MESSAGE FROM CEO AND CIO

Dear Policyholders,

Market Review

The financial year ended 30 November 2015 was a turbulent one for Malaysia due to a combination of external and internal factors. The FBMKLCI Index fell by 8.2% during the year, making it the second consecutive year of declines.

Domestically, depressed crude oil and crude palm oil prices, fears over 1Malaysia Development Bhd's (1MDB) debt, the implementation of GST and rising political uncertainty resulted in further disappointment in corporate earnings. Externally, a sharp correction in the Chinese stock market, the unexpected devaluation of the Renmimbi and the US' first interest rate hike in nearly a decade further dampened sentiment.

These concerns resulted in an exodus of foreign funds, which saw the Ringgit plunging to a low of RM4.45 against the US dollar before closing at RM4.25/USD – a level worse than the RM3.80/USD pegged exchange rate during the Asian financial crisis.

The fixed income market enjoyed better fortunes with the Malaysia Government Securities (MGS) Index rising 3.7% thanks to well-anchored inflation expectations, the implementation of GST and ongoing reduction in subsidies by the Malaysian government – a positive factor for the nation's fiscal prospects.

Performance

For the financial year ended 30 November 2015, most of our open-ended funds outperformed their respective benchmarks and industry peers. The performance of our two major flagship funds – AIA Balanced Fund and AIA Equity PLUS Fund – was particularly commendable, posting only a modest loss of 0.80% and 2.41%, respectively. Despite the extremely challenging market conditions, they outperformed their respective benchmarks by 3.45% and 4.54%.

Our five-year track record was also commendable, with all our local investment strategies for equity, fixed income, balanced, and shariah funds outperforming their benchmarks between 0.27% per annum and 9.62% per annum. In terms of absolute returns, the funds registered annual returns of between 3.68% and 14.16%.

MESSAGE FROM CEO AND CIO (cont'd)

Outlook

In the short term, we expect continued volatility due to plunging crude oil prices and a correction in the global stock market. Over the longer term, we are cautiously optimistic about the prospects in 2016. Our investment thesis is premised on 1) the expectations that the Malaysian economy will expand between 4% and 5% and corporate earnings will grow at a modest single-digit rate, 2) the successful execution of 1MDB's debt restructuring and 3) a gradual hike in US interest rates.

However, there are downside risks if 1) our budget deficit target of 3.1% is revised substantially higher as a result of lower oil prices, 2) China experiences a sharp fall into recession and 3) the renmimbi is devalued sharply.

As for fixed income, we expect volatile oil prices and a weak ringgit to weigh on the Malaysian bond market. Normalisation of interest rates in the US is also something to look out for, although we do expect this to be a gradual process.

Apart from this, uneven global economic growth, lower fuel prices and moderating domestic demand should keep a lid on inflation. Bank Negara Malaysia (BNM) believes that inflation expectations are well anchored and thus its monetary stance is to be accommodative.

Thank you for placing your trust in us. Our team of highly qualified investment professionals employs a robust and proven investment methodology, backed by a solid risk management framework. We assure you that we will continue to invest your money prudently to achieve the best possible returns.

Kind regards and best wishes for 2016,

Anusha Thavarajah
Chief Executive Officer, AIA Bhd.

Emilee M. L. Yew
Chief Investment Officer, AIA Bhd.

LOCAL BOND MARKET COMMENTARY

Market Review

The longer tenure Malaysian government bond (MGS) fell significantly as yields rose sharply while the shorter tenure bills and notes rose due to defensive positioning by investors on the back of the weaker ringgit, low oil prices and political uncertainty. The plunge in oil prices had asserted pressure on the ringgit as investors were concerned over Malaysia's fiscal position. Uncertainty over the timing of the first US interest rate rise in nearly a decade also dampened sentiment.

Against the backdrop of the government's weak fiscal position and thinning trade balance, Fitch Rating had warned of a possible sovereign rating downgrade for Malaysia. However, in a surprise move, the rating agency subsequently affirmed Malaysia's long-term foreign currency sovereign credit rating at A-, and upgraded the outlook to stable from negative, citing Malaysia's improving fiscal position following the implementation of the Goods and Services Tax (GST), sound financing flexibility due to the depth of Malaysia's capital market and favourable economic growth as reasons.

Sentiment in the bond market too improved towards the end of the financial year as there were signs of resolution of 1Malaysia Development Berhad's (1MDB) debt issue and after the government announced measures to narrow the fiscal deficit from 3.2% in 2015 to 3.1% in 2016.

Market Outlook

Bank Negara is likely to keep the Overnight Policy Rate (OPR) steady in the near future as the current monetary stance is viewed as both accommodative and supportive of economic activities. Given the prospect of benign inflation and expectations of a continuation of an accommodative monetary policy, we are cautiously optimistic about the Malaysian bond market amidst a heightened uncertainty in the global bond space. Against this backdrop, we prefer a neutral to slightly underweight duration stance to protect the fund against the risks of potential volatile yield movements.

The pace of the US Fed's tightening cycle is expected to be gradual and dependent on economic data, hence unlikely to pose any significant downside risk to the Malaysian bond market. However, volatile oil prices and the Ringgit is expected to weigh on the Malaysian bond market. On a global basis, Malaysian bonds may look attractive in a low yield environment but an extended period of volatile movements in the ringgit may reduce the appeal of Malaysian bonds to offshore investors.

LOCAL BOND MARKET COMMENTARY (cont'd)

Opportunities

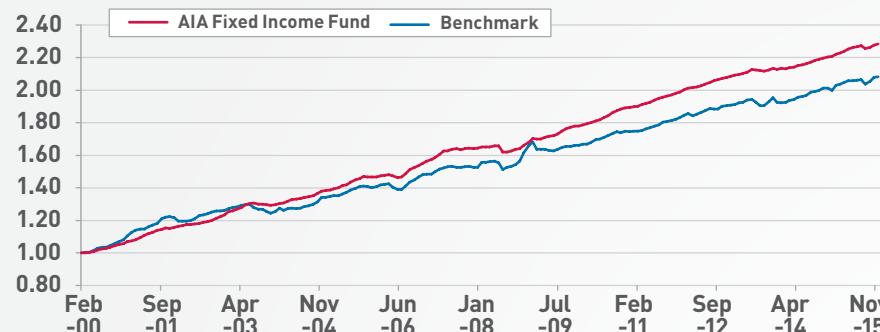

- Despite the expectations of US monetary tightening, the pace is likely to be measured. In the Eurozone and Japan, interest rates should stay low. The low interest rate environments in the developed economies and Malaysia's relatively higher bond yield in the region may continue to make Malaysian fixed income assets attractive.
- With generally stable credit conditions and a modest supply pipeline of corporate bonds in 2016, our funds' allocation will continue to favour corporate bonds over government bonds.

Concerns

- The relatively high foreign ownership in MGS has made the domestic bond market susceptible to foreign selling should Malaysia's fiscal outlook deteriorate further.
- A more aggressive monetary tightening policy by the Fed may result in a weaker ringgit, causing fund outflow to accelerate.
- There is also the risk of Malaysia's sovereign rating being downgraded if oil prices fall further, leading to a further weakening in the fiscal position.

AIA FIXED INCOME FUND

Sector Allocation as at 30 November 2015

AIA FIXED INCOME FUND (cont'd)

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the fund returned 3.58% against the benchmark's return of 3.47%. Since inception in Feb 2000, the Fund has posted an annualised return of 5.38% versus the benchmark's return of 4.77%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund's neutral to slight underweight position in duration contributed to the performance as long term yields rose sharply.

Negative

- The Fund's holdings in certain lower-rated credits which were downgraded and/or put under negative outlook have detracted from the performance.

What is your strategy going forward?

Given the expectations of a volatile bond market, the Fund will position its duration stance based on our assessment of economic and market conditions. The Fund may maintain its current strategy of investing in shorter-dated bonds until the risk of foreign capital outflows from the Malaysian government bond market lessens on the back of stability or improvements in oil prices, the ringgit and Malaysia's fiscal position. Improvements in these areas will lead the Fund to invest more in longer-dated bonds to benefit from the rally in the bond market.

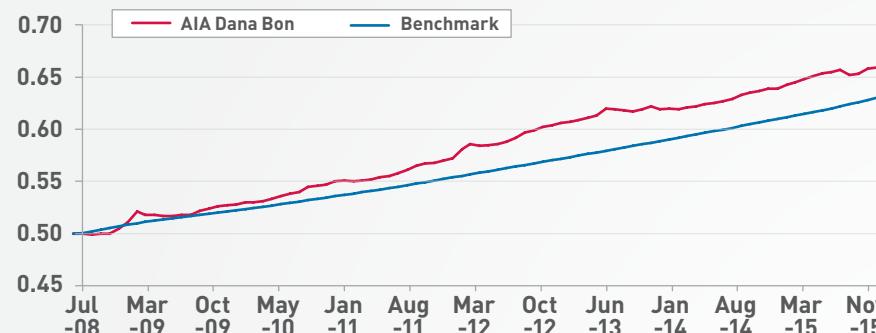

Conversely, if those economic indicators weaken significantly which may increase the risk of a downgrade of Malaysia's sovereign rating and trigger significant foreign capital outflows from Malaysia's government bond market, the Fund will invest in shorter dated bonds with the main objective of capital preservation.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to focus on a high level of income and return through the careful selection of good quality bonds. We will also maintain a diversified portfolio of corporate and government bonds to better manage the risks.

AIA DANA BON

* 12-month Maybank General Investment Account (Islamic) Tier 1 Rate (Source: Maybank)

Sector Allocation as at 30 November 2015

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the Fund returned 3.13% against the benchmark's return of 3.64%. Since inception in July 2008, the Fund has posted an annualised return of 3.82% versus the benchmark's return of 3.20%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund's holdings in corporate sukuk that carried high profit rates contributed to the performance.

Negative

- The Fund's holdings in certain lower-rated credits which were downgraded and/or put under negative outlook have detracted from the performance.

What is your strategy going forward?

The Fund may maintain its current strategy of investing predominately in medium-tenured corporate and government sukuk until the risk of foreign capital outflows from Malaysia's government bond market lessens on the back of stability or improvements in oil prices, the ringgit and Malaysia's fiscal position. Improvements in these areas may prompt the Fund to consider investing more in long-dated sukuk to benefit from the rally in the bond market.

Conversely, if those economic indicators weaken significantly which may increase the risk of a downgrade of Malaysia's sovereign rating and trigger significant foreign capital outflows from Malaysian government bond market, the Fund will invest more in shorter tenure sukuk with the main objective of reducing volatility to the Fund.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to focus on maximising total returns from both income and capital growth by investing in investment grade Islamic bonds and Islamic money market instruments in Malaysia while minimising reinvestment risk.

AIA DANA BON (cont'd)

LOCAL STOCK MARKET COMMENTARY

Market Review

Financial year ended 30 November 2015 was a turbulent one for Malaysia as external and internal headwinds came together. The FBMKLCI Index fell another 8.2% during the year, marking the second consecutive year of decline. Domestically, depressed crude oil and crude palm oil prices, fears over 1Malaysia Development Bhd's (1MDB) debt, the implementation of the GST and rising political uncertainties resulted in further disappointment in corporate earnings. Externally, the sharp correction in the Chinese stock market, the unexpected devaluation of the renminbi and the impending first US rate hike in nearly a decade further dampened sentiment.

These concerns sparked an exodus of foreign funds, which saw the ringgit plunging to a low of RM4.45/USD before recovering to close at RM4.25/USD, still far worse than the RM3.80/USD pegged exchange rate during the Asian financial crisis. YTD until end Nov, foreign equities outflows amounted to RM18.3 billion, almost three times more than the RM6.9 billion outflow recorded in 2014.

Market Outlook

In the short run, volatility is expected to persist on the back of plunging crude oil prices and correction in global stock market. Over the longer term, we are cautiously optimistic about the prospects in 2016. Our investment thesis is premised on the expectations that the economy will grow between 4% and 5% and corporate earnings will grow at a modest single-digit rate boosted by firmer crude palm oil prices, lower cost for the banking sector and a reduction of 1% in the corporate tax rate.

News of the planned injection of RM20 billion into ValueCap Sdn Bhd helped to improve sentiment as the funds will eventually be invested in the stock market. In the latest Malaysia-China bilateral economic forum, the Chinese government showed an interest to purchase more Malaysian Government Securities and China General Nuclear Power Corporation's purchase of Edra Global Energy Bhd's power assets. Chinese parties are expected to be further involved in the restructuring of 1MDB via the purchase of a stake in Bandar Malaysia and the construction of the High Speed Rail linking Malaysia to Singapore. Should these materialise, foreign FDI and capital flows will be boosted, beefing our foreign currency reserve, which is expected to strengthen the Ringgit.

With 1MDB's debt situation improving, the government will be better positioned to expedite the rollout of the 11th Malaysia Plan to boost the local economy. Meanwhile, we expect a revival of consumer sentiment to sustain domestic demand following the normalisation of GST impact by 2H2016. Despite the low crude oil prices, the government is committed to reducing the budget deficit through on-going subsidy rationalisation. The tax collected from GST was also higher than expected.

On the external front, we expect the pace of the Fed's rate hike to be gradual. A benign interest rate in the US is expected to result in a gradual depreciation in the US dollar, which is positive for emerging markets like Malaysia. Global economic growth is also expected to be modestly higher than 2015 driven by improving jobs and consumer spending. In Japan and the Eurozone, monetary policy is expected to loosen further and in China, growth should settle at around 6.5% per annum.

LOCAL STOCK MARKET COMMENTARY (cont'd)

Opportunities

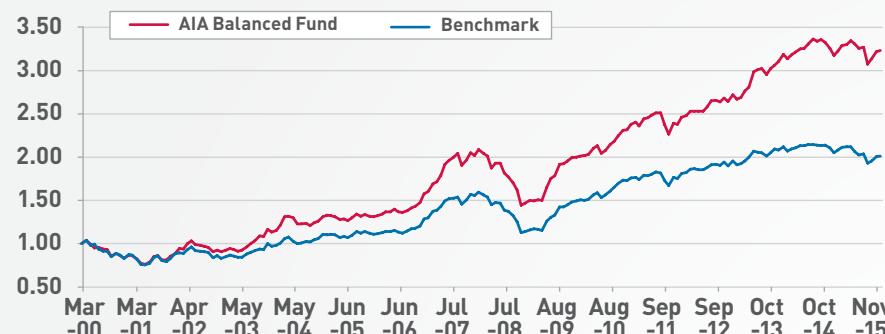

- China has indicated an interest to purchase Malaysian Government Securities and participate in the restructuring of 1MDB.
- The RM20 billion injection into ValueCap may create positive sentiment in the market once the funds are invested in the stock market.
- Awarding of mega projects such as Pan Borneo Highway, MRT2 and LRT3.
- Conclusion of the sale of Edra Global Energy's power assets and Bandar Malaysia in an effort to pare down 1MDB's debt.
- Anticipated gradual recovery of oil prices and stronger crude palm oil prices as a result of El Nino is expected to boost the local stock market.

Concerns

- Downside risk to economic growth as the full impact of the GST, subsidy reduction and lower Ringgit is felt in 2016.
- Oil prices stay below US\$30 per barrel for a prolonged period, changing budget deficit to be significantly above 3.1%.
- Local corporate earnings could yet disappoint given lower margins on the back of rising cost and weak consumer demand.
- Rising racial tensions.
- Slower-than-expected global growth stemming from disappointment in the Chinese economy while Japan and the Eurozone may fall into recession as money printing may not work.
- Pace of US interest rate hikes is faster and steeper than expected.
- The Chinese renminbi may be devalued again.

AIA BALANCED FUND

AIA Balanced Fund

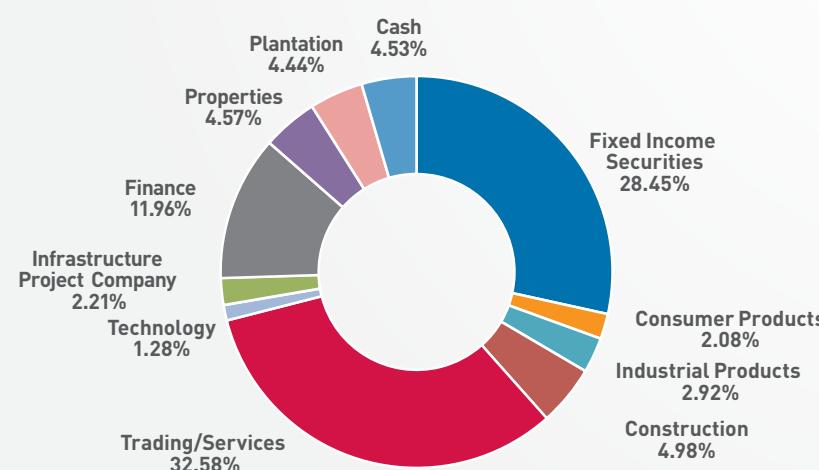

Performance as at 30 November 2015

	1-Month	6-Month	1-Year	3-Year	5-Year	Since Inception

Weighted Index*	0.42%	(2.42%)	(4.25%)	2.01%	3.13%	4.56%
Out/(Under)-performed	0.14%	0.27%	3.45%	4.90%	3.77%	3.19%

* 70% FBM 100 (Source: Bursa Malaysia) + 30% MGS All Index (Source: RAM QuantShop @ www.quantshop.com)

Sector Allocation as at 30 November 2015

AIA BALANCED FUND (cont'd)

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the Fund declined 0.80% against the benchmark's loss of 4.25%. Since inception in March 2000, the Fund has posted an annualised return of 7.76% versus the benchmark's return of 4.56%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in small to medium cap stocks such as Time dot com, Prestariang and JAKS Resources which outperformed.
- The Fund was overweight in cyclical sectors such as construction and technology, which outperformed.
- The Fund was underweight in the finance and telecommunication sectors, which underperformed.
- The Fund's neutral to slight underweight position in duration contributed to the performance as long term yields rose sharply.

Negative

- The Fund was overweight in the plantation sector, which underperformed, on the back of weak crude palm oil prices.
- The Fund's stock selection in AirAsia and AirAsia X detracted from performance despite lower oil prices.
- The Fund was underweight in glove makers, which outperformed.
- The Fund's relatively higher allocation to government-guaranteed bonds that carried lower coupons as compared with corporate credits detracted from the performance.

What is your strategy going forward?

For equity, in view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As such, companies in the construction sector, affordable property sector, plantation sector and concessionaire owners that have steady cash flows and long-term contracts are preferred. The transportation sector is also expected to benefit from low crude oil prices. As for exporters, we are less hopeful because of the anticipated strengthening of the ringgit and those stocks have done very well, making valuations unattractive.

AIA BALANCED FUND (cont'd)

For fixed income, the Fund will position its duration stance based on our assessment of economic and market conditions to navigate a potentially volatile bond market. The Fund may maintain its current strategy of investing in shorter-dated bonds until the risk of foreign capital outflows from Malaysian government bond market is reduced on the back of signs of stability or improvements in oil prices, the ringgit and Malaysia's fiscal position. Improvements in these areas will lead the Fund to invest more in longer-dated bonds to benefit from the rally in the bond market.

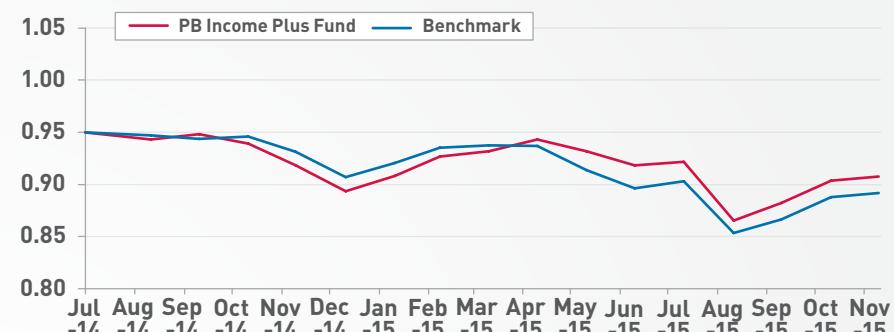

Conversely, if those economic indicators weaken significantly which may increase the risk of a downgrade of Malaysia's sovereign rating and trigger significant foreign capital outflows from Malaysia's government bond market, the Fund will invest in shorter-dated bonds for capital preservation.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We continue to focus on a high level of income and return through a careful selection of good quality bonds while maintaining a diversified portfolio of corporate and government bonds to help manage the risks. As for the equity portion, we continue to seek long-term growth of capital and income through a diversified equity portfolio.

Sector Allocation as at 30 November 2015

AIA DANA PROGRESIF (cont'd)

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the Fund returned 1.05% against the benchmark's loss of 1.73%. Since inception in March 2000, the Fund has posted an annualised return of 5.71% versus the benchmark's return of 4.01%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in small to medium cap stocks such as Time dot com, Prestariang and Chin Well which outperformed.
- The Fund was underweight in the telecommunication sector, which underperformed.
- The Fund's overweight duration position added to performance as longer term yields fell.
- The Fund's investment in long-dated government-guaranteed securities also contributed positively.

Negative

- The Fund was overweight in the plantation sector, which underperformed on weak crude palm oil prices.
- The Fund was overweight in transportation, which underperformed despite lower crude oil prices.
- The Fund was underweight in glove makers, which outperformed.
- The Fund's lack of holdings in high-yielding securities meant that the fund lost out on high carry.

AIA DANA PROGRESIF (cont'd)

What is your strategy going forward?

For equity, in view of moderate domestic economic growth, we prefer Shariah compliant companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As such, companies in the construction sector, affordable property sector, plantation sector and concessionaire owners that have steady cash flows and long-term contracts are preferred. The transportation sector is also expected to benefit from low crude oil prices. As for exporters, we are less hopeful in view of the anticipated strengthening of the ringgit. Furthermore, those stocks have done very well.

