixed income securities and money market instruments. The fund also aims to provide medium to long-term capital appreciation whilst preserving the capital invested.

The objective of the AIA Elite Adventurous Fund is to seek long-term total return (combination of capital growth and income) with higher risk by investing in a portfolio of mostly equities and a small proportion of fixed income securities.

The objective of the AIA Elite Conservative Fund is to seek long-term total return (combination of capital growth and income) and at the same time minimize short term capital risk by investing in a portfolio of equities and fixed income securities.

Effective 1 January 2022, four funds have been renamed and the changed of fund objectives to the following:

- i. AIA Global Equity fund (formerly known as AIA International Small Cap fund) aims to provide long-term investment growth through exposure to a diversified portfolio of global equities and equity-related securities that exhibit various investment factor characteristics.
- ii. AIA Global Equity Income fund (formerly known as AIA International High Dividend fund) aims to provide both income and capital growth through a portfolio of global equities and equity-related securities with a covered call strategy to enhance income generation. In order to achieve its investment objective, the Fund will invest primarily, i.e. at least 50% of the Fund's Net Asset Value, in equity securities and equity-related securities issued by companies globally selected for their income and / or growth potential and call options writing.
- iii. AIA Global Balanced fund (formerly known as AIA Eleven Plus fund) aims to provide long-term total return (combination of capital growth and income) with moderate risk by investing through exposure in a diversified portfolio of global equities and fixed income securities. It is also flexible by allowing

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)

1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION (CONT'D)

investments in newer funds launched in the future. The Fund adopts a relatively balanced approach towards equities and bond exposure with the aim of providing stable growth of your investment. The Fund's expected average exposure to equities will be approximately 60% over the long term, however this exposure may vary from time to time and can go up to 80%. The balance is invested in the fixed income or money market instruments.

iv. AIA Global Fixed Income fund (formerly known as AIA Asian Debt fund) aims to maximise long-term return by investing in a diversified fixed income portfolio consisting primarily investment grade bonds and other debt securities denominated in USD.

Please note that the Funds' objectives provided above is an abbreviated version. For further details, please refer to AIA Funds' Fact Sheet.

The Manager

The Manager of the Funds is AIA Bhd. ("AIAB"), a company incorporated in Malaysia. AIAB is engaged principally in the underwriting of life insurance business, including investment-linked business.

2. BASIS OF PREPARATION

The financial information of the Funds have been prepared in accordance with the accounting policies as described in Note 3 to the financial information and Guidelines on Investment-linked Business issued by BNM.

The financial information have been prepared under the historical cost convention except as disclosed in the significant accounting policies in Note 3 to the financial information.

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Investments

(i) Fair value through profit or loss financial assets

The Funds designate their financial assets in the investment portfolio at fair value through profit or loss ("FVTPL") at inception as they are managed and evaluated on a fair value basis, in accordance with the respective investment strategy and mandate.

Financial assets classified as FVTPL are initially recorded at fair value. Subsequent to intial recognition, the financial assets are remeasured at fair values with fair value adjustments and realised gains and losses recognised in the statement of income and expenditure.

(ii) Fair value of financial assets

The fair values of Malaysian government securities, collective investment schemes, unquoted corporate debt securities and fixed and call deposits are based on indicative fair market prices/indices by reference to the quotations provided by financial institutions and brokers.

The fair values of quoted equity securities and real estate investment trust funds are based on current active market prices.

If the market for a financial asset is not active, the Funds establish fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and option pricing models.

Cash and cash equivalents with licensed financial institutions are stated at their carrying amounts as at the date of the statement of assets and liabilities.

(b) Income recognition

Profit/interest income is recognised on a time proportion basis that takes into account the effective yield of the assets.

Dividends from Malaysian quoted securities are recognised on the ex-dividend date.

Realised gains and losses on sale of investments are arrived at after accounting for cost of investments determined on the first-in-first-out method.

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(c) Foreign currencies

(i) Functional and presentation currency

The financial information are presented in Ringgit Malaysia ("RM"), which are the Funds' functional and presentation currency.

(ii) Foreign currency transactions

At each date of the statement of assets and liabilities, monetary items denominated in foreign currencies are translated at the rates prevailing on the date of the statement of assets and liabilities. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences arising on the settlement of monetary items and on the translation of monetary items are taken to the statement of income and expenditure.

(d) Net creation of units

Net creation of units represents premiums paid by policyholders as payment for a new contract or subsequent payments to increase the amount of that contract less switching within funds. Net creation of units is recognised on a receipt basis.

(e) Net cancellation of units

Net cancellation of units represents cancellation of units arising from surrenders and withdrawals. Net cancellation of units is recognised upon notification by the unitholders.

(f) Cash and cash equivalents

Cash and cash equivalents consist of cash and bank balances, excluding fixed deposits/money market, which are subject to an insignificant risk of changes in value.

(g) Income tax

Income tax on the profit and loss for the financial year comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the financial year and is measured using the tax rates that have been enacted at the date of the statement of assets and liabilities.

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(g) Income tax (cont'd)

Deferred tax is provided for using the liability method, on temporary differences at the date of the statement of assets and liabilities between the tax bases of assets and liabilities and their carrying amounts in the financial information. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the financial year when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the date of the statement of assets and liabilities. Deferred tax is recognised in the statement of income and expenditure.

(h) Management fee

Management fee is charged based on the Funds' daily net asset value at the following rates.

AIA Fixed Income Fund	0.500% per annum
AIA Equity Dividend Fund	1.500% per annum
AIA Global Bond Fund	1.000% per annum

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(h) Management fee (cont'd)

Management fee is charged based on the Funds' daily net asset value at the following rates. (cont'd)

AIA Global Balanced Fund	1.5000% per annum
AIA Dana Bon	0.5000% per annum
AIA Asia Opportunity Fund	1.5000% per annum
PB Income Plus Fund	1.2000% per annum
PB Income Plus 2 Fund	1.2000% per annum
AIA Strategic Equity Fund	1.5000% per annum
AIA Strategic Fixed Income Fund	1.0000% per annum
AIA Elite Adventurous Fund	1.5000% per annum
AIA Elite Conservative Fund	1.1500% per annum

Effective 1 January 2022, AIA Global Balanced fund (formerly known as AIA Eleven Plus fund) management fee have been rebased to 1.5000% per annum.

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)

4. INCOME DISTRIBUTION

The income distribution to policyholders of AIA Global Bond Fund Series is a fixed payout of 5 sen per unit per annum for Policy Year 1 to 5, which are distributed quarterly at 1.25 sen per unit. No coupon shall be paid if the NAV per unit is RM0.70 or lower. Fixed payout will resume when the NAV per unit increases above RM0.70. In the subsequent years, variable payout will be made annually if the NAV is above RM1.00. The amount of payout declared, if any, may vary from year to year.

The income distribution to policyholders of PB Income Plus Fund Series is a fixed payout of 5 sen per unit per annum for Policy Year 1 to 5, which are distributed semi-annually at 2.5 sen per unit. No coupon shall be paid if the NAV per unit is RM0.70 or lower. Fixed payout will resume when the NAV per unit increases above RM0.70. In the subsequent years, variable payout will be made annually if the NAV is above RM1.00. The amount of payout declared, if any, may vary from year to year.

For 2022, there is no dividend distributed as the NAV per unit prior to the distributions is below RM1.00

NOTES TO THE FINANCIAL INFORMATION – 31 DECEMBER 2022 (cont'd)