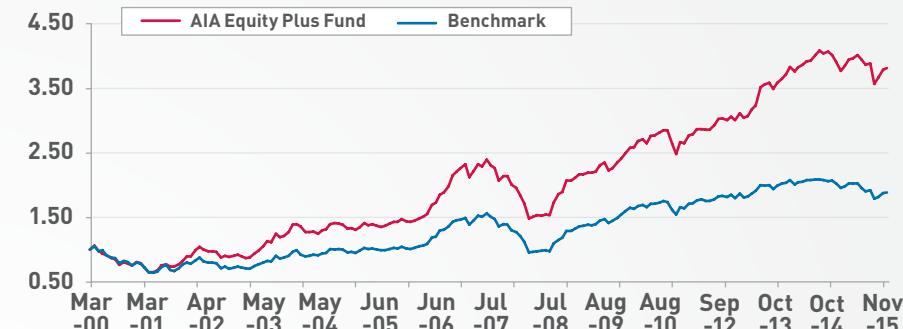

For fixed income, we will be neutral on duration while investing in corporate sukuk and government Islamic issues that offer good relative values.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to seek a high level of income and return through a careful selection of good quality sukuk as well as maintain a diversified portfolio of both corporate and government issues for capital protection. As for the equity portion, we will continue to seek long-term growth of capital and income through a diversified equity portfolio.

Sector Allocation as at 30 November 2015

AIA EQUITY PLUS FUND (cont'd)

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the Fund declined 2.41% against the benchmark's loss of 6.94%. Since inception in March 2000, the Fund has posted an annualised return of 8.89% versus the benchmark's return of 4.10%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in small to medium cap stocks such as Time dot com, Prestariang and JAKS Resources which outperformed.
- The Fund was overweight in cyclical sectors such as construction and technology, which outperformed.
- The Fund was underweight in the finance and telecommunication sectors, which underperformed.

Negative

- The Fund was overweight in the plantation sector, which underperformed, on the back of weak crude palm oil prices.
- The Fund's stock selection in AirAsia and AirAsia X detracted from performance despite the lower oil prices.
- The Fund was underweight in glove makers, which outperformed.

What is your strategy going forward?

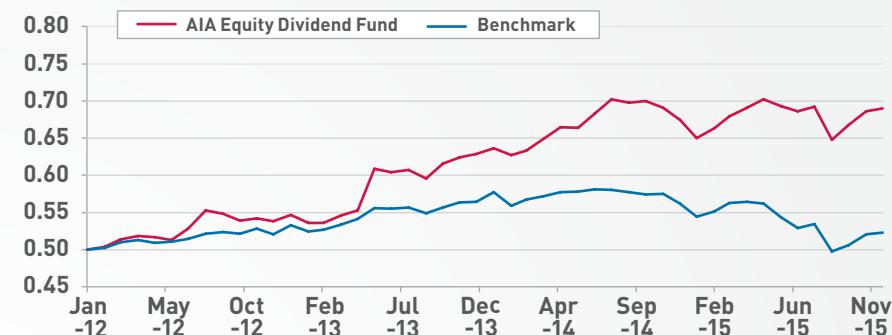

For equity, in view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As such, companies in the construction sector, affordable property sector, plantation sector and concessionaire owners that have steady cash flows and long-term contracts are preferred. The transportation sector is also expected to benefit from low crude oil prices. As for exporters, we are less hopeful in view of the anticipated strengthening of the ringgit. Those stocks have also done very well, making valuations unattractive.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to seek long-term growth of capital and income through a diversified equity portfolio.

Sector Allocation as at 30 November 2015

AIA EQUITY DIVIDEND FUND (cont'd)

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the Fund returned 2.22% against the benchmark loss of 6.94%. Since inception in January 2012, the Fund has returned 8.61% versus the benchmark's return of 1.17%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in small to medium cap stocks like Prestariang, Time dotCom and Kulim, which outperformed.
- The Fund was overweight in manufacturing sector and technology, which outperformed.
- The Fund was underweight in conglomerates, finance and telecommunications, which underperformed.

Negative

- The Fund was overweight in the property sector, which underperformed.
- The Fund was overweight in the gaming sector, which underperformed.

What is your strategy going forward?

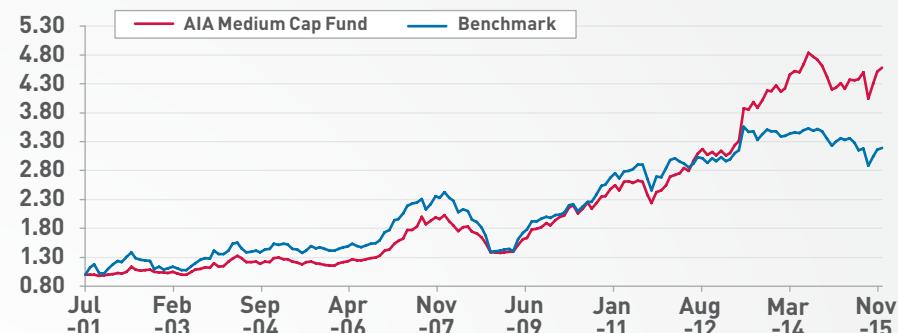

In view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows and balance sheet strength given their ability to sustain dividend payouts to shareholders.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to seek long-term growth of capital and income through a diversified equity portfolio.

AIA MEDIUM CAP FUND

AIA Medium Cap Fund

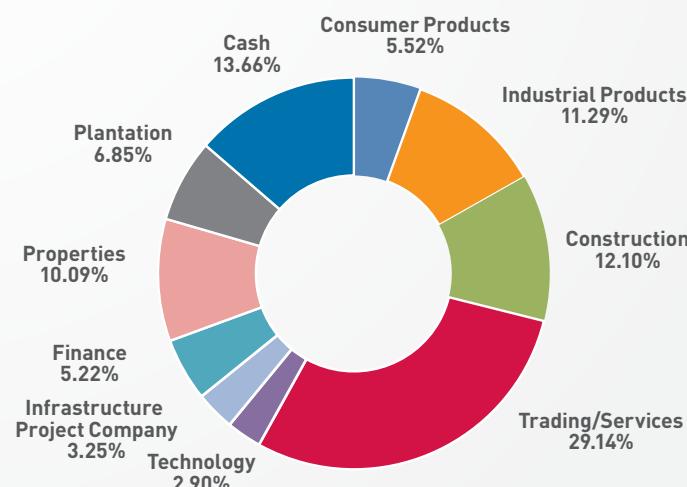

Performance as at 30 November 2015

	Oct 15 – Nov 15	May 15 – Nov 15	Nov 14 – Nov 15	Nov 12 – Nov 15	Nov 10 – Nov 15	Jul 01 – Nov 15
AIA Medium Cap Fund	1.40%	4.81%	3.53%	14.31%	14.16%	11.13%
Index*	0.83%	(2.75%)	(4.72%)	2.53%	4.54%	8.38%
Out/(Under)-performed	0.56%	7.56%	8.25%	11.79%	9.62%	2.75%

* 95% FBM 70 Index (Source: Bursa Malaysia) + 5% 1-month KLIBOR (Source: Bank Negara Malaysia)

Sector Allocation as at 30 November 2015

AIA MEDIUM CAP FUND (cont'd)

How did the Fund perform during the period?

For the financial year ended 30 November 2015, on a net basis, the Fund returned 3.53% against the benchmark's loss of 4.72%. Since inception in July 2001, the Fund has posted an annualised return of 11.13% versus the benchmark return of 8.38%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in small to medium cap stocks such as JAKS Resources and Syarikat Takaful Malaysia.
- The Fund was overweight in the consumer and technology sectors, which outperformed.

Negative

- Stock selection in AirAsia and AirAsia X detracted from performance, despite low oil prices.
- The Fund was overweight in the infrastructure sector, which underperformed.

What is your strategy going forward?

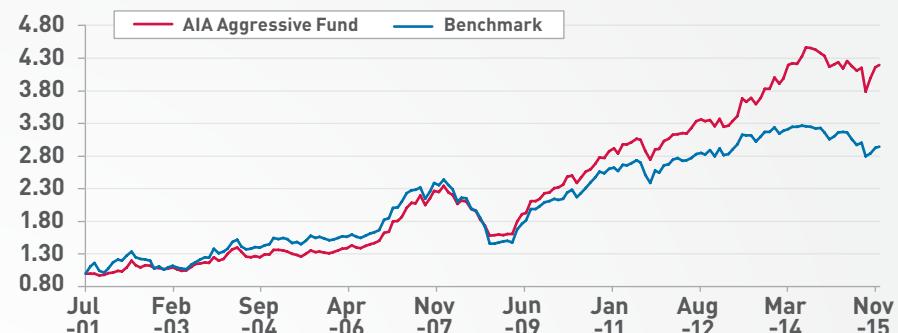

In view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As for exporters, we are less hopeful in view of the anticipated strengthening of the ringgit. Furthermore, those stocks have done very well, making their valuations unattractive. The Fund's preference is in the consumer, infrastructure, plantation, technology, telecommunication and property sectors.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to seek medium to long-term growth of capital and income through investments in a diversified portfolio of stocks. The focus will be on small and medium sized enterprises as well as growth stocks with a market capitalisation of less than RM6 billion.

AIA AGGRESSIVE FUND

Sector Allocation as at 30 November 2015

AIA AGGRESSIVE FUND (cont'd)

How did the Fund perform during the period?

For financial year ended 30 November 2015, on a net basis, the Fund declined 3.18% against the benchmark's loss of 6.94%. Since inception in July 2001, the Fund has posted an annualised return of 10.46% versus the benchmark's return of 7.77%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in stocks such as JAKS Resources and Westport which were strongly re-rated over the year.
- The Fund was overweight in the manufacturing and consumer sectors, which outperformed.

Negative

- The Fund's overweight positions in AirAsia and AirAsia X detracted from performance, despite low oil prices.
- The Fund's underweight position in Petronas Chemicals detracted from performance.

What is your strategy going forward?

For equity, in view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As such, companies in the construction sector, affordable property sector, plantation sector and concessionaire owners that have steady cash flows and long-term contracts are preferred. The transportation sector is also expected to benefit from low crude oil prices. As for exporters, we are less hopeful in view of the anticipated strengthening of the ringgit. Those stocks have also done very well, making valuations expensive.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to seek long-term growth of capital and income through investments in a diversified portfolio of stocks. This is a high-conviction Fund which takes more concentrated positions in sectors and stock positioning.

AIA DANA DINAMIK

AIA Dana Dinamik

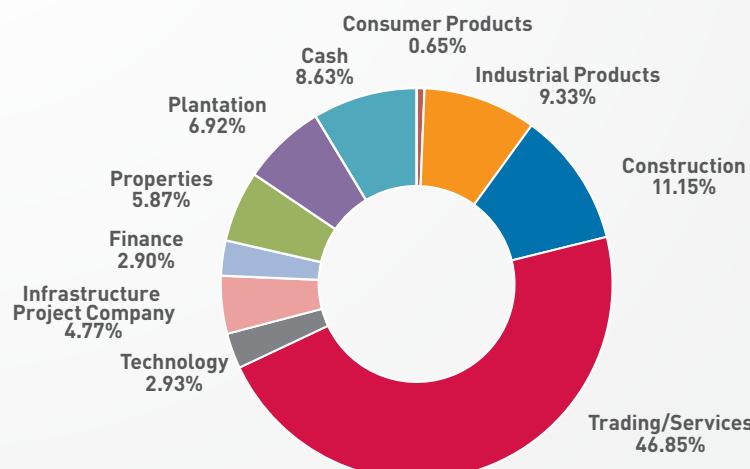

Performance as at 30 November 2015

	1-Month	6-Month	1-Year	3-Year	5-Year	Since Inception

* 95% FBM Emas Shariah Index [Source: Bursa Malaysia] + 5% 1-month KLIBOR [Source: Bank Negara Malaysia]

Sector Allocation as at 30 November 2015

AIA DANA DINAMIK (cont'd)

How did the Fund perform during the period?

For financial year ended 30 November 2015, on a net basis, the Fund recorded a decline of 2.10% against the benchmark's loss of 3.66%. Since inception in July 2001, the Fund has posted an annualised return of 9.45% versus the benchmark's return of 7.65%.

What investments influenced the Fund's performance over the year?

Positive

- The Fund was overweight in stocks such as Time dotCom and Westport which were strongly re-rated over the year.
- The Fund was overweight in the transportation, port and plantation sectors, which outperformed.
- The Fund was underweight in the utilities sector, which underperformed.

Negative

- The Fund's stock selection detracted from performance given its underweight position in Petronas Chemicals and overweight stance in AEON Group.

What is your strategy going forward?

For equity, in view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As such, companies in the construction sector, affordable property sector, plantation sector and concessionaire owners that have steady cash flows and long-term contracts are preferred. The transportation sector is also expected to benefit from low crude oil prices. As for exporters, we are less hopeful in view of the anticipated strengthening of the ringgit. Those stocks have also done very well, making valuations expensive.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We will continue to invest in Shariah-approved securities listed on Bursa Malaysia to maximise the medium to long-term capital appreciation on your investment.

GLOBAL BOND MARKET COMMENTARY

What economic, events or financial market conditions impacted the Fund?

Over the course of last year, the US dollar continued to broadly strengthen against a vast number of developed- and emerging-market currencies, which added to volatility in 2015. Currencies in Asia (ex-Japan) and Latin America continued to depreciate, negatively impacting the absolute performance of our funds.

However, we believe that there are some currency positions that remain attractive as they are priced inefficiently. In addition, our negative duration exposure to US Treasuries had an adverse impact on absolute returns as the 10-year US Treasury note's yield declined from its year-to-date high of approximately 2.5% in June. However, our outlook for a rising-rate environment has not changed.

It is important to note that we have navigated these volatile periods in the past, and we often use these types of conditions to add attractive opportunities as they arise. Periods of large macroeconomic adjustments take time to develop, making it difficult to precisely predict an inflection point.

As such, we believe in investing based on a longer-term fundamental analysis as our approach emphasises having the right time frame, and we recognise that when investing globally, many opportunities may take time to materialise.

Looking ahead, we have strategised ourselves in three main areas for a potential rising-rate environment: 1) negative exposure to US Treasuries; 2) long US dollar against short euro and long US dollar against short Japanese yen; and 3) selected local currency and local bond exposures in specific emerging markets.

What is your outlook going forward?

Looking ahead to 2016, we remain confident in the economic outlook for the United States and continue to expect rising interest rates from the US Federal Reserve (Fed). Labor conditions in the United States have been strong while wages and earnings have increased, which we believe will continue to drive consumption. In our assessment, global financial markets are poised to benefit from US economic expansion.

We also anticipate significant divergences in monetary policies around the world in 2016; we expect the Fed to tighten policy, while the Bank of Japan (BOJ) and European Central Bank (ECB) will continue to expand monetary accommodation through quantitative easing (QE).

The BOJ has indicated that its QE program will likely continue into 2017, and the ECB has indicated it will likely continue QE through March 2017. In our assessment, both the BOJ and the ECB need to continue these expansionary policies, which should continue to devalue the yen and euro against the US dollar. In the Eurozone, QE has been driving the euro weaker to stimulate export-driven economic growth and lift inflation toward the ECB's target; in Japan, QE has become explicit debt financing for the government and a cornerstone of "Abenomics", a multi-pronged economic program introduced by Japanese Prime Minister Shinzo Abe to spur growth and remedy stagnation.

GLOBAL BOND MARKET COMMENTARY (cont'd)

Despite downward revisions to 2016 global growth projections by the International Monetary Fund, we do not anticipate a global recession or global deflation. Global growth remains on trend while the major economies remain relatively healthy; our growth projections for 2016 are 2%-3% for the United States, above 1% for the Eurozone, around 1% for Japan and between 6% and 7% for China.

We believe that fears of global deflation are unwarranted. Markets have, in our view, overestimated the extent to which lower headline inflation reflects structurally weaker global demand. We believe that supply factors are the main driver behind falling energy and commodity prices, which in turn have pushed headline inflation lower.

These are short-term effects, and their disinflationary impact should wane as commodity prices stabilise. The belief that inflation has become structurally lower has made some investors complacent in taking interest-rate risk, during what we believe is a dangerous part of the yield cycle. When commodity price base effects on inflation roll off in the first half of 2016, we expect US inflation to get back to the Fed's target.

Overall, we continue to believe that an unconstrained global strategy is the most effective way to position for a rising-rate environment because it provides us with flexibilities to adjust our duration exposures of our Fund.

What changes, if any, have you made in the Fund's investment objectives or risk characteristic?

We have not made any changes to the Fund's investment objectives or risk characteristics.

What investments influenced the Fund's performance over the year?

Positive factors

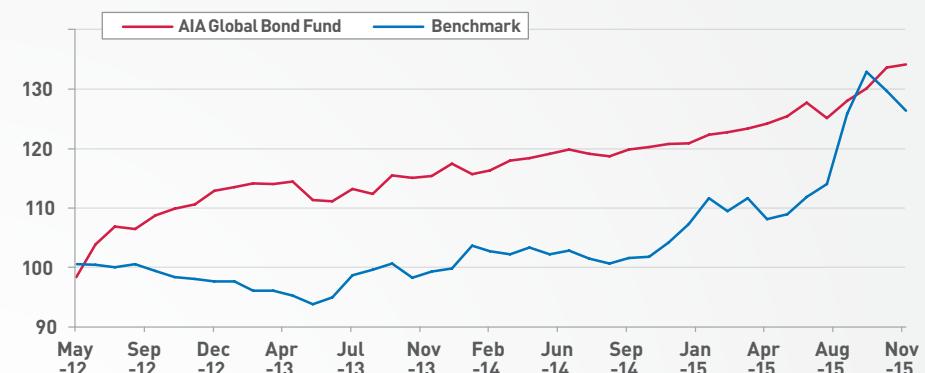

- The Fund's sovereign credit exposures and interest-rate strategies contributed to Fund's positive absolute performance.
- Among currencies, the Fund's net-negative position in the Euro and the Japanese Yen contributed to Fund's positive absolute performance.
- The Fund maintained a defensive approach regarding interest rates in developed and emerging markets. Certain duration exposures in Europe also contributed to Fund's positive absolute performance.

Negative factors

- The Fund's negative absolute performance was primarily attributable to currency positions. Positions in Latin America and Asia ex-Japan detracted from the Fund's absolute performance.

Geographical Allocation as of 30 November 2015

AIA ASIA OPPORTUNITY FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended at 30 November 2015, on a net basis, the Fund returned 8.91% against the benchmark of 13.37%. Since inception in April 2009, the Fund has posted an annualised return of 6.27% versus the benchmark 11.95%.

What events, economic or financial market conditions impacted the Fund?

2015 was a volatile year for regional markets. The MSCI Asia ex Japan index surged to a record high of 642 points in April 2015 from 560 points at the start of the year. However, the index ended the financial year on a lower note at 503 or 8% lower in USD terms. In the first half of the year, the market rallied on the back of monetary easing and stimulus government policies such as the further reserve rate ratio (RRR), interest rate cuts and the 'One Belt One Road' strategy in China to counter the slowing economy. Going into the second half of 2015, the MSCI Asia ex Japan plunged due to uncertainties surrounding China's economic slowdown and the renminbi (RMB) devaluation. On 11 August 2015, the People's Bank of China surprised the market by devaluing the RMB. During the month, the RMB depreciated by 3.0% while other Asia currencies depreciated between 5%-8%.

Table: Regional market performance in Local Currency and MYR for 1 year ending 30 November 2015

Country	Nov 14 - Nov 15 in Local Currency	Nov 14 - Nov 15 in MYR
Shanghai	28.42%	54.35%
South Korea	0.56%	20.92%
The Philippines	-5.04%	13.65%
Malaysia-FBM KLCI	-8.17%	-8.17%
Hong Kong	-8.30%	14.82%
India	-8.88%	6.69%
Taiwan	-9.43%	7.64%
Indonesia	-13.66%	-4.71%
Thailand	-14.69%	-2.04%
Singapore	-14.76%	-1.34%

AIA ASIA OPPORTUNITY FUND (cont'd)

Key Market Drivers

Positive

- China's market rallied in 1H2015 after the government announced targeted stimulus and monetary easing policies to boost growth. This included approval for local government debt to be swapped to bonds, lowering the down payment requirement for first-time home buyers in cities to 25% from 30% and ending the country's one-child policy.
- The Korean market went up marginally or 0.6% in local currency terms but up 20.9% in MYR term on the back of better earnings reversion. Samsung's announcement of a share buyback and cancelation of common shares from 2015 to 2017 also helped to support the market.

Negative

- The Singapore market dropped 14.76% on the back of weak economic data and a weak property market. Sentiment was also affected by the uncertainty surrounding China's slowdown and the Fed's delay in implementing its first rate hike.
- Thailand's market underperformed, dragged down by the heavy weighted energy related stocks and rising concerns about non-performing loans impacting the banking sector. Telcos also underperformed as a key spectrum auction ended up in a bidding war and inflated prices. Overall, growth indicators have remained weak.
- Indonesia has underperformed due to currency weakness and disappointment over the execution of government policies.
- Taiwan's equities corrected sharply into late-August led by the technology sector as expectations about slowing hardware demand coincided with China's weakness. The financials sector also came under pressure as the Presidential elections neared.
- India's market ended lower on the back of weak corporate earnings and the central government's poor showing in the state elections.
- Hong Kong's market dropped by 8.3% in local currency terms due to concerns over China's slowdown as well as weak retail and property sales.

AIA ASIA OPPORTUNITY FUND (cont'd)

What investments influenced the Fund's performance over the year?

Positive

- Our overweight position in China which outperformed and underweight position in Indonesia which underperformed.
- The Fund was underweight in energy and consumer discretionary related stocks which underperformed.

Negative

- Our underweight position in Hong Kong and South Korea, which outperformed
- The Fund was overweight in technology which underperformed and underweight in healthcare related stocks which outperformed.

What is your strategy going forward?

At present, we are neutral on Asia ex Japan Equities as the economic outlook continues to be challenging on the back of China's slowdown, weaker commodity prices and the strengthening of the US dollar. However, we think a lot of the risks have been priced in as MSCI Asia ex Japan is trading at a price-to-book of 1.3x and price-to-earnings ratio of 12x, levels that are lower than the 1.4x and 13x, respectively, recorded during the global financial crisis.

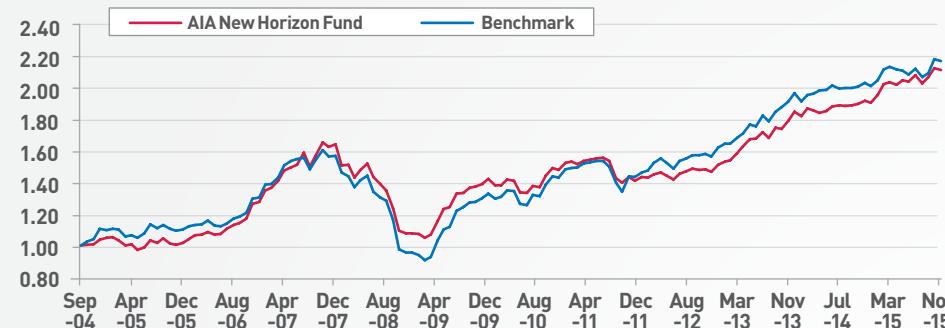

Against a backdrop of sluggish economic growth, we remain focused on investing in companies that have sustainable business models, are asset light and strong cashflow. As such, we prefer the insurance, consumer and Internet sector. In terms of country allocation, we prefer North Asia (mainly China) over ASEAN. This is in view of China's accommodative monetary policy to drive economic growth. Furthermore, valuation is attractive after the sharp correction. We expect ASEAN markets to continue to be impacted by currency headwinds and low commodity prices.

Will there be any changes in the Fund's investment objectives or risk characteristics?

We will continue to seek capital growth and income through investments in a diversified portfolio of stocks in Asia ex-Japan markets.

AIA NEW HORIZON FUND

AIA New Horizon Fund

AIA NEW HORIZON FUND (cont'd)

Negative

- The Fund's underweight position in glove makers which outperformed
- The Fund's overweight position in AirAsia which underperformed.

What is your strategy going forward?

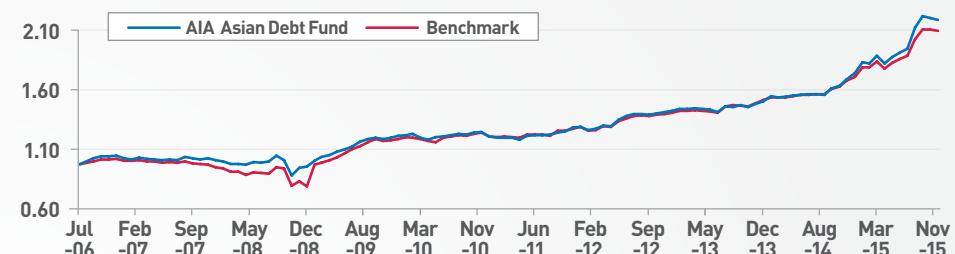

For equity, in view of moderate domestic economic growth, we prefer companies with resilient earnings, strong cash flows, balance sheet strength and inexpensive valuations. As such, companies in the construction, affordable property and plantation sectors as well as concessionaire owners that have steady cash flows and long-term contracts are preferred. The transportation sector is also expected to benefit from low crude oil prices. As for exporters, we are less hopeful in view of the anticipated strengthening of the ringgit. Those stocks have also done very well making valuations unattractive.

Will there be any changes in the Fund's investment objectives or risk characteristic?

We maintain the same investment objectives and general risk characteristics. We will continue to seek long-term capital growth and income through a diversified equity portfolio in both local and global markets.

* JP Morgan Asia Credit Index (MYR Term) (Source: Bloomberg)

Rating Allocation as at 30 November 2015

AIA ASIAN DEBT FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended 30 November 2015, on a net basis the Fund returned 24.88% against the benchmark of 29.40%. Since inception in July 2006, the Fund has posted an annualised return of 8.24% versus the benchmark 8.74%.

What events, economic or financial market conditions impacted the Fund?

Asian credit markets faced elevated volatility in the 12-month period ending November 2015. In the first half of the period, the market was boosted by monetary easing across the region and dovish statements by the US Federal Reserve. Investors were also optimistic that the 2014 election of reform-minded leaders in Indonesia and India would help to speed up infrastructure projects and cut red tape. Indeed, both governments took advantage of lower oil prices to cut domestic fuel subsidies.

Global risk aversion, however, spiked in June after Greece missed a €1.55 billion payment to the International Monetary Fund, contributing to a nervous mood that swung between hope that a deal would release bailout funds for Athens and fears that the country might exit the Eurozone. Sentiment took a turn for the worse when China's Shanghai Composite Index sold off and policymakers' heavy-handed intervention to stabilise prices only served to alarm investors. Later, Beijing's announcement that it would move to a new, more market-orientated exchange rate regime with an immediate 2% devaluation stoked fears that it was the start of a currency war. Towards the end of the period, markets recovered when it became clear that China only intended to liberalise its exchange rate mechanism. At the end of November, the International Monetary Fund included the renminbi in its Special Drawing Rights basket of currencies.

Overall, the JPMorgan Asia Credit Index rose by 2.65%. Even though spreads widened by 27 bps and US Treasury yields rose, positive carry helped to cushion overall return. High-yield bonds also underperformed compared to investment-grade bonds. By way of countries, Pakistan, the Philippines and China posted the largest gains, while Mongolia lagged. As for sectors, real estate picked up, owing to the recovery of China's property fundamentals. In contrast, metals and mining, as well as industrials, weakened.

AIA ASIAN DEBT FUND (cont'd)

Key Market Drivers

Positive

- Stable economic and political environment.
- Monetary easing by major central banks, including the European Central Bank and Bank of Japan.
- Asia is a net importer of oil.
- Recovery of China's property fundamentals.
- Technical support from lower bond supply last year as Chinese issuers turned to the onshore market.

Negative

- Higher US Treasury yields in anticipation of the US Fed raising interest rates.
- Impact of weaker commodity prices on natural resource producers and Malaysia's fiscal position.
- Concerns over China's economic growth.
- Geopolitical events in other regions namely the Euro Zone.
- Weak Asian currencies raised concerns that corporates might find it hard to service US dollar debt.
- Increased levels of bond defaults compared to the last period.
- Major bond default risks e.g. 1MDB, Noble, Kaisa.

What investments influenced the Fund's performance over the year?

Positive

- Good bond selection within China, Malaysia and Korea
- Good bond selection within real estate, oil and gas, and financials
- Country allocation by overweight in China

Negative

- Holdings in high risk Kaisa Group bonds and 1MDB bonds
- Overweight spread duration towards the second half the period
- Overweight to Indonesian quasi-sovereign bonds

AIA ASIAN DEBT FUND (cont'd)

What is your strategy going forward?

Asia's macroeconomic fundamentals appear to be stabilising. Although China continues to weaken as the government steers the economy to a more consumption-led growth model, it is becoming more evident that a hard landing can be avoided. The services sector continues to expand, helping to offset the decline in manufacturing. We are also heartened by China's latest five-year plan, which included a commitment to establish a system of basic pensions and introduce medical insurance for households to cover serious illnesses. This should help to improve consumers' social security net and encourage spending.

We also expect the US' rate hike cycle to be benign. After seven years of rock-bottom rates, the US Federal Reserve finally raised its federal funds rate on 16 December by a quarter of a basis point to 0.25-0.5%. The central bank made clear that the rate hike was a tentative beginning to a "gradual" tightening cycle. Meanwhile, there is still monetary policy divergence across both developed and emerging countries. The Bank of Japan (BOJ) and European Central Bank (ECB) both still have substantial quantitative easing programmes in place and the ECB cut its deposit rate further at the start of December. In Asia, ongoing weakness in China means that monetary policies should remain loose in 2016.

The technicals for bond supply should also be more positive in 2016. Already, the US dollar's primary market has slowed this year, as new supply to the year to end November is down by 22% compared to 2014. With China's continued efforts to open up its capital markets combined with expected weakness of the Chinese currency versus the US dollar, we expect more Chinese issuers to turn to the onshore market to raise money.

Although the general fundamental outlook is positive, we expect pockets of the credit market to face bouts of volatility. One is the commodities sector as the bottom for prices is still yet to be seen. The good news is that many Asian energy companies are state-owned enterprises, whose ratings are closely linked to their sovereigns given their strategic role. Meanwhile, Chinese property developers that focus on the lower tiered cities still struggle with high inventory levels as these cities have not recovered as well as their Tier 1 and 2 counterparts.

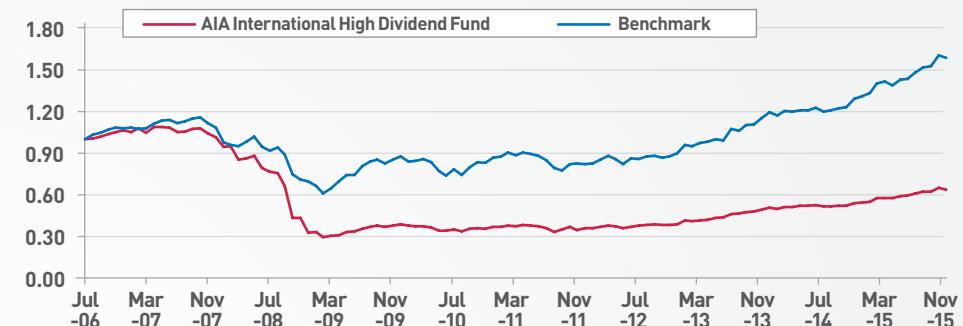

Will there be any changes in the Fund's investment objectives or risk characteristics?

The underlying fund ING (L) Renta Fund Asian Debt Hard Currency Class P - Capitalisation (USD) has been renamed to NN (L) Asian Debt (Hard Currency) Class P - Capitalisation (USD) effective 7th April 2015.

However, the investment objectives and general risk characteristics remain unchanged. We continue to focus on securities that will deliver the most attractive risk-adjusted returns in the environment we face. To do so, we place heavy emphasis on intensive corporate and sovereign fundamental research.

* MSCI World Index (MYR Term) (Source: Bloomberg)

Sector Allocation as at 30 November 2015 *

AIA INTERNATIONAL HIGH DIVIDEND FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended 30 November 2015, on a net basis, the Fund returned 18.15% against the benchmark of 22.79%. Since inception in July 2006, the Fund has posted an annualised loss of 4.70% versus the benchmark return of 5.05%.

What events, economic or financial market conditions impacted the Fund?

Economic indicators, earnings growth and central bank actions during the period were supportive for cyclical value stocks to outperform, especially in Europe. The outperformance didn't materialise however and trusted growth stocks were once again the preferred segment of the market for investors. Investors were fearful of global growth conditions mainly due to the uncertainty surrounding China's economic slowdown and volatility in many emerging markets. Worries about China also negatively impacted commodity prices which had a knock-on effect for mining companies. Low oil prices continued to pressure the energy sector. The Fed delayed implementing its first rate hike since 2006 but expectations of a lift-off combined with divergent actions by other central banks led to a strong rise in the US dollar.

Key Market Drivers

Positive

- The ECB started its €60 billion asset-buying programme, a commitment to buy assets, including sovereign bonds, at a rate of €60 billion per month until at least September 2016. Subsequently, ECB President Mario Draghi indicated that there would be an additional stimulus package.
- The US labour market continued to improve with unemployment falling to 5%.
- Apart from a disappointing Q3 in Europe, global corporate earnings were generally supportive throughout the period. The majority of companies in the US consistently beat consensus forecasts.
- There was a high level of M&A activity throughout the period as corporates sought to improve their growth prospects. The largest combination came in the healthcare sector where Allergan and Pfizer agreed to merge in a deal worth USD160 billion.

AIA INTERNATIONAL HIGH DIVIDEND FUND (cont'd)

Negative

- "Grexit" Greece's exit from the Eurozone became a real possibility again and markets were volatile, especially after a national referendum was held to accept the terms of a new debt bailout. In the end, the Greek people voted for the terms of the bailout and eventually a deal was agreed between Prime Minister Tsipras and Greece's European creditors.
- The People's Bank of China made a surprise devaluation of the renminbi in August. The event intensified investors' concerns about the economic slowdown in China. It also came on the back of a sell-off in Chinese equities following fears of a "bubble".
- The Fed delayed raising interest rates in September citing international developments. The move was seen by markets – at the time – as confirmation that global growth was fragile.

What investments influenced the Fund's performance over the year?

Positive

- Stock selection contributed positively within the industrials sector.
- The Fund benefitted from hedging its US dollar underweight exposure relative to the benchmark.
- The best active contributors at stock level were: McDonald's Corporation (consumer discretionary), Vinci (industrials) and Microsoft (technology).

Negative

- Stock picking in the materials, consumer discretionary and technology sectors detracted from relative performance.
- Our overweight positioning to the energy sector and underweight in consumer discretionary also contributed negatively to relative performance.
- From a regional perspective, our overweight and stock picking in Europe detracted from performance.

AIA INTERNATIONAL HIGH DIVIDEND FUND (cont'd)

What is your strategy going forward?

We are overweight on European stocks as they currently offer good earnings support, especially relative to the US. The difference in earnings expectations between the two regions is now significant, with analysts predicting double-digit growth in the Eurozone and near-flat growth in the US. Looking at valuation multiples we also see more upside in Europe. From a macro perspective, economic growth in Europe should be supported by lower oil prices, a weaker euro and an improving credit environment. In the US, the labour market continues to improve, which is positive, but wage-growth pressure will test the ability of corporates to expand margins. The strong US dollar also remains a headwind for corporate earnings.

Japanese valuations are generally expensive and it is difficult to find attractive dividends stocks. We prefer domestic-orientated companies as these are seeing the best earnings revision ratios at the moment.

From a sector perspective, we believe banks offer the best upside: valuations are attractive, balance sheets have been strengthened and payouts are increasing. The sector is domestically exposed and therefore less affected by weak currencies and slowing-growth concerns in emerging markets. On the other end of the spectrum, we are underweight on companies with stable earnings where valuations are too high from a fundamental perspective; in particular, we avoid bond-proxy stocks such as real estate and US utilities, which are sensitive to interest rate hikes.

Will there be any changes in the Fund's investment objectives or risk characteristics?

The underlying fund ING (L) Invest Global High Dividend Class P - Capitalisation (USD) has been renamed to NN (L) Global High Dividend Class P - Capitalisation (USD) effective 7th April 2015.

However, the investment objectives and general risk characteristics remain unchanged.

AIA ASIAN EQUITY FUND

* MSCI Asia Ex Japan (MYR Term) (Source: Bloomberg)

Sector Allocation as at 30 November 2015 *

AIA ASIAN EQUITY FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended 30 November 2015, on a net basis, the Fund returned 12.89% against the benchmark of 12.64%. Since inception in July 2006, the Fund has posted an annualised return of -15.02% versus the benchmark 5.78%.

What events, economic or financial market conditions impacted the Fund?

- Chinese H-shares rose during H1 2015 mainly due to a strong rally in April after mainland investors, encouraged by government policy, sent A-shares rocketing with margin trading.
- Investors were fearful of global growth conditions mainly due to the uncertainty surrounding China's economic slowdown and volatility in many emerging markets. Worries about China also negatively impacted commodity prices which had a knock-on effect for mining companies. Low oil prices continued to pressure the energy sector.
- The Fed delayed implementing its first rate hike since 2006 but expectations of a lift-off combined with divergent actions by other central banks led to a strong rise in the US dollar.
- The Reserve Bank of India (RBI) made three rate cuts, reducing its benchmark Repurchasing Agreement from 8.0% to 7.25%. The government agreed to give the RBI a legal mandate to fight inflation by setting a target of 4%, plus or minus 2%. India's 2015 budget was seen as pro-growth but there was some disappointment as there were no changes made to government subsidies.

Key Market Drivers

Positive

- The ECB started its €60 billion asset-buying programme, a commitment to buy assets, including sovereign bonds, at a rate of €60 billion per month until at least September 2016. Subsequently, ECB President Mario Draghi indicated that there would be an additional stimulus package.
- Emerging market equities made a strong recovery in October after expectations of the Fed's first rate hike were pushed back and supportive policy measures were introduced in China.

AIA ASIAN EQUITY FUND (cont'd)

- There were a number of significant announcements in China. Local government debts were allowed to be swapped to bonds allowing local government access to cheaper and longer tenure financing. The down payment requirement for first-time home buyers in cities was cut to 25% from 30%. The government announced the end of China's one-child policy.

Negative

- The Chinese equity markets had a tumultuous summer and the government implemented measures to stabilise the market (providing more liquidity, suspension of IPOs). This intervention did not convince investors as the outlook for the economy worsened.
- In a surprise move, the People's Bank of China devalued the renminbi in August. The event intensified investors' concerns about the economic slowdown in China. It also came on the back of a sell-off in Chinese equities following fears of a "bubble".
- Rising US treasury yields and an appreciating US dollar caused volatility in the market on expectations that the Fed will begin its new era of rate hikes in December.

What investments influenced the Fund's performance over the year?

Positive

- Stock selection in financials and industrials contributed strongly to the relative return. Stock picking was also positive in energy sector.
- We gained from our positioning in China and India and from our stock selection in Taiwan.
- Stock selection in Korean energy company SK Innovation added positively to performance.

Negative

- Our stock selection detracted in materials and in China.
- Our overweight in Energy sector detracted from performance.
- The worst stock contributors during the period were Tata Steel, PT Indo Tambangraya Megah and Posco.

AIA ASIAN EQUITY FUND (cont'd)

What is your strategy going forward?

We are cautiously optimistic about 2016. While economic uncertainty prevails, a lot of risks have been priced in. The asset class has been de-rated for four years in a row and valuation levels are becoming supportive. The MSCI All Country Asia ex-Japan Index is trading at a price-to-book ratio of close to 1.3x, a level that was only lower during the global financial crisis. We continue to avoid companies with high financial leverage or dependence on stronger economic growth. But there remains a number of attractive structural growth companies within Asia and further weakness will provide investment opportunities.

Will there be any changes in the Fund's investment objectives or risk characteristics?

Effective 7th April 2015, the underlying fund ING (L) Invest Asia ex Japan High Div Class P - Capitalisation (USD) has been renamed to NN (L) Asia Ex Japan High Dividend Class P - Capitalisation (USD). As of 1st October 2015, NN (L) Asia Ex Japan High Dividend Class P - Capitalisation (USD) has been renamed to NN (L) Asia Income Class P - Capitalisation (USD). The fund has expanded its activities to include call option selling to generate additional income for the fund effective 1st October 2015.

However, the investment objectives remains unchanged. The Fund will continue to invest in a diversified portfolio of shares in Asia Ex Japan equities.

AIA ELEVEN PLUS FUND

AIA Eleven Plus Fund	(1.76%)	7.11%	21.40%	13.61%	8.49%	5.69%

Sector Allocation as at 30 November 2015

AIA ELEVEN PLUS FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended 30 November 2015, on a net basis, the Fund returned 21.4%. Since inception in October 2007, the Fund has posted an annualised return of 5.69%.

What events, economic or financial market conditions impacted the Fund?

Key Market Drivers for Equity

Positive

- Korea and Hong Kong rallied following rate cuts in China.
- India too gained strongly on the back of a stronger political framework.
- In the US, employment data continued to show strong jobs growth, reflecting the continued strength in hiring and jobs creation.

Negative

- Malaysia, Indonesia and Thailand saw negative returns due to weakening commodity prices.
- Global equity markets were also affected by oil prices which neared record lows.
- The depreciation of China's renminbi caused a sell down across the Asia ex-Japan currencies.

Key Market Drivers for Bond

Positive

- Bond markets had another strong performance in 1H 2015 driven by the start of the European Central Bank's money printing activity as well as expectations of a delay in the Fed's interest rate hike.
- In currencies, the US dollar appreciated against emerging markets and commodity-linked currencies.

Negative

- Uncertainty over Greece forced investors to reduce risk and this negatively impacted the Fund.
- Financial markets were impacted by different macro themes in 2H 2015 such as the weakness in commodities as well as concerns over the growth outlook in China and emerging markets.

AIA ELEVEN PLUS FUND (cont'd)

What investments influenced the Fund's performance over the year?

Positive

Equity

- Overweight in the information technology sector and underweight in the financial sector help to add value to the portfolio.
- Good stock selection in Jarden Corporation and Allergan.

Fixed Income

- The performance of the bond fund was positive as the Fund was overweight in bonds that had 5-10 years of maturity.
- The Fund hedged its return in US dollar, which appreciated.
- The Fund had a positive contribution from its underweight position in the British pound, Canadian dollar, Australian dollar, Mexican peso and Malaysian ringgit. This partially offset losses from its underweight position in the Japanese yen.

Negative

Equity

- Overweight in ASEAN equity markets, which underperformed.
- Overweight in the US Consumer Staples and Utilities sectors, which underperformed.

Fixed Income

- Asset allocation was negative due to the overweight in corporate bonds, mainly in financials, basic materials and consumer cyclical, which underperformed.

AIA ELEVEN PLUS FUND (cont'd)

What is your strategy going forward?

- The Fed's action to raise rates remains a headwind for equities, but macro and attractive valuations in many vulnerable markets are lessening the threat of significant downside. Uncertainties around the Chinese economy are risks in the near-term global outlook. However, we continue to monitor accelerating structural reform, together with near-term demand-side stimulus, which we expect will revive the Chinese economy.
- We expect rates to remain in their current ranges, but they will continue to show high volatility as the central bank actions/expectations continue to drive markets.
- We are positioned to benefit from an anticipated uptrend in US dollar and prefer corporate bonds over government bonds.

Will there be any changes in the Fund's investment objectives or risk characteristics?

The Fund will continue to seek long-term capital growth by investing in large and smaller capitalisation equities and fixed income in global markets.

AIA ASIA PLATINUM FUND

Fund Allocation as at 30 November 2015

AIA ASIA PLATINUM FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended 30 November 2015, on a net basis, the Fund returned 21.46% against the benchmark of 18.83%. Since inception in May 2006, the Fund has posted an annualised return of 5.50% versus the benchmark 6.62%.

What events, economic or financial market conditions impacted the Fund?

Key Market Drivers

Greater China

Greater China equities posted strong returns in 1H 2015 as market sentiment was buoyed by expectations that the Chinese government's further easing and stimulus policies as well as its 'One Belt One Road' strategy would counter the slowing economy. However, the markets fell sharply in the third quarter as volatility in Chinese markets and slowing growth in the world's second-largest economy led to a global selloff. The Hong Kong market also fell sharply on weaker sentiment over Chinese growth. Taiwanese equities declined on worries over slowing global growth and the potential impact on its large technology manufacturing sector.

Japan

The Japanese equity market posted strong returns in 1H 2015 thanks mainly to solid corporate earnings. However the continued weakness in global markets weighed down the market in 2H 2015. Sector performance remained volatile but over the last one year ending Nov 2015, retailers remained as the leading sector and defensive sectors, pharmaceutical and foods in particular, outperformed substantially. Insurance also performed well. On the other hand, iron & steel, marine transportation, and mining produced absolute negative returns and other cyclical sectors including machinery, electrical appliances and transportation equipment, lagged.

India

The macro narrative was dominated by its softening inflation and lower interest rates. However, economic data points remained muted, while corporate earnings were weak. This along with the political setback experienced by the central government in the state elections resulted in Indian equities finishing 2015 in negative territory. The strong returns in the early months of 2015 was fueled primarily by declining energy prices, high hopes for pro-reforms along

AIA ASIA PLATINUM FUND (cont'd)

with a resurgent US economy and hopes of further interest rate cuts by the RBI. Domestic cyclical sectors such as financials and industrials rallied strongly as the economy continued to gather momentum. However, Indian equities experienced weakness subsequently and pared these gains as disappointing corporate earnings, weak rainfall trends hitting farm income as well as rural demand weighed on investor sentiment.

What investments influenced the Fund's performance over the year?

Positive

- Overweight positions on Japan and India contributed positively to performance as the Fund outperformed the benchmark for the period under review.
- Underweight position on Emerging Market China contributed positively as the fund underperformed the benchmark.

Negative

- Underweight position on China eroded some performance as the China fund outperformed the benchmark for the period under review.

What is your strategy going forward?

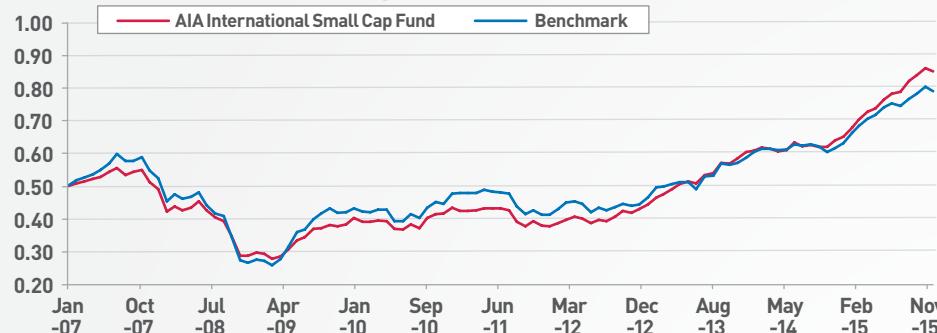

We continue to overweight Japan, and underweight Emerging Market. We believe Japan will continue to outperform as liquidity from aggressive stimulus will support the stock market while lower commodity prices and currency headwinds will drag the performance of Emerging Market.

Will there be any changes in the Fund's investment objectives or risk characteristic?

There will be no change to the Fund's investment objectives and risk characteristics.

AIA INTERNATIONAL SMALL CAP FUND

AIA International Small Cap Fund

Sector Allocation as at 30 November 2015

AIA INTERNATIONAL SMALL CAP FUND (cont'd)

How did the Fund perform during the period?

For the fiscal year ended 30 November 2015, on a net basis, the Fund returned 33.12% against the benchmark of 28.11%. Since inception in January 2007, the Fund has posted an annualised return of 6.19% versus the benchmark of 5.31%.

What events, economic or financial market conditions impacted the Fund?

Key Market Drivers

Positive

- Improved investor sentiment from Quantitative Easing (QE) by the European Central Bank (ECB) and early signs of European economic improvement.
- Continued net buying by the domestic public pension sponsors, the Bank of Japan, and stock buyback from corporates help to boost Japanese equities.
- In 1H 2015, China's policy easing and measures to liberalise its financial market propelled the stock market to a seven-year high. South Korea's market rallied on the back of unexpected rate cuts in March, while Indian equities benefited from an improved political framework.

Negative

- In Europe, the European Smaller Companies equity index modestly under-performed owing to global growth concerns and the Fed's decision not to raise interest rates.
- In Japan, risk aversion ahead of the US Fed's rate hike and the Chinese market correction triggered corrections in the global market. The Greek crisis and Volkswagen scandal also impacted market sentiment.
- South Korea's market weakened towards the end of 1H 2015 on concerns over the spread of the Middle East Respiratory Syndrome or MERS virus. Indian equities also weakened on news that the government's policy would turn hawkish.
- Asia ex-Japan suffered from a sell down on the back of currency depreciation, especially the ASEAN currencies. All Asia ex-Japan markets posted negative returns. China's weak macroeconomic numbers and renminbi depreciation caused its equity market to fare the worst in the region.

AIA INTERNATIONAL SMALL CAP FUND (cont'd)

What investments influenced the Fund's performance over the year?

Positive

- The strongest contribution to performance came from our underweight position in the industrial, materials and energy sectors.
- The top three individual stock contributions came from AMS (Austrian semiconductor manufacturer), Bras Monier Building Group (roofing tile manufacturer) and Societa Iniziative Autostradali e Servizi (Italian toll road operator).
- In Japan, sector selection was positive as REITs declined by 0.7%, a sector we had underweighted.

Negative

- Our overweight position in micro-cap growth stocks and negative stock selection in the electronics and construction related sectors detracted from performance.
- In Japan, our overweight position in global cyclicals and its stock selection was the biggest negative contributor.

What is your strategy going forward?

- The overall market remains volatile. Amidst elevated levels of volatility, value has emerged for a number of quality companies and sectors. The Team will continue to focus on companies with strong management, solid fundamentals and attractive valuations.
- Central bank actions and global growth are among the many issues currently affecting global markets. With slowly improving economic data in Europe and still very strong central bank support, the outlook remains attractive. The Team believes the Fund is well positioned to benefit from the improving trends.
- The Team is bullish on the market due to the underlying structural changes of Japanese companies over the long-term. In terms of valuation, the price to earnings ratio (PER) is reasonable at 16x for financial year 2016. At the same time, overall earnings growth remains static, especially among domestic players. As the uncertainty related to monetary policies fade, we expect risk appetite to recover going forward.

AIA INTERNATIONAL SMALL CAP FUND (cont'd)

Will there be any changes in the Fund's investment objectives or risk characteristics?

The Fund benchmark will be changed from 30% HSBC Smaller Europe (Inc UK)+ 30% TSE 2nd section TR + 40% S&P Pan Asia ex Japan under U\$1.5bil Index to 30% HSBC Smaller Europe (Inc UK)+ 30% TSE 2nd section TR + 40% MSCI Asia Pacific ex Japan Small Cap USD net Index effective 31 Dec 2015.

However, the investment objectives and general risk characteristics remain unchanged.

MESEJ DARI CEO DAN CIO

Para pemegang polisi yang dihargai,

Ulasan Pasaran

Tahun kewangan berakhir 30 November 2015 merupakan tahun yang bergelora untuk Malaysia disebabkan gabungan beberapa faktor luaran dan dalaman. Pada tahun ini Indeks FBMKLCI jatuh 8.2%, justeru menjadikan 2015 tahun kedua penurunan berlaku berturut-turut.

Faktor-faktor dalam negara, iaitu tekanan harga minyak mentah dan minyak sawit mentah, kebimbangan tentang hutang 1Malaysia Development Bhd (1MDB), pelaksanaan GST dan ketidaktentuan politik yang kian meningkat telah mengakibatkan pendapatan korporat yang mengecewakan. Dari perspektif luaran pula, sentimen melembap apabila China membuat pembetulan mendadak dalam pasaran sahamnya, Renminbi turun nilai dengan mengejut dan AS menaikkan kadar faedah buat pertama kali dalam hampir satu dekad.

Kebimbangan ini mengakibatkan penghijrahan dana asing, yang menyaksikan kadar Ringgit ke dolar AS menjunam ke paras RM4.45 sebelum ditutup pada RM4.25/USD, jauh lebih teruk daripada kadar tambat RM3.80/USD semasa krisis kewangan Asia.

Pasaran pendapatan tetap menikmati nasib yang lebih baik dengan Indeks Sekuriti Kerajaan Malaysia (MGS) meningkat ke 3.7%, disebabkan jangkaan inflasi yang berlandas kukuh, pelaksanaan GST dan pengurangan subsidi yang berterusan oleh kerajaan Malaysia, satu faktor positif untuk prospek fiskal negara.

Prestasi

Pada tahun kewangan berakhir 30 November 2015, sebahagian besar daripada dana terbuka kami mengatasi tanda aras dan tanda aras rakan industri lain. Prestasi dua dana utama kami iaitu AIA Balanced Fund dan AIA Equity PLUS Fund adalah amat membanggakan—yang mana setiap satu mendapat kerugian sederhana pada 0.80% dan 2.41%. Meskipun keadaan pasaran amat mencabar, dana-dana ini mengatasi tanda aras pada 3.45% dan 4.54% setiap satu.

Rekod selama lima tahun kami juga membanggakan, yang mana strategi pelaburan tempatan untuk ekuiti, pendapatan tetap, imbang, dan dana syariah telah dapat mengatasi tanda aras antara 0.27% setahun dan 9.62% setahun. Dari segi pulangan mutlak, kedua-duanya mencatatkan pulangan tahunan antara 3.68% dan 14.16%.

MESEJ DARI CEO DAN CIO (samb)

Pandangan

Dalam jangka pendek, kami menjangkakan keadaan turun naik akan berterusan disebabkan kejatuhan harga minyak mentah dan pembetulan dalam pasaran saham global. Dalam jangka masa panjang, kami agak berwaspada namun optimis tentang prospek dalam tahun 2016. Tesis pelaburan kami berdasarkan 1) jangkaan bahawa ekonomi Malaysia akan berkembang antara 4% dan 5% dan pendapatan korporat akan berkembang sederhana pada kadar satu angka, 2) kejayaan pelaksanaan penyusunan semula hutang 1MDB dan 3) kenaikan kadar faedah AS secara beransur-ansur.

Walau bagaimanapun, terdapat risiko jika 1) sasaran defisit bajet kami sebanyak 3.1% disemak pada kadar lebih tinggi akibat harga minyak yang lebih rendah, 2) China mengalami kemelesetan curam dan 3) nilai renminbi diturunkan dengan ketara.

Bagi pendapatan tetap, kami menjangkakan keadaan harga minyak yang tidak menentu dan ringgit yang lemah akan menekan pasaran bon Malaysia. Penormalan kadar faedah di Amerika Syarikat juga merupakan perkara yang harus diberi perhatian, meskipun kami menjangkakan prosesnya akan berjalan secara beransur-ansur.

Selain itu, keadaan pertumbuhan ekonomi global yang tidak sama rata, harga bahan api yang lebih rendah dan penyerderhanaan permintaan dalam negara akan membendung inflasi. Bank Negara Malaysia (BNM) percaya bahawa jangkaan inflasi berlandas kukuh, justeru pendirian kewangan cenderung akomodatif.

Terima kasih kerana mempercayai kami. Pasukan kami yang terdiri dari ahli-ahli pelaburan profesional yang berkepakaran tinggi menggunakan kaedah pelaburan yang kukuh dan terbukti, disokong oleh rangka kerja pengurusan risiko yang mantap. Kami memberi jaminan bahawa kami akan terus melabur wang anda dengan berhemat untuk mencapai pulangan yang sebaik mungkin.

Salam sejahtera dan semoga berjaya dalam tahun 2016.

Anusha Thavarajah
Ketua Pegawai Eksekutif, AIA Bhd.

Emilee M.L.Yew
Ketua Pegawai Pelaburan, AIA Bhd.

PANDANGAN PASARAN BON TEMPATAN

Ulasan Pasaran

Bon kerajaan Malaysia (MGS) yang bertempoh lebih panjang jatuh dengan ketara manakala hasil meningkat dengan mendadak dan bil dan tempoh lebih pendek meningkat akibat kedudukan defensif pelabur berikutan ringgit yang lemah, harga minyak yang rendah dan ketidaktentuan politik. Kejatuhan harga minyak telah menambahkan tekanan ke atas ringgit kerana para pelabur bimbang akan kedudukan fiskal Malaysia. Keraguan tentang tarikh Amerika Syarikat (AS) akan menaikkan kadar faedahnya buat kali pertama dalam hampir satu dekad juga melembapkan sentimen.

Berlatar belakangkan kedudukan fiskal kerajaan yang lemah dan penipisan perdagangan, Fitch Rating telah memberi amaran tentang kemungkinan penurunan penarafan kedaulatan Malaysia. Walau bagaimanapun, dalam satu langkah yang mengejutkan, agensi penarafan itu kemudian mengesahkan penarafan kredit kedaulatan mata wang asing jangka panjang Malaysia pada A- dan meningkat prospek kepada stabil daripada negatif, dengan menyatakan, antara sebab-sebabnya kedudukan fiskal Malaysia yang telah meningkatkan berikutan pelaksanaan Cukai Barang dan Perkhidmatan (GST), fleksibiliti pembiayaan yang kukuh kerana kedalaman pasaran modal Malaysia dan pertumbuhan ekonomi yang baik.

Sentimen dalam pasaran bon juga bertambah baik menjelang akhir tahun kewangan kerana terdapat tanda-tanda bahawa isu hutang 1Malaysia Development Berhad (1MDB) akan diselesaikan dan kerajaan telah pun mengumumkan langkah-langkah untuk mengurangkan defisit fiskal daripada 3.2% pada tahun 2015 kepada 3.1% pada 2016.

Tinjauan Pasaran

Bank Negara dijangka akan mengekalkan Kadar Dasar Semalam (OPR) dalam masa terdekat kerana dasar kewangan semasa dilihat sebagai akomodatif dan menyokong aktiviti ekonomi. Memandangkan prospek inflasi yang sederhana dan jangkaan kesinambungan dasar kewangan yang akomodatif, kami agak optimis tentang pasaran bon Malaysia dalam suasana ketidaktentuan yang memuncak dalam ruang bon global. Berlatar belakangkan ini kami lebih cenderung mengambil pendirian tempoh neutral hingga ke wajaran rendah untuk melindungi dana daripada risiko pergerakan kadar hasil yang berpotensi menjadi tidak menentu.

Kadar pengetatan kitaran Rizab Persekutuan AS dijangka akan berlaku beransur-ansur dan akan bergantung kepada data ekonomi, justeru tidak mungkin menimbulkan risiko penurunan ketara dalam pasaran bon Malaysia. Walau bagaimanapun, harga minyak yang tidak menentu dan kedudukan Ringgit dijangka memberi tekanan ke atas pasaran bon Malaysia. Di peringkat global, bon Malaysia mungkin kelihatan menarik bagi persekitaran hasil yang rendah tetapi jika tempoh pergerakan ringgit yang tidak menentu berlanjutan, ia boleh mengurangkan daya tarikan bon Malaysia kepada pelabur di luar pesisir.

PANDANGAN PASARAN BON TEMPATAN (samb)

Peluang

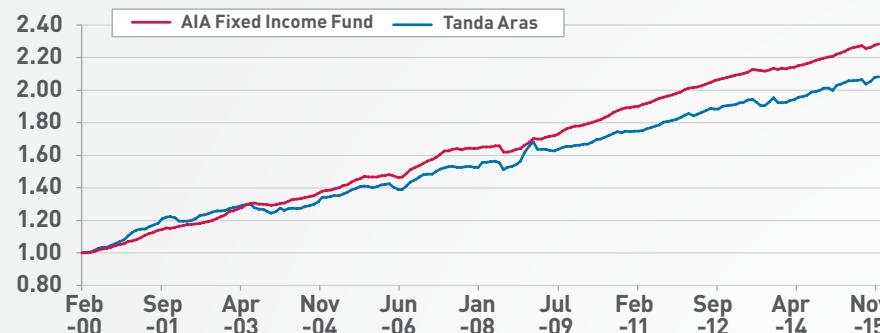

- Meskipun kewangan AS dijangka akan mengetat, kadar pergerakannya mungkin teratur. Dalam zon Euro dan Jepun, kadar faedah dijangka kekal rendah. Persekitaran kadar faedah rendah di negara-negara maju dan hasil bon Malaysia yang lebih tinggi di rantau ini mungkin masih membuat aset pendapatan tetap Malaysia menarik.
- Dengan keadaan kredit yang umumnya stabil dan bekalan bon korporat yang sederhana pada 2016, peruntukan dana kami akan terus memilih bon korporat daripada bon kerajaan.

Kebimbangan

- Pemilikan pihak asing dalam MGS yang agak tinggi telah membuat pasaran bon dalam negeri terdedah kepada jualan asing jika pandangan fiskal Malaysia merosot lagi.
- Dasar monetari ketat yang lebih agresif oleh Rizab Persekutuan AS boleh melemahkan ringgit, justeru mempercepatkan aliran keluar dana.
- Terdapat juga risiko penurunan penarafan kedaulatan Malaysia sekiranya harga minyak jatuh lagi, dan ini akan membawa kepada penyusutan dalam kedudukan fiskal.

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan berakhir 30 November 2015, pada asas bersih, Dana ini memberi pulangan 3.58% berbanding tanda aras 3.47%. Sejak dilancarkan pada Februari 2000, Dana ini telah memberi pulangan tahunan 5.38% berbanding tanda aras 4.77%.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Kedudukan Dana pada wajarnya neutral hingga ke lebih rendah sedikit dalam tempoh berkenaan telah menyumbang kepada prestasi apabila kadar hasil jangka panjang meningkat dengan ketara.

Negatif

- Pegangan Dana dalam beberapa kredit penarafan rendah yang telah diturunkan dan/atau diletakkan di bawah pandangan negatif telah menjelaskan prestasi.

Apakah strategi anda bagi masa depan?

Memandangkan jangkaan pasaran bon yang tidak menentu, Dana akan meletakkan pendirian tempohnya berdasarkan penilaian kami terhadap keadaan ekonomi dan pasaran. Dana ini mungkin mengekalkan strategi semasanya dengan melabur dalam bon berjangka lebih pendek sehingga risiko aliran keluar modal asing pasaran bon kerajaan Malaysia berkurangan dalam senario kestabilan atau peningkatan harga minyak, bersama ringgit dan fiskal Malaysia. Penambahbaikan dalam bidang-bidang ini akan mendorong Dana untuk melabur dengan lebih banyak lagi dalam bon berjangka lebih panjang untuk memanfaatkan peningkatan pasaran bon.

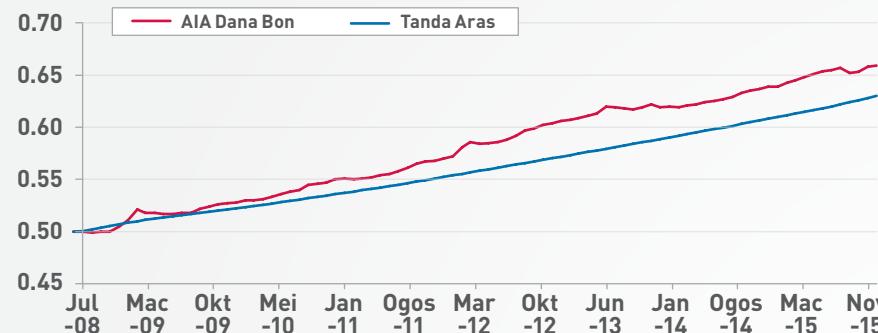

Sebaliknya, jika petunjuk ekonomi menjadi lemah secara ketara dan menyebabkan peningkatan risiko penurunan penarafan kedaulatan Malaysia di samping mencetuskan pengaliran keluar modal asing yang penting daripada pasaran bon kerajaan Malaysia, maka Dana akan melabur dalam bon berjangka lebih pendek dengan objektif utamanya untuk melihara modal.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami akan terus memberi tumpuan kepada tahap pendapatan dan pulangan yang tinggi dengan pemilihan teliti bon berkualiti baik. Kami juga akan mengekalkan portfolio pelbagai bon korporat dan kerajaan untuk menangani risiko dengan lebih baik.

Pengagihan Sektor pada 30 November 2015

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan berakhir 30 November 2015, pada asas bersih, Dana ini memberi pulangan 3.13% berbanding tanda aras 3.64%. Sejak dilancarkan pada Julai 2000, Dana ini telah memberi pulangan tahunan 3.82% berbanding tanda aras 3.20%.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Pegangan Dana dalam sukuk korporat yang memberi kadar keuntungan yang tinggi menyumbang kepada prestasi.

Negatif

- Pegangan Dana lebih rendah dalam beberapa kredit berpenarafan rendah yang telah diturunkan dan/atau diletakkan di bawah pandangan negatif telah menjelaskan prestasi.

Apakah strategi anda bagi masa depan?

Dana ini mungkin akan mengekalkan strategi pelaburan semasanya terutama sekali dalam sukuk korporat dan kerajaan bertempoh sederhana sehingga risiko aliran keluar modal asing dari pasaran bon kerajaan Malaysia berkurangan dalam senario kestabilan atau peningkatan harga minyak, dan kedudukan baik ringgit dan fiskal Malaysia. Penambahaian dalam bidang-bidang ini boleh mendorong Dana untuk mempertimbangkan pelaburan dalam sukuk bertarikh panjang untuk memanfaatkan kenaikan dalam pasaran bon.

Sebaliknya, jika petunjuk ekonomi menjadi lemah secara ketara yang boleh menyebabkan peningkatan risiko penurunan penarafan kedaulatan Malaysia di samping mencetuskan pengaliran keluar modal asing yang penting daripada pasaran bon kerajaan Malaysia, maka Dana akan melabur lebih banyak lagi dalam sukuk bertempoh lebih pendek dengan objektif utamanya untuk mengurangkan kesan turun naik ini terhadap Dana.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami akan terus memberi tumpuan terhadap memaksimumkan jumlah pulangan dari pendapatan dan pertumbuhan modal dengan melabur dalam bon gred pelaburan Islam dan instrumen pasaran wang Islam di Malaysia sambil meminimumkan juga risiko pelaburan.

AIA DANA BON (samb)

PANDANGAN PASARAN SAHAM TEMPATAN

Ulasan Pasaran

Tahun kewangan berakhir 30 November 2015 merupakan tahun yang bergelora untuk Malaysia disebabkan pukulan luaran dan dalaman yang datang serentak. Indeks FBMKLCI jatuh 8.2% lagi pada tahun ini, menandakan kemerosotan bagi dua tahun berturut-turut. Dalam negeri, harga tertekan minyak mentah dan minyak sawit mentah, kebimbangan terhadap hutang 1Malaysia Development Bhd (1MDB), pelaksanaan GST dan peningkatan ketidaktentuan politik telah menyebabkan lebih kekecewaan dalam pendapatan korporat. Luaran, pembetulan yang mendadak dalam pasaran saham China, penurunan di luar jangka nilai renminbi dan jangkaan kenaikan kadar AS akan berlaku buat pertama kali dalam hampir satu dekad menjasaskan lagi sentimen.

Kebimbangan ini mencetuskan penghijrahan dana asing, yang menyaksikan nilai ringgit menjunam ke paras RM4.45/USD sebelum pulih dan tutup pada RM4.25/USD, yang jauh lebih teruk daripada kadar pertukaran yang ditambat pada RM3.80/USD semasa krisis kewangan Asia. YTD sehingga akhir November, aliran keluar ekuiti asing berjumlah RM18.3 bilion, iaitu hampir tiga kali lebih daripada aliran keluar RM6.9 bilion yang dicatatkan pada 2014.

Tinjauan Pasaran

Dalam jangka masa pendek, keadaan kurang stabil dijangka akan berterusan berikutan kejatuhan harga minyak mentah dan pembetulan dalam pasaran saham global. Dalam jangka masa panjang, kami agak yakin mengenai prospek dalam tahun 2016. Tesis pelaburan kami berlandaskan jangkaan bahawa ekonomi akan berkembang antara 4% dan 5% dan pendapatan korporat akan berkembang pada kadar sederhana satu angka, dirangsang oleh harga minyak sawit mentah yang lebih kukuh, kos sektor perbankan yang lebih rendah dan pengurangan sebanyak 1% dalam kadar cukai korporat.

Berita tentang suntikan sebanyak RM20 bilion ke dalam ValueCap Sdn Bhd membantu memulihkan sentimen kerana dana akhirnya akan dilabur ke dalam pasaran saham. Pada forum ekonomi dua hala Malaysia-China terkini, kerajaan China menunjukkan minat untuk membeli lebih banyak lagi Sekuriti Kerajaan Malaysia dan China General Nuclear Power Corporation membeli aset kuasa Edra Global Energy Bhd. Beberapa pihak China dijangka akan terus terlibat dalam penyusunan semula 1MDB melalui pembelian pegangan dalam Bandar Malaysia dan pembinaan kereta api berkelajuan tinggi menghubungkan Malaysia ke Singapura. Sekiranya semua ini menjadi nyata, FDI asing dan aliran modal akan terangsang, sekaligus memantapkan rizab mata wang asing, yang dijangka akan mengukuhkan Ringgit.

Dengan bertambah baiknya keadaan hutang 1MDB, kerajaan akan berada dalam kedudukan yang lebih baik untuk mempercepatkan pelancaran Rancangan Malaysia Ke-11 bagi meningkatkan ekonomi tempatan.

PANDANGAN PASARAN SAHAM TEMPATAN (samb)

Sementara itu, kami mengharapkan sentimen pengguna berbangkit semula agar dapat mengekalkan permintaan dalam negeri berikutan normalisasi impak GST menjelang 2H2016. Meskipun harga minyak mentah rendah, kerajaan komited untuk mengurangkan defisit bajet melalui rasionalisasi subsidi yang berterusan. Cukai yang dikumpul daripada GST juga lebih tinggi daripada yang dijangkakan.

Dalam sektor luaran, kami jangkakan bahawa kadar kenaikan kadar Rizab Persekutuan AS akan berlaku secara beransur-ansur. Kadar faedah yang lembut di Amerika Syarikat dijangka akan mengakibatkan penyusutan nilai dolar AS secara beransur-ansur, merupakan perkara positif bagi pasaran yang baru muncul seperti Malaysia. Pertumbuhan ekonomi global juga dijangka sederhana tinggi daripada 2015 didorong oleh peningkatan peluang pekerjaan dan perbelanjaan pengguna. Di Jepun dan zon Euro, dasar monetari dijangka akan terus melonggar dan di China, pertumbuhan dijangka akan menetap pada kira-kira 6.5% setahun.

Peluang

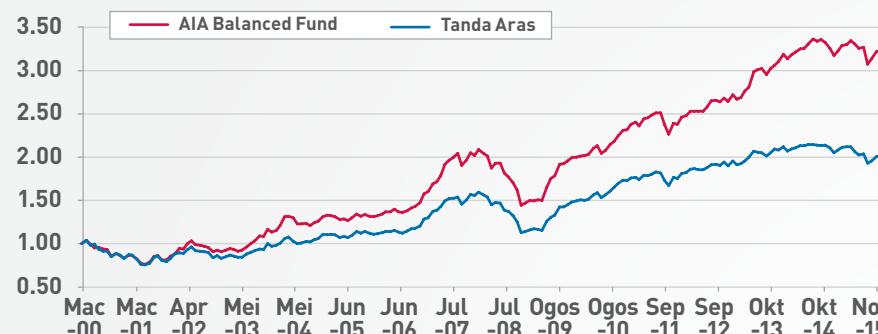

- China telah menunjukkan minat untuk membeli Sekuriti Kerajaan Malaysia dan melibatkan diri dalam penyusunan semula 1MDB.
- Suntikan RM20 bilion ke dalam ValueCap boleh mewujudkan sentimen positif dalam pasaran sebaik sahaja dana itu dilaburkan ke dalam pasaran saham.
- Pemberian projek-projek mega seperti Lebuh Raya Pan Borneo, MRT2 dan LRT3.
- Kesimpulan penjualan aset Edra Tenaga Global dan Bandar Malaysia dalam usaha untuk menurunkan hutang 1MDB.
- Jangkaan pemulihan beransur-ansur harga minyak dan pengukuhan harga minyak sawit mentah hasil daripada El Nino dijangka akan meningkatkan pasaran saham tempatan.

Kebimbangan

- Mengurangkan risiko kepada pertumbuhan ekonomi apabila kesan penuh GST dan pengurangan subsidi dan kedudukan lemah Ringgit dirasai pada 2016.
- Harga minyak kekal di bawah US\$30 seteng untuk tempoh yang lama, menukar defisit belanjawan dengan ketara kepada lebih daripada 3.1%.
- Pendapatan korporat tempatan boleh mengecewakan akibat margin yang lebih rendah berikutan peningkatan kos dan permintaan pengguna yang lemah.
- Peningkatan ketegangan kaum.
- Pertumbuhan global yang lebih perlahan akibat kekecewaan dalam ekonomi China manakala ekonomi Jepun dan zon Euro mungkin meleset kerana tindakan percetakan wang mungkin tidak berkesan.
- Rentak kadar kenaikan faedah AS adalah lebih cepat dan lebih curam daripada yang dijangkakan.
- Nilai renminbi China mungkin diturunkan lagi.

AIA BALANCED FUND

AIA BALANCED FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan berakhir 30 November 2015, pada asas bersih, Dana ini menurun 0.80% berbanding kerugian tanda aras 4.25%. Sejak dilancarkan pada Mac 2000, Dana ini telah memberi pulangan tahunan 7.76% berbanding tanda aras 4.56%.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Dana berwajaran tinggi hingga ke sederhana dalam saham-saham bermodal kecil seperti Time dotCom, Prestariang dan JAKS Resources, yang mengatasi prestasi.
- Dana berwajaran tinggi dalam sektor kitaran seperti pembinaan dan teknologi, yang mengatasi prestasi.
- Dana berwajaran rendah dalam sektor kewangan dan telekomunikasi, yang berprestasi rendah.
- Kedudukan Dana berwajaran neutral hingga ke rendah sedikit dalam tempohnya menyumbang kepada prestasi apabila kadar hasil jangka panjang meningkat dengan mendadak.

Negatif

- Dana ini berwajaran tinggi dalam sektor perladangan, yang berprestasi rendah, berikutan harga minyak sawit mentah yang lemah.
- Pemilikan saham Dana dalam AirAsia dan AirAsia X menjelaskan prestasi meskipun harga minyak adalah lebih rendah.
- Dana berwajaran rendah dalam pembuatan sarung tangan yang mengatasi prestasi.
- Peruntukan Dana yang lebih tinggi untuk bon yang dijamin kerajaan yang mempunyai kupon yang lebih rendah berbanding dengan kredit korporat, menjelaskan prestasi.

AIA BALANCED FUND (samb)

Apakah strategi anda bagi masa depan?

Bagi ekuiti, memandangkan pertumbuhan ekonomi dalam negara yang sederhana, kami memilih syarikat yang mempunyai pendapatan yang berdaya tahan, aliran tunai yang kukuh, kekuatan kunci kira-kira dan penilaian yang murah. Justeru, pilihan kami ialah syarikat-syarikat dalam sektor pembinaan, sektor hartanah mampu milik, sektor perladangan dan pemilik syarikat konsesi yang mempunyai aliran tunai yang stabil dan kontrak jangka panjang. Sektor pengangkutan juga dijangka mendapat manfaat daripada harga minyak mentah yang rendah. Bagi pengeksport pula, kami kurang menaruh harapan kerana jangkaan pengukuhan ringgit dan saham-saham itu telah memberikan pulangan yang baik, membuatkan penilaian kurang menarik.

Bagi pendapatan tetap, Dana akan meletakkan pendirian tempohnya berdasarkan penilaian kami tentang keadaan ekonomi dan pasaran untuk mengemudi pasaran bon yang potensinya tidak menentu. Dana ini boleh mengekalkan strategi pelaburan semasanya dalam bon yang bertarikh lebih pendek sehingga risiko aliran keluar modal asing daripada pasaran bon kerajaan Malaysia berkurangan berikutan tanda-tanda kestabilan atau peningkatan harga minyak, serta kedudukan ringgit dan fiskal Malaysia. Penambahbaikan dalam bidang-bidang ini akan mendorong Dana untuk melabur dengan lebih banyak lagi dalam bon bertarikh panjang untuk memanfaatkan peningkatan pasaran bon.

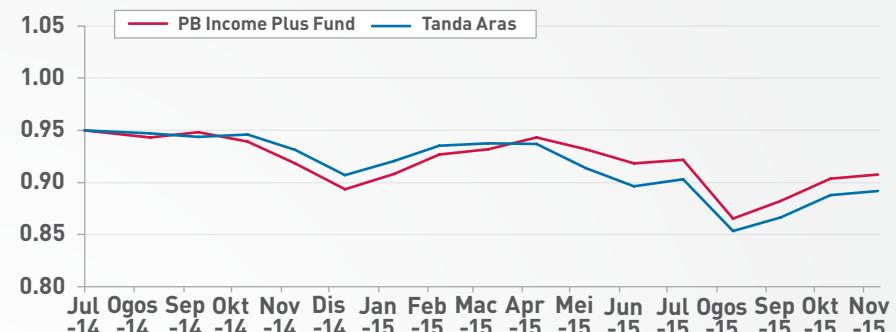

Sebaliknya, jika petunjuk-petunjuk ekonomi menjadi lemah secara ketara dengan kemungkinan meningkatkan risiko penurunan penarafan kedaulatan Malaysia di samping mencetuskan pengaliran keluar modal asing yang penting daripada pasaran bon kerajaan Malaysia, maka Dana akan melabur dalam bon yang bertarikh lebih pendek untuk memelihara modal.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami terus memberi tumpuan kepada tahap pendapatan dan pulangan yang tinggi menerusi pemilihan bon berkualiti tinggi secara berhati-hati dan mengekalkan portfolio pelbagai bon korporat dan kerajaan untuk membantu menguruskan risiko. Berhubung bahagian ekuiti pula, kami akan terus berusaha untuk mendapatkan pertumbuhan jangka panjang modal dan pendapatan melalui portfolio ekuiti pelbagai.

Sejak dilancarkan pada Oktober 2014, Dana ini menurun 0.89% berbanding kerugian tanda aras 4.09%.

Apakah pelaburan yang mempengaruhi prestasi PB Income Plus Fund dan PB Income Plus 2 Fund sepanjang tahun ini?

Positif

- Dana berwajaran tinggi hingga ke sederhana dalam saham-saham bermodal kecil seperti Time dotCom, Prestariang dan JAKS Resources, yang mengatasi prestasi.
- Dana berwajaran tinggi dalam sektor kitaran seperti pembinaan dan teknologi, yang mengatasi prestasi.
- Dana berwajaran rendah dalam sektor kewangan dan telekomunikasi, yang berprestasi rendah.
- Kedudukan dana yang berwajaran neutral hingga ke rendah sedikit dalam tempohnya telah menyumbang kepada prestasi apabila kadar hasil jangka panjang meningkat dengan mendadak.

PB INCOME PLUS FUND (samb)

Negatif

- Dana ini berwajaran tinggi dalam sektor perladangan yang berprestasi rendah, berikutan harga minyak sawit mentah yang lemah.
- Pemilihan Dana dalam saham AirAsia dan AirAsia X menjelaskan prestasi meskipun harga minyak adalah lebih rendah.
- Dana berwajaran rendah dalam pembuatan sarung tangan yang mengatasi prestasi.
- Pegangan Dana dalam beberapa bon tenaga yang kurang berprestasi berikutan kebimbangan bekalan telah menjelaskan prestasi.

Apakah strategi anda bagi masa depan?

Bagi ekuiti, memandangkan pertumbuhan ekonomi dalam negara yang sederhana, kami memilih syarikat yang mempunyai pendapatan yang berdaya tahan, aliran tunai yang kukuh, kekuatan kunci kira-kira dan penilaian yang murah. Oleh itu, syarikat-syarikat dalam sektor pembinaan, sektor hartanah yang berpatutan, sektor perladangan dan pemilik syarikat konsesi yang mempunyai aliran tunai yang stabil dan kontrak jangka panjang adalah pilihan. Sektor pengangkutan juga dijangka akan memanfaatkan harga minyak mentah yang rendah. Bagi pengeksport pula, kami kurang menaruh harapan kerana jangkaan pengukuhan ringgit dan saham-saham juga telah memberi pulangan yang baik, justeru membuat penilaian kurang menarik.

Bagi pendapatan tetap, Dana akan meletakkan pendirian tempohnya berdasarkan penilaian kami tentang keadaan ekonomi dan pasaran untuk mengemudi pasaran bon yang potensinya tidak menentu. Dana ini boleh mengekalkan strategi pelaburan semasanya dalam bon yang bertarikh lebih pendek sehingga berkurangan risiko aliran keluar modal asing daripada pasaran bon kerajaan Malaysia berikutan tanda-tanda kestabilan atau peningkatan harga minyak, serta kedudukan ringgit dan fiskal Malaysia. Penambahbaikan dalam bidang-bidang ini akan membawa Dana untuk melabur dengan lebih banyak dalam bon bertarikh panjang untuk memanfaatkan peningkatan pasaran bon.

Sebaliknya, jika petunjuk-petunjuk ekonomi menjadi lemah secara ketara dengan kemungkinan meningkatkan risiko penurunan penarafan kedaulatan Malaysia disamping mencetuskan pengaliran keluar modal asing yang penting daripada pasaran bon kerajaan Malaysia, maka Dana akan melabur dalam bon yang bertarikh lebih pendek untuk memelihara modal.

PB INCOME PLUS FUND (samb)

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko PB Income Plus Fund dan PB Income Plus 2 Fund?

Kami terus memberi tumpuan terhadap tahap pendapatan dan pulangan yang tinggi dengan pemilihan bon berkualiti tinggi secara berhati-hati dan mengekalkan portfolio pelbagai bon korporat dan kerajaan untuk membantu menguruskan risiko. Berhubung bahagian ekuiti pula, kami akan terus berusaha untuk mendapatkan pertumbuhan jangka panjang bagi modal dan pendapatan melalui portfolio ekuiti pelbagai.

AIA DANA PROGRESIF (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan berakhir 30 November 2015, pada asas bersih, Dana ini memberi pulangan 1.05% berbanding tanda aras 1.73%. Sejak dilancarkan pada Mac 2000, Dana ini telah memberi pulangan tahunan 5.71% berbanding tanda aras 4.01%.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Dana dalam saham-saham bermodal kecil berwajaran tinggi hingga ke sederhana seperti Time dotCom, Prestariang dan Chin Well yang mengatasi prestasi.
- Dana berwajaran rendah dalam sektor telekomunikasi, yang berprestasi rendah.
- Kedudukan tempoh Dana yang berwajaran tinggi menyumbang kepada prestasi apabila kadar hasil jangka panjang jatuh.
- Pelaburan Dana dalam sekuriti bertarikh panjang yang dijamin kerajaan juga menyumbang secara positif.

Negatif

- Dana berwajaran tinggi dalam sektor perladangan, yang berprestasi rendah bagi harga minyak sawit mentah yang lemah.
- Dana berwajaran tinggi bagi pengangkutan, berprestasi rendah meskipun harga minyak mentah adalah lebih rendah.
- Dana berwajaran rendah dalam pembuatan sarung tangan, mengatasi prestasi.
- Kekurangan pegangan Dana dalam sekuriti berhasil tinggi bermakna bahawa Dana telah kerugian bagi bawaan tinggi.

AIA DANA PROGRESIF (samb)

Apakah strategi anda bagi masa depan?

Bagi ekuiti, memandangkan pertumbuhan ekonomi dalam negara yang sederhana, kami lebih memilih syarikat patuh Syariah yang mempunyai pendapatan berdaya tahan, aliran tunai yang kukuh, kekuatan kunci kira-kira dan penilaian yang murah. Justeru, kami memilih syarikat-syarikat dalam sektor pembinaan, sektor harta tanah yang mampu milik, sektor perladangan dan pemilik syarikat konsesi yang mempunyai aliran tunai yang stabil dan kontrak jangka panjang. Sektor pengangkutan juga dijangka akan memanfaatkan harga minyak mentah yang rendah. Bagi pengeksport pula, kami kurang menaruh harapan kerana jangkaan pengukuh ringgit. Tambahan pula, saham-saham berkenaan telah memberi pulangan yang baik.

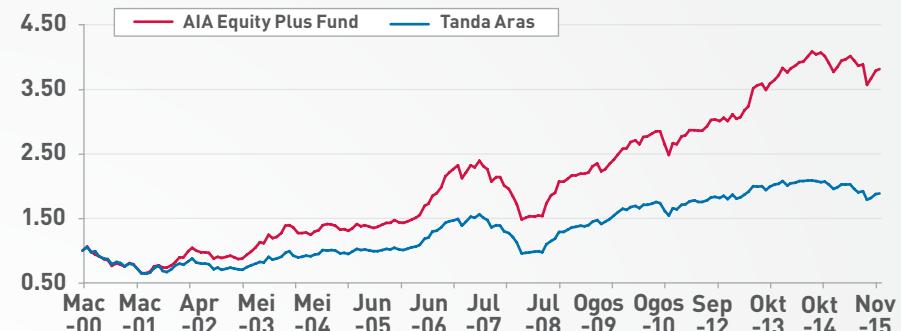

Bagi pendapatan tetap, kami adalah neutral terhadap tempoh dan juga melabur dalam sukuk korporat dan isu Islam kerajaan yang menawarkan nilai yang relatifnya baik.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami akan terus memberi tumpuan tentang tahap pendapatan dan pulangan yang tinggi dengan pemilihan sukuk berkualiti tinggi secara berhati-hati dan mengekalkan portfolio korporat dan kerajaan pelbagai keluaran untuk perlindungan modal. Bagi bahagian ekuiti pula, kami akan terus berusaha untuk mendapatkan pertumbuhan jangka panjang bagi modal dan pendapatan menerusi portfolio ekuiti pelbagai.

AIA DANA DINAMIK (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun kewangan berakhir 30 November 2015, pada asas bersih, Dana ini menurun 2.10% berbanding kerugian tanda aras 3.66%. Sejak dilancarkan pada Julai 2001, Dana ini telah memberi pulangan tahunan 9.45% berbanding tanda aras 7.65%.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Dana berwajaran tinggi dalam saham seperti Time dotCom dan Westport yang telah diubah penarafan dengan kukuh dalam tahun ini.
- Dana berwajaran tinggi dalam sektor pengangkutan, pelabuhan dan perladangan, yang mengatasi prestasi.
- Dana berwajaran rendah dalam sektor utiliti, yang berprestasi rendah.

Negatif

- Pemilihan saham Dana menjaskan prestasi memandangkan kedudukannya yang berwajaran rendah dalam Petronas Chemicals dan pendirian berwajaran tinggi dalam Kumpulan AEON.

Apakah strategi anda bagi masa depan?

Bagi ekuiti, memandangkan pertumbuhan ekonomi dalam negara yang sederhana, kami memilih syarikat yang mempunyai pendapatan yang berdaya tahan, aliran tunai yang kukuh, kekuatan kunci kira-kira dan penilaian yang murah. Justeru, kami memilih syarikat-syarikat dalam sektor pembinaan, sektor hartanah yang berpatutan, sektor perladangan dan pemilik syarikat konsesi yang mempunyai aliran tunai yang kukuh dan kontrak jangka panjang. Sektor pengangkutan juga dijangka akan dapat memanfaatkan harga minyak mentah yang rendah. Bagi pengeksport pula, kami kurang menaruh harapan kerana jangkaan pengukuhan Ringgit. Saham-saham berkenaan juga telah memberi pulangan yang baik, membuat penilaianya mahal.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami akan terus melabur dalam sekuriti yang dibenarkan Shariah yang tersenarai di Bursa Malaysia untuk memaksimumkan kenaikan modal jangka sederhana dan panjang untuk pelaburan anda.

ULASAN DANA BOND GLOBAL

Apakah keadaan ekonomi, peristiwa atau pasaran kewangan yang memberi kesan kepada Dana?

Sepanjang tahun lalu, dolar AS terus mengukuh secara meluas berbanding beberapa mata wang negara maju dan pasaran yang memuncul, yang mengakibatkan pertambahan ketidakstabilan tahun 2015. Nilai mata wang-mata wang Asia (kecuali Jepun) dan Amerika Latin terus menyusut, dan memberi kesan negatif terhadap prestasi mutlak dana kami.

Bagaimanapun, kami percaya bahawa kedudukan sesetengah mata wang masih menarik kerana mata wang berkenaan dinilaikan secara tidak efisien. Tambahan lagi, dedahan jangka masa kami terhadap Bon Perbendaharaan AS yang negatif memberi kesan buruk ke atas pulangan mutlak kerana hasil Bon AS 10 tahun itu merosot daripada paras tertingginya pada tahun tersebut hingga kini, iaitu kira-kira 2.5% pada bulan Jun. Walau bagaimanapun, harapan kami untuk persekitaran yang semakin meningkat tidak berubah.

Perlu diingatkan bahawa kami sudah biasa menangani waktu-waktu sebegini pada masa lalu, dan lazimnya kami menggunakan keadaan seperti ini untuk memanfaatkan sebarang peluang menarik yang timbul. Jangka waktu penyesuaian makroekonomi yang besar memerlukan masa untuk berkembang, justeru sukar untuk meramalkan titik permulaan perubahan dengan tepat.

Oleh itu, kami yakin dengan pelaburan yang berdasarkan analisis atas jangka panjang kerana pendekatan kami menekankan rangka masa yang tepat, juga, kami maklum bahawa dengan pelaburan di peringkat global, peluang-peluang yang ada mungkin akan mengambil masa untuk mendatangkan keuntungan.

Memandang ke hadapan, kami telah menyusun strategi dalam tiga bidang utama untuk mendapat persekitaran kadar yang berpotensi meningkat: 1) pendedahan negatif kepada Bon AS; 2) tempoh panjang dolar AS berbanding tempoh pendek euro dan tempoh panjang dolar AS berbanding tempoh pendek yen Jepun; dan 3) mata wang tempatan terpilih dan dedahan bon tempatan dalam pasaran memuncul tertentu.

Apakah pandangan anda pada masa depan?

Memandang ke hadapan ke 2016, kami tetap yakin terhadap prospek ekonomi Amerika Syarikat dan terus menunggu kenaikan kadar faedah oleh Rizab Persekutuan AS (Fed). Keadaan buruh di Amerika Syarikat adalah kukuh manakala gaji dan pendapatan telah meningkat, dan kami percaya ia akan terus memacu penggunaan. Dalam penilaian kami, pasaran kewangan global dijangka akan meraih keuntungan dari pertumbuhan ekonomi Amerika Syarikat.

Kami juga menjangkakan perbezaan yang ketara dalam dasar kewangan di seluruh dunia dalam tahun 2016; kami menjangka Fed akan mengetatkan dasar, manakala Bank of Japan (BOJ) dan European Central Bank (ECB) akan terus meluaskan penyesuaian monetari dengan pelonggaran kuantitatif (QE).

ULASAN DANA BOND GLOBAL (samb)

BOJ telah membayangkan bahawa program QE mereka mungkin akan berterusan sehingga 2017, dan ECB telah membayangkan yang ia mungkin akan meneruskan QE sehingga Mac 2017. Mengikut penilaian kami, BOJ bersama ECB perlu meneruskan dasar pengembangan ini, yang tentunya akan terus menurunkan nilai yen dan euro berbanding dolar AS. Di zon Euro, QE telah mendorong euro yang lemah untuk merangsang pertumbuhan ekonomi yang berdasarkan eksport dan mengangkatkan inflasi ke arah tahap sasaran ECB; di Jepun, QE telah menjadi pembiayaan hutang yang eksplisit bagi kerajaan dan asas kepada "Abenomics", iaitu program ekonomi pelbagai hala yang diperkenalkan oleh Perdana Menteri Jepun Shinzo Abe untuk merangsang pertumbuhan dan memulih kelembapan.

Walaupun berlakunya semakan ke bawah bagi unjuran pertumbuhan 2016 oleh International Monetary Fund, kami merasakan bahawa tidak akan berlaku kemelesetan global atau deflasi global. Pertumbuhan global kekal mengikut trend semasa manakala ekonomi-ekonomi utama kekal sihat; unjuran pertumbuhan kami untuk 2016 ialah 2%-3% untuk Amerika Syarikat, lebih tinggi daripada 1% bagi zon Euro, sekitar 1% bagi Jepun dan antara 6% dan 7% bagi China.

Kami percaya bahawa kebimbangan tentang deflasi global tidak akan menjadi nyata. Pada pandangan kami, pasaran telah terlebih anggar sejauh mana anggaran kasar inflasi mencerminkan permintaan global yang berstruktur lemah. Kami percaya bahawa faktor pembekalan ialah pemandu utama di sebalik kejatuhan harga tenaga dan komoditi, yang seterusnya telah menolak inflasi kasar ke tahap lebih rendah.

Semua ini merupakan kesan jangka pendek, dan impak disinfiasinya tentu akan berkurangan apabila harga komoditi menstabil. Beberapa pelabur selesa dengan mengambil risiko kadar faedah, semasa di bahagian kitaran pulangan, atas kepercayaan bahawa inflasi telah menurun dalam strukturnya, yang pada pandangan kami adalah merbahaya. Apabila kesan asas harga komoditi ke atas inflasi mula berkurangan pada separuh pertama 2016, kami menjangka bahawa inflasi AS akan kembali kepada tahap sasaran Fed.

Secara keseluruhan, kami terus yakin bahawa strategi global tanpa kekangan ialah cara yang paling berkesan untuk memposisikan diri supaya bersedia untuk keadaan kenaikan kadar kerana ia memberikan kami kelonggaran untuk menyesuaikan dedahan tempoh Dana kami.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami tidak membuat sebarang perubahan kepada objektif pelaburan Dana atau ciri-ciri risikonya.

ULASAN DANA BOND GLOBAL (samb)

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Faktor positif

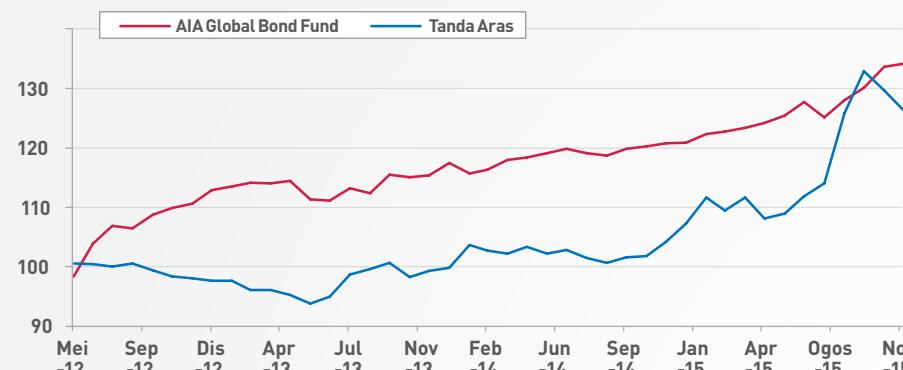

- Dedahan kredit berdaulat Dana dan strategi kadar faedah menyumbang kepada prestasi mutlak Dana yang positif.
- Antara mata wang-mata wang, kedudukan negatif bersih Dana dalam Euro dan Yen Jepun menyumbang kepada prestasi mutlak Dana yang positif.
- Dana mengekalkan pendekatan defensif berhubung kadar faedah dalam pasaran maju dan yang memuncul. Dedahan tempoh tertentu di Eropah juga menyumbang kepada prestasi mutlak Dana yang positif.

Faktor negatif

- Prestasi negatif mutlak Dana adalah disebabkan kedudukan mata wang tertentu. Kedudukan di Amerika Latin dan Asia kecuali Jepun menjelaskan prestasi mutlak Dana.

AIA ASIA OPPORTUNITY FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 8.91% berbanding tanda aras 13.37%. Sejak pelancaran dalam April 2009, Dana telah mencatat pulangan tahunan 6.270% berbanding tanda aras 11.95%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

2015 merupakan tahun yang bergelora bagi pasaran serantau. Indeks MSCI Asia kecuali Jepun melonjak daripada 560 mata pada awal tahun ke paras tertingginya, iaitu 642 mata pada bulan April 2015. Namun begitu, indeks pada akhir tahun kewangan adalah pada tahap rendah 503 atau 8% lebih rendah berdasarkan dolar AS. Pada separuh pertama tahun, pasaran melonjak disebabkan pelonggaran kewangan dan dasar rangsangan kerajaan antaranya nisbah kadar rizab lanjut (RRR), penurunan kadar faedah dan strategi 'One Belt One Road' yang digunakan China untuk menangani perlambatan ekonomi. Melangkah ke separuh kedua tahun 2015, Indeks MSCI Asia kecuali Jepun menjunam disebabkan ketidaktentuan bersabit kelembapan ekonomi China dan penurunan nilai renminbi (RMB). Pada 11 Ogos 2015, Bank Rakyat China mengejutkan pasaran apabila menurunkan nilai RMB. Pada bulan itu, RMB menyusut sebanyak 3.0% manakala mata wang Asia lain susut antara 5% -8%.

Prestasi pasaran serantau dalam mata wang tempatan dan RM untuk 1 tahun yang berakhir pada 30 November 2015

Negara	Nov '14 - Nov '15 Mata Wang Tempatan	Nov '14 - Nov '15 Dalam RM

Taiwan	-9.43%	7.64%
Indonesia	-13.66%	-4.71%
Negara Thai	-14.69%	-2.04%
Singapura	-14.76%	-1.34%

AIA ASIA OPPORTUNITY FUND (samb)

Pemandu Utama Pasaran

Positif

- Pasaran China memulih pada 1H2015 selepas kerajaan mengumumkan dasar pelonggaran rangsangan dan monetari yang tersasar untuk menggalakkan pertumbuhan. Ini termasuk kelulusan membenarkan hutang kerajaan tempatan ditukar kepada bon, mengurangkan keperluan wang muka untuk pembeli rumah kali pertama di kawasan bandar daripada 30% kepada 25% dan memansuhkan dasar anak di negara ini.
- Pasaran Korea naik sedikit atau berdasarkan mata wang tempatan naik 0.6%, tetapi berdasarkan ringgit naik sehingga 20.9% berikutan perkembalian kepada pendapatan yang lebih baik. Pengumuman Samsung tentang pembelian balik saham dan pembatalan saham biasa dari 2015 hingga 2017 juga membantu menyokong pasaran.

Negatif

- Pasaran Singapura jatuh 14.76% berikutan data ekonomi yang lemah dan pasaran hartanah yang lemah. Sentimen juga terjejas disebabkan ketidaktentuan yang menyelubungi kelembapan China dan kelewatan Fed dalam melaksanakan kenaikan kadar buat kali pertama.
- Pasaran Negara Thai berprestasi rendah, diseret turun oleh tenaga saham berwajaran berat yang berkaitan dan peningkatan keimbangan mengenai pinjaman tidak berbayar yang menjelaskan sektor perbankan. Syarikat telekomunikasi juga berprestasi rendah kerana lelongan berakhir dengan perang bidaan dan harga yang melambung. Secara keseluruhan, petunjuk pertumbuhan kekal lemah.
- Indonesia menunjukkan prestasi rendah kerana kelemahan mata wang dan kekecewaan tentang pelaksanaan dasar kerajaan.
- Ekuiti Taiwan membetul dengan mendadak ke akhir bulan Ogos yang diterajui oleh sektor teknologi kerana harapan berhubung kelembapan atas permintaan perkakasan berlaku serentak dengan kelemahan China. Sektor kewangan juga tertekan disebabkan pilihan raya Presiden yang turut menyusul.
- Pasaran India ditutup rendah akibat pendapatan korporat yang lemah dan kekalahan teruk kerajaan pusat dalam pilihan raya negeri.
- Pasaran Hong Kong jatuh 8.3% dari segi mata wang tempatan disebabkan keimbangan terhadap kelembapan China serta jualan peruncitan dan hartanah yang lemah.

AIA ASIA OPPORTUNITY FUND (samb)

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Kedudukan berwajaran tinggi kami di negeri China yang mengatasi prestasi dan kedudukan berwajaran rendah kami di Indonesia yang berprestasi rendah.
- Dana berwajaran rendah dalam sektor tenaga dan saham berkaitan budi bicara pengguna yang berprestasi rendah.

Negatif

- Kedudukan berwajaran rendah kami di Hong Kong dan Korea Selatan, yang mengatasi prestasi.
- Dana berwajaran tinggi dalam teknologi yang berprestasi rendah dan berwajaran rendah dalam saham berkaitan penjagaan kesihatan yang mengatasi prestasi.

Apakah strategi anda bagi masa depan?

Pada masa ini, kami adalah neutral di Asia kecuali Jepun kerana prospek ekonomi terus mencabar berikutan kelembapan China, harga komoditi yang lebih lemah dan pengukuhan dolar AS. Walau bagaimanapun, kami berpendapat bahawa banyak daripada risiko telah diambil kira kerana MSCI Asia kecuali Jepun diniagakan pada nisbah harga kepada buku 1.3x dan nisbah harga kepada pendapatan 12x, yang lebih rendah daripada nisbah 1.4x dan 13x setiap satu, yang dicatatkan semasa krisis kewangan global.

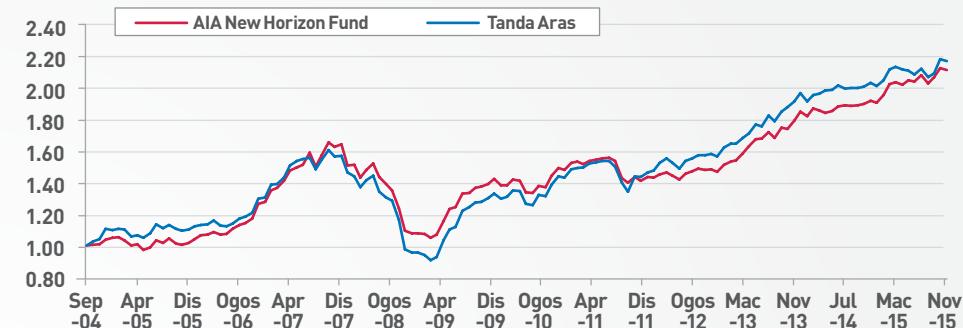

Berlatarbelakangkan pertumbuhan ekonomi yang lembap, kami tetap menumpukan pelaburan kepada syarikat-syarikat yang mempunyai model perniagaan yang kukuh, kurang pegangan aset dan aliran tunai yang kukuh. Justeru, kami lebih memilih sektor insurans, pengguna dan Internet. Dari segi peruntukan negara, kami lebih memilih Asia Utara (terutamanya China) daripada ASEAN. Ini disebabkan dasar kewangan akomodatif China untuk memacu pertumbuhan ekonomi. Tambahan pula, penilaian adalah menarik selepas berlakunya pembetulan yang mendadak. Kami menjangkakan bahawa pasaran ASEAN akan terus diimpakkan oleh ketidaktentuan mata wang dan harga komoditi yang rendah.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami akan terus berusaha mendapatkan pertumbuhan modal dan pendapatan melalui pelaburan dalam portfolio saham yang pelbagai di pasaran Asia kecuali Jepun.

Pengagihan Dana & Sektor pada 30 November 2015

AIA NEW HORIZON FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 10.20% berbanding tanda aras 6.89%. Sejak pelancaran pada September 2004, Dana telah mencatatkan pulangan tahunan 6.87% berbanding tanda aras 7.13%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

Pemandu Utama Pasaran

Positif

- GST dan potongan subsidi telah dilaksanakan untuk mengurangkan impak harga minyak yang rendah.
- Penyusunan semula 1MDB yang berterusan
- RM20 bilion dana Value Cap ditubuhkan untuk memberi sokongan kepada pasaran saham tempatan.
- Pemulihan mendadak harga minyak sawit mentah sejak Ogos 2015.

Negatif

- Harga minyak yang mendadak lebih rendah dan berita negatif 1MDB telah mengakibatkan penyusutan curam dalam nilai Ringgit.
- Pendapatan korporat tempatan mengecewakan lagi.
- Kebimbangan terhadap kenaikan kadar faedah oleh AS buat kali pertama sejak krisis kewangan global.
- Pertumbuhan ekonomi yang tidak seimbang dan risiko geopolitik.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Dana berwajaran tinggi di pasaran global berbanding dengan Malaysia
- Dana berwajaran tinggi dalam saham teknologi, pengguna dan pembinaan yang mengatasi prestasi.
- Dana berwajaran tinggi dalam Prestariang, Time dotCom dan Matrix Concept, yang semuanya mengatasi prestasi
- Dana berwajaran rendah dalam telekomunikasi, yang berprestasi rendah.
- Dana berwajaran tinggi dalam Pinebridge Global Focus yang mengatasi prestasi.

AIA NEW HORIZON FUND (samb)

Negatif

- Kedudukan Dana berwajaran rendah dalam sektor pembuat sarung tangan yang mengatasi prestasi
- Kedudukan Dana berwajaran tinggi dalam AirAsia, yang berprestasi rendah.

Apakah strategi anda bagi masa depan?

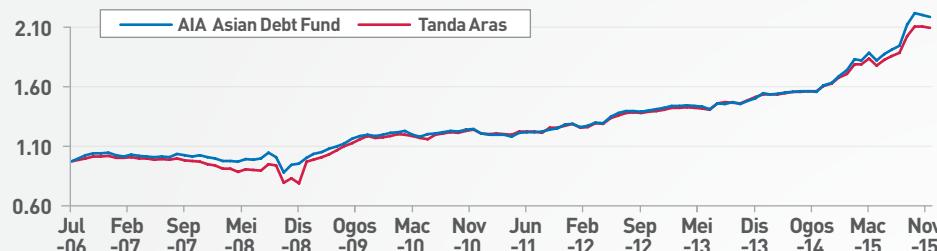

Bagi ekuiti, memandangkan pertumbuhan ekonomi dalam negeri yang sederhana, kami memilih syarikat yang mempunyai pendapatan yang berdaya tahan, aliran tunai yang kukuh, kekuatan kunci kira-kira dan penilaian yang murah. Justeru, pilihan kami ialah syarikat-syarikat dalam sektor pembinaan, sektor harta tanah mampu milik, sektor perladangan dan pemilik syarikat konsesi yang mempunyai aliran tunai yang stabil dan kontrak jangka panjang. Sektor pengangkutan juga dijangka mendapat manfaat daripada harga minyak mentah yang rendah. Bagi pengeksport pula, kami kurang menaruh harapan kerana jangkaan pengukuhan Ringgit dan saham-saham itu telah memberikan pulangan yang baik, membuatkan penilaian kurang menarik.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Kami mengekalkan objektif pelaburan dan ciri risiko am yang sama. Kami akan terus berusaha mendapatkan pertumbuhan modal jangka panjang dan pendapatan melalui portfolio ekuiti yang pelbagai dalam pasaran tempatan dan global.

* JP Morgan Asia Credit Index (MYR Term) (Sumber: Bloomberg)

Pengagihan Kadar pada 30 November 2015

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 24.88% berbanding tanda aras 29.40%. Sejak pelancaran pada Julai 2006, Dana telah mencatatkan pulangan tahunan 8.24% berbanding tanda aras 8.74%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

Pasaran kredit Asia mengalami pergolakan yang hebat selama 12 bulan sehingga November 2015. Semasa separuh pertama tempoh ini, pasaran dirangsang oleh pelonggaran dasar monetari di rantau ini dan pengumuman yang bersifat tidak agresif oleh Rizab Persekutuan AS. Bagi Indonesia dan India, pelabur juga yakin bahawa perlantikan pemimpin yang berpendirian reformasi dalam pilihan raya 2014 akan membantu mempercepatkan projek infrastruktur dan mengurangkan kerendah birokrasi. Malah, kedua-dua kerajaan telah mengambil kesempatan berikutnya harga minyak yang turun untuk mengurangkan subsidi bahan api dalam negeri.

Penghindaran risiko global, bagaimanapun, melonjak pada bulan Jun apabila Greece gagal membuat bayaran €1.55 bilion kepada Tabung Kewangan Antarabangsa, yang telah menyebabkan sentimen yang bergolak antara harapan bahawa satu perjanjian akan dibuat yang mana Athens akan mendapat dana bantuan dan keimbangan yang Greece mungkin terpaksa keluar dari zon Euro. Sentimen kian melembap apabila Indeks Komposit Shanghai China dijual dan campur tangan pembuat dasar yang keras 'untuk menstabilkan harga hanya menjauhkan lagi para pelabur. Selepas itu, pengumuman Beijing untuk menukar dasar kadar pertukaran kepada yang lebih berorientasikan pasaran dengan secara mendadak menurunkan nilai 2% telah mencetuskan keimbangan akan bermulanya perang mata wang. Menjelang akhir tempoh berkenaan, pasaran memulih apabila disedari bahawa China hanya bertindak untuk meliberalisasikan mekanisme kadar pertukarannya. Pada akhir November, Tabung Kewangan Antarabangsa memasukkan renminbi ke dalam bakul mata wang Hak Pengeluaran Istimewa.

Secara keseluruhan, Indeks Kredit Asia JP Morgan meningkat sebanyak 2.65%. Meskipun spread kadar hasil melebar sebanyak 27 mata asas dan kadar hasil Perbendaharaan AS meningkat, carry positif membantu mengurangkan kesan pulangan keseluruhan. Bon pulangan tinggi juga berprestasi rendah berbanding bon gred pelaburan. Dari segi negara tertentu, Pakistan, Filipina dan China mencatatkan keuntungan terbesar, manakala Mongolia ketinggalan di belakang. Dari segi sektor, sektor harta tanah meningkat, disebabkan pemulihran fundamental harta tanah China. Sebaliknya, logam dan perlombongan, dan juga perindustrian, adalah lemah.

AIA ASIAN DEBT FUND (samb)

Pemandu Utama Pasaran

Positif

- Persekutuan ekonomi dan politik yang stabil.
- Pelonggaran monetari oleh bank pusat utama, termasuk European Central Bank dan Bank of Japan.
- Asia ialah pengimpor bersih minyak.
- Pemulihan harta tanah China.
- Sokongan teknikal dari bekalan bon yang lebih rendah pada tahun lepas apabila penerbit China mengalih tumpuan kepada pasaran dalam negeri.

Negatif

- Kadar hasil Perbendaharaan AS lebih tinggi disebabkan jangkaan Fed AS akan menaikkan kadar faedah.
- Kesan harga komoditi yang lemah yang membabitkan pengeluar sumber asli dan kedudukan fiskal Malaysia.
- Kebimbangan terhadap pertumbuhan ekonomi China.
- Peristiwa geopolitik di kawasan lain seperti di Zon Euro.
- Mata wang Asia yang lemah menimbulkan kebimbangan bahawa syarikat korporat mungkin mengalami kesukaran dalam membayar balik hutang dolar.
- Peningkatan tahap kegagalan membayar bon berbanding tempoh yang lalu.
- Risiko keingkaran membayar bon utama seperti 1MDB, Noble, Kaisa

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Pemilihan bon yang baik di China, Malaysia dan Korea
- Pemilihan bon yang baik dalam harta tanah, minyak dan gas, dan kewangan
- Peruntukan Negara berdasarkan wajaran tinggi di China

Negatif

- Pegangan dalam bon risiko tinggi Kaisa Group dan 1MDB
- Tempoh spread wajaran tinggi menjelang separuh tempoh kedua
- Berwajaran tinggi bagi bon kuasi-berdaulat Indonesia

AIA ASIAN DEBT FUND (samb)

Apakah strategi anda bagi masa depan?

Fundamental makroekonomi di Asia kelihatan stabil. Walaupun China terus melemah dan ketika kerajaan mengemudikan ekonomi ke arah model pertumbuhan yang lebih diterajui penggunaan, adalah ternampak lebih jelas bahawa kelembapan mendadak boleh dielakkan. Sektor perkhidmatan terus berkembang, serta membantu mengimbangi kemelesetan dalam pengeluaran. Kami juga memandang baik rancangan lima tahun terkini China, termasuk komitmen untuk mewujudkan satu sistem pencen asas dan memperkenalkan insurans perubatan untuk isi rumah bagi menanggung penyakit yang serius. Ini akan membantu meningkatkan keselamatan sosial bersih pengguna dan menggalakkan perbelanjaan.

Kami juga merasakan bahawa kitaran kenaikan kadar AS dijangka tidak curam. Selepas tujuh tahun mengalami kadar tersangat rendah, Rizab Persekutuan AS akhirnya pada 16 Disember menaikkan kadar dana persekituan sebanyak satu perempat mata asas kepada 0.25-0.5%. Bank pusat itu menjelaskan bahawa kenaikan kadar adalah satu permulaan berhati-hati ke arah kitaran yang mengetat "beransur-ansur". Sementara itu, masih terdapat perbezaan dasar kewangan yang merentasi negara maju dan negara memuncul. Bank of Japan (BOJ) dan European Central Bank (ECB) masih mempunyai program pelonggaran kuantitatif yang besar dan ECB mengurangkan lagi kadar depositnya pada awal Disember. Di Asia, kelemahan yang berterusan di China bermakna bahawa dasar monetari mungkin kekal longgar pada 2016.

Petunjuk teknikal untuk bekalan bon juga mungkin lebih positif pada tahun 2016. Sehingga ini pasaran utama dolar AS telah memperlahan pada tahun ini, kerana bekalan baharu untuk tahun berakhir November turun sebanyak 22% berbanding tahun 2014. Dengan usaha berterusan China untuk membuka pasaran modalnya, bersama jangkaan kelemahan mata wang China berbanding dolar AS, kami menjangka lebih banyak penerbit Cina akan mengalih tumpuan ke pasaran dalam negeri untuk mendapatkan wang.

Walaupun prospek fundamental secara umumnya adalah positif, kami menjangkakan sebahagian pasaran kredit akan mengalami pergolakan. Satu daripadanya ialah sektor komoditi kerana harga terendahnya masih belum diketahui. Berita baik ialah bahawa banyak syarikat tenaga Asia merupakan perusahaan milik negara, yang mana penilaiannya berkait rapat dengan kerajaan berkenaan kerana peranan strategik mereka. Sementara itu, pemaju harta tanah China yang memberi tumpuan kepada bandar-bandar di peringkat rendah masih cuba menangani tahap inventori yang tinggi kerana bandar-bandar ini belum memulih ke tahap rakan Tier 1 dan 2 mereka.

AIA ASIAN DEBT FUND (samb)

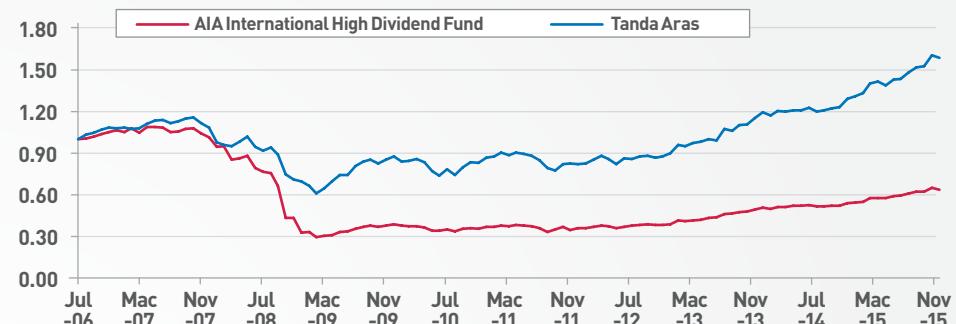

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Dana yang tertera sebagai ING (L) Renta Fund Asian Debt Hard Currency Class P – Capitalisation (USD) telah dinamakan semula sebagai NN (L) Asian Debt (Hard Currency) Class P – Capitalisation (USD) bermula pada 7th April 2015.

Walaubagaimanapun, tiada perubahan dalam objektif pelaburan dan ciri risiko am. Kami akan fokus terhadap sekuriti yang akan memberikan pulangan terlaras risiko yang paling menarik dalam persekitaran yang dihadapi sekarang. Untuk itu, kami akan menumpukan perhatian terhadap penyelidikan intensif korporat dan fundamental berdaulat.

* MSCI World Index (MYR Term) (Sumber: Bloomberg)

Pengagihan Sektor pada 30 November 2015 *

AIA INTERNATIONAL HIGH DIVIDEND FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 18.15% berbanding tanda aras 22.79%. Sejak pelancaran dalam Julai 2006, Dana telah mencatatkan kerugian tahunan 4.70% berbanding tanda aras 5.05%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

Petunjuk ekonomi, pertumbuhan pendapatan dan tindakan bank pusat dalam tempoh ini membantu saham nilai kitaran mengatasi prestasi, terutamanya di Eropah. Prestasi cemerlang itu, walau bagaimanapun, tidak menjadi kenyataan dan saham pertumbuhan dipercayai sekali lagi akan menjadi segmen pilihan pasaran untuk pelabur. Pelabur bimbang tentang keadaan pertumbuhan global disebabkan ketidaktentuan yang menyelubungi kelembapan ekonomi China dan pergolakan dalam banyak pasaran memuncul. Kebimbangan mengenai China juga memberi kesan negatif terhadap harga komoditi yang menyebabkan kesan lanjutan bagi syarikat perlombongan. Harga minyak yang terus rendah memberi tekanan kepada sektor tenaga. Fed melengahkan pelaksanaan kenaikan kadar buat pertama kali sejak 2006 tetapi jangkaan pelancaran bergabung dengan tindakan berbeza bank pusat yang lain telah menyebabkan peningkatan dolar AS yang kukuh.

Pemandu Utama Pasaran

Positif

- ECB memulakan program pembelian aset €6 bilionnya, satu komitmen membeli aset, termasuk bon berdaulat, pada kadar €60 bilion setiap bulan sebaik-baiknya sampai September 2016. Selepas itu, Presiden ECB Mario Draghi menyatakan bahawa pakej rangsangan tambahan akan diadakan.
- Pasaran buruh AS terus memulih dengan kadar pengangguran jatuh kepada 5%.
- Selain daripada Q3 yang mengecewakan di Eropah, pendapatan korporat global secara amnya menyokong sepanjang tempoh tersebut. Majoriti syarikat di AS mengalahkan ramalan konsensus secara konsisten.
- Aktiviti M&A berada pada tahap tinggi sepanjang tempoh tersebut apabila syarikat korporat berusaha meningkatkan prospek pertumbuhan mereka. Gabungan terbesar berlaku dalam sektor penjagaan kesihatan yang mana Allergan dan Pfizer bersetuju untuk bergabung dalam perjanjian yang bernilai 160 bilion dolar AS.

AIA INTERNATIONAL HIGH DIVIDEND FUND (samb)

Negatif

- "Grexit" tinggalan Greece daripada zon Euro menjadi kemungkinan yang ketara, sekali lagi menyebabkan pasaran bergolak terutamanya selepas referendum kebangsaan diadakan untuk menerima syarat-syarat bantuan bayaran hutang baharu. Akhirnya, rakyat Greece menerima syarat-syarat bantuan wang dan akhirnya perjanjian telah dimeterai antara Perdana Menteri Tsipras dan pembiutang Greece di Eropah.
- People's Bank of China melaksanakan penurunan nilai renminbi yang mengejut pada bulan Ogos. Peristiwa ini menambahkan lagi kebimbangan pelabur mengenai kelembapan ekonomi di China. Ia juga berlaku berikutnya jualan ekuiti China secara besar-besaran akibat kebimbangan "bencana kewangan".
- Fed menangguhkan kenaikkan kadar faedah pada bulan September atas alasan perkembangan di peringkat antarabangsa. Pasaran-pasaran melihat langkah tersebut - ketika itu - sebagai kepastian bahawa pertumbuhan global adalah rapuh.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Pemilihan Saham menyumbang secara positif dalam sektor perindustrian.
- Dana mendapat manfaat dengan pelindungan pendedahan nilai dolar AS wajaran rendah relatif kepada tanda aras.
- Penyumbang aktif terbaik di peringkat saham ialah: McDonald Corporation (perbelanjaan budi bicara pengguna), Vinci (perindustrian) dan Microsoft (teknologi)

Negatif

- Pemilihan saham dalam sektor bahan mentah, perbelanjaan budi bicara pengguna dan teknologi menjelaskan prestasi relatif.
- Kedudukan berwajaran tinggi kami bagi sektor tenaga dan wajaran rendah bagi perbelanjaan budi bicara pengguna juga menyumbang secara negatif kepada prestasi relatif.
- Dari segi perspektif serantau, pemilihan saham berwajaran tinggi dan saham di Eropah telah menjelaskan prestasi.

AIA INTERNATIONAL HIGH DIVIDEND FUND (samb)

Apakah strategi anda bagi masa depan?

Kami berwajaran tinggi bagi saham Eropah kerana saham kini menawarkan sokongan pendapatan yang baik, terutamanya apabila dibandingkan dengan AS. Perbezaan dalam jangkaan pendapatan antara dua rantau kini ketara, dan penganalisis meramalkan pertumbuhan pada kadar dua angka di zon Euro dan pertumbuhan yang hampir merata di AS.

Dari perspektif pengganda penilaian kami juga melihat lebih banyak potensi peningkatan di Eropah. Dari perspektif makro, pertumbuhan ekonomi di Eropah tentulah disokong oleh harga minyak yang lebih rendah berserta euro yang lemah dan persekitaran kredit yang semakin meningkat. Di Amerika Syarikat, pasaran buruh terus bertambah baik, satu perkara positif, tetapi tekanan pertumbuhan pendapatan akan menguji keupayaan syarikat korporat untuk mengembangkan margin. Dolar AS yang kukuh juga menjadi rintangan kepada keuntungan korporat.

Penilaian Jepun umumnya lazim mahal dan sukar untuk mencari saham dengan dividen yang menarik. Kami lebih memilih syarikat berorientasikan pasaran dalam negeri kerana ia mempunyai nisbah semakan pendapatan yang terbaik pada masa ini.

Dari perspektif sektor, bagi kami, bank menawarkan pulangan terbaik: penilaiannya menarik, kunci kira-kira telah diperkuatkan dan pembayaran semakin meningkat. Sektor ini terdedah dalam negara dan oleh itu kurang terjejas oleh mata wang yang lemah dan keimbangan pemerlahaan-pertumbuhan dalam pasaran memuncul. Di sebalik spektrum, kami berwajaran rendah dalam syarikat yang mempunyai pendapatan yang stabil yang mana penilaian adalah amat tinggi dari perspektif fundamental; khususnya, kami mengelak saham bon proksi seperti hartanah dan utiliti Amerika Syarikat, yang sensitif kepada kenaikan kadar faedah.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Dana yang tertera sebagai ING (L) Invest Global High Dividend Class P – Capitalisation (USD) telah dinamakan semula sebagai NN (L) Global High Dividend Class P – Capitalisation (USD) bermula pada 7th April 2015.

Walaubagaimanapun, tiada perubahan dalam objektif pelaburan dan ciri risiko am.

Pengagihan Sektor pada 30 November 2015 *

AIA ASIAN EQUITY FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 12.89% berbanding tanda aras 12.64%. Sejak pelancaran dalam Julai 2006, Dana telah mencatatkan pulangan tahunan -15.02% berbanding tanda aras 5.78%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

- Saham-H China meningkat pada H1 2015 disebabkan kenaikan dalam bulan April terutamanya selepas pelabur di tanah besar China, terdorong oleh dasar kerajaan, menyebabkan saham-A melambung dengan perdagangan margin.
- Para pelabur ragu tentang keadaan pertumbuhan global disebabkan ketidaktentuan yang menyelubungi kelembapan ekonomi China dan pergolakan dalam banyak pasaran memuncul. Kebimbangan mengenai China juga memberi impak negatif ke atas harga komoditi yang membabitkan syarikat perlombongan. Harga minyak yang rendah terus memberi tekanan ke atas sektor tenaga.
- Fed menangguhkan perlaksanaan kenaikan kadar buat pertama kali sejak 2006 tetapi jangkaan pelancaran berserta tindakan berbeza bank pusat yang lain menyebabkan peningkatan dolar AS yang kukuh.
- Rizab Bank India (RBI) membuat tiga penurunan kadar, dengan mengurangkan Perjanjian Pembelian Semula yang standard dari 8.0% kepada 7.25%. Kerajaan bersetuju untuk memberi RBI mandat undang-undang untuk memerangi inflasi dengan menetapkan sasaran 4%, lebih atau kurang 2%. Bajet India 2015 dilihat sebagai mengalakkan pertumbuhan tetapi agak mengecewakan kerana tiada perubahan yang dibuat kepada subsidi kerajaan.

Pemandu Utama Pasaran

Positif

- ECB memulakan program belian aset €60 bilionnya, satu komitmen untuk membeli aset, termasuk bon berdaulat, pada kadar €60 bilion setiap bulan sebaik-baiknya sampai September 2016. Selepas itu, Presiden ECB Mario Draghi menyatakan bahawa pakej rangsangan tambahan akan diadakan.
- Ekuiti pasaran memuncul memulih dengan kukuh pada bulan Oktober selepas jangkaan kenaikan kadar Fed buat pertama kali ditangguhkan dan langkah-langkah dasar yang menyokong telah diperkenalkan di China.

AIA ASIAN EQUITY FUND (samb)

- Beberapa pengumuman penting dibuat oleh China. Kelulusan diberi bagi penukaran hutang kerajaan tempatan kepada bon, justeru membuka ruang bagi kerajaan tempatan membuat pembiayaan yang lebih murah dalam tempoh yang lebih lama. Keperluan bayaran muka untuk pembeli rumah kali pertama di kawasan bandar telah dipotong daripada 30% kepada 25%. Kerajaan mengumumkan kemansuhan dasar satu anak di China.

Negatif

- Pasaran ekuiti Cina mengalami situasi yang bergolak dan kerajaan telah melaksanakan langkah-langkah untuk menstabilkan pasaran (menyediakan lebih kecairan, menggantungkan tawaran awam [IPO]). Campur tangan ini tidak meyakinkan pelabur kerana prospek ekonomi semakin teruk.
- Dalam satu langkah yang mengejutkan, People's Bank of China menurunkan nilai reminbi pada bulan Ogos. Peristiwa ini menambahkan lagi kebimbangan pelabur mengenai kelembapan ekonomi di China. Ia juga berlaku bersama jualan ekuiti Cina secara besar-besaran berikutan kebimbangan "bencana kewangan".
- Peningkatan hasil pertambahan AS dan kenaikan dolar AS menyebabkan keadaan tidak stabil dalam pasaran berikutnya jangkaan bahawa Fed akan memulakan era yang baharu dengan kenaikan kadar pada bulan Disember.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Pemilihan Saham dalam sektor kewangan dan perindustrian memberi sumbangan yang besar kepada pulangan relatif. Pemilihan saham juga positif dalam sektor tenaga.
- Kami beruntung dengan kedudukan kami di China dan India dan dari pemilihan saham di Taiwan.
- Pemilihan saham dalam syarikat tenaga Korea, SK Innovation membawa prestasi yang positif.

Negatif

- Pilihan saham kami dalam bahan mentah di China terjejas.
- Kedudukan wajaran tinggi dalam sektor tenaga telah menjelaskan prestasi.
- Penyumbang saham yang paling teruk dalam tempoh tersebut ialah Tata Steel, PT Indo Tambangraya Megah dan Posco

AIA ASIAN EQUITY FUND (samb)

Apakah strategi anda bagi masa depan?

Kami yakin namun berwaspada tentang 2016. Walaupun ketidaktentuan ekonomi masih berterusan, banyak risiko telah diambil kira. Kelas aset telah dikadarkan semula untuk empat tahun berturut-turut dan tahap penilaian semakin menyokong. Indeks MSCI Semua Negara Asia kecuali Jepum diniagakan pada nisbah harga kepada buku berhampiran 1.3x, satu tahap yang hanya lebih rendah semasa krisis kewangan global. Kami terus mengelak syarikat yang mempunyai keumpilan kewangan yang tinggi atau pergantungan kepada pertumbuhan ekonomi yang lebih kukuh. Tetapi masih ada beberapa syarikat pertumbuhan struktur yang menarik di Asia dan kelanjutan kelemahan akan memberi peluang pelaburan.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Bermula pada 7th April 2015, dana yang tertera sebagai ING (L) Invest Asia ex Japan High Div Class P – Capitalisation (USD) telah dinamakan semula sebagai NN (L) Asia Ex Japan High Dividend Class P – Capitalisation (USD). Bermula pada 1st Oktober 2015, NN (L) Asia Ex Japan High Dividend Class P – Capitalisation (USD) telah dinamakan semula sebagai NN (L) Asia Income Class P – Capitalisation (USD). Dana tersebut telah mengembangkan aktivitinya untuk menyertakan call option selling untuk menghasilkan pendapatan tambahan untuk dana tersebut bermula pada 1st Oktober 2015.

Walaubagaimanapun, tiada perubahan dalam objektif pelaburan. Dana ini akan terus melabur dalam portfolio saham yang pelbagai dalam ekuiti Asia kecuali Jepun.

Pengagihan Sektor pada 30 November 2015

AIA ELEVEN PLUS FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiscal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 21.4%. Sejak pelancaran dalam Oktober 2007, Dana telah mencatat pulangan tahunan pada kadar 5.69%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

Pemandu Utama Pasaran untuk Ekuiti

Positif

- Korea dan Hong Kong memulih berikutan penurunan kadar di China.
- India juga meraih keuntungan akibat kerangka politik yang lebih kukuh.
- Di Amerika Syarikat, data pekerjaan terus menunjukkan pertumbuhan pekerjaan yang kukuh, yang mencerminkan kekuatan yang berterusan dalam pengambilan dan pengwujudan pekerjaan.

Negatif

- Malaysia, Indonesia dan Negara Thai mengalami kerugian disebabkan penurunan harga komoditi .
- Pasaran ekuiti global turut terjejas dengan harga minyak yang menghampiri paras terendah.
- Kejatuhan nilai renminbi China menyebabkan kejatuhan mata wang Asia kecuali Jepun.

Pemandu Pasaran utama untuk Bon

Positif

- Pasaran Bon mengalami prestasi yang kukuh sekali lagi dalam 1H 2015 didorong oleh permulaan aktiviti percetakan wang oleh European Central Bank di samping jangkaan penangguhan kenaikan kadar faedah Fed
- Berkaitan mata wang, dolar AS bertambah nilai berbanding pasaran memuncul dan mata wang yang berkaitan komoditi.

Negatif

- Ketidaktentuan mengenai Greece memaksa pelabur mengurangkan risiko menyebabkan impak negatif ke atas Dana.
- Pasaran kewangan menerima impak dari tema makro yang berbeza dalam 2H 2015 seperti kelemahan dalam harga komoditi dan juga keimbangan terhadap prospek pertumbuhan di China dan pasaran memuncul.

AIA ELEVEN PLUS FUND (samb)

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

Ekuiti

- Wajaran tinggi dalam sektor teknologi maklumat dan wajaran rendah dalam sektor kewangan membantu menambah nilai portfolio.
- Pemilihan saham yang baik dalam Jarden Corporation dan Allergan.

Pendapatan Tetap

- Prestasi dana bon positif kerana Dana berwajaran tinggi bagi bon yang mempunyai tempoh matang 5-10 tahun.
- Dana melindungi nilai pulangannya dalam dolar AS, yang naik nilai.
- Dana mempunyai sumbangan positif akibat kedudukan berwajaran rendahnya dalam pound British, dolar Kanada, dolar Australia, peso Mexico dan ringgit Malaysia. Sebahagian daripadanya mengimbangi kerugian dari kedudukannya yang berwajaran rendah dalam yen Jepun.

Negatif

Ekuiti

- Berwajaran tinggi dalam pasaran ekuiti ASEAN, yang berprestasi rendah.
- Berwajaran tinggi di Amerika dalam sektor perbelanjaan Asas Pengguna dan Utiliti, yang berprestasi rendah.

Pendapatan Tetap

- Peruntukan aset adalah negatif kerana wajarannya yang tinggi dalam bon korporat, terutamanya dalam kewangan, bahan asas dan kitaran perbelanjaan pengguna, yang berprestasi rendah.

AIA ELEVEN PLUS FUND (samb)

Apakah strategi anda bagi masa depan?

- Tindakan Fed menaikkan kadar masih merupakan halangan bagi ekuiti, tetapi penilaian makro dan penilaian yang menarik dalam banyak pasaran yang terdedah mengurangkan ancaman penurunan yang ketara. Ketidaktentuan ekonomi China merupakan risiko bagi pandangan global jangka terdekat. Walau bagaimanapun, kami terus memantau percepatan pembaharuan struktur, bersama-sama dengan rangsangan berdasarkan permintaan masa terdekat, yang kami jangkakan akan memulihkan ekonomi China.
- Kami menjangkakan kadar akan kekal dalam julat masa kini, tetapi kadar akan terus turun naik dengan curam kerana tindakan/jangkaan bank pusat terus-menerus memacu pasaran.
- Kami berada pada kedudukan untuk dapat memanfaatkan jangkaan peningkatan dalam dolar AS dan lebih memilih bon korporat berbanding bon kerajaan.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Dana ini akan terus berusaha mendapatkan pertumbuhan modal jangka panjang dengan melabur dalam ekuiti permodalan besar dan yang lebih kecil dan pendapatan tetap di pasaran global.

Pengagihan Dana pada 30 November 2015

AIA ASIA PLATINUM FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 21.46% berbanding tanda aras 18.83%. Sejak pelancaran dalam Mei 2006, Dana telah mencatat pulangan tahunan 5.50% berbanding tanda aras 6.62%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

Pemandu Utama Pasaran

Kawasan Besar China

Ekuiti Kawasan Besar China mencatat pulangan yang kukuh dalam 1H 2015 apabila sentimen pasaran mendapat rangsangan akibat jangkaan bahawa dasar pelonggaran dan rangsangan kerajaan China dan juga strategi 'One Belt One Road' akan mengatasi ekonomi yang bergerak perlakan. Walau bagaimanapun, pasaran jatuh secara mendadak pada suku ketiga disebabkan pergolakan dalam pasaran China dan pertumbuhan yang perlakan dalam ekonomi kedua terbesar di dunia telah mengakibatkan jualan global. Pasaran Hong Kong juga jatuh mendadak akibat sentimen lemah terhadap pertumbuhan China. Ekuiti Taiwan jatuh kerana kebimbangan mengenai kelembapan pertumbuhan global dan potensi impaknya ke atas sektor pembuatan teknologinya yang besar.

Jepun

Pasaran ekuiti Jepun mencatatkan pulangan yang kukuh dalam 1H 2015 disebabkan pendapatan korporat yang kukuh. Namun begitu, kelemahan yang berterusan dalam pasaran global menjelaskan pasaran pada 2H 2015. Prestasi Sektor masih kurang stabil tetapi sepanjang tahun lalu yang berakhir pada Nov 2015, peruncitan masih merupakan sektor utama bersama sektor-sektor defensif, farmaseutikal dan makanan, yang mengatasi prestasi dengan ketara. Insurans juga menunjukkan prestasi yang baik. Sebaliknya, besi dan keluli, pengangkutan laut, dan perlombongan menghasilkan pulangan yang benar-benar negatif dan sektor kitaran lain termasuk jentera, peralatan elektrik dan peralatan pengangkutan, amat lembap.

India

Dari perspektif makro, pasaran didominasi oleh inflasi yang meringan dan kadar faedah yang lebih rendah. Walau bagaimanapun, data ekonomi kekal tidak bergerak, manakala pendapatan korporat adalah lemah. Keadaan ini

AIA ASIA PLATINUM FUND (samb)

bersama-sama dengan kemunduran politik yang dialami oleh kerajaan pusat dalam pilihan raya negeri menyebabkan ekuiti India mengakhiri 2015 dalam kawasan negatif. Pulangan kukuh pada awal 2015 telah didorong terutamanya oleh kemerosotan harga tenaga, bersama-sama harapan yang tinggi untuk pro-pembaharuan dan kebangkitan semula ekonomi Amerika Syarikat, dan harapan RBI akan menurunkan lagi kadar faedah. Sektor kitaran domestik seperti kewangan dan perindustrian melonjak kerana ekonomi negara terus mengumpul momentum. Walau bagaimanapun, ekuiti India mengalami kelemahan seterusnya dan keuntungan mengurang disebabkan pendapatan korporat yang mengecewakan, serta kesan hujan yang tidak mencukupi menjelaskan pendapatan ladang dan mengurangkan permintaan luar bandar dan semuanya mempengaruhi sentimen pelabur.

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Kedudukan wajaran tinggi di Jepun dan India telah menyumbang secara positif kepada prestasi Dana yang mengatasi tanda aras bagi tempoh yang diulas.
- Kedudukan wajaran rendah dalam Pasaran Memuncul China menyumbang secara positif kerana prestasi dana di bawah tanda aras.

Negatif

- Kedudukan wajaran rendah di China merendahkan prestasi beberapa sektor apabila dana China mengatasi tanda aras untuk tempoh yang diulas

Apakah strategi anda bagi masa depan?

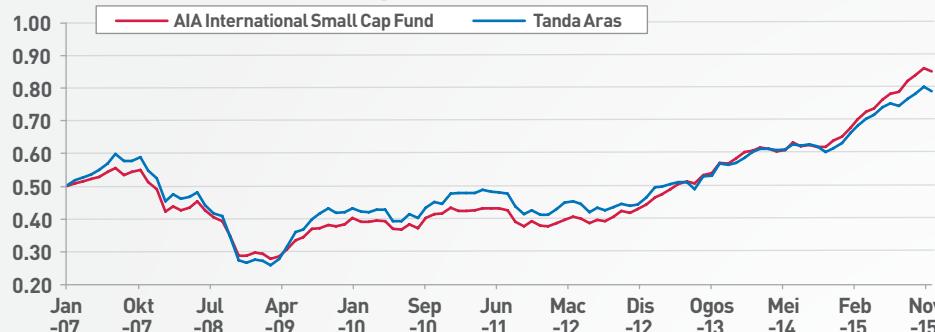

Kami akan terus mewajarkan Jepun secara tinggi, dan mewajarkan Pasaran Memuncul secara rendah. Kami percaya Jepun akan terus mengatasi prestasi kerana kecairan daripada rangsangan agresif akan menyokong pasaran saham manakala harga komoditi yang rendah dan ketidaktentuan mata wang di Pasaran Memuncul akan menolak prestasi ke bawah.

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tiada sebarang perubahan akan berlaku dalam objektif pelaburan dan ciri risiko Dana.

Pengagihan Sektor pada November 2015

AIA INTERNATIONAL SMALL CAP FUND (samb)

Bagaimana prestasi Dana semasa tempoh tersebut?

Bagi tahun fiskal berakhir 30 November 2015, pada asas bersih, Dana memberi pulangan 33.12% berbanding tanda aras 28.11%. Sejak pelancaran pada Januari 2007, Dana telah mencatat pulangan tahunan 6.19% berbanding tanda aras 5.31%.

Apakah keadaan ekonomi, peristiwa atau Pasaran kewangan yang memberi kesan kepada Dana?

Pemandu Utama Pasaran

Positif

- Sentimen pelabur yang bertambah baik akibat pelonggaran kuantitatif (QE) oleh European Central Bank (ECB) dan tanda-tanda awal peningkatan ekonomi Eropah.
- Pembelian bersih yang berterusan oleh penaja pencen awam domestik, iaitu Bank of Japan, dan pembelian balik saham oleh syarikat korporat membantu meningkatkan ekuiti Jepun.
- Dalam 1H 2015, dasar pelonggaran China dan langkah-langkah untuk meliberalisasikan pasaran kewangan mendorong pasaran saham ke tahap tertinggi dalam tujuh tahun. Pasaran Korea Selatan melonjak berikutan penurunan kadar yang tidak dijangka pada bulan Mac, manakala ekuiti India mendapat keuntungan akibat rangka kerja politik yang lebih baik.

Negatif

- Di Eropah, indeks ekuiti European Smaller Companies di bawah prestasi secara sederhana kerana kebimbangan tentang pertumbuhan global dan keputusan Fed untuk tidak menaikkan kadar faedah.
- Di Jepun, pengelakan risiko lebih awal daripada kenaikan kadar AS dan pembetulan pasaran China mencetuskan pembetulan dalam pasaran global. Krisis Greece dan skandal Volkswagen turut memberi kesan terhadap sentimen pasaran.
- Pasaran Korea Selatan lemah menjelang akhir 1H 2015 berikutan kebimbangan tentang pemerebakan Sindrom Middle East Respiratory Syndrome atau virus MERS. Ekuiti India juga melemah berikutan berita bahawa dasar kerajaan akan bertukar menjadi agresif.
- Asia kecuali Jepun mengalami penurunan prestasi akibat kejatuhan nilai mata wang, terutamanya mata wang ASEAN. Semua pasaran Asia kecuali Jepun mencatatkan pulangan negatif. Angka makroekonomi China yang lemah dan penyusutan nilai renminbi menyebabkan pasaran ekuitinya menunjukkan prestasi yang paling teruk di rantau ini.

AIA INTERNATIONAL SMALL CAP FUND (samb)

Apakah pelaburan yang mempengaruhi prestasi Dana sepanjang tahun?

Positif

- Sumbangan terkuat ke atas prestasi datang daripada kedudukan beberapa jaran rendah kami dalam sektor industri, bahan mentah dan tenaga.
- Sumbangan tiga saham individu utama datang dari AMS (Austrian Semiconductor Manufacturer), Bras Monier Building Group (pengilang jubin bumbung) dan Societa Iniziative Autostradali e Servizi (pengendali tol jalan Itali).
- Di Jepun, pemilihan sektor adalah positif apabila REIT menurun sebanyak 0.7%, iaitu sektor yang kami memberikan wajaran rendah.

Negatif

- Kedudukan berwajaran tinggi kami dalam saham pertumbuhan mikro-modal dan pemilihan saham yang negatif dalam sektor elektronik dan yang berkaitan pembinaan menjelaskan prestasi.
- Di Jepun, kedudukan berwajaran tinggi kami dalam saham kitaran global dan pemilihan sahamnya merupakan penyumbang negatif yang terbesar.

Apakah strategi anda bagi masa depan?

- Keseluruhan pasaran masih bergolak. Ketika ketidakstabilan meningkat, nilai beberapa syarikat dan sektor yang berkualiti telah naik. Pasukan kami akan terus memberi tumpuan kepada syarikat yang mempunyai pengurusan yang mantap, beserta fundamental yang kukuh dan penilaian yang menarik.
- Tindakan bank pusat dan pertumbuhan global adalah antara isu-isu yang melanda pasaran global sekarang. Dengan data ekonomi di Eropah meningkat perlahan dan sokongan bank pusat yang kekal kuat, prospek adalah menarik. Pasukan kami percaya Dana mempunyai kedudukan yang baik untuk memanfaatkan trend yang bertambah baik.
- Pasukan kami bertindak bulis terhadap pasaran disebabkan perubahan struktur syarikat Jepun dalam jangka masa panjang. Dari segi penilaian, nisbah harga kepada pendapatan (PER) adalah munasabah pada 16x bagi tahun kewangan 2016. Pada masa yang sama, pertumbuhan pendapatan keseluruhan kekal statik, terutamanya dalam kalangan pemain tempatan. Sebaik sahaja ketidaktentuan berkaitan dasar kewangan menghilang, kami menjangka bahawa kecenderungan mengambil risiko akan turut kembali.

AIA INTERNATIONAL SMALL CAP FUND (samb)

Adakah sebarang perubahan dalam objektif pelaburan atau ciri risiko Dana?

Tanda aras Dana akan ditukarkan dari 30% HSBC Smaller Europe (Inc UK)+ 30% TSE 2nd section TR + 40% S&P Seluruh Asia kecuali Jepun dibawah indeks U\$1.5bil kepada 30% HSBC Smaller Europe (Inc UK)+ 30% TSE 2nd section TR + 40% MSCI Asia Pasifik kecuali Cap Kecilan Jepun USD indeks bermula 31 Dec 2015.

Walaubagaimanapun, tiada perubahan dalam objektif pelaburan dan ciri risiko am.

(hereinafter referred to collectively as "the Funds")

REPORT ON THE FINANCIAL INFORMATION

We have audited the financial information of the Funds, which comprise the statement of assets and liabilities as at 30 November 2015, the statement of income and expenditure, the statement of changes in net asset value of the Funds for the financial year then ended, and a summary of significant accounting policies and other explanatory notes, as set out on pages 150 to 290.

Managers' Responsibility for the Financial Information

The Directors of AIA Bhd. ("the Manager") are responsible for the preparation of financial information in accordance with the accounting policies prescribed in Note 3 to the financial information and the Guidelines on Investment-linked Insurance/Takaful Business issued by Bank Negara Malaysia ("BNM") and for such internal control as the Manager determine are necessary to enable the preparation of financial information that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial information based on our audit. We conducted our audit in accordance with Approved Standards on Auditing in Malaysia. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

INDEPENDENT AUDITORS' REPORT (cont'd)

Auditors' Responsibility (cont'd)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial information. The procedures selected depend on our judgment, including the assessment of risks of material misstatement of the financial information, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Manager's preparation of the financial information in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Manager's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Manager, as well as evaluating the overall presentation of the financial information.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial information of the Funds have been properly prepared in accordance with the accounting policies prescribed in Note to the financial information and the Guidelines on Investment-linked Insurance/Takaful Business issued by BNM.

OTHER MATTERS

This report is made solely to the policyholders of the Funds, as a body in accordance with Guidelines on Investment-linked Insurance/Takaful Business issued by BNM and for no other purpose. We do not assume responsibility to any other person for the content of this report.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015

1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION

The principal activity of the AIA Bhd.'s AIA Fixed Income Fund, AIA Equity Dividend Fund, AIA Global Bond Fund, AIA Global Bond Fund 1, AIA Global Bond Fund 2, AIA Global Bond Fund 3, AIA Global Bond Fund 4, AIA Global Bond Fund 5, AIA Global Bond Fund 6, AIA Global Bond Fund 7, AIA Global Bond Fund 8, AIA Balanced Fund, AIA Equity Plus Fund, AIA Asian Debt Fund, AIA Asian Equity Fund, AIA International High Dividend Fund, AIA Dana Progresif, AIA Medium Cap Fund, AIA Aggressive Fund, AIA Dana Dinamik, AIA New Horizon Fund, AIA Asia Platinum Fund, AIA International Small Cap Fund, AIA Eleven Plus Fund, AIA Dana Bon, AIA Asia Opportunity Fund, PB Income Plus Fund and PB Income Plus 2 Fund which are distributed under agent and bancassurance distribution channel, (hereinafter referred to collectively as "the Funds") is to invest in authorised investments.

The objective of the AIA Fixed Income Fund is to provide a stable income through investments in fixed income securities and money market instruments in Malaysia.

The objective of the AIA Equity Dividend Fund is to provide steady capital growth and income by investing mainly in a portfolio of stocks listed on the Bursa Malaysia which offer or have the potential to offer attractive dividend yields.

The objective of the AIA Global Bond Fund series is to maximize total investment return consisting of a combination of interest income, capital appreciation and currency gains by investing principally in a portfolio of fixed or floating rate debt securities and debt obligations issued by government or government-related issuers worldwide.

The objective of the AIA Balanced Fund is to maximize total returns with reasonable safety on principal by investing in diversified portfolio of stocks, bonds and money market instruments.

The objective of the AIA Equity Plus Fund is to maximize medium to long-term growth of capital and income by investing in well managed large cap companies that are believed to offer above average growth potential.

The objective of the AIA Asian Debt Fund is to provide steady income stream and potential for capital growth through actively managed and diversified bonds of Asian issuers which includes governments and corporations from Asia.

The objective of the AIA Asian Equity Fund is to provide capital growth over long term instruments which include portfolio of stocks and transferable securities in Asian equity markets for investors who are willing to take high risk in order to achieve attractive capital gains.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION (CONT'D)

The objective of the AIA International High Dividend Fund is to provide capital growth with supported stable income over long-term through investing in global stocks and transferable securities for aggressive investors to achieve attractive capital gains and stable income stream.

The objective of the AIA Dana Progresif is to maximize medium to long term capital appreciation by investing in equity and equity-related securities listed on Bursa Malaysia and Islamic debt securities which are strictly in compliance with Syariah principles.

The objective of the AIA Medium Cap Fund is to achieve medium to long-term capital growth. Greater emphasis is placed on investing in mid-size companies with reasonably good earnings growth prospect on the medium term horizon.

The objective of the AIA Aggressive Fund is to achieve medium to long-term capital growth. It is slanted towards investment listed on Bursa Malaysia, that are traded below their Initial Public Offer price.

The objective of the AIA Dana Dinamik is to achieve consistent capital growth over the medium term to long term horizon through investment in permissible stocks in accordance with the application of Syariah principles and regulatory policies.

The objective of the AIA New Horizon Fund is to achieve medium to long term capital appreciation by investing in equity and equity-related securities listed on Bursa Malaysia and global markets permissible by the prevailing Bank Negara Malaysia regulations.

The objective of the AIA Asia Platinum Fund is to achieve long term capital growth by investing in equity and equity related securities of companies in three regional markets, ie. Greater China (which consists of People's Republic of China, Hong Kong and Taiwan), India and Japan. From time to time, it may invest in global emerging markets' securities in times of adverse investment climate in any of the above three regional markets. The investment in global emerging markets will be allocated across markets which include but are not limited to markets located in Central & Eastern Europe, South East Asia, Latin America and Africa.

The objective of the AIA International Small Cap Fund is to seek to achieve long term capital growth by investing in equity and equity-related investments in small to medium sized companies whose assets, products or operations are in Europe, Southeast Asia and Japan.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION (CONT'D)

The objective of the AIA Eleven Plus Fund is to achieve long term capital growth by investing in the large and smaller capitalization equities and fixed income in US, Europe, Japan, Asia Pacific and emerging markets. The investment in emerging markets will be investing in a wide spectrum of underlying funds including but not limited to markets located in Central & Eastern Europe, South East Asia, Latin America and Africa, with the flexibility to continue investing in newer funds as may be launched in the future. The Fund adopts a relatively balanced approach towards equities and bond exposure with the aim of achieving capital growth with lower volatility.

The objective of the AIA Dana Bon is to provide medium to long-term capital appreciation by investing in selected sukuks (Islamic equivalent of bonds) and Islamic money market instruments in Malaysia.

The objective of the AIA Asia Opportunity Fund is to provide capital appreciation over the medium to long term by investing primarily in equities and equities related instruments in the Asian region excluding Japan.

The objective of the PB Income Plus Fund series is to maximize total returns with reasonable safety of principal and is suitable for investors who are willing to take moderate risk in order to achieve a reasonable return.

The Manager

The Manager of the Funds is AIA Bhd. ("AIAB"), a company incorporated in Malaysia. AIAB is engaged principally in the underwriting of life insurance business, including investment-linked business, and all classes of general insurance business.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

2. BASIS OF PREPARATION

The financial information of the Funds have been prepared in accordance with the accounting policies as described in Note 3 to the financial information and Guidelines on Investment-linked Insurance/Takaful Business issued by Bank Negara Malaysia ("BNM").

The financial information have been prepared under the historical cost convention except as disclosed in the significant accounting policies in Note 3 to the financial information.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Investments

(i) Fair value through profit or loss financial assets

The Funds designate their financial assets in the investment portfolio at fair value through profit or loss ("FVTPL") at inception as they are managed and evaluated on a fair value basis, in accordance with the respective investment strategy and mandate.

Financial assets classified as FVTPL are initially recorded at fair value. Subsequent to initial recognition, the financial assets are remeasured at fair values with fair value adjustments and realised gains and losses recognised in Statement of Income and Expenditure.

(ii) Fair value of financial assets

The fair values of Malaysian Government Securities, Malaysian Government Loan, Government Investment Issues, unquoted corporate securities and fixed and call deposits are based on indicative fair market prices/indices by reference to the quotations provided by financial institutions and brokers.

The fair values of quoted securities are based on current active market prices. If the market for a financial asset is not active, the Funds establish fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and option pricing models.

Cash and cash equivalents with licensed financial institutions are stated at approximately their carrying amount as at the date of Statement of Assets and Liabilities.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(b) Income recognition

Profit/interest income is recognised on a time proportion basis that takes into account the effective yield of the assets.

Dividends from Malaysian quoted securities are recognised on the ex-dividend date.

Realized gains and losses on sale of investments are arrived at after accounting for cost of investments determined on the first-in-first-out method.

(c) Foreign currencies

(i) Functional and presentation currency

The financial information are presented in Ringgit Malaysia (RM), which is the Funds functional and presentation currency.

(ii) Foreign currency transactions

At each date of Statement of Assets and Liabilities, monetary items denominated in foreign currencies are translated at the rates prevailing on the date of Statement of Assets and Liabilities. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences arising on the settlement of monetary items and on the translation of monetary items are taken to the Statement of Income and Expenditure.

(d) Net creation of units

Net creation of units represents premiums paid by policyholders as payment for a new contract or subsequent payments to increase the amount of that contract less switching within funds. Net creation of units is recognised on a receipt basis.

(e) Net cancellation of units

Net cancellation of units represents cancellation of units arising from surrenders and withdrawals. Net cancellation of units is recognised upon notification by unitholders.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(f) Cash and cash equivalents

Cash and cash equivalents consist of cash and bank balances, excluding fixed deposits/money market, which are subject to an insignificant risk of changes in value.

(g) Income tax

Income tax on the profit and loss for the financial period comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the financial period and is measured using the tax rates that have been enacted at the date of Statement of Assets and Liabilities.

Deferred tax is provided for, using the liability method, on temporary differences at the date of Statement of Assets and Liabilities between the tax bases of assets and liabilities and their carrying amounts in the financial information. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the financial period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the date of Statement of Assets and Liabilities. Deferred tax is recognised in the Statement of Income and Expenditure.

(h) Comparatives

The comparative figures for Statement of Income and Expenditure and Statement of Changes in Net Asset Value for AIA Fixed Income Fund, AIA Equity Dividend Fund, AIA Global Bond Fund, AIA Global Bond Fund 1, AIA Global Bond Fund 2, AIA Global Bond Fund 3, AIA Global Bond Fund 4, AIA Global Bond Fund 5, AIA Global Bond Fund 6, AIA Global Bond Fund 7, AIA Global Bond Fund 8, AIA Balanced Fund, AIA Equity Plus Fund, AIA Asian Debt Fund, AIA Asian Equity Fund, AIA International High Dividend Fund, AIA Dana Progresif Fund, AIA Medium Cap Fund, AIA Aggressive Fund, AIA Dana Dinamik, AIA New Horizon Fund, AIA Asia Platinum Fund, AIA International Small Cap Fund, AIA Eleven Plus Fund, AIA Dana Bon and AIA Asia Opportunity Fund are for the financial period of 12 months to 30 November 2014.

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(h) Comparatives (cont'd)

NOTES TO THE FINANCIAL INFORMATION – 30 NOVEMBER 2015 (cont'd)

4. INCOME DISTRIBUTION (CONT'D)

The income distribution to policyholders of PB Income Plus Fund Series is a fixed payout of 5 sen per unit per annum for Policy Year 1 to 5, which are distributed semi-annually at 2.5 sen per unit. No coupon shall be paid if the NAV per unit is RM 0.70 or lower. Fixed payout will resume when the NAV per unit increases above RM 0.70.

The NAV per unit prior and subsequent to the distributions are as follows:

	2015	
	Cum-Distribution RM	Ex-Distribution RM
PB Income Plus Fund (18 December 2014)	0.877	0.852
PB Income Plus Fund (18 June 2015)	0.898	0.873
PB Income Plus 2 Fund (17 March 2015)	0.947	0.922
PB Income Plus 2 Fund (17 September 2015)	0.898	0.873

Units in circulation, distribution per unit and total distribution as at date of distribution:

	Units in circulation	Distribution per unit sen	Total Distribution RM
--	----------------------	---------------------------	-----------------------
